**RE: FINAL PERMIT TO INSTALL
ASHTABULA COUNTY**

CERTIFIED MAIL

Street Address:

122 S. Front Street

Lazarus Gov. Center TELE: (614) 644-3020 FAX: (614) 644-2329

Mailing Address:

Lazarus Gov. Center
P.O. Box 1049

Application No: 02-21602

Fac ID: 0204020245

DATE: 8/29/2006

Continental Structural Plastics of Ohio
David Murtha
333 Gore Rd
Conneaut, OH 43030

Enclosed please find an Ohio EPA Permit to Install which will allow you to install the described source(s) in a manner indicated in the permit. Because this permit contains several conditions and restrictions, I urge you to read it carefully.

The Ohio EPA is urging companies to investigate pollution prevention and energy conservation. Not only will this reduce pollution and energy consumption, but it can also save you money. If you would like to learn ways you can save money while protecting the environment, please contact our Office of Pollution Prevention at (614) 644-3469.

You are hereby notified that this action of the Director is final and may be appealed to the Environmental Review Appeals Commission pursuant to Section 3745.04 of the Ohio Revised Code. The appeal must be in writing and set forth the action complained of and the grounds upon which the appeal is based. The appeal must be filed with the Commission within thirty (30) days after notice of the Director's action. The appeal must be accompanied by a filing fee of \$70.00 which the Commission, in its discretion, may reduce if by affidavit you demonstrate that payment of the full amount of the fee would cause extreme hardship. Notice of the filing of the appeal shall be filed with the Director within three (3) days of filing with the Commission. Ohio EPA requests that a copy of the appeal be served upon the Ohio Attorney General's Office, Environmental Enforcement Section. An appeal may be filed with the Environmental Review Appeals Commission at the following address:

Environmental Review Appeals Commission
309 South Fourth Street, Room 222
Columbus, OH 43215

Sincerely,

Michael W. Ahern, Manager
Permit Issuance and Data Management Section
Division of Air Pollution Control

STATE OF OHIO ENVIRONMENTAL PROTECTION AGENCY

FINAL PERMIT TO INSTALL 02-21602

Application Number: 02-21602
Facility ID: 0204020245
Permit Fee: **\$1000**
Name of Facility: Continental Structural Plastics of Ohio
Person to Contact: David Murtha
Address: 333 Gore Rd
Conneaut, OH 43030

Location of proposed air contaminant source(s) [emissions unit(s)]:
**333 Gore Rd
Conneaut, Ohio**

Description of proposed emissions unit(s):
Compression mold press nos. 22-26 for reinforced plastic composite parts.

The above named entity is hereby granted a Permit to Install for the above described emissions unit(s) pursuant to Chapter 3745-31 of the Ohio Administrative Code. Issuance of this permit does not constitute expressed or implied approval or agreement that, if constructed or modified in accordance with the plans included in the application, the above described emissions unit(s) of environmental pollutants will operate in compliance with applicable State and Federal laws and regulations, and does not constitute expressed or implied assurance that if constructed or modified in accordance with those plans and specifications, the above described emissions unit(s) of pollutants will be granted the necessary permits to operate (air) or NPDES permits as applicable.

This permit is granted subject to the conditions attached hereto.

Ohio Environmental Protection Agency

Director

Part I - GENERAL TERMS AND CONDITIONS

A. State and Federally Enforceable Permit-To-Install General Terms and Conditions

1. Monitoring and Related Recordkeeping and Reporting Requirements

- a. Except as may otherwise be provided in the terms and conditions for a specific emissions unit, the permittee shall maintain records that include the following, where applicable, for any required monitoring under this permit:
 - i. The date, place (as defined in the permit), and time of sampling or measurements.
 - ii. The date(s) analyses were performed.
 - iii. The company or entity that performed the analyses.
 - iv. The analytical techniques or methods used.
 - v. The results of such analyses.
 - vi. The operating conditions existing at the time of sampling or measurement.
- b. Each record of any monitoring data, testing data, and support information required pursuant to this permit shall be retained for a period of five years from the date the record was created. Support information shall include, but not be limited to, all calibration and maintenance records and all original strip-chart recordings for continuous monitoring instrumentation, and copies of all reports required by this permit. Such records may be maintained in computerized form.
- c. Except as may otherwise be provided in the terms and conditions for a specific emissions unit, the permittee shall submit required reports in the following manner:
 - i. Reports of any required monitoring and/or recordkeeping of federally enforceable information shall be submitted to the appropriate Ohio EPA District Office or local air agency.
 - ii. Quarterly written reports of (i) any deviations from federally enforceable emission limitations, operational restrictions, and control device operating parameter limitations, excluding deviations resulting from malfunctions reported in accordance with OAC rule 3745-15-06, that have been detected by the testing, monitoring and recordkeeping requirements specified in this permit, (ii) the probable cause of such deviations, and (iii) any corrective actions or preventive measures taken, shall be made to

the appropriate Ohio EPA District Office or local air agency. The written reports shall be submitted (i.e., postmarked) quarterly, by January 31, April 30, July 31, and October 31 of each year and shall cover the previous calendar quarters. See B.9 below if no deviations occurred during the quarter.

- iii. Written reports, which identify any deviations from the federally enforceable monitoring, recordkeeping, and reporting requirements contained in this permit shall be submitted (i.e., postmarked) to the appropriate Ohio EPA District Office or local air agency every six months, by January 31 and July 31 of each year for the previous six calendar months. If no deviations occurred during a six-month period, the permittee shall submit a semi-annual report, which states that no deviations occurred during that period.
 - iv. If this permit is for an emissions unit located at a Title V facility, then each written report shall be signed by a responsible official certifying that, based on information and belief formed after reasonable inquiry, the statements and information in the report are true, accurate, and complete.
- d. The permittee shall report actual emissions pursuant to OAC Chapter 3745-78 for the purpose of collecting Air Pollution Control Fees.

2. Scheduled Maintenance/Malfunction Reporting

Any scheduled maintenance of air pollution control equipment shall be performed in accordance with paragraph (A) of OAC rule 3745-15-06. The malfunction, i.e., upset, of any emissions units or any associated air pollution control system(s) shall be reported to the appropriate Ohio EPA District Office or local air agency in accordance with paragraph (B) of OAC rule 3745-15-06. (The definition of an upset condition shall be the same as that used in OAC rule 3745-15-06(B)(1) for a malfunction.) The verbal and written reports shall be submitted pursuant to OAC rule 3745-15-06.

Except as provided in that rule, any scheduled maintenance or malfunction necessitating the shutdown or bypassing of any air pollution control system(s) shall be accompanied by the shutdown of the emission unit(s) that is (are) served by such control system(s).

3. Risk Management Plans

If the permittee is required to develop and register a risk management plan pursuant to section 112(r) of the Clean Air Act, as amended, 42 U.S.C. 7401 et seq. ("Act"), the permittee shall comply with the requirement to register such a plan.

4. Title IV Provisions

If the permittee is subject to the requirements of 40 CFR Part 72 concerning acid rain, the permittee shall ensure that any affected emissions unit complies with those requirements. Emissions exceeding any allowances that are lawfully held under Title IV of the Act, or any regulations adopted thereunder, are prohibited.

5. Severability Clause

A determination that any term or condition of this permit is invalid shall not invalidate the force or effect of any other term or condition thereof, except to the extent that any other term or condition depends in whole or in part for its operation or implementation upon the term or condition declared invalid.

6. General Requirements

- a. The permittee must comply with all terms and conditions of this permit. Any noncompliance with the federally enforceable terms and conditions of this permit constitutes a violation of the Act, and is grounds for enforcement action or for permit revocation, revocation and re-issuance, or modification
- b. It shall not be a defense for the permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the federally enforceable terms and conditions of this permit.
- c. This permit may be modified, revoked, or revoked and reissued, for cause. The filing of a request by the permittee for a permit modification, revocation and reissuance, or revocation, or of a notification of planned changes or anticipated noncompliance does not stay any term and condition of this permit.
- d. This permit does not convey any property rights of any sort, or any exclusive privilege.
- e. The permittee shall furnish to the Director of the Ohio EPA, or an authorized representative of the Director, upon receipt of a written request and within a reasonable time, any information that may be requested to determine whether cause exists for modifying or revoking this permit or to determine compliance with this permit. Upon request, the permittee shall also furnish to the Director or an authorized representative of the Director, copies of records required to be kept by this permit. For information claimed to be confidential in the submittal to the Director, if the Administrator of the U.S. EPA requests such information, the permittee may furnish such records directly to the Administrator along with a claim of confidentiality.

Continental Structural Plastics of Ohio
PTI Application: 02-21602
Issued: 8/29/2006

Facility ID: 0204020245

7. Fees

The permittee shall pay fees to the Director of the Ohio EPA in accordance with ORC section 3745.11 and OAC Chapter 3745-78. The permittee shall pay all applicable permit-to-install fees within 30 days after the issuance of any permit-to-install. The permittee shall pay all applicable permit-to-operate fees within thirty days of the issuance of the invoice.

8. Federal and State Enforceability

Only those terms and conditions designated in this permit as federally enforceable, that are required under the Act, or any its applicable requirements, including relevant provisions designed to limit the potential to emit of a source, are enforceable by the Administrator of the U.S. EPA and the State and by citizens (to the extent allowed by section 304 of the Act) under the Act. All other terms and conditions of this permit shall not be federally enforceable and shall be enforceable under State law only.

9. Compliance Requirements

- a. Any document (including reports) required to be submitted and required by a federally applicable requirement in this permit shall include a certification by a responsible official that, based on information and belief formed after reasonable inquiry, the statements in the document are true, accurate, and complete.
- b. Upon presentation of credentials and other documents as may be required by law, the permittee shall allow the Director of the Ohio EPA or an authorized representative of the Director to:
 - i. At reasonable times, enter upon the permittee's premises where a source is located or the emissions-related activity is conducted, or where records must be kept under the conditions of this permit.
 - ii. Have access to and copy, at reasonable times, any records that must be kept under the conditions of this permit, subject to the protection from disclosure to the public of confidential information consistent with ORC section 3704.08.
 - iii. Inspect at reasonable times any facilities, equipment (including monitoring and air pollution control equipment), practices, or operations regulated or required under this permit.

- iv. As authorized by the Act, sample or monitor at reasonable times substances or parameters for the purpose of assuring compliance with the permit and applicable requirements.
- c. The permittee shall submit progress reports to the appropriate Ohio EPA District Office or local air agency concerning any schedule of compliance for meeting an applicable requirement. Progress reports shall be submitted semiannually, or more frequently if specified in the applicable requirement or by the Director of the Ohio EPA. Progress reports shall contain the following:
 - i. Dates for achieving the activities, milestones, or compliance required in any schedule of compliance, and dates when such activities, milestones, or compliance were achieved.
 - ii. An explanation of why any dates in any schedule of compliance were not or will not be met, and any preventive or corrective measures adopted.

10. Permit-To-Operate Application

- a. If the permittee is required to apply for a Title V permit pursuant to OAC Chapter 3745-77, the permittee shall submit a complete Title V permit application or a complete Title V permit modification application within twelve (12) months after commencing operation of the emissions units covered by this permit. However, if the proposed new or modified source(s) would be prohibited by the terms and conditions of an existing Title V permit, a Title V permit modification must be obtained before the operation of such new or modified source(s) pursuant to OAC rule 3745-77-04(D) and OAC rule 3745-77-08(C)(3)(d).
- b. If the permittee is required to apply for permit(s) pursuant to OAC Chapter 3745-35, the source(s) identified in this permit is (are) permitted to operate for a period of up to one year from the date the source(s) commenced operation. Permission to operate is granted only if the facility complies with all requirements contained in this permit and all applicable air pollution laws, regulations, and policies. Pursuant to OAC Chapter 3745-35, the permittee shall submit a complete operating permit application within ninety (90) days after commencing operation of the source(s) covered by this permit.

11. Best Available Technology

As specified in OAC Rule 3745-31-05, all new sources must employ Best Available Technology (BAT). Compliance with the terms and conditions of this permit will fulfill this requirement.

Continental Structural Plastics of Ohio
PTI Application: 02-21602
Issued: 8/29/2006

Facility ID: 0204020245

12. Air Pollution Nuisance

The air contaminants emitted by the emissions units covered by this permit shall not cause a public nuisance, in violation of OAC rule 3745-15-07.

Continental Structural Plastics of Ohio
PTI Application: 02-21602
Issued: 8/29/2006

Facility ID: 0204020245

13. Permit-To-Install

A permit-to-install must be obtained pursuant to OAC Chapter 3745-31 prior to "installation" of "any air contaminant source" as defined in OAC rule 3745-31-01, or "modification", as defined in OAC rule 3745-31-01, of any emissions unit included in this permit.

B. State Only Enforceable Permit-To-Install General Terms and Conditions

1. Compliance Requirements

The emissions unit(s) identified in this Permit shall remain in full compliance with all applicable State laws and regulations and the terms and conditions of this permit.

2. Reporting Requirements

The permittee shall submit required reports in the following manner:

- a. Reports of any required monitoring and/or recordkeeping of state-only enforceable information shall be submitted to the appropriate Ohio EPA District Office or local air agency.
- b. Except as otherwise may be provided in the terms and conditions for a specific emissions unit, quarterly written reports of (a) any deviations (excursions) from state-only required emission limitations, operational restrictions, and control device operating parameter limitations that have been detected by the testing, monitoring, and recordkeeping requirements specified in this permit, (b) the probable cause of such deviations, and (c) any corrective actions or preventive measures which have been or will be taken, shall be submitted to the appropriate Ohio EPA District Office or local air agency. If no deviations occurred during a calendar quarter, the permittee shall submit a quarterly report, which states that no deviations occurred during that quarter. The reports shall be submitted (i.e., postmarked) quarterly, by January 31, April 30, July 31, and October 31 of each year and shall cover the previous calendar quarters. (These quarterly reports shall exclude deviations resulting from malfunctions reported in accordance with OAC rule 3745-15-06.)

3. Permit Transfers

Any transferee of this permit shall assume the responsibilities of the prior permit holder.

Continental Structural Plastics of Ohio
PTI Application: 02-21602
Issued: 8/29/2006

Facility ID: 0204020245

The appropriate Ohio EPA District Office or local air agency must be notified in writing of any transfer of this permit.

Continental Structural Plastics of Ohio
PTI Application: 02-21602
Issued: 8/29/2006

Facility ID: 0204020245

4. Authorization To Install or Modify

If applicable, authorization to install or modify any new or existing emissions unit included in this permit shall terminate within eighteen months of the effective date of the permit if the owner or operator has not undertaken a continuing program of installation or modification or has not entered into a binding contractual obligation to undertake and complete within a reasonable time a continuing program of installation or modification. This deadline may be extended by up to 12 months if application is made to the Director within a reasonable time before the termination date and the party shows good cause for any such extension.

5. Construction of New Sources(s)

This permit does not constitute an assurance that the proposed source will operate in compliance with all Ohio laws and regulations. This permit does not constitute expressed or implied assurance that the proposed facility has been constructed in accordance with the application and terms and conditions of this permit. The action of beginning and/or completing construction prior to obtaining the Director's approval constitutes a violation of OAC rule 3745-31-02. Furthermore, issuance of this permit does not constitute an assurance that the proposed source will operate in compliance with all Ohio laws and regulations. Issuance of this permit is not to be construed as a waiver of any rights that the Ohio Environmental Protection Agency (or other persons) may have against the applicant for starting construction prior to the effective date of the permit. Additional facilities shall be installed upon orders of the Ohio Environmental Protection Agency if the proposed facilities cannot meet the requirements of this permit or cannot meet applicable standards.

6. Public Disclosure

The facility is hereby notified that this permit, and all agency records concerning the operation of this permitted source, are subject to public disclosure in accordance with OAC rule 3745-49-03.

7. Applicability

This Permit to Install is applicable only to the emissions unit(s) identified in the Permit To Install. Separate application must be made to the Director for the installation or modification of any other emissions unit(s).

8. Construction Compliance Certification

Continental Structural Plastics of Ohio
PTI Application: 02-21602
Issued: 8/29/2006

Facility ID: 0204020245

If applicable, the applicant shall provide Ohio EPA with a written certification (see enclosed form if applicable) that the facility has been constructed in accordance with the permit-to-install application and the terms and conditions of the permit-to-install. The certification shall be provided to Ohio EPA upon completion of construction but prior to startup of the source.

9. Additional Reporting Requirements When There Are No Deviations of Federally Enforceable Emission Limitations, Operational Restrictions, or Control Device Operating Parameter Limitations (See Section A of This Permit)

If no deviations occurred during a calendar quarter, the permittee shall submit a quarterly report, which states that no deviations occurred during that quarter. The reports shall be submitted quarterly (i.e., postmarked), by January 31, April 30, July 31, and October 31 of each year and shall cover the previous calendar quarters.

C. Permit-To-Install Summary of Allowable Emissions

SUMMARY (for informational purposes only)
TOTAL PERMIT TO INSTALL ALLOWABLE EMISSIONS

<u>Pollutant</u>	<u>Tons Per Year</u>
OC	33.95

PTI Application: 02-21602
Issued: 8/29/2006

Facility ID: 0204020245

Part II - FACILITY SPECIFIC TERMS AND CONDITIONS

A. State and Federally Enforceable Permit To Install Facility Specific Terms and Conditions

1. On April 21, 2003 U.S. EPA promulgated the National Emission Standards for Hazardous Air Pollutants (NESHAP) for Reinforced Plastic Composites Production, 40 CFR 63 Subpart WWWW. The facility is subject as an existing major source with a April 17, 2006 compliance date as specified in the NESHAP.
 - a. Within 15 calendar days after any changes are made, a revised Initial Notification Report, as required in 40 CFR 63.5905(b) and in 40 CFR 63.9(b), that contains the following information:
 - i. The name and address of the owner or operator;
 - ii. The address (i.e. physical location) of the affected source;
 - iii. An identification of the relevant standard, or other requirement, that is the basis of the notification and the source's compliance date;
 - iv. A brief description of the nature, size, design, and method of operation of the source and an identification of the types of emissions points within the affected source subject to the relevant standard and types of hazardous air pollutants emitted; and
 - v. A statement of whether the affected source is a major source or an area source.
 - b. A revised Initial Notification Report, if needed, and a Notification of Compliance Status report shall be submitted to the following parties:
 - i. The original, revised "Initial Notification Report" shall be sent to Mr. Robert Hodanbosi, Chief, Division of Air Pollution Control, Ohio EPA, Lazarus Government Center, P.O. Box 1049, Columbus, OH 43216-1049;
 - ii. Copies of the revised "Initial Notification Report" shall be sent to the following addresses:
 - (a) Mr. George T. Czerniak, AE-17J, U.S. EPA Region V, 77 West

Continental Structural Plastics of Ohio
PTI Application: 02-21602
Issued: 8/29/2006

Facility ID: 0204020245

Jackson Boulevard, Chicago, IL 60604-3507;

- (b) Ms. Christine McPhee, DAPC, Ohio EPA, Northeast District Office, 2110 East Aurora Road, Twinsburg, OH 44087-1969; and
- (c) Mr. Abdur Rahim, MACT Coordinator, Ohio EPA, DAPC, Lazarus Government Center, P.O. Box 1049, Columbus, OH 43216-1049.

Continental Structural Plastics of Ohio

Facility ID: 0204020245

PTI Application: 02-21602

Issued: 8/29/2006

B. State Only Enforceable Permit To Install Facility Specific Terms and Conditions

None.

Part III - SPECIAL TERMS AND CONDITIONS FOR SPECIFIC EMISSIONS UNIT(S)

A. State and Federally Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operations(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
P030 - Compression mold press no. 22 with a slitter system for reinforced plastic composite parts	OAC rule 3745-31-05(A)(3) 40 CFR, Part 63, Subpart WWWW	Organic compound (OC) emissions shall not exceed 1.55 lbs/hr and 6.79 tons/year. The requirements of this rule also include compliance with the requirements of 40 CFR Parts 63.5780 - 63.5935. See section A.2.a. See section A.I.2.a. and Part II, section A of this permit.

2. Additional Terms and Conditions

- 2.a The following work practice(s) shall be employed to minimize the generation of hazardous air pollutant (HAP, i.e. styrene) emissions as required in 40 CFR 63.5805(a) and specified in Table 4 of 40 CFR, Part 63, Subpart WWWW:
 - i. only one charge of molding compound may be uncovered, unwrapped, or exposed per mold cycle per compression/injection molding press; and
 - ii. mold compound materials may be uncovered before slitting, but must be recovered after slitting.

17

Conti

PTI A

Issued: 8/29/2006

Emissions Unit ID: P030

II. Operational Restrictions

None.

III. Monitoring and/or Recordkeeping Requirements

1. Except as otherwise provided in this section, the permittee shall perform inspections of production material charges associated with this emissions unit on a once per day basis. The purpose of the inspections is to ensure that work practice(s) to minimize HAP emissions are employed. The inspections shall be performed during representative, normal operating conditions.
2. The permittee shall collect and record the following information for each day for this emissions unit:
 - a. The company identification for each sheet mold compound (SMC) employed;
 - b. The weight of each sheet mold compound (SMC) employed, in pounds;
 - c. The weight of all sheet mold compound (SMC) employed, in pounds;
 - d. The total OC emission rate for all the materials employed, in pounds, determined based upon the following equation:

$$E_{OC} = \text{summation of } (W_{i_SMC} \times EF).$$

where:

E_{OC} = the daily, OC emissions for all materials, in pounds per day.

W_{i_SMC} = the weight of SMC "i" employed, in pounds per day, from section A.III.2.b.

EF = emission factor for styrene emissions from the mold press, which is 0.00134 pounds per pound of mold compound materials, as determined from a pre-1997 Society of Plastics Industry report, "Styrene Emissions during the Charging and Molding Cycle;"

- e. The actual number of hours the emissions unit was in operation;
- f. The average hourly OC emission rate for all materials employed, i.e., (d)/(e), in pounds per hour (average);
- g. The date and reason any required inspection was not performed; and

- h. The dates the equipment standard(s) or work practice(s) were not implemented when the emissions unit was in operation.
3. The permittee shall maintain records of certified statements, required by 40 CFR 63.5915(d), regarding compliance with the work practice(s) standard for 5 years following the date of each record. Retention of copies of the semi-annual compliance report(s), required by 40 CFR 63.5910(b) and required by the reporting requirement in section A.IV.3., will fulfill the requirements of this permit term.

IV. Reporting Requirements

1. The permittee shall submit quarterly deviation (excursion) reports, in accordance with the General Terms and Conditions of this permit, which include an identification of each day during which the average hourly OC emissions from the production materials exceeded 1.55 pounds per hour, and the actual average hourly OC emissions for each such day.
2. The permittee shall submit an initial compliance report, required by 40 CFR 63.5860(a), which include certified statements in the notice of compliance status that state the following:
 - a. only one charge of molding compound was uncovered, unwrapped, or exposed per mold cycle per compression/injection molding press; and
 - b. mold compound materials were recovered after slitting.

The initial compliance report must cover the period beginning on the operations startup date, as required in 40 CFR 63.5800 and specified in Table 2 of 40 CFR, Part 63, Subpart WWWW, and ending June 30 or December 31, whichever date is the first date following the end of the first calendar half after the operations startup date. The initial compliance report must be submitted by July 31 or January 31, whichever date follows the end of the first calendar half after the operations startup date.

3. The permittee shall submit semi-annual compliance reports, required by 40 CFR 63.5910(b) which includes the following information:
 - a. If there were no deviations from the work practice standards, required by 40 CFR 63.5805(a) as well as by the control measure requirements in section A.I.2.a., and if there were no deviations from the record keeping requirements in sections A.III.2.g. and A.III.2.h., a statement that there were no deviations during the reporting period.
 - b. If there was a deviation from the work practice standards during the reporting period the following information, required by 40 CFR 63.5910(d), must be

submitted:

- i. Company name and address;
 - ii. Statement by a responsible official with that official's name, title, and signature, certifying the truth, accuracy, and completeness of the content of the report;
 - iii. Date of the report and beginning and ending dates of the reporting period;
 - iv. The total operating time of this emissions unit; and
 - v. Information on the number, duration, and cause of deviations (including unknown cause if applicable), and the corrective action(s) taken.
- c. A semi-annual compliance report shall be submitted to the Ohio EPA Northeast District Office every six months, i.e. by January 31 and July 31 of each year for the previous six calendar months, as required by 40 CFR 63.5910(b)(3) and 40 CFR 63.5910(b)(4).
4. The permittee shall submit annual reports which specify the total OC emissions from this emissions unit for the previous calendar year, in tons. These reports shall be submitted by January 31 of each year.

V. Testing Requirements

1. Compliance with the allowable emissions limitations in section A.1. of these terms and conditions shall be determined in accordance with the following methods:
 - a. Emissions Limitation: 1.55 lbs OC/hr

Applicable Compliance Method: Compliance with the hourly allowable OC emission limitation above shall be demonstrated in accordance with the record keeping requirements specified in section A.III.2 of this permit.

If required, the permittee shall demonstrate compliance with the hourly allowable OC emission limitation above through emission tests performed in accordance with 40 CFR Part 60, Appendix A, Method 25A or Method 18, or American Society for Testing and Materials (ASTM) D6420-99, as appropriate, or an equivalent alternate method as approved by Ohio EPA.

- b. Emissions Limitation: 6.79 TPY OC

Applicable Compliance Method: Compliance with the annual allowable OC emission limitation above shall be based on the sum of the daily OC emission rates from the mold compounds, from section A.III.2.d of this permit, for the calendar year, divided by 2,000 pounds/ton.

Also, as long as compliance with the hourly allowable OC emission limitation is maintained, compliance with the annual allowable OC emission limitation shall be ensured.

2. Any analysis of a material shall be based on the material as employed, including the addition of any monomer to the material. The permittee shall determine the composition of the material by formulation data supplied by the manufacturer or from data determined by an analysis of each material, as employed, by U.S. EPA Reference Method 24 - Determination of Volatile Matter Content, Water Content, Density, Volume Solids and Weight Solids of Surface Coatings, as referenced in 40 CFR Part 60, Appendix A. If formulation data is employed, Ohio EPA may require the permittee to have a Reference Method 24 analysis or an equivalent, alternative method (as approved by Ohio EPA) performed on the material(s).

The total organic HAP content may be determined by an analysis of the material, as employed, by U.S. EPA Reference Method 311 - Analysis of Hazardous Air Pollutant Compounds in Paints and Coatings by Direct Injection into a Gas Chromatography as referenced in 40 CFR Part 63, Appendix A. The styrene content, ethyl acrylate content and methyl methacrylate content may be determined by an analysis of the material, as employed, by ASTM D 4827-93 or ASTM D 4747-87. Equivalent, alternative method(s) (as approved by Ohio EPA) may be performed on the material(s).

VI. Miscellaneous Requirements

None.

B. State Only Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operations(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
P030 - Compression mold press no. 22 with a slitter for reinforced plastic composite parts	None	Compliance with the Air Toxic Policy as specified in Section B.III.

2. Additional Terms and Conditions

None.

II. Operational Restrictions

None.

III. Monitoring and/or Recordkeeping Requirements

1. Modeling the federally regulated pollutant, styrene, a hazardous air pollutant (HAP), to demonstrate compliance with the Ohio EPA's "Air Toxic Policy" was not necessary because this emissions unit is subject to a federal Maximum Achievable Control Technology rule, 40 CFR, Part 63, Subpart WWWW, which was promulgated on April 21, 2003, which is less than 5 years ago.
2. Physical changes to or changes in the method of operation of the emissions unit after its installation or modification could affect the parameters used to determine whether or not the "Air Toxic Policy" is satisfied. Consequently, prior to making a change that could impact such parameters, the permittee shall conduct an evaluation to determine that the "Air Toxic Policy" will still be satisfied. If, upon evaluation, the permittee determines that the "Air Toxic Policy" will not be satisfied, the permittee will not make

the change. Changes that can affect the parameters used in applying the "Air Toxic Policy" include the following:

- a. changes in the composition of the materials used or the use of new materials, that would result in the emission of a compound or chemical with a lower Threshold Limit Value (TLV) than the lowest TLV previously modeled, as documented in the most current version of the American Conference of Governmental Industrial Hygienists' (ACGIH's) handbook entitled "TLVs and BEIs" ("Threshold Limit Values for Chemical Substances and Physical Agents, Biological Exposure Indices");
 - b. changes in the composition of the materials, or use of new materials, that would result in an increase in emissions of any pollutant with a listed TLV that was proposed in the application and modeled; and
 - c. physical changes to the emissions unit or its exhaust parameters (e.g., increased/ decreased exhaust flow, changes in stack height, changes in stack diameter, etc.).
3. If the permittee determines that the "Air Toxic Policy" will be satisfied for the above changes, the Ohio EPA will not consider the change(s) to be a "modification" under OAC rule 3745-31-01 solely due to the emissions of any type of toxic air contaminant not previously emitted, and a modification of the existing permit to install will not be required, even if the toxic air contaminant emissions are greater than the de minimis level in OAC rule 3745-15-05. If the change(s) meet(s) the definition of a "modification" under other provisions of the rule, then the permittee shall obtain a final permit to install prior to the change.
 4. The permittee shall collect, record, and retain the following information when it conducts evaluations to determine that the changed emissions unit will still satisfy the "Air Toxic Policy":
 - a. a description of the parameters changed (composition of materials, new pollutants emitted, change in stack/exhaust parameters, etc.);
 - b. documentation of the evaluation and determination that the changed emissions unit still satisfies the "Air Toxic Policy"; and
 - c. where computer modeling is performed, a copy of the resulting computer model runs that show the results of the application of the "Air Toxic Policy" for the

change.

IV. Reporting Requirements

None.

V. Testing Requirements

None.

VI. Miscellaneous Requirements

None.

Part III - SPECIAL TERMS AND CONDITIONS FOR SPECIFIC EMISSIONS UNIT(S)

A. State and Federally Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operations(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
P031 - Compression mold press no. 23 with a slitter for reinforced plastic composite parts	OAC rule 3745-31-05(A)(3)	Organic compound (OC) emissions shall not exceed 1.55 lbs/hr and 6.79 tons/year.
	40 CFR, Part 63, Subpart WWWW	The requirements of this rule also include compliance with the requirements of 40 CFR Parts 63.5780 - 63.5935. See section A.2.a.
		See section A.1.2.a. and Part II, section A of this permit

2. Additional Terms and Conditions

- 2.a** The following work practice(s) shall be employed to minimize the generation of hazardous air pollutant (HAP, i.e. styrene) emissions as required in 40 CFR 63.5805(a) and specified in Table 4 of 40 CFR, Part 63, Subpart WWWW:
- i. only one charge of molding compound may be uncovered, unwrapped, or exposed per mold cycle per compression/injection molding press; and
 - ii. mold compound materials may be uncovered before slitting, but must be recovered after slitting.

II. Operational Restrictions

None.

III. Monitoring and/or Recordkeeping Requirements

1. Except as otherwise provided in this section, the permittee shall perform inspections of production material charges associated with this emissions unit on a once per day basis. The purpose of the inspections is to ensure that work practice(s) to minimize HAP emissions are employed. The inspections shall be performed during representative, normal operating conditions.
2. The permittee shall collect and record the following information for each day for this emissions unit:
 - a. The company identification for each sheet mold compound (SMC) employed;
 - b. The weight of each sheet mold compound (SMC) employed, in pounds;
 - c. The weight of all sheet mold compound (SMC) employed, in pounds;
 - d. The total OC emission rate for all the materials employed, in pounds, determined based upon the following equation:

$$E_{OC} = \text{summation of } (W_{i_SMC} \times EF).$$

where:

E_{OC} = the daily, OC emissions for all materials, in pounds per day.

W_{i_SMC} = the weight of SMC "i" employed, in pounds per day, from section A.III.2.b.

EF = emission factor for styrene emissions from the mold press, which is 0.00134 pounds per pound of mold compound materials, as determined from a pre-1997 Society of Plastics Industry report, "Styrene Emissions during the Charging and Molding Cycle;"

- e. The actual number of hours the emissions unit was in operation;
- f. The average hourly OC emission rate for all materials employed, i.e., (d)/(e), in pounds per hour (average);
- g. The date and reason any required inspection was not performed; and

Emissions Unit ID: P031

- h. The dates the equipment standard(s) or work practice(s) were not implemented when the emissions unit was in operation.
3. The permittee shall maintain records of certified statements, required by 40 CFR 63.5915(d), regarding compliance with the work practice(s) standard for 5 years following the date of each record. Retention of copies of the semi-annual compliance report(s), required by 40 CFR 63.5910(b) and required by the reporting requirement in section A.IV.3., will fulfill the requirements of this permit term.

IV. Reporting Requirements

1. The permittee shall submit quarterly deviation (excursion) reports, in accordance with the General Terms and Conditions of this permit, which include an identification of each day during which the average hourly OC emissions from the production materials exceeded 1.55 pounds per hour, and the actual average hourly OC emissions for each such day.
2. The permittee shall submit an initial compliance report, required by 40 CFR 63.5860(a), which include certified statements in the notice of compliance status that state the following:
 - a. only one charge of molding compound was uncovered, unwrapped, or exposed per mold cycle per compression/injection molding press; and
 - b. mold compound materials were recovered after slitting.

The initial compliance report must cover the period beginning on the operations startup date, as required in 40 CFR 63.5800 and specified in Table 2 of 40 CFR, Part 63, Subpart WWWW, and ending June 30 or December 31, whichever date is the first date following the end of the first calendar half after the operations startup date. The initial compliance report must be submitted by July 31 or January 31, whichever date follows the end of the first calendar half after the operations startup date.

3. The permittee shall submit semi-annual compliance reports, required by 40 CFR 63.5910(b) which includes the following information:
 - a. If there were no deviations from the work practice standards, required by 40 CFR 63.5805(a) as well as by the control measure requirements in section A.I.2.a., and if there were no deviations from the record keeping requirements in sections A.III.2.g. and A.III.2.h., a statement that there were no deviations during the reporting period.
 - b. If there was a deviation from the work practice standards during the reporting period the following information, required by 40 CFR 63.5910(d), must be submitted:

- i. Company name and address;
 - ii. Statement by a responsible official with that official's name, title, and signature, certifying the truth, accuracy, and completeness of the content of the report;
 - iii. Date of the report and beginning and ending dates of the reporting period;
 - iv. The total operating time of this emissions unit; and
 - v. Information on the number, duration, and cause of deviations (including unknown cause if applicable), and the corrective action(s) taken.
- c. A semi-annual compliance report shall be submitted to the Ohio EPA Northeast District Office every six months, i.e. by January 31 and July 31 of each year for the previous six calendar months, as required by 40 CFR 63.5910(b)(3) and 40 CFR 63.5910(b)(4).
4. The permittee shall submit annual reports which specify the total OC emissions from this emissions unit for the previous calendar year, in tons. These reports shall be submitted by January 31 of each year.

V. Testing Requirements

1. Compliance with the allowable emissions limitations in section A.1. of these terms and conditions shall be determined in accordance with the following methods:

- a. Emissions Limitation: 1.55 lbs OC/hr

Applicable Compliance Method: Compliance with the hourly allowable OC emission limitation above shall be demonstrated in accordance with the record keeping requirements specified in section A.III.2 of this permit.

If required, the permittee shall demonstrate compliance with the hourly allowable OC emission limitation above through emission tests performed in accordance with 40 CFR Part 60, Appendix A, Method 25A or Method 18, or American Society for Testing and Materials (ASTM) D6420-99, as appropriate, or an equivalent alternate method as approved by Ohio EPA.

- b. Emissions Limitation: 6.79 TPY OC

Compliance with the annual allowable OC emission limitation above shall be based on the sum of the daily OC emission rates from the mold compounds, from section A.III.2.d of this permit, for the calendar year, divided by 2,000 pounds/ton.

Also, as long as compliance with the hourly allowable OC emission limitation is maintained, compliance with the annual allowable OC emission limitation shall be ensured.

2. Any analysis of a material shall be based on the material as employed, including the addition of any monomer to the material. The permittee shall determine the composition of the material by formulation data supplied by the manufacturer or from data determined by an analysis of each material, as employed, by U.S. EPA Reference Method 24 - Determination of Volatile Matter Content, Water Content, Density, Volume Solids and Weight Solids of Surface Coatings, as referenced in 40 CFR Part 60, Appendix A. If formulation data is employed, Ohio EPA may require the permittee to have a Reference Method 24 analysis or an equivalent, alternative method (as approved by Ohio EPA) performed on the material(s).

The total organic HAP content may be determined by an analysis of the material, as employed, by U.S. EPA Reference Method 311 - Analysis of Hazardous Air Pollutant Compounds in Paints and Coatings by Direct Injection into a Gas Chromatograph as referenced in 40 CFR Part 63, Appendix A. The styrene content, ethyl acrylate content and methyl methacrylate content may be determined by an analysis of the material, as employed, by ASTM D 4827-93 or ASTM D 4747-87. Equivalent, alternative method(s) (as approved by Ohio EPA) may be performed on the material(s).

VI. Miscellaneous Requirements

None.

B. State Only Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

- The specific operations(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
P031 - Compression mold press no. 23 with a slitter for reinforced plastic composite parts	None	Compliance with the Air Toxic Policy as specified in Section B.III.

2. Additional Terms and Conditions

- None.

II. Operational Restrictions

None.

III. Monitoring and/or Recordkeeping Requirements

- Modeling the federally regulated pollutant, styrene, a hazardous air pollutant (HAP), to demonstrate compliance with the Ohio EPA's "Air Toxic Policy" was not necessary because this emissions unit is subject to a federal Maximum Achievable Control Technology rule, 40 CFR, Part 63, Subpart WWWW, which was promulgated on April 21, 2003, which is less than 5 years ago.
- Physical changes to or changes in the method of operation of the emissions unit after its installation or modification could affect the parameters used to determine whether or not the "Air Toxic Policy" is satisfied. Consequently, prior to making a change that could impact such parameters, the permittee shall conduct an evaluation to determine that the "Air Toxic Policy" will still be satisfied. If, upon evaluation, the permittee determines that the "Air Toxic Policy" will not be satisfied, the permittee will not make

the change. Changes that can affect the parameters used in applying the "Air Toxic Policy" include the following:

- a. changes in the composition of the materials used or the use of new materials, that would result in the emission of a compound or chemical with a lower Threshold Limit Value (TLV) than the lowest TLV previously modeled, as documented in the most current version of the American Conference of Governmental Industrial Hygienists' (ACGIH's) handbook entitled "TLVs and BEIs" ("Threshold Limit Values for Chemical Substances and Physical Agents, Biological Exposure Indices");
 - b. changes in the composition of the materials, or use of new materials, that would result in an increase in emissions of any pollutant with a listed TLV that was proposed in the application and modeled; and
 - c. physical changes to the emissions unit or its exhaust parameters (e.g., increased/ decreased exhaust flow, changes in stack height, changes in stack diameter, etc.).
3. If the permittee determines that the "Air Toxic Policy" will be satisfied for the above changes, the Ohio EPA will not consider the change(s) to be a "modification" under OAC rule 3745-31-01 solely due to the emissions of any type of toxic air contaminant not previously emitted, and a modification of the existing permit to install will not be required, even if the toxic air contaminant emissions are greater than the de minimis level in OAC rule 3745-15-05. If the change(s) meet(s) the definition of a "modification" under other provisions of the rule, then the permittee shall obtain a final permit to install prior to the change.
4. The permittee shall collect, record, and retain the following information when it conducts evaluations to determine that the changed emissions unit will still satisfy the "Air Toxic Policy":
- a. a description of the parameters changed (composition of materials, new pollutants emitted, change in stack/exhaust parameters, etc.);
 - b. documentation of the evaluation and determination that the changed emissions unit still satisfies the "Air Toxic Policy"; and
 - c. where computer modeling is performed, a copy of the resulting computer model runs that show the results of the application of the "Air Toxic Policy" for the

Part III - SPECIAL TERMS AND CONDITIONS FOR SPECIFIC EMISSIONS UNIT(S)

A. State and Federally Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operations(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
P032 - Compression mold press no. 24 for reinforced plastic composite parts	OAC rule 3745-31-05(A)(3) 40 CFR, Part 63, Subpart WWWW	Organic compound (OC) emissions shall not exceed 1.55 lbs/hr and 6.79 tons/year. The requirements of this rule also include compliance with the requirements of 40 CFR Parts 63.5780 - 63.5935. See section A.2.a. See section A.I.2.a. and Part II, section A of this permit

2. Additional Terms and Conditions

- 2.a The following work practice(s) shall be employed to minimize the generation of hazardous air pollutant (HAP, i.e. styrene) emissions as required in 40 CFR 63.5805(a) and specified in Table 4 of 40 CFR, Part 63, Subpart WWWW:
 - i. only one charge of molding compound may be uncovered, unwrapped, or exposed per mold cycle per compression/injection molding press; and
 - ii. mold compound materials may be uncovered before slitting, but must be recovered after slitting.

III. Monitoring and/or Recordkeeping Requirements

1. Except as otherwise provided in this section, the permittee shall perform inspections of production material charges associated with this emissions unit on a once per day basis. The purpose of the inspections is to ensure that work practice(s) to minimize HAP emissions are employed. The inspections shall be performed during representative, normal operating conditions.
2. The permittee shall collect and record the following information for each day for this emissions unit:
 - a. The company identification for each sheet mold compound (SMC) employed;
 - b. The weight of each sheet mold compound (SMC) employed, in pounds;
 - c. The weight of all sheet mold compound (SMC) employed, in pounds;
 - d. The total OC emission rate for all the materials employed, in pounds, determined based upon the following equation:

$$E_{OC} = \text{summation of } (W_{i_SMC} \times EF).$$

where:

E_{OC} = the daily, OC emissions for all materials, in pounds per day.

W_{i_SMC} = the weight of SMC "i" employed, in pounds per day, from section A.III.2.b.

EF = emission factor for styrene emissions from the mold press, which is 0.00134 pounds per pound of mold compound materials, as determined from a pre-1997 Society of Plastics Industry report, "Styrene Emissions during the Charging and Molding Cycle;"

- e. The actual number of hours the emissions unit was in operation;
- f. The average hourly OC emission rate for all materials employed, i.e., (d)/(e), in pounds per hour (average);
- g. The date and reason any required inspection was not performed; and

- i. Company name and address;
 - ii. Statement by a responsible official with that official's name, title, and signature, certifying the truth, accuracy, and completeness of the content of the report;
 - iii. Date of the report and beginning and ending dates of the reporting period;
 - iv. The total operating time of this emissions unit; and
 - v. Information on the number, duration, and cause of deviations (including unknown cause if applicable), and the corrective action(s) taken.
- c. A semi-annual compliance report shall be submitted to the Ohio EPA Northeast District Office every six months, i.e. by January 31 and July 31 of each year for the previous six calendar months, as required by 40 CFR 63.5910(b)(3) and 40 CFR 63.5910(b)(4).
4. The permittee shall submit annual reports which specify the total OC emissions from this emissions unit for the previous calendar year, in tons. These reports shall be submitted by January 31 of each year.

V. Testing Requirements

1. Compliance with the allowable emissions limitations in section A.1. of these terms and conditions shall be determined in accordance with the following methods:

- a. Emissions Limitation: 1.55 lbs OC/hr

Applicable Compliance Method: Compliance with the hourly allowable OC emission limitation above shall be demonstrated in accordance with the record keeping requirements specified in section A.III.2 of this permit.

If required, the permittee shall demonstrate compliance with the hourly allowable OC emission limitation above through emission tests performed in accordance with 40 CFR Part 60, Appendix A, Method 25A or Method 18, or American Society for Testing and Materials (ASTM) D6420-99, as appropriate, or an equivalent alternate method as approved by Ohio EPA.

- b. Emissions Limitation: 6.79 TPY OC

Compliance with the annual allowable OC emission limitation above shall be based on the sum of the daily OC emission rates from the mold compounds, from section A.III.2.d of this permit, for the calendar year, divided by 2,000 pounds/ton.

Also, as long as compliance with the hourly allowable OC emission limitation is maintained, compliance with the annual allowable OC emission limitation shall be ensured.

2. Any analysis of a material shall be based on the material as employed, including the addition of any monomer to the material. The permittee shall determine the composition of the material by formulation data supplied by the manufacturer or from data determined by an analysis of each material, as employed, by U.S. EPA Reference Method 24 - Determination of Volatile Matter Content, Water Content, Density, Volume Solids and Weight Solids of Surface Coatings, as referenced in 40 CFR Part 60, Appendix A. If formulation data is employed, Ohio EPA may require the permittee to have a Reference Method 24 analysis or an equivalent, alternative method (as approved by Ohio EPA) performed on the material(s).

The total organic HAP content may be determined by an analysis of the material, as employed, by U.S. EPA Reference Method 311 - Analysis of Hazardous Air Pollutant Compounds in Paints and Coatings by Direct Injection into a Gas Chromatograph as referenced in 40 CFR Part 63, Appendix A. The styrene content, ethyl acrylate content and methyl methacrylate content may be determined by an analysis of the material, as employed, by ASTM D 4827-93 or ASTM D 4747-87.  - iii. Date of the report and beginning and ending dates of the reporting period;
 - iv. The total operating time of this emissions unit; and
 - v. Information on the number, duration, and cause of deviations (including unknown cause if applicable), and the corrective action(s) taken.
- c. A semi-annual compliance report shall be submitted to the Ohio EPA Northeast District Office every six months, i.e. by January 31 and July 31 of each year for the previous six calendar months, as required by 40 CFR 63.5910(b)(3) and 40 CFR 63.5910(b)(4).
4. The permittee shall submit annual reports which specify the total OC emissions from this emissions unit for the previous calendar year, in tons. These reports shall be submitted by January 31 of each year.

V. Testing Requirements

1. Compliance with the allowable emissions limitations in section A.1. of these terms and conditions shall be determined in accordance with the following methods:

- a. Emissions Limitation: 1.55 lbs OC/hr

Applicable Compliance Method: Compliance with the hourly allowable OC emission limitation above shall be demonstrated in accordance with the record keeping requirements specified in section A.III.2 of this permit.

If required, the permittee shall demonstrate compliance with the hourly allowable OC emission limitation above through emission tests performed in accordance with 40 CFR Part 60, Appendix A, Method 25A or Method 18, or American Society for Testing and Materials (ASTM) D6420-99, as appropriate, or an equivalent alternate method as approved by Ohio EPA.

- b. Emissions Limitation: 6.79 TPY OC

Compliance with the annual allowable OC emission limitation above shall be based on the sum of the daily OC emission rates from the mold compounds, from section A.III.2.d of this permit, for the calendar year, divided by 2,000 pounds/ton.

Also, as long as compliance with the hourly allowable OC emission limitation is maintained, compliance with the annual allowable OC emission limitation shall be ensured.

2. Any analysis of a material shall be based on the material as employed, including the addition of any monomer to the material. The permittee shall determine the composition of the material by formulation data supplied by the manufacturer or from data determined by an analysis of each material, as employed, by U.S. EPA Reference Method 24 - Determination of Volatile Matter Content, Water Content, Density, Volume Solids and Weight Solids of Surface Coatings, as referenced in 40 CFR Part 60, Appendix A. If formulation data is employed, Ohio EPA may require the permittee to have a Reference Method 24 analysis or an equivalent, alternative method (as approved by Ohio EPA) performed on the material(s).

The total organic HAP content may be determined by an analysis of the material, as employed, by U.S. EPA Reference Method 311 - Analysis of Hazardous Air Pollutant Compounds in Paints and Coatings by Direct Injection into a Gas Chromatograph as referenced in 40 CFR Part 63, Appendix A. The styrene content, ethyl acrylate content and methyl methacrylate content may be determined by an analysis of the material, as employed, by ASTM D 4827-93 or ASTM D 4747-87. Equivalent, alternative method(s) (as approved by Ohio EPA) may be performed on the material(s).

VI. Miscellaneous Requirements

None.

B. State Only Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operations(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
P033 - Compression mold press no. 25 for reinforced plastic composite parts	None	Compliance with the Air Toxic Policy as specified in Section B.III.

2. Additional Terms and Conditions

None.

II. Operational Restrictions

None.

III. Monitoring and/or Recordkeeping Requirements

1. Modeling the federally regulated pollutant, styrene, a hazardous air pollutant (HAP), to demonstrate compliance with the Ohio EPA's "Air Toxic Policy" was not necessary because this emissions unit is subject to a federal Maximum Achievable Control Technology rule, 40 CFR, Part 63, Subpart WWWW, which was promulgated on April 21, 2003, which is less than 5 years ago.
2. Physical changes to or changes in the method of operation of the emissions unit after its installation or modification could affect the parameters used to determine whether or not the "Air Toxic Policy" is satisfied. Consequently, prior to making a change that could impact such parameters, the permittee shall conduct an evaluation to determine that the "Air Toxic Policy" will still be satisfied. If, upon evaluation, the permittee determines that the "Air Toxic Policy" will not be satisfied, the permittee will not make

the change. Changes that can affect the parameters used in applying the "Air Toxic Policy" include the following:

- a. changes in the composition of the materials used or the use of new materials, that would result in the emission of a compound or chemical with a lower Threshold Limit Value (TLV) than the lowest TLV previously modeled, as documented in the most current version of the American Conference of Governmental Industrial Hygienists' (ACGIH's) handbook entitled "TLVs and BEIs" ("Threshold Limit Values for Chemical Substances and Physical Agents, Biological Exposure Indices");
 - b. changes in the composition of the materials, or use of new materials, that would result in an increase in emissions of any pollutant with a listed TLV that was proposed in the application and modeled; and
 - c. physical changes to the emissions unit or its exhaust parameters (e.g., increased/ decreased exhaust flow, changes in stack height, changes in stack diameter, etc.).
3. If the permittee determines that the "Air Toxic Policy" will be satisfied for the above changes, the Ohio EPA will not consider the change(s) to be a "modification" under OAC rule 3745-31-01 solely due to the emissions of any type of toxic air contaminant not previously emitted, and a modification of the existing permit to install will not be required, even if the toxic air contaminant emissions are greater than the de minimis level in OAC rule 3745-15-05. If the change(s) meet(s) the definition of a "modification" under other provisions of the rule, then the permittee shall obtain a final permit to install prior to the change.
 4. The permittee shall collect, record, and retain the following information when it conducts evaluations to determine that the changed emissions unit will still satisfy the "Air Toxic Policy":
 - a. a description of the parameters changed (composition of materials, new pollutants emitted, change in stack/exhaust parameters, etc.);
 - b. documentation of the evaluation and determination that the changed emissions unit still satisfies the "Air Toxic Policy"; and
 - c. where computer modeling is performed, a copy of the resulting computer model runs that show the results of the application of the "Air Toxic Policy" for the

Part III - SPECIAL TERMS AND CONDITIONS FOR SPECIFIC EMISSIONS UNIT(S)

A. State and Federally Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operations(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
P034 - Compression mold press no. 26 with a slitter for reinforced plastic composite parts	OAC rule 3745-31-05(A)(3) 40 CFR, Part 63, Subpart WWWW	Organic compound (OC) emissions shall not exceed 1.55 lbs/hr and 6.79 tons/year. The requirements of this rule also include compliance with the requirements of 40 CFR Parts 63.5780 - 63.5935. See section A.2.a. See section A.I.2.a. and Part II, section A of this permit.

2. Additional Terms and Conditions

- 2.a The following work practice(s) shall be employed to minimize the generation of hazardous air pollutant (HAP, i.e. styrene) emissions as required in 40 CFR 63.5805(a) and specified in Table 4 of 40 CFR, Part 63, Subpart WWWW:
 - i. only one charge of molding compound may be uncovered, unwrapped, or exposed per mold cycle per compression/injection molding press; and
 - ii. mold compound materials may be uncovered before slitting, but must be recovered after slitting.

PTI A

Issued: 8/29/2006

Emissions Unit ID: P033

II. Operational Restrictions

None.

III. Monitoring and/or Recordkeeping Requirements

1. Except as otherwise provided in this section, the permittee shall perform inspections of production material charges associated with this emissions unit on a once per day basis. The purpose of the inspections is to ensure that work practice(s) to minimize HAP emissions are employed. The inspections shall be performed during representative, normal operating conditions.
2. The permittee shall collect and record the following information for each day for this emissions unit:
 - a. The company identification for each sheet mold compound (SMC) employed;
 - b. The weight of each sheet mold compound (SMC) employed, in pounds;
 - c. The weight of all sheet mold compound (SMC) employed, in pounds;
 - d. The total OC emission rate for all the materials employed, in pounds, determined based upon the following equation:

$$E_{OC} = \text{summation of } (W_{i_SMC} \times EF).$$

where:

E_{OC} = the daily, OC emissions for all materials, in pounds per day.

W_{i_SMC} = the weight of SMC "i" employed, in pounds per day, from section A.III.2.b.

EF = emission factor for styrene emissions from the mold press, which is 0.00134 pounds per pound of mold compound materials, as determined from a pre-1997 Society of Plastics Industry report, "Styrene Emissions during the Charging and Molding Cycle;"

- e. The actual number of hours the emissions unit was in operation;
- f. The average hourly OC emission rate for all materials employed, i.e., (d)/(e), in pounds per hour (average);
- g. The date and reason any required inspection was not performed; and

- i. Company name and address;
 - ii. Statement by a responsible official with that official's name, title, and signature, certifying the truth, accuracy, and completeness of the content of the report;
 - iii. Date of the report and beginning and ending dates of the reporting period;
 - iv. The total operating time of this emissions unit; and
 - v. Information on the number, duration, and cause of deviations (including unknown cause if applicable), and the corrective action(s) taken.
- c. A semi-annual compliance report shall be submitted to the Ohio EPA Northeast District Office every six months, i.e. by January 31 and July 31 of each year for the previous six calendar months, as required by 40 CFR 63.5910(b)(3) and 40 CFR 63.5910(b)(4).
4. The permittee shall submit annual reports which specify the total OC emissions from this emissions unit for the previous calendar year, in tons. These reports shall be submitted by January 31 of each year.

V. Testing Requirements

1. Compliance with the allowable emissions limitations in section A.1. of these terms and conditions shall be determined in accordance with the following methods:

- a. Emissions Limitation: 1.55 lbs OC/hr

Applicable Compliance Method: Compliance with the hourly allowable OC emission limitation above shall be demonstrated in accordance with the record keeping requirements specified in section A.III.2 of this permit.

If required, the permittee shall demonstrate compliance with the hourly allowable OC emission limitation above through emission tests performed in accordance with 40 CFR Part 60, Appendix A, Method 25A or Method 18, or American Society for Testing and Materials (ASTM) D6420-99, as appropriate, or an equivalent alternate method as approved by Ohio EPA.

- b. Emissions Limitation: 6.79 TPY OC

Compliance with the annual allowable OC emission limitation above shall be based on the sum of the daily OC emission rates from the mold compounds, from section A.III.2.d of this permit, for the calendar year, divided by 2,000 pounds/ton.

Also, as long as compliance with the hourly allowable OC emission limitation is maintained, compliance with the annual allowable OC emission limitation shall be ensured.

2. Any analysis of a material shall be based on the material as employed, including the addition of any monomer to the material. The permittee shall determine the composition of the material by formulation data supplied by the manufacturer or from data determined by an analysis of each material, as employed, by U.S. EPA Reference Method 24 - Determination of Volatile Matter Content, Water Content, Density, Volume Solids and Weight Solids of Surface Coatings, as referenced in 40 CFR Part 60, Appendix A. If formulation data is employed, Ohio EPA may require the permittee to have a Reference Method 24 analysis or an equivalent, alternative method (as approved by Ohio EPA) performed on the material(s).

The total organic HAP content may be determined by an analysis of the material, as employed, by U.S. EPA Reference Method 311 - Analysis of Hazardous Air Pollutant Compounds in Paints and Coatings by Direct Injection into a Gas Chromatograph as referenced in 40 CFR Part 63, Appendix A. The styrene content, ethyl acrylate content and methyl methacrylate content may be determined by an analysis of the material, as employed, by ASTM D 4827-93 or ASTM D 4747-87. Equivalent, alternative method(s) (as approved by Ohio EPA) may be performed on the material(s).

VI. Miscellaneous Requirements

None.
