Dear Permit Holder:

A draft of the Ohio Administrative Code (OAC) Chapter 3745-31 Air Pollution Permit-to-Install and Operate (PTIO) for the referenced facility has been issued for the emissions unit(s) listed in the Authorization section of the enclosed draft permit. This draft action is not an authorization to begin construction or modification of your emissions unit(s). The purpose of this draft is to solicit public comments on the permit. A public notice will appear in the Ohio EPA Weekly Review and the local newspaper, Troy Daily News. A copy of the public notice and the draft permit are enclosed. This permit can be accessed electronically on the Division of Air Pollution Control (DAPC) Web page, www.epa.ohio.gov/dapc by clicking the "Issued Air Pollution Control Permits" link. Comments will be accepted as a marked-up copy of the draft permit or in narrative format. Any comments must be sent to the following:

Andrew Hall
Permit Review/Development Section
Ohio EPA, DAPC
122 South Front Street
Columbus, Ohio 43215

and Regional Air Pollution Control Agency
117 South Main Street
Dayton, OH 45422-1280

Comments and/or a request for a public hearing will be accepted within 30 days of the date the notice is published in the newspaper. You will be notified in writing if a public hearing is scheduled. A decision on issuing a final permit-to-install will be made after consideration of comments received and oral testimony if a public hearing is conducted. Any permit fee that will be due upon issuance of a final Permit-to-Install is indicated in the Authorization section. Please do not submit any payment now. If you have any questions, please contact Regional Air Pollution Control Agency at (937)225-4435.

Sincerely,

Michael W. Ahern, Manager
Permit Issuance and Data Management Section, DAPC

Permit Strategy Write-Up

1. Check all that apply:

[x] Synthetic Minor Determination

[] Netting Determination

2. Source Description:

Polysource is an Expandable Polystyrene (EPS) expansion and molding facility. The facility primarily manufactures helmets for bicycles using EPS beads. The facility manufactures the black EPS material and purchases the white and grey EPS material from a supplier. The process consists of four stages, pre-expanding, aging, molding and warehouse storage. The facility consists of twenty one (21) permitted emissions units, two pre-expanding machines, one aging bag process, 17 molding machines and a warehouse.

3. Facility Emissions and Attainment Status:

The facility is located in the City of Piqua (Miami County is designated as attainment for all criteria pollutants including ozone). Without any federally enforceable restrictions the facility is a major source for Organic Compound (OC). The potential to emit calculations were based upon the maximum process capacities and a maximum operating scenario of 8760 hours per year. The potential OC emissions is 236.74 tons per year, so the facility would be considered a major source subject to Title V permitting requirements.

4. Source Emissions:

The potential OC emissions from this facility without any federally enforceable restriction is greater than 100 tons OC/yr. The facility can easily limit the potential OC emissions below 100 tons per year and therefore avoid TV permitting requirements. The permittee is proposing to accept federally enforceable restrictions on the annual EPS material throughput and the OC content of the EPS material.

5. Conclusion:

Polysource Inc. is an existing synthetic minor facility by limiting the annual throughput of EPS material and the OC content of the EPS material effectively restricting the PTE for OC to below the Title V permitting threshold level. Monthly monitoring, record keeping and quarterly deviation reporting will be required to monitor compliance.

6. Please provide additional notes or comments as necessary:

None

7. Total Permit Allowable Emissions Summary (for informational purposes only):

Table with 2 columns: Pollutant, Tons Per Year. Row 1: OC, 74.9

PUBLIC NOTICE
Issuance of Draft Air Pollution Permit-To-Install and Operate
POLYSOURCE INC

Issue Date: 12/15/2010

Permit Number: P0107014

Permit Type: Administrative Modification

Permit Description: Admin. mod initiated by permittee to revise the production limitation and emission factors

Facility ID: 0855100531

Facility Location: POLYSOURCE INC
555 E STATLER RD,
Piqua, OH 45356

Facility Description: Plastics Material and Resin Manufacturing

Chris Korleski, Director of the Ohio Environmental Protection Agency, 50 West Town Street, Columbus Ohio has issued a draft action of an air pollution control, federally enforceable permit-to-install and operate (PTIO) for the facility at the location identified above on the date indicated. Comments concerning this draft action, or a request for a public meeting, must be sent in writing no later than thirty (30) days from the date this notice is published. All comments, questions, requests for permit applications or other pertinent documentation, and correspondence concerning this action must be directed to Carlos Lynch at Regional Air Pollution Control Agency, 117 South Main Street, Dayton, OH 45422-1280 or (937)225-4435. The permit can be downloaded from the Web page: www.epa.ohio.gov/dapc

This document constitutes issuance to:

POLYSOURCE INC
555 E STATLER RD
Piqua, OH 45356

of a Permit-to-Install and Operate for the emissions unit(s) identified on the following page.

Ohio EPA District Office or local air agency responsible for processing and administering your permit:

Regional Air Pollution Control Agency
117 South Main Street
Dayton, OH 45422-1280
(937)225-4435

The above named entity is hereby granted this Permit-to-Install and Operate for the air contaminant source(s) (emissions unit(s)) listed in this section pursuant to Chapter 3745-31 of the Ohio Administrative Code. Issuance of this permit does not constitute expressed or implied approval or agreement that, if constructed or modified in accordance with the plans included in the application, the described emissions unit(s) will operate in compliance with applicable State and Federal laws and regulations.

This permit is granted subject to the conditions attached hereto.

Ohio Environmental Protection Agency

Chris Korleski
Director

Authorization (continued)

Permit Number: P0107014

Permit Description: Admin. mod initiated by permittee to revise the production limitation and emission factors

Permits for the following Emissions Unit(s) or groups of Emissions Units are in this document as indicated below:

Group Name: EPS Molding Machines

Emissions Unit ID:	P017
Company Equipment ID:	expandable polystyrene(EPS)
Superseded Permit Number:	P0106491
General Permit Category and Type:	Not Applicable
Emissions Unit ID:	P018
Company Equipment ID:	expandable polystyrene(EPS)

Emissions Unit ID:	P021
Company Equipment ID:	expandable polystyrene(EPS)
Superseded Permit Number:	P0106491
General Permit Category and Type:	Not Applicable

A. Standard Terms and Conditions

1. What does this permit-to-install and operate ("PTIO") allow me to do?

This permit allows you to install and operate the emissions unit(s) identified in this PTIO. You must install and operate the unit(s) in accordance with the application you submitted and all the terms and conditions contained in this PTIO, including emission limits and those terms that ensure compliance with the emission limits (for example, operating, recordkeeping and monitoring requirements).

2. Who is responsible for complying with this permit?

The person identified on the "Authorization" page, above, is responsible for complying with this permit until the permit is revoked, terminated, or transferred. "Person" means a person, firm, corporation, association, or partnership. The words "you," "your," or "permittee" refer to the "person" identified on the "Authorization" page above. The permit applies only to the emissions unit(s) identified in the permit. If you install or modify any other equipment that requires an air permit, you must apply for an additional PTIO(s) for these sources.

3. What records must I keep under this permit?

You must keep all records required by this permit, including monitoring data, test results, strip-chart recordings, calibration data, maintenance records, and any other record required by this permit for five years from the date the record was created. You can keep these records electronically, provided they can be made available to Ohio EPA during an inspection at the facility. Failure to make requested records available to Ohio EPA upon request is a violation of this permit requirement.

4. What are my permit fees and when do I pay them?

There are two fees associated with permitted air contaminant sources in Ohio:

- PTIO fee. This one-time fee is based on a fee schedule in accordance with Ohio Revised Code (ORC) section 3745.11, or based on a time and materials charge for permit application review and permit processing if required by the Director.

You will be sent an invoice for this fee after you receive this PTIO and payment is due within 30 days of the invoice date. You are required to pay the fee for this PTIO even if you do not install or modify your operations as authorized by this permit.

- Annual emissions fee. Ohio EPA will assess a separate fee based on the total annual emissions from your facility. You self-report your emissions in accordance with Ohio Administrative Code (OAC) Chapter 3745-78. This fee assessed is based on a fee schedule in ORC section 3745.11 and funds Ohio EPA's permit compliance oversight activities. Unless otherwise specified, facilities subject to one or more synthetic minor restrictions must use Ohio EPA's "Air Services" to submit annual emissions associated with this permit requirement. Ohio EPA will notify you when it is time to report your emissions and to pay your annual emission fees.

5. When does my PTIO expire, and when do I need to submit my renewal application?

This permit expires on the date identified at the beginning of this permit document (see "Authorization" page above) and you must submit a renewal application to renew the permit. Ohio EPA will send a renewal notice to you approximately six months prior to the expiration date of this permit. However, it is very important that you submit a complete renewal permit application (postmarked prior to expiration of this permit) even if you do not receive the renewal notice. If a complete renewal application is submitted before the expiration date, Ohio EPA considers this a timely application for purposes of ORC section 119.06, and you are authorized to continue operating the emissions unit(s) covered by this permit beyond the expiration date of this permit until final action is taken by Ohio EPA on the renewal application.

6. What happens to this permit if my project is delayed or I do not install or modify my source?

This PTIO expires 18 months after the issue date identified on the "Authorization" page above unless otherwise specified if you have not (1) started constructing the new or modified emission sources identified in this permit, or (2) entered into a binding contract to undertake such construction. This deadline can be extended by up to 12 months, provided you apply to Ohio EPA for this extension within a reasonable time before the 18-month period has ended and you can show good cause for any such extension.

7. What reports must I submit under this permit?

An annual permit evaluation report (PER) is required in addition to any malfunction reporting required by OAC rule 3745-15-06 or other specific rule-based reporting requirement identified in this permit. Your PER due date is identified in the Authorization section of this permit.

8. If I am required to obtain a Title V operating permit in the future, what happens to the operating provisions and PER obligations under this permit?

If you are required to obtain a Title V permit under OAC Chapter 3745-77 in the future, the permit-to-operate portion of this permit will be superseded by the issued Title V permit. From the effective date of the Title V permit forward, this PTIO will effectively become a PTI (permit-to-install) in accordance with OAC rule 3745-31-02(B). The following terms and conditions will no longer be applicable after issuance of the Title V permit: Section B, Term 1.b) and Section C, for each emissions unit, Term a)(2). The PER requirements in this permit remain effective until the date the Title V permit is issued and is effective, and cease to apply after the effective date of the Title V permit. The final PER obligation will cover operations up to the effective date of the Title V permit and must be submitted on or before the submission deadline identified in this permit on the last day prior to the effective date of the Title V permit.

9. What are my obligations when I perform scheduled maintenance on air pollution control equipment?

You must perform scheduled maintenance of air pollution control equipment in accordance with OAC rule 3745-15-06(A). If scheduled maintenance requires shutting down or bypassing any air pollution control equipment, you must also shut down the emissions unit(s) served by the air pollution control equipment during maintenance, unless the conditions of OAC rule 3745-15-06(A)(3) are met. Any emissions that exceed permitted amount(s) under this permit (unless specifically exempted by rule) must be reported as deviations in the annual permit evaluation report (PER), including nonexempt excess emissions that occur during approved scheduled maintenance.

10. Do I have to report malfunctions of emissions units or air pollution control equipment? If so, how must I report?

If you have a reportable malfunction of any emissions unit(s) or any associated air pollution control system, you must report this to the Regional Air Pollution Control Agency in accordance with OAC rule 3745-15-06(B). Malfunctions that must be reported are those that result in emissions that exceed permitted emission levels. It is your responsibility to evaluate control equipment breakdowns and operational upsets to determine if a reportable malfunction has occurred. If you have a malfunction, but determine that it is not a reportable malfunction under OAC rule 3745-15-06(B), it is recommended that you maintain records associated with control equipment breakdown or process upsets. Although it is not a requirement of this permit, Ohio EPA recommends that you maintain records for non-reportable malfunctions.

11. Can Ohio EPA or my local air agency inspect the facility where the emission unit(s) is/are located?

Yes. Under Ohio law, the Director or his authorized representative may inspect the facility, conduct tests, examine records or reports to determine compliance with air pollution laws and regulations and the terms and conditions of this permit. You must provide, within a reasonable time, any information Ohio EPA requests either verbally or in writing.

12. What happens if one or more emissions units operated under this permit is/are shut down permanently?

Ohio EPA can terminate the permit terms associated with any permanently shut down emissions unit. "Shut down" means the emissions unit has been physically removed from service or has been altered in such a way that it can no longer operate without a subsequent "modification" or "installation" as defined in OAC Chapter 3745-31. You should notify Ohio EPA of any emissions unit that is permanently shut down by submitting¹ a certification that identifies the date on which the emissions unit was permanently shut down. The certification must be submitted by an authorized official from the facility. You cannot continue to operate an emissions unit once the certification has been submitted to Ohio EPA by the authorized official. You must comply with all recordkeeping and reporting for any permanently shut down emissions unit in accordance with the provisions of the permit, regulations or laws that were enforceable during the period of operation, such as the requirement to submit a PER, air fee emission report, or malfunction report. You must also keep all records relating to any permanently shutdown emissions unit, generated while the emissions unit was in operation, for at least five years

¹ Permittees that use Ohio EPA's "Air Services" can mark the affected emissions unit(s) as "permanently shutdown" in the facility profile along with the date the emissions unit(s) was permanently removed and/or disabled. Submitting the facility profile update will constitute notifying of the permanent shutdown of the affected emissions unit(s).

from the date the record was generated. Again, you cannot resume operation of any emissions unit certified by the authorized official as being permanently shut down without first applying for and obtaining a permit pursuant to OAC Chapter 3745-31.

13. Can I transfer this permit to a new owner or operator?

You can transfer this permit to a new owner or operator. If you transfer the permit, you must follow the procedures in OAC Chapter 3745-31, including notifying Ohio EPA or the local air agency of the change in ownership or operator. Any transferee of this permit must assume the responsibilities of the transferor permit holder.

14. Does compliance with this permit constitute compliance with OAC rule 3745-15-07, "air pollution nuisance"?

This permit and OAC rule 3745-15-07 prohibit operation of the air contaminant source(s) regulated under this permit in a manner that causes a nuisance. Ohio EPA can require additional controls or modification of the requirements of this permit through enforcement orders or judicial enforcement action if, upon investigation, Ohio EPA determines existing operations are causing a nuisance.

15. What happens if a portion of this permit is determined to be invalid?

If a portion of this permit is determined to be invalid, the remainder of the terms and conditions remain valid and enforceable. The exception is where the enforceability of terms and conditions are dependent on the term or condition that was declared invalid.

B. Facility-Wide Terms and Conditions

Draft Permit-to-Install and Operate

POLYSOURCE INC

Permit Number: P0107014

Facility ID: 0855100531

Effective Date: To be entered upon final issuance

1. This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).
 - a) For the purpose of a permit-to-install document, the facility-wide terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.
 - (1) None.
 - b) For the purpose of a permit-to-operate document, the facility-wide terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.
 - (1) None.

C. Emissions Unit Terms and Conditions

1. Emissions Unit Group - EPS Molding Machines: P017, P018, P019, P020, P021,

EU ID	Operations, Property and/or Equipment Description
P017	Expandable Polystyrene (EPS) molding machine
P018	Expandable Polystyrene (EPS) molding machine
P019	Expandable Polystyrene (EPS) molding machine
P020	Expandable Polystyrene (EPS) molding machine
P021	Expandable Polystyrene (EPS) molding machine

a) This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).

(1) For the purpose of a permit-to-install document, the emissions unit terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.

a. None.

(2) For the purpose of a permit-to-operate document, the emissions unit terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.

a. b)(1)c., b)(2)d., b)(2)e., c)(1), c)(2), d)(1), d)(2), e)(1), and f)(1)c.

b) Applicable Emissions Limitations and/or Control Requirements

(1) The specific operation(s), property, and/or equipment that constitute each emissions unit along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures are identified below. Emissions from each unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

	Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures
a.	OAC rule 3745-31-05(A)(3), as effective 11/30/01.	The Organic Compound (OC) emissions from this emissions unit shall not exceed 0.86 lb/hr and 3.77 tons/yr. See b)(2)a. The requirements established pursuant to this rule also include the requirement of OAC rules 3745-31-05(D).
b.	OAC rule 3745-31-05(A)(3)(a)(ii), as effective 12/01/06.	See b)(2)b.
c.	OAC rule 3745-31-05(D) (Synthetic minor to avoid Title V)	The emissions of OC from P001, P002, P003, P004, P005, P006, P007, P008, P009, P010, P011, P012, P013, P014, P015, P016 [P0107003], P017, P018, P019, P020 and P021 [P0107014]

	Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures
		combined shall not exceed 74.9 tons per year, based upon a rolling, 12-month summation of the monthly emissions.

(2) Additional Terms and Conditions

a. The permittee has satisfied the Best Available Technology (BAT) requirements pursuant to OAC paragraph 3745-31-05(A)(3), as effective November 30, 2001, in this permit. On December 1, 2006, paragraph (A)(3) of OAC rule 3745-31-05 was revised to conform to ORC changes effective August 3, 2006 (S.B. 265 changes), such that BAT is no longer required by State regulations for NAAQS pollutants less than ten tons per year. However, that rule revision has not been yet approved by U.S. EPA as a revision to Ohio's State Implementation Plan (SIP). Therefore, until the SIP revision occurs and the U.S. EPA approves the revisions to OAC rule 3745-31-05, the requirement to satisfy BAT will exist as part of the federally-approved SIP for Ohio. Once U.S. EPA approves the December 1, 2006 version of 3745-31-05, then these emission limits/control measures no longer apply.

b. This rule paragraph applies once U.S. EPA approves the December 1, 2006 version of OAC rule 3745-31-05 as part of the State Implementation Plan.

The Best Available Technology (BAT) requirements under OAC rule 3745-31-05(A)(3) do not apply to the OC from this air contaminant source since the uncontrolled potential to emit for OC is less than 10 tons/yr.

c. This emissions unit is permitted at its potential to emit, as defined in OAC rule 3745-31-01, for all pollutants.

d. The maximum pentane content of the EPS manufactured at Polysource, Inc. (PSI material) shall not exceed 6 percent (%) by weight.

e. The maximum pentane content of the EPS purchased by Polysource, Inc. (non-PSI material) shall not exceed 5 percent (%) by weight

c) Operational Restrictions

(1) The maximum annual EPS PSI material throughput for this facility shall not exceed 4,600,000 pounds per year, based upon a rolling, 12-month summation of the monthly EPS PSI material throughput rates.

(2) The maximum annual EPS non-PSI material throughput for this facility shall not exceed 350,000 pounds per year, based upon a rolling, 12-month summation of the monthly non-PSI material throughput rates.

d) Monitoring and/or Recordkeeping Requirements

(1) The permittee shall maintain the following information each month:

- a. The % by weight pentane of each batch of EPS (PSI material).
 - b. The % by weight pentane of each shipment of EPS (non-PSI material).
 - c. The PSI material throughput rate for each month.
 - d. The non-PSI material throughput rate for each month.
 - e. The rolling, 12-month summation of the PSI material throughput rate
 - f. The rolling, 12-month summation of the non-PSI material throughput rates.
- (2) The permittee shall calculate and maintain monthly records of the OC emissions and the rolling 12-month emissions of OC, using the appropriate emissions factor from the table below:

Emissions Unit Information		Emissions Factors (lb Pentane/lb EPS)	
EU Stage	EU ID	PSI Material	non-PSI Material
Pre-expanding	P001 & P002	0.0066	0.0072
Aging Bags	P014	0.0000	0.0044
Molding	P003 - P012, P015 - P021	0.0200	0.0129
Warehouse	P013	0.0025	0.0209

e) Reporting Requirements

- (1) The permittee shall submit quarterly deviation (excursion) reports that identify:
- a. all deviations (excursions) of the following emission limitations, operational restrictions and/or control device operating parameter limitations that restrict the potential to emit (PTE) of any regulated air pollutant and have been detected by the monitoring, record keeping and/or testing requirements in this permit:
 - i. All exceedances of the rolling, 12-month emissions limitation of 74.9 tons/yr for OC;
 - ii. all exceedances of the pentane content of the EPS PSI material limitation of 6% by weight;
 - iii. all exceedances of the pentane content of the EPS non-PSI material limitation of 5% by weight;
 - iv. all exceedances of the rolling, 12-month EPS PSI material throughput limitation of 4,600,000 lbs/yr;
 - v. all exceedances of the rolling, 12-month EPS non-PSI material throughput limitation of 350,000 lbs/yr.

- b. the probable cause of each deviation (excursion);
- c. any corrective actions that were taken to remedy the deviations (excursions) or prevent future deviations (excursions); and
- d. The magnitude and duration of each deviation (excursion).

If no deviations (excursions) occurred during a calendar quarter, the permittee shall submit a report that states that no deviations (excursions) occurred during the quarter.

The quarterly reports shall be submitted, electronically through Ohio EPA Air Services, each year by January 31 (covering October to December), April 30 (covering January to March), July 31 (covering April to June), and October 31 (covering July to September), unless an alternative schedule has been established and approved by the Director (the appropriate District Office or local air agency).

- (2) Annual Permit Evaluation Report (PER) forms will be mailed to the permittee at the end of the reporting period specified in the Authorization section of this permit. The permittee shall submit the PER in the form and manner provided by the director by the due date identified in the Authorization section of this permit. The permit evaluation report shall cover a reporting period of no more than twelve-months for each air contaminant source identified in this permit.
- (3) Unless other arrangements have been approved by the Director, all notifications and reports shall be submitted through the Ohio EPA's eBusiness Center: Air Services online web portal.

f) Testing Requirements

- (1) Compliance with the emission limitations in b)(1) of these terms and conditions shall be determined in accordance with the following methods:

a. Emissions Limitation-

The OC emissions from this emissions unit shall not exceed 0.86 lb/hr.

Applicable Compliance Method-

The hourly emissions limitation is based upon the unit's potential to emit, which was established by multiplying the maximum hourly process weight (43.2 lbs PSI material/hr) by the pentane emissions factor (0.02 lb pentane emissions/lb EPS).

b. Emissions Limitation-

The OC emissions from this emissions unit shall not exceed 3.77 tons/yr.

Applicable Compliance Method-

The annual emissions limitation was developed by multiplying the lb/hr limitation by the maximum operating schedule of 8760 hrs/yr, and then dividing by 2000 lbs/ton. Therefore, provided compliance is shown with the hourly limitation, compliance shall also be shown with the annual limitation.

c. Emissions Limitation-

The OC emissions from P001, P002, P003, P004, P005, P006, P007, P008, P009, P010, P011, P012, P013, P014, P015, P016 [P0107003], P017, P018, P019, P020 and P021 [P0107014] combined shall not exceed 74.9 tons per year, based upon a rolling, 12-month summation of the monthly emissions.

Applicable Compliance Method-

The annual emission limitation was established by totaling the following:

- i. The maximum annual PSI material throughput limit of 4,600,000 pounds multiplied by the emission factor of 0.0291 lb pentane emissions/lb EPS and applying the conversion factor of 2000 pounds per ton.
- ii. The maximum annual non-PSI material throughput limit of 340,000 multiplied by the emission factor of 0.0454 lb pentane emissions/lb EPS and applying the conversion factor of 2000 pounds per ton.

Compliance shall be based on the record keeping requirements specified in d)(2).

g) Miscellaneous Requirements

- (1) None.
