RE: PRELIMINARY PROPOSED AIR POLLUTION TITLE V PERMIT
Permit Type: Initial

Dear Permit Holder:

Enclosed is the Ohio EPA Preliminary Proposed Title V permit that was issued in draft form on 1/20/2011. The comment period for the Draft permit has ended. We are now ready to submit this permit to U.S. EPA for approval.

We are submitting this for your review and comment. If you do not agree with the Preliminary Proposed Title V permit as written, you now have the opportunity to raise your concerns. This permit can be accessed electronically on the Division of Air Pollution Control (DAPC) Web page, www.epa.ohio.gov/dapc by clicking the "Issued Air Pollution Control Permits" link. Comments will be accepted as a marked-up copy of the permit or in narrative format. Any comments must be sent to the following within 14 days of your receipt of this letter:

Andrew Hall
Permit Review/Development Section
Ohio EPA, DAPC
50 West Town Street, Suite 700
P.O. Box 1049
Columbus, Ohio 43216-1049

and Ohio EPA DAPC, Northeast District Office
2110 East Aurora Road
Twinsburg, OH 44087

If you believe that it is necessary to have an informal conference with us, then, as part of your written comments, you should request a conference concerning the written comments.

If comments are not submitted within 14 days of your receipt of this letter, we will forward the proposed permit to U.S. EPA for approval. All comments received will be carefully considered before proceeding with the proposed permit.

Sincerely,

Michael W. Ahern, Manager
Permit Issuance and Data Management Section, DAPC

Cc: Ohio EPA DAPC, Northeast District Office

Response to Comments

Response to comments for: Title V Permit

Table with 2 columns: Field Name, Value. Fields include Facility ID, Facility Name, Facility Description, Facility Address, Permit #, and public notice details.

The following comments were received during the comment period specified. Ohio EPA reviewed and considered all comments received during the public comment period. By law, Ohio EPA has authority to consider specific issues related to protection of the environment and public health.

In an effort to help you review this document, the questions are grouped by topic and organized in a consistent format. PDF copies of the original comments in the format submitted are available upon request.

1. Topic: SOB

Comment:

The Comments column of the Statement of Basis is blank. Therefore, the permit does not provide the legal and factual basis, as required by 40 C.R.F. § 70.7(a)(1)(5), for the permit's monitoring, reporting, recordkeeping, and emissions testing requirements.

Response:

The comment column of the Avery Dennison, Specialty Tape Division, Building 14 &19 Statement of Basis has been revised and is included in this Response to Comments document.

2. Topic: Incorporation by Reference MACT

Comment:

Part B.2 states that the applicable requirements of 40 C.F.R. Par 63, Subpart JJJJ “are hereby incorporated into this permit as if fully rewritten.” This is not a proper method of incorporating a Maximum Available Control Technology (MACT) standard. Only the applicable parts of the MACT should be included in the permit. Some of the MACT terms are specified in Part C; if there are other applicable MACT terms, then they should be specified in Part C as well. The statement of full incorporation should be omitted from Part B.

Response: The statement of full incorporation has been omitted.

3. Topic: BAT emission rates for NOx and CO

Comment:

Page 34, Additional Terms and Conditions (a) states that “the permittee has satisfied the Best Available Technology (BAT) requirements for [nitrous oxides] and [carbon monoxide] pursuant to [Ohio Administrative Code] paragraph 3745-31-05(A)(3), as effective November 30, 2001, in this permit.” This term is not practically enforceable. As noted in EPA’s January 31, 2011 Order responding to Petition Number V-2009-03 to object to the Title V permit for United States Steel Corporation Gary Works, Section 504(a) of the Clean Air Act requires each Title V permit to include enforceable emissions limitations and standards. The above permit term merely states that the permittee has satisfied an applicable requirement without explaining what the permittee must do to continue complying with the requirement. The permit term should be rewritten as a clear legal obligation.

Response:

BAT is the allowable which is based on the potential to emit which is based on maximum operating hours. A clarifying statement has been added to section b)(2)a for emissions unit K005.

4. Topic: Venting configuration

Comment:

Page 34, Additional Terms and Conditions (c) states that “this emission unit is not capable of routinely venting emissions from coating to atmosphere.” This term is not practically enforceable. If compliance with applicable requirements depends on venting configuration, then this term should be rewritten to require the permittee to maintain the venting configuration. Otherwise, the term should be omitted.

Response:

The following term has been added to address the above concern:

In the event that this venting configuration is modified such that this emissions unit is capable of venting emissions from coating to atmosphere, the Northeast District of the Ohio EPA shall be notified, and, if required, an appropriate permit application shall be submitted.

5. Topic: Permanent Total Enclosure

Comment:

Page 35, Additional Terms and Conditions (d) and (j) are redundant. Term (d) requires maintaining the permanent total enclosure (PTE) to capture all Volatile Organic Compound (VOC) emissions during all solvent-based coating operations. Term (j) simply requires the PTE to capture all VOC emissions. Since Term (j) is more stringent, Term (d) should be omitted.

Response: Both terms were condensed into one.

6, Topic: No record keeping

Comment:

The permit does not contain monitoring, recordkeeping and reporting requirements for nitrous oxides and carbon monoxide for unit K005. Such requirements must be added to the permit in order to comply with 40 C.F.R. § 70.6(a)(3)(B).

Response:

BAT is the allowable which is based on the potential to emit which is based on maximum operating hours. No monitoring or record keeping is required.

Facility ID: 0243081177
Facility Description: Manufacturer of pressure sensitive tape and film
Application Number(s): A0037612
Permit Number: P0105953
Permit Description: Manufacturer of pressure sensitive tape and film
Permit Type: Initial
Issue Date: 3/17/2011
Effective Date: To be entered upon final issuance
Expiration Date: To be entered upon final issuance
Superseded Permit Number:

This document constitutes issuance of an OAC Chapter 3745-77 Title V permit to:

Avery Dennison, Specialty Tape Division, Bldg. 14&19
7100 Lindsay Drive
Mentor, OH 44060

Ohio EPA District Office or local air agency responsible for processing and administering your permit:

Ohio EPA DAPC, Northeast District Office
2110 East Aurora Road
Twinsburg, OH 44087
(330)425-9171

The above named entity is hereby granted a Title V permit pursuant to Chapter 3745-77 of the Ohio Administrative Code. This permit and the authorization to operate the air contaminant sources (emissions units) at this facility shall expire at midnight on the expiration date shown above. You will be sent a notice approximately 18 months prior to the expiration date regarding the renewal of this permit. If you do not receive a notice, please contact the Ohio EPA DAPC, Northeast District Office. If a renewal permit is not issued prior to the expiration date, the permittee may continue to operate pursuant to OAC rule 3745-77-08(E) and in accordance with the terms of this permit beyond the expiration date, if a timely renewal application is submitted. A renewal application will be considered timely if it is submitted no earlier than 18 months (540 days) and no later than 6 months (180 days) prior to the expiration date.

This permit is granted subject to the conditions attached hereto.

Ohio Environmental Protection Agency

Scott J. Nally
Director

A. Standard Terms and Conditions

Effective Date: To be entered upon final issuance

1. Federally Enforceable Standard Terms and Conditions

- a) All Standard Terms and Conditions are federally enforceable, with the exception of those listed below which are enforceable under State law only:
- (1) Standard Term and Condition A. 24., Reporting Requirements Related to Monitoring and Record Keeping Requirements of State-Only Enforceable Permit Terms and Conditions
 - (2) Standard Term and Condition A. 25., Records Retention Requirements for State-Only Enforceable Permit Terms and Conditions
 - (3) Standard Term and Condition A. 27., Scheduled Maintenance/Malfunction Reporting
 - (4) Standard Term and Condition A. 29., Additional Reporting Requirements When There Are No Deviations of Federally Enforceable Emission Limitations, Operational Restrictions, or Control Device Operating Parameter Limitations

(Authority for term: ORC 3704.036(A))

2. Monitoring and Related Record Keeping and Reporting Requirements

- a) Except as may otherwise be provided in the terms and conditions for a specific emissions unit (i.e., in section C. Emissions Unit Terms and Conditions of this Title V permit), the permittee shall maintain records that include the following, where applicable, for any required monitoring under this permit:
- (1) The date, place (as defined in the permit), and time of sampling or measurements.
 - (2) The date(s) analyses were performed.
 - (3) The company or entity that performed the analyses.
 - (4) The analytical techniques or methods used.
 - (5) The results of such analyses.
 - (6) The operating conditions existing at the time of sampling or measurement.

(Authority for term: OAC rule 3745-77-07(A)(3)(b)(i))

- b) Each record of any monitoring data, testing data, and support information required pursuant to this permit shall be retained for a period of five years from the date the record was created. Support information shall include all calibration and maintenance records and all original strip-chart recordings for continuous monitoring instrumentation, and copies of all reports required by this permit. Such records may be maintained in computerized form.

(Authority for term: OAC rule 3745-77-07(A)(3)(b)(ii))

- c) The permittee shall submit required reports in the following manner:

- (1) All reporting required in accordance with OAC rule 3745-77-07(A)(3)(c) for deviations caused by malfunctions shall be submitted in the following manner:

Any malfunction, as defined in OAC rule 3745-15-06(B)(1), shall be promptly reported to the Ohio EPA in accordance with OAC rule 3745-15-06. In addition, to fulfill the OAC rule 3745-77-07(A)(3)(c) deviation reporting requirements for malfunctions, written reports that identify each malfunction that occurred during each calendar quarter (including each malfunction reported only verbally in accordance with OAC rule 3745-15-06) shall be submitted (i.e., postmarked) by January 31, April 30, July 31, and October 31 of each year in accordance with Standard Term and Condition A.2.c)(2) below; and each report shall cover the previous calendar quarter. An exceedance of the visible emission limitations specified in OAC rule 3745-17-07(A)(1) that is caused by a malfunction is not a violation and does not need to be reported as a deviation if the owner or operator of the affected air contaminant source or air pollution control equipment complies with the requirements of OAC rule 3745-17-07(A)(3)(c).

In accordance with OAC rule 3745-15-06, a malfunction reportable under OAC rule 3745-15-06(B) is a deviation of the federally enforceable permit requirements. Even though verbal notifications and written reports are required for malfunctions pursuant to OAC rule 3745-15-06, the written reports required pursuant to this term must be submitted quarterly to satisfy the prompt reporting provision of OAC rule 3745-77-07(A)(3)(c).

In identifying each deviation caused by a malfunction, the permittee shall specify the emission limitation(s) (or control requirement(s)) for which the deviation occurred, describe each deviation, and provide the magnitude and duration of each deviation. For a specific malfunction, if this information has been provided in a written report that was submitted in accordance with OAC rule 3745-15-06, the permittee may simply reference that written report to identify the deviation. Nevertheless, all malfunctions, including those reported only verbally in accordance with OAC rule 3745-15-06, must be reported in writing on a quarterly basis.

Any scheduled maintenance, as referenced in OAC rule 3745-15-06(A)(1), that results in a deviation from a federally enforceable emission limitation (or control requirement) shall be reported in the same manner as described above for malfunctions.

(Authority for term: OAC rule 3745-77-07(A)(3)(c))

- (2) Except as may otherwise be provided in the terms and conditions for a specific emissions unit (i.e., in section C. Emissions Unit Terms and Conditions of this Title V permit or, in some cases, in section B. Facility-Wide Terms and Conditions of this Title V permit), all reporting required in accordance with OAC rule 3745-77-07(A)(3)(c) for deviations of the emission limitations, operational restrictions, and control device operating parameter limitations shall be submitted in the following manner:

Written reports of (a) any deviations from federally enforceable emission limitations, operational restrictions, and control device operating parameter limitations, (b) the probable cause of such deviations, and (c) any corrective actions or preventive measures taken, shall be promptly made to the appropriate Ohio EPA District Office or local air agency. Except as provided below, the written reports shall be submitted (i.e., postmarked) by January 31, April 30, July 31, and October 31 of each year; and each report shall cover the previous calendar quarter.

Effective Date: To be entered upon final issuance

In identifying each deviation, the permittee shall specify the emission limitation(s), operational restriction(s), and/or control device operating parameter limitation(s) for which the deviation occurred, describe each deviation, and provide the estimated magnitude and duration of each deviation.

These written deviation reports shall satisfy the requirements of OAC rule 3745-77-07(A)(3)(c) pertaining to the submission of monitoring reports every six months and to the prompt reporting of all deviations. Full compliance with OAC rule 3745-77-07(A)(3)(c) requires reporting of all other deviations of the federally enforceable requirements specified in the permit as required by such rule.

If an emissions unit has a deviation reporting requirement for a specific emission limitation, operational restriction, or control device operating parameter limitation that is not on a quarterly basis (e.g., within 30 days following the end of the calendar month, or within 30 or 45 days after the exceedance occurs), that deviation reporting requirement satisfies the reporting requirements specified in this Standard Term and Condition for that specific emission limitation, operational restriction, or control device parameter limitation. Following the provisions of that non-quarterly deviation reporting requirement will also satisfy (for the deviations so reported) the requirements of OAC rule 3745-77-07(A)(3)(c) pertaining to the submission of monitoring reports every six months and to the prompt reporting of all deviations, and additional quarterly deviation reports for that specific emission limitation, operational restriction, or control device parameter limitation are not required pursuant to this Standard Term and Condition.

See A.29 below if no deviations occurred during the quarter.
(*Authority for term: OAC rule 3745-77-07(A)(3)(c)*)

- (3) All reporting required in accordance with the OAC rule 3745-77-07(A)(3)(c) for other deviations of the federally enforceable permit requirements which are not reported in accordance with Standard Term and Condition A.2)c)(2) above shall be submitted in the following manner:

Unless otherwise specified by rule, written reports that identify deviations of the following federally enforceable requirements contained in this permit; Standard Terms and Conditions: A.3, A.4, A.5, A.7.e), A.8, A.13, A.15, A.19, A.20, A.21, and A.23 of this Title V permit, as well as any deviations from the requirements in section C. Emissions Unit Terms and Conditions of this Title V permit, and any monitoring, record keeping, and reporting requirements, which are not reported in accordance with Standard Term and Condition A.2.c)(2) above shall be submitted (i.e., postmarked) to the appropriate Ohio EPA District Office or local air agency by January 31 and July 31 of each year; and each report shall cover the previous six calendar months. Unless otherwise specified by rule, all other deviations from federally enforceable requirements identified in this permit shall be submitted annually as part of the annual compliance certification, including deviations of federally enforceable requirements not specifically addressed by permit or rule for the insignificant activities or emissions levels (IEU) identified in section B. Facility-Wide Terms and Conditions of this Title V permit. Annual reporting of deviations is deemed adequate to meet the deviation reporting requirements for IEUs unless otherwise specified by permit or rule.

In identifying each deviation, the permittee shall specify the federally enforceable requirement for which the deviation occurred, describe each deviation, and provide the magnitude and duration of each deviation.

Effective Date: To be entered upon final issuance

These semi-annual and annual written reports shall satisfy the reporting requirements of OAC rule 3745-77-07(A)(3)(c) for any deviations from the federally enforceable requirements contained in this permit that are not reported in accordance with Standard Term and Condition A.2.c)(2) above.

If no such deviations occurred during a six-month period, the permittee shall submit a semi-annual report which states that no such deviations occurred during that period.

(Authority for term: OAC rules 3745-77-07(A)(3)(c)(i) and (ii) and OAC rule 3745-77-07(A)(13)(b))

- (4) Each written report shall be signed by a responsible official certifying that, "based on information and belief formed after reasonable inquiry, the statements and information in the report (including any written malfunction reports required by OAC rule 3745-15-06 that are referenced in the deviation reports) are true, accurate, and complete."

(Authority for term: OAC rule 3745-77-07(A)(3)(c)(iv))

- (5) Reports of any required monitoring and/or record keeping information shall be submitted to Ohio EPA DAPC, Northeast District Office.

(Authority for term: OAC rule 3745-77-07(A)(3)(c))

3. Scheduled Maintenance

Any scheduled maintenance of air pollution control equipment shall be performed in accordance with paragraph (A) of OAC rule 3745-15-06. Except as provided in OAC rule 3745-15-06(A)(3), any scheduled maintenance necessitating the shutdown or bypassing of any air pollution control system(s) shall be accompanied by the shutdown of the emissions unit(s) that is (are) served by such control system(s). Any scheduled maintenance, as defined in OAC rule 3745-15-06(A)(1), that results in a deviation from a federally enforceable emission limitation (or control requirement) shall be reported in the same manner as described for malfunctions in Standard Term and Condition A.2.c)(1) above.

(Authority for term: OAC rule 3745-77-07(A)(3)(c))

4. Risk Management Plans

If applicable, the permittee shall develop and register a risk management plan pursuant to section 112(r) of the Clean Air Act, as amended, 42 U.S.C. § 7401 et seq. ("Act"); and, pursuant to 40 C.F.R. 68.215(a), the permittee shall submit either of the following:

- a) a compliance plan for meeting the requirements of 40 C.F.R. Part 68 by the date specified in 40 C.F.R. 68.10(a) and OAC 3745-104-05(A); or
- b) as part of the compliance certification submitted under 40 C.F.R. 70.6(c)(5), a certification statement that the source is in compliance with all requirements of 40 C.F.R. Part 68 and OAC Chapter 3745-104, including the registration and submission of the risk management plan.

(Authority for term: OAC rule 3745-77-07(A)(4))

5. Title IV Provisions

If the permittee is subject to the requirements of 40 CFR Part 72 concerning acid rain, the permittee shall ensure that any affected emissions unit complies with those requirements. Emissions exceeding

Effective Date: To be entered upon final issuance

any allowances that are lawfully held under Title IV of the Act, or any regulations adopted thereunder, are prohibited.

(Authority for term: OAC rule 3745-77-07(A)(5))

6. Severability Clause

A determination that any term or condition of this permit is invalid shall not invalidate the force or effect of any other term or condition thereof, except to the extent that any other term or condition depends in whole or in part for its operation or implementation upon the term or condition declared invalid.

(Authority for term: OAC rule 3745-77-07(A)(6))

7. General Requirements

- a) The permittee must comply with all terms and conditions of this permit. Any noncompliance with the federally enforceable terms and conditions of this permit constitutes a violation of the Act, and is grounds for enforcement action or for permit revocation, revocation and reissuance, or modification, or for denial of a permit renewal application.
- b) It shall not be a defense for the permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the federally enforceable terms and conditions of this permit.
- c) This permit may be modified, reopened, revoked, or revoked and reissued, for cause, in accordance with Standard Term and Condition A.11 below. The filing of a request by the permittee for a permit modification, revocation and reissuance, or revocation, or of a notification of planned changes or anticipated noncompliance does not stay any term and condition of this permit.
- d) This permit does not convey any property rights of any sort, or any exclusive privilege.
- e) The permittee shall furnish to the Director of the Ohio EPA, or an authorized representative of the Director, upon receipt of a written request and within a reasonable time, any information that may be requested to determine whether cause exists for modifying, reopening or revoking this permit or to determine compliance with this permit. Upon request, the permittee shall also furnish to the Director or an authorized representative of the Director, copies of records required to be kept by this permit. For information claimed to be confidential in the submittal to the Director, if the Administrator of the U.S. EPA requests such information, the permittee may furnish such records directly to the Administrator along with a claim of confidentiality.
- f) Except as otherwise indicated below, this Title V permit, or permit modification, is effective for five years from the original effective date specified in the permit. In the event that this facility becomes eligible for non-title V permits, this permit shall cease to be enforceable when:
 - (1) the permittee submits an approved facility-wide potential to emit analysis supporting a claim that the facility no longer meets the definition of a "major source" as defined in OAC rule 3745-77-01(W) based on the permanent shutdown and removal of one or more emissions units identified in this permit; or

Effective Date: To be entered upon final issuance

- (2) the permittee no longer meets the definition of a "major source" as defined in OAC rule 3745-77-01(W) based on obtaining restrictions on the facility-wide potential(s) to emit that are federally enforceable or legally and practically enforceable ; or
- (3) a combination of (1) and (2) above.

The permittee shall continue to comply with all applicable OAC Chapter 3745-31 requirements for all regulated air contaminant sources once this permit ceases to be enforceable. The permittee shall comply with any residual requirements, such as quarterly deviation reports, semi-annual deviation reports, and annual compliance certifications covering the period during which this Title V permit was enforceable. All records relating to this permit must be maintained in accordance with law.

(Authority for term: OAC rule 3745-77-01(W), OAC rule 3745-77-07(A)(3)(b)(ii), OAC rule 3745-77(A)(7))

8. Fees

The permittee shall pay fees to the Director of the Ohio EPA in accordance with ORC section 3745.11 and OAC Chapter 3745-78.

(Authority for term: OAC rule 3745-77-07(A)(8))

9. Marketable Permit Programs

No revision of this permit is required under any approved economic incentive, marketable permits, emissions trading, and other similar programs or processes for changes that are provided for in this permit.

(Authority for term: OAC rule 3745-77-07(A)(9))

10. Reasonably Anticipated Operating Scenarios

The permittee is hereby authorized to make changes among operating scenarios authorized in this permit without notice to the Ohio EPA, but, contemporaneous with making a change from one operating scenario to another, the permittee must record in a log at the permitted facility the scenario under which the permittee is operating. The permit shield provided in these standard terms and conditions shall apply to all operating scenarios authorized in this permit.

(Authority for term: OAC rule 3745-77-07(A)(10))

11. Reopening for Cause

This Title V permit will be reopened prior to its expiration date under the following conditions:

- a) Additional applicable requirements under the Act become applicable to one or more emissions units covered by this permit, and this permit has a remaining term of three or more years. Such a reopening shall be completed not later than eighteen (18) months after promulgation of the applicable requirement. No such reopening is required if the effective date of the requirement is later than the date on which the permit is due to expire, unless the original permit or any of its terms and conditions has been extended pursuant to paragraph (E)(1) of OAC rule 3745-77-08.

Effective Date: To be entered upon final issuance

- b) This permit is issued to an affected source under the acid rain program and additional requirements (including excess emissions requirements) become applicable. Upon approval by the Administrator, excess emissions offset plans shall be deemed to be incorporated into the permit, and shall not require a reopening of this permit.
- c) The Director of the Ohio EPA or the Administrator of the U.S. EPA determines that the federally applicable requirements in this permit are based on a material mistake, or that inaccurate statements were made in establishing the emissions standards or other terms and conditions of this permit related to such federally applicable requirements.
- d) The Administrator of the U.S. EPA or the Director of the Ohio EPA determines that this permit must be revised or revoked to assure compliance with the applicable requirements.

(Authority for term: OAC rules 3745-77-07(A)(12) and 3745-77-08(D))

12. Federal and State Enforceability

Only those terms and conditions designated in this permit as federally enforceable, that are required under the Act, or any of its applicable requirements, including relevant provisions designed to limit the potential to emit of a source, are enforceable by the Administrator of the U.S. EPA, the State, and citizens under the Act. All other terms and conditions of this permit shall not be federally enforceable and shall be enforceable under State law only.

(Authority for term: OAC rule 3745-77-07(B))

13. Compliance Requirements

- a) Any document (including reports) required to be submitted and required by a federally applicable requirement in this Title V permit shall include a certification by a responsible official that, based on information and belief formed after reasonable inquiry, the statements in the document are true, accurate, and complete.
- b) Upon presentation of credentials and other documents as may be required by law, the permittee shall allow the Director of the Ohio EPA or an authorized representative of the Director to:
 - (1) At reasonable times, enter upon the permittee's premises where a source is located or the emissions-related activity is conducted, or where records must be kept under the conditions of this permit.
 - (2) Have access to and copy, at reasonable times, any records that must be kept under the conditions of this permit, subject to the protection from disclosure to the public of confidential information consistent with paragraph (E) of OAC rule 3745-77-03.
 - (3) Inspect at reasonable times any facilities, equipment (including monitoring and air pollution control equipment), practices, or operations regulated or required under this permit.
 - (4) As authorized by the Act, sample or monitor at reasonable times substances or parameters for the purpose of assuring compliance with the permit and applicable requirements.
- c) The permittee shall submit progress reports to the appropriate Ohio EPA District Office or local air agency concerning any schedule of compliance for meeting an applicable requirement.

Effective Date: To be entered upon final issuance

Progress reports shall be submitted semiannually or more frequently if specified in the applicable requirement or by the Director of the Ohio EPA. Progress reports shall contain the following:

- (1) Dates for achieving the activities, milestones, or compliance required in any schedule of compliance, and dates when such activities, milestones, or compliance were achieved.
 - (2) An explanation of why any dates in any schedule of compliance were not or will not be met, and any preventive or corrective measures adopted.
- d) Compliance certifications concerning the terms and conditions contained in this permit that are federally enforceable emission limitations, standards, or work practices, shall be submitted to the Director (the appropriate Ohio EPA District Office or local air agency) and the Administrator of the U.S. EPA in the following manner and with the following content:
- (1) Compliance certifications shall be submitted annually on a calendar year basis. The annual certification shall be submitted (i.e., postmarked) on or before April 30th of each year during the permit term.
 - (2) Compliance certifications shall include the following:
 - a. An identification of each term or condition of this permit that is the basis of the certification.
 - b. The permittee's current compliance status.
 - c. Whether compliance was continuous or intermittent.
 - d. The method(s) used for determining the compliance status of the source currently and over the required reporting period.
 - e. Such other facts as the Director of the Ohio EPA may require in the permit to determine the compliance status of the source.
 - (3) Compliance certifications shall contain such additional requirements as may be specified pursuant to sections 114(a)(3) and 504(b) of the Act.

(Authority for term: OAC rules 3745-77-07(C)(1),(2),(4) and (5) and ORC section 3704.03(L))

14. Permit Shield

- a) Compliance with the terms and conditions of this permit (including terms and conditions established for alternate operating scenarios, emissions trading, and emissions averaging, but excluding terms and conditions for which the permit shield is expressly prohibited under OAC rule 3745-77-07) shall be deemed compliance with the applicable requirements identified and addressed in this permit as of the date of permit issuance.

Effective Date: To be entered upon final issuance

- b) This permit shield provision shall apply to any requirement identified in this permit pursuant to OAC rule 3745-77-07(F)(2), as a requirement that does not apply to the source or to one or more emissions units within the source.

(Authority for term: OAC rule 3745-77-07(F))

15. Operational Flexibility

The permittee is authorized to make the changes identified in OAC rule 3745-77-07(H)(1)(a) to (H)(1)(c) within the permitted stationary source without obtaining a permit revision, if such change is not a modification under any provision of Title I of the Act [as defined in OAC rule 3745-77-01(JJ)], and does not result in an exceedance of the emissions allowed under this permit (whether expressed therein as a rate of emissions or in terms of total emissions), and the permittee provides the Administrator of the U.S. EPA and the appropriate Ohio EPA District Office or local air agency with written notification within a minimum of seven days in advance of the proposed changes, unless the change is associated with, or in response to, emergency conditions. If less than seven days notice is provided because of a need to respond more quickly to such emergency conditions, the permittee shall provide notice to the Administrator of the U.S. EPA and the appropriate District Office of the Ohio EPA or local air agency as soon as possible after learning of the need to make the change. The notification shall contain the items required under OAC rule 3745-77-07(H)(2)(d).

(Authority for term: OAC rules 3745-77-07(H)(1) and (2))

16. Emergencies

The permittee shall have an affirmative defense of emergency to an action brought for noncompliance with technology-based emission limitations if the conditions of OAC rule 3745-77-07(G)(3) are met. This emergency defense provision is in addition to any emergency or upset provision contained in any applicable requirement.

(Authority for term: OAC rule 3745-77-07(G))

17. Off-Permit Changes

The owner or operator of a Title V source may make any change in its operations or emissions at the source that is not specifically addressed or prohibited in the Title V permit, without obtaining an amendment or modification of the permit, provided that the following conditions are met:

- a) The change does not result in conditions that violate any applicable requirements or that violate any existing federally enforceable permit term or condition.
- b) The permittee provides contemporaneous written notice of the change to the Director and the Administrator of the U.S. EPA, except that no such notice shall be required for changes that qualify as insignificant emissions levels or activities as defined in OAC rule 3745-77-01(U). Such written notice shall describe each such change, the date of such change, any change in emissions or pollutants emitted, and any federally applicable requirement that would apply as a result of the change.
- c) The change shall not qualify for the permit shield under OAC rule 3745-77-07(F).
- d) The permittee shall keep a record describing all changes made at the source that result in emissions of a regulated air pollutant subject to an applicable requirement, but not otherwise regulated under the permit, and the emissions resulting from those changes.

- e) The change is not subject to any applicable requirement under Title IV of the Act or is not a modification under any provision of Title I of the Act.

Paragraph (I) of rule 3745-77-07 of the Administrative Code applies only to modification or amendment of the permittee's Title V permit. The change made may require a permit-to-install under Chapter 3745-31 of the Administrative Code if the change constitutes a modification as defined in that Chapter. Nothing in paragraph (I) of rule 3745-77-07 of the Administrative Code shall affect any applicable obligation under Chapter 3745-31 of the Administrative Code.

(Authority for term: OAC rule 3745-77-07(I))

18. Compliance Method Requirements

Nothing in this permit shall alter or affect the ability of any person to establish compliance with, or a violation of, any applicable requirement through the use of credible evidence to the extent authorized by law. Nothing in this permit shall be construed to waive any defenses otherwise available to the permittee, including but not limited to, any challenge to the Credible Evidence Rule (see 62 Fed. Reg. 8314, Feb. 24, 1997), in the context of any future proceeding.

(This term is provided for informational purposes only.)

19. Insignificant Activities or Emissions Levels

Each IEU that has one or more applicable requirements shall comply with those applicable requirements.

(Authority for term: OAC rule 3745-77-07(A)(1))

20. Permit to Install Requirement

Prior to the "installation" or "modification" of any "air contaminant source," as those terms are defined in OAC rule 3745-31-01, a permit to install must be obtained from the Ohio EPA pursuant to OAC Chapter 3745-31.

(Authority for term: OAC rule 3745-77-07(A)(1))

21. Air Pollution Nuisance

The air contaminants emitted by the emissions units covered by this permit shall not cause a public nuisance, in violation of OAC rule 3745-15-07.

(Authority for term: OAC rule 3745-77-07(A)(1))

22. Permanent Shutdown of an Emissions Unit

The permittee may notify Ohio EPA of any emissions unit that is permanently shut down by submitting a certification from the responsible official that identifies the date on which the emissions unit was permanently shut down. Authorization to operate the affected emissions unit shall cease upon the date certified by the responsible official that the emissions unit was permanently shut down.

After the date on which an emissions unit is permanently shut down (i.e., that has been physically removed from service or has been altered in such a way that it can no longer operate without a

Effective Date: To be entered upon final issuance

subsequent "modification" or "installation" as defined in OAC Chapter 3745-31 and therefore ceases to meet the definition of an "emissions unit" as defined in OAC rule 3745-77-01(O)), rendering existing permit terms and conditions irrelevant, the permittee shall not be required, after the date of the certification and submission to Ohio EPA, to meet any Title V permit requirements applicable to that emissions unit, except for any residual requirements, such as the quarterly deviation reports, semi-annual deviation reports and annual compliance certification covering the period during which the emissions unit last operated. All records relating to the shutdown emissions unit, generated while the emissions unit was in operation, must be maintained in accordance with law.

No emissions unit certified by the responsible official as being permanently shut down may resume operation without first applying for and obtaining a permit to install pursuant to OAC Chapter 3745-31.

(Authority for term: OAC rule 3745-77-01)

23. Title VI Provisions

If applicable, the permittee shall comply with the standards for recycling and reducing emissions of ozone depleting substances pursuant to 40 CFR Part 82, Subpart F, except as provided for motor vehicle air conditioners in Subpart B of 40 CFR Part 82:

- a) Persons opening appliances for maintenance, service, repair, or disposal must comply with the required practices specified in 40 CFR 82.156.
- b) Equipment used during the maintenance, service, repair, or disposal of appliances must comply with the standards for recycling and recovery equipment specified in 40 CFR 82.158.
- c) Persons performing maintenance, service, repair, or disposal of appliances must be certified by an approved technician certification program pursuant to 40 CFR 82.161.

(Authority for term: OAC rule 3745-77-01(H)(11))

24. Reporting Requirements Related to Monitoring and Record Keeping Requirements Under State Law Only

The permittee shall submit required reports in the following manner:

- a) Reports of any required monitoring and/or record keeping information shall be submitted to the appropriate Ohio EPA District Office or local air agency.
- b) Except as otherwise may be provided in the terms and conditions for a specific emissions unit, quarterly written reports of (i) any deviations (excursions) from emission limitations, operational restrictions, and control device operating parameter limitations that have been detected by the testing, monitoring, and record keeping requirements specified in this permit, (ii) the probable cause of such deviations, and (iii) any corrective actions or preventive measures which have been or will be taken, shall be submitted to the appropriate Ohio EPA District Office or local air agency. In identifying each deviation, the permittee shall specify the applicable requirement for which the deviation occurred, describe each deviation, and provide the magnitude and duration of each deviation. If no deviations occurred during a calendar quarter, the permittee shall submit a quarterly report, which states that no deviations occurred during that quarter. The reports

Effective Date: To be entered upon final issuance shall be submitted (i.e., postmarked) quarterly, by January 31, April 30, July 31, and October 31 of each year and shall cover the previous calendar quarters. (These quarterly reports shall exclude deviations resulting from malfunctions reported in accordance with OAC rule 3745-15-06.)

25. Records Retention Requirements Under State Law Only

Each record of any monitoring data, testing data, and support information required pursuant to this permit shall be retained for a period of five years from the date the record was created. Support information shall include, but not be limited to, all calibration and maintenance records and all original strip-chart recordings for continuous monitoring instrumentation, and copies of all reports required by this permit. Such records may be maintained in computerized form.

26. Inspections and Information Requests

The Director of the Ohio EPA, or an authorized representative of the Director, may, subject to the safety requirements of the permittee and without undue delay, enter upon the premises of this source at any reasonable time for purposes of making inspections, conducting tests, examining records or reports pertaining to any emission of air contaminants, and determining compliance with any applicable State air pollution laws and regulations and the terms and conditions of this permit. The permittee shall furnish to the Director of the Ohio EPA, or an authorized representative of the Director, upon receipt of a written request and within a reasonable time, any information that may be requested to determine whether cause exists for modifying, reopening or revoking this permit or to determine compliance with this permit. Upon verbal or written request, the permittee shall also furnish to the Director of the Ohio EPA, or an authorized representative of the Director, copies of records required to be kept by this permit.

(Authority for term: OAC rule 3745-77-07(C))

27. Scheduled Maintenance/Malfunction Reporting

Any scheduled maintenance of air pollution control equipment shall be performed in accordance with paragraph (A) of OAC rule 3745-15-06. The malfunction of any emissions units or any associated air pollution control system(s) shall be reported to the appropriate Ohio EPA District Office or local air agency in accordance with paragraph (B) of OAC rule 3745-15-06. Except as provided in that rule, any scheduled maintenance or malfunction necessitating the shutdown or bypassing of any air pollution control system(s) shall be accompanied by the shutdown of the emissions unit(s) that is (are) served by such control system(s).

28. Permit Transfers

Any transferee of this permit shall assume the responsibilities of the prior permit holder. The appropriate Ohio EPA District Office or local air agency must be notified in writing of any transfer of this permit.

(Authority for term: OAC rule 3745-77-01(C))

29. Additional Reporting Requirements When There Are No Deviations of Federally Enforceable Emission Limitations, Operational Restrictions, or Control Device Operating Parameter Limitations

If no emission limitation (or control requirement), operational restriction and/or control device parameter limitation deviations occurred during a calendar quarter, the permittee shall submit a quarterly report,

Effective Date: To be entered upon final issuance

which states that no deviations occurred during that quarter. The reports shall be submitted (i.e., postmarked) by January 31, April 30, July 31, and October 31 of each year; and each report shall cover the previous calendar quarter.

The permittee is not required to submit a quarterly report which states that no deviations occurred during that quarter for the following situations:

- a) where an emissions unit has deviation reporting requirements for a specific emission limitation, operational restriction, or control device parameter limitation that override the deviation reporting requirements specified in Standard Term and Condition A.2.c)(2); or
- b) where an uncontrolled emissions unit has no monitoring, record keeping, or reporting requirements and the emissions unit's applicable emission limitations are established at the potentials to emit; or
- c) where the company's responsible official has certified that an emissions unit has been permanently shut down.

B. Facility-Wide Terms and Conditions

Effective Date: To be entered upon final issuance

1. All the following facility-wide terms and conditions are federally enforceable with the exception of those listed below which are enforceable under state law only:
 - a) None.
2. The following emissions units contained in this permit are subject to 40 CFR Part 63, Subpart JJJJ: K001, K003 and K005. The complete MACT requirements, including the MACT General Provisions, may be accessed via the internet from the Electronic Code of Federal Regulations (e-CFR) website <http://efcr.gpoaccess.gov> (<http://efcr.gpoaccess.gov/>) or by contacting the Ohio EPA Northeast District Office.
3. The following insignificant emissions units located at this facility are exempt from permit requirements because they are not subject to any applicable requirements (as defined in OAC rule 3745-77-01(H) or because they meet the “de minimis” criteria established in OAC rule 3745-15-05:

K007: Arsoma Press line processing printing with non-VOC UV cured inks;

P004: 7100-1 Vinyl film perforation unit (Building #14); and

P005: I-10 coater solvent based wash tank for cleaning coating parts.

Each insignificant emissions unit at this facility must comply with all applicable State and federal regulations, as well as any emission limitations and/or control requirements contained within a permit to install (PTI) for this emissions unit.

C. Emissions Unit Terms and Conditions

1. K001, I-4 HOT MELT COATER

Operations, Property and/or Equipment Description:

Hot melt adhesive die coating line and associated equipment used to melt, blend, and apply adhesive compound paper or plastic film, Building #14

- a) The following emissions unit terms and conditions are federally enforceable with the exception of those listed below which are enforceable under state law only.
(1) None.
b) Applicable Emissions Limitations and/or Control Requirements
(1) The specific operations(s), property, and/or equipment that constitute each emissions unit along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from each unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

Table with 2 columns: Applicable Rules/Requirements and Applicable Emissions Limitations/Control Measures. Rows a-f detailing VOC emissions rules and control measures.

(2) Additional Terms and Conditions

- a. The permittee has satisfied the BAT requirements for VOCs pursuant to OAC paragraph 3745-31-05(A)(3), as effective November 30, 2001, in this permit. On December 1, 2006, paragraph (A)(3) of OAC rule 3745-31-05 was revised to conform to ORC changes effective August 3, 2006 (S.B. 265 changes), such that BAT is no longer required by state regulations for NAAQS pollutants less than ten tons per year. However, that rule revision has not yet been approved by U.S. EPA as a revision to Ohio's State Implementation Plan (SIP). Therefore, until the SIP revision occurs and the U.S. EPA approves the revisions to OAC rule 3745-31-05, the requirements to satisfy BAT still exists as part of the federally-approved SIP for Ohio. Once U.S. EPA approves the December 1, 2006, version of 3745-31-05, then these emission limits/control measures no longer apply since the potential to emit for VOC (including controls) will be less than 10 tons per year.

- b. This rule paragraph applies once U.S. EPA approves the December 1, 2006, version of OAC rule 3745-31-05 as part of the SIP.

Once the December 1, 2006 version of OAC rule 3745-31-05 is included in the Ohio SIP, BAT shall not be applicable as the potential to emit for VOCs (including controls) will be < 10 tpy.

- c. This emissions unit is exempt from the requirements of 40 CFR Part 60, Subpart RR, "Standards of Performance for Pressure Sensitive Tape and Label Surface Coating Operations", and the emissions limitations described in 40 CFR 60.442(a) because the VOC input to this coating line is less than 45 Mg (50 tons) per 12 month period. If the amount of VOC exceeds 45 Mg per 12 month period, this emissions unit will no longer be exempt from 40 CFR Part 60, Subpart RR.
- d. Pursuant to 40 CFR 63.3320 and on the compliance date specified in 40 CFR Part 63.3330, the source must limit HAP emissions from the affected source to no more than 1.6 percent of the mass of coating materials applied for each month.

This emissions unit is subject to the requirements of 40 CFR Part 63, Subpart JJJJ, "Paper and Other Web Coating", and the emission limitations described therein.

c) Operational Restrictions

- (1) The permittee shall comply with the applicable restrictions required pursuant to 40 CFR Part 63, Subpart JJJJ, including the applicable parts of the following sections:

Effective Date: To be entered upon final issuance

Table with 2 columns: Regulatory Reference and Description. Rows include 63.3320 (Organic HAP emissions), 63.3321 and Table 1 to Subpart JJJJ (Capture system, control devices and operating limits), 63.3370(c)(4) (HAP content restrictions in coatings), and 63.3370(e)(f)(h)(k) (Capture and control requirements; restriction of HAP emissions).

[Authority for Term: OAC rule 3745-77-07(A)(1) and 40 CFR Part 63, Subpart JJJJ]

d) Monitoring and/or Recordkeeping Requirements

- (1) The permittee shall collect and record the following information daily for all coatings employed in this emissions unit:
a. the name and identification of each coating employed;
b. the VOC content of each coating (including HAPs), as applied, in pounds per gallon, excluding water and exempt solvents;
c. the number of gallons of each coating employed, excluding water and exempt solvents; and
d. the total VOC emissions from all coatings (including HAPs), in pounds (b x c).

[Authority for Term: OAC rule 3745-77-07(C)(1) and PTI 02-2982]

- (2) The permittee shall collect and record the following information daily for all cleanup materials employed in this emissions unit:
a. the name and identification of each cleanup material, as employed;
b. the VOC content (including HAPs) of each cleanup material, as employed;
c. the number of gallons of each cleanup material, as employed; and
d. the total VOC emissions from cleanup materials (including HAPs), in pounds (b x c).

[Authority for Term: OAC rule 3745-77-07(C)(1) and PTI 02-2982]

- (3) The permittee shall collect and record the following information daily for all coatings and cleanup materials employed in this emissions unit:
a. the total daily VOC emissions from all coatings and cleanup materials (including HAPs), in pounds [the sum of d)(1)d + d)(2)d];
b. the total operating hours of the emissions unit;
c. the average hourly VOC emission rate, in pounds per hour (a/b); and
d. the total VOC emitted to date, in tons per year.

Effective Date: To be entered upon final issuance

[Authority for Term: OAC rule 3745-77-07(C)(1) and PTI 02-2982]

- (4) The permittee shall collect and record the following information monthly for all organic hazardous air pollutants (HAPs) from all coatings:
- a. the mass of organic HAPs applied in all coatings employed, in pounds and tons;
 - b. the mass of coating materials applied, in pounds and tons;
 - c. the mass of coating solids applied, in pounds and tons;
 - d. the percent of HAPs applied per coating materials applied; and
 - e. the percent of HAPs applied per coating solids applied.

[Authority for Term: OAC rule 3745-77-07(C)(1)]

- (5) The total monthly HAP applied shall be determined by Equation 6 of Section 63.3370 of 40 CFR Part 63, Subpart JJJJ, as follows:

$$H_m = \sum_{i=1}^p C_{hi}M_i + \sum_{j=1}^q C_{hij}M_{ij} - M_{vret}$$

where:

H_m = total monthly organic HAP applied;

p = number of different coating materials applied in a month;

C_{hi} = organic HAP content of coating material, i , as-purchased, expressed as a mass fraction, lb/lb;

M_i = mass of as-purchased coating material, i , applied in a month, lb;

q = number of different materials added to the coating material;

C_{hij} = organic HAP content of material, j , added to as-purchased coating material, i , expressed as a mass fraction, lb/lb;

M_{ij} = mass of material, j , added to as-purchased coating material, i , in a month, lb; and

M_{vret} = mass of volatile matter retained in the coated web after curing or drying, or otherwise not emitted to the atmosphere, kg. The value of this term will be zero in all cases except where you choose to take into account the volatile matter retained in the coated web or otherwise not emitted to the atmosphere for the compliance demonstration procedures in 40 CFR 63.3370.

[Authority for term: OAC rule 3745-77-07(C)(1), PTI 02-2982 and 40 CFR Part 63, Subpart JJJJ]

Effective Date: To be entered upon final issuance

- (6) The permittee shall comply with the applicable monitoring and record keeping requirements pursuant to 40 CFR Part 63, Subpart JJJJ, including the applicable parts of the following sections:

63.3340	Startup, Shutdown and Malfunction Plans and other General Provisions of Subpart A
63.3350	Control Device Monitoring and other General Provisions to Subpart JJJJ
63.3350(b)(c)(e) and (f); 63.3410(a)(1)ii, v, and (2)	Capture System and Control Device operating parameter data; Monitoring and Recordkeeping

[Authority for Term: OAC rule 3745-77-07(C)(1) and 40 CFR Part 63, Subpart JJJJ]

e) Reporting Requirements

- (1) The permittee shall notify the Director (Ohio EPA Northeast District Office) in writing, on a monthly basis, of any daily record showing that the VOC content of any coating exceeded the applicable limitation of 2.9 pounds of VOC per gallon of coating, excluding water and exempt solvents.

The notification shall include a copy of such record and shall be sent to the Ohio EPA Northeast District Office within 30 days following the end of the calendar month in which the excursion(s) occurred.

[Authority for Term: OAC rule 3745-77-07(C)(1) and PTI 02-2982]

- (2) The permittee shall submit quarterly deviation (excursions) reports that identify any and all exceedances of the hourly limitation of 1.36 lbs of VOC per hour for the coatings employed.

Once U.S. EPA approves the December 1, 2006 version of OAC rule 3745-31-05 as part of the Ohio SIP, BAT shall not be applicable as the potential to emit for VOCs (including controls) will be less than 10 tons per year and e) (2) will be voided.

[Authority for Term: OAC rule 3745-77-07(C)(1) and PTI 02-2982]

- (3) The permittee shall submit annual reports that specify the total VOC emissions from this emissions unit for the previous calendar year. These reports shall be submitted by January 31 of each year.

[Authority for Term: OAC rule 3745-77-07(C)(1) and PTI 02-2982]

- (4) The permittee shall submit quarterly deviation (excursion) reports that identify any and all exceedances of the percent HAP content of the mass of coating materials applied for each month.

[Authority for Term: OAC rule 3745-77-07(C)(1) and PTI 02-2982]

Effective Date: To be entered upon final issuance

- (5) The permittee shall submit semiannual reports and such other notifications and reports to the Administrator and/or the Ohio EPA Northeast District Office as are required pursuant to 40 CFR Part 63, Subpart JJJJ, including the applicable parts of the following sections:

Table with 2 columns: Regulatory Section, Report Type. Rows include 63.3400(b) Initial notification report, 63.3400(c) Semiannual compliance report, 63.3400(d) Notification of performance test, 63.3400(e) and Notification of compliance status, 63.3400(f) Notification of performance test results.

[Authority for Term: OAC rule 3745-77-07(C)(1) and 40 CFR Part 63, Subpart JJJJ]

f) Testing Requirements

- (1) Compliance with the emission limitations established in section b)(1) of this permit shall be determined in accordance with the following methods:

a. Emission Limitations:

VOC emissions shall not exceed 1.36 pounds per hour for all coatings employed, including cleanup, as a daily average.

VOC emissions shall not exceed 5.94 tons per year, including cleanup and organic HAPs.

Applicable Compliance Method:

Compliance shall be demonstrated based upon the record keeping requirements specified in d)(1), d)(2) and d)(3).

b. Emission Limitation:

For all coatings employed in this emissions unit, the VOC content shall not exceed 2.9 pounds per gallon of coating, as applied, excluding water and exempt solvents.

Applicable Compliance Method:

Compliance shall be demonstrated based upon the record keeping requirements specified in d)(1)b.

c. Emission Limitation:

HAP emissions from this emissions unit shall not exceed 1.6 percent of the mass of coating materials applied for each month.

Applicable Compliance Method:

Compliance shall be demonstrated based upon the record keeping requirements specified in d)(4) and d)(5).

[Authority for Term: OAC rule 3745-77-07(C)(1) and 40 CFR Part 63, Subpart JJJJ]

- (2) USEPA Method 24 shall be used, in accordance with OAC rule 3745-21-04(B)(5), to determine the VOC contents for all coatings. If, pursuant to section 11.4 of Method 24, 40 CFR Part 60, Appendix A (revised as of July 1, 2001), an owner or operator determines that Method 24 cannot be used for a particular coating, the permittee shall so notify the Administrator of the USEPA and shall use formulation data for that coating to demonstrate compliance until the USEPA provides alternative analytical procedures or alternative precision statements for Method 24. Formulation data or USEPA Method 24 shall be used to determine the VOC contents of the cleanup materials.

[Authority for Term: OAC rule 3745-77-07(C)(1) and 40 CFR Part 60, Appendix A, Method 24]

- (3) The permittee shall comply with the applicable testing requirements pursuant to 40 CFR Part 63, Subpart JJJJ, including the applicable parts of the following sections:

Table with 2 columns: Code, Description. Row 1: 63.3360, Performance Tests. Row 2: 63.3370(a)(4), Overall organic HAP control efficiency (destruction and capture efficiency)

[Authority for Term: OAC rule 3745-77-07(C)(1) and 40 CFR Part 63, Subpart JJJJ]

g) Miscellaneous Requirements

- (1) None.

2. K003, I-6 COATER Building #14

Operations, Property and/or Equipment Description:

- a) The following emissions unit terms and conditions are federally enforceable with the exception of those listed below which are enforceable under state law only.
(1) None.
b) Applicable Emissions Limitations and/or Control Requirements
(1) The specific operations(s), property, and/or equipment that constitute each emissions unit along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from each unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

Table with 2 columns: Applicable Rules/Requirements and Applicable Emissions Limitations/Control Measures. Rows a-f detailing VOC emissions rules and BAT requirements.

(2) Additional Terms and Conditions

- a. The permittee has satisfied the BAT requirements for VOC pursuant to OAC paragraph 3745-31-05(A)(3), as effective November 30, 2001, in this permit. On

Effective Date: To be entered upon final issuance

December 1, 2006, paragraph (A)(3) of OAC rule 3745-31-05 was revised to conform to ORC changes effective August 3, 2006 (S.B. 265 changes), such that BAT is no longer required by state regulations for NAAQS pollutants less than ten tons per year. However, that rule revision has not yet been approved by U.S. EPA as a revision to Ohio's State Implementation Plan (SIP). Therefore, until the SIP revision occurs and the U.S. EPA approves the revisions to OAC rule 3745-31-05, the requirements to satisfy BAT still exists as part of the federally approved SIP for Ohio. Once U.S. EPA approves the December 1, 2006, version of 3745-31-05, then these emission limits/control measures no longer apply since the potential to emit for VOC (including controls) will be less than 10 tons per year.

- b. This rule paragraph applies once U.S. EPA approves the December 1, 2006, version of OAC rule 3745-31-05 as part of the SIP.

Once the December 1, 2006 version of OAC rule 3745-31-05 is included in the Ohio SIP, BAT shall not be applicable as the potential to emit for VOCs (including controls) will be less than 10 tpy.

- c. This emissions unit is exempt from the requirements of 40 CFR Part 60, Subpart RR, "Standards of Performance for Pressure Sensitive Tape and Label Surface Coating Operations", and the emissions limitations described in 40 CFR Part 60.442(a) because the VOC input to this coating line is less than 45 Mg (50 tons) per 12 month period. If the amount of VOC exceeds 45 Mg per 12 month period, this emissions unit will no longer be exempt from 40 CFR Part 60, Subpart RR.
- d. Pursuant to 40 CFR 63.3320 and on the compliance date specified in 40 CFR Part 63.3330, the source must limit HAP emissions from the affected source to no more than 1.6 percent of the mass of coating materials applied for each month.

This emissions unit is subject to the requirements of 40 CFR Part 63, Subpart JJJJ, "Paper and Other Web Coating", and the emission limitations described therein.

c) Operational Restrictions

- (1) The permittee shall comply with the applicable restrictions required pursuant to 40 CFR Part 63, Subpart JJJJ, including the applicable parts of the following sections:

63.3320	Organic HAP emissions
63.3321 and Table 1 to Subpart JJJJ	Capture system, control devices and operating limits
63.3370(c)(4)	HAP content restrictions in coatings,
63.3370(e)(f)(h)(k)	Capture and control requirements; restriction of HAP emissions

[Authority for Term: OAC rule 3745-77-07(C)(1) and 40 CFR Part 63, Subpart JJJJ]

Effective Date: To be entered upon final issuance

d) Monitoring and/or Recordkeeping Requirements

- (1) The permittee shall collect and record the following information daily for all coatings employed in this emissions unit:
- a. the name and identification of each coating employed;
 - b. the VOC content of each coating (including HAPs), as applied, in pounds per gallon, excluding water and exempt solvents;
 - c. the number of gallons of each coating employed, excluding water and exempt solvents; and
 - d. the total VOC emissions from all coatings (including HAPs), in pounds (b x c).

[Authority for Term: OAC rule 3745-77-07(C)(1) and PTI 02-2982]

- (2) The permittee shall collect and record the following information daily for all cleanup materials employed in this emissions unit:
- a. the name and identification of each cleanup material, as employed;
 - b. the VOC content (including HAPs) of each cleanup material, as employed;
 - c. the number of gallons of each cleanup material, as employed; and
 - d. the total VOC emissions from cleanup materials (including HAPs), in pounds (b x c).

[Authority for Term: OAC rule 3745-77-07(C)(1) and PTI 02-2982]

- (3) The permittee shall collect and record the following information daily for all coatings and cleanup materials employed in this emissions unit:
- a. the total daily VOC emissions from all coatings and cleanup materials (including HAPs), in pounds [the sum of d)(1)d + d)(2)d];
 - b. the total operating hours of the emissions unit;
 - c. the average hourly VOC emission rate, in pounds per hour (a/b); and
 - d. the total VOC emitted to date, in tons per year.

[Authority for Term: OAC rule 3745-77-07(C)(1) and PTI 02-2982]

- (4) The permittee shall collect and record the following information monthly for all organic hazardous air pollutants (HAPs) from all coatings:
- a. the mass of organic HAPs applied in all coatings employed, in pounds and tons;
 - b. the mass of coating materials applied, in pounds and tons;
 - c. the mass of coating solids applied, in pounds and tons;

Effective Date: To be entered upon final issuance

- d. the percent of HAPs applied per coating materials applied; and
e. the percent of HAPs applied per coating solids applied.

[Authority for Term: OAC rule 3745-77-07(C)(1)]

- (5) The total monthly HAP applied shall be determined by Equation 6 of Section 63.3370 of 40 CFR Part 63, Subpart JJJJ, as follows:

Hm = sum from i=1 to p of ChiMi + sum from j=1 to q of ChijMij - Mvret

where:

Hm = total monthly organic HAP applied;

p = number of different coating materials applied in a month;

Chi = organic HAP content of coating material, i, as-purchased, expressed as a mass fraction, lb/lb;

Mi = mass of as-purchased coating material, i, applied in a month, lb;

q = number of different materials added to the coating material;

Chij = organic HAP content of material, j, added to as-purchased coating material, i, expressed as a mass fraction, lb/lb;

Mij = mass of material, j, added to as-purchased coating material, i, in a month, lb; and

Mvret = mass of volatile matter retained in the coated web after curing or drying, or otherwise not emitted to the atmosphere, kg. The value of this term will be zero in all cases except where you choose to take into account the volatile matter retained in the coated web or otherwise not emitted to the atmosphere for the compliance demonstration procedures in 40 CFR 63.3370.

[Authority for term: OAC rule 3745-77-07(C)(1) and 40 CFR Part 63, Subpart JJJJ]

- (6) The permittee shall comply with the applicable monitoring and record keeping as is required pursuant to 40 CFR Part 63, Subpart JJJJ, including the applicable parts of the following sections:

Table with 2 columns: Section Number and Description. Rows include 63.3340 (Startup, Shutdown and Malfunction Plans...), 63.3350 (Control Device Monitoring...), and 63.3350(b)(c)(e) and (f); 63.3410(a)(1)ii, v, and (2) (Capture System and Control Device operating parameter data...).

[Authority for Term: OAC rule 3745-77-07(C)(1) and 40 CFR Part 63, Subpart JJJJ]

e) Reporting Requirements

- (1) The permittee shall notify the Director (Ohio EPA Northeast District Office) in writing, on a monthly basis, of any daily record showing that the VOC content of any coating exceeded the applicable limitation of 2.9 pounds of VOC per gallon of coating, excluding water and exempt solvents.

The notification shall include a copy of such record and shall be sent to the Ohio EPA Northeast District Office within 30 days following the end of the calendar month in which the excursion(s) occurred.

[Authority for Term: OAC rule 3745-77-07(C)(1) and PTI 02-2982]

- (2) The permittee shall submit quarterly deviation (excursions) reports that identify any and all exceedances of the hourly limitation of 0.68 lbs of VOC per hour for the coatings employed.

Once U.S. EPA approves the December 1, 2006 version of OAC rule 3745-31-05 as part of the Ohio SIP, BAT shall not be applicable as the potential to emit for VOCs (including controls) will be less than 10 tons per year and e)(2) will be voided.

[Authority for Term: OAC rule 3745-77-07(C)(1) and PTI 02-2982]

- (3) The permittee shall submit annual reports that specify the total VOC emissions from this emissions unit for the previous calendar year. These reports shall be submitted by January 31 of each year.

[Authority for Term: OAC rule 3745-77-07(C)(1) and PTI 02-2982]

- (4) The permittee shall submit quarterly deviation (excursion) reports that identify any and all exceedances of the percent HAP content of the mass of coating materials applied for each month.

[Authority for Term: OAC rule 3745-77-07(C)(1) and PTI 02-2982]

- (5) The permittee shall submit semiannual reports and such other notifications and reports to the Administrator and/or the Ohio EPA Northeast District Office as are required pursuant to 40 CFR Part 63, Subpart JJJJ, including the applicable parts of the following sections:

Table with 2 columns: Section Reference and Description. Rows include 63.3400(b) Initial notification report, 63.3400(c) Semiannual compliance report, 63.3400(d) Notification of performance test, 63.3400(e) and Notification of compliance status, 63.3400(f) Notification of performance test results.

[Authority for Term: OAC rule 3745-77-07(C)(1) and 40 CFR Part 63, Subpart JJJJ]

f) Testing Requirements

(1) Compliance with the emission limitations established in section b)(1) of this permit shall be determined in accordance with the following methods:

a. Emission Limitations:

VOC emissions shall not exceed 0.68 pound per hour for all coatings employed, including cleanup, as a daily average.

VOC emissions shall not exceed 3.0 tons per year, including cleanup and organic HAPs.

Applicable Compliance Method:

Compliance shall be demonstrated based upon the record keeping requirements specified in d)(1), d)(2) and d)(3).

[Authority for Term: OAC rule 3745-77-07(C)(1) and PTI 02-2982]

b. Emission Limitation:

For all coatings employed in this emissions unit, the VOC content shall not exceed 2.9 pounds per gallon of coating, as applied, excluding water and exempt solvents.

Applicable Compliance Method:

Compliance shall be demonstrated based upon the record keeping requirements specified in d)(1)b.

[Authority for Term: OAC rule 3745-77-07(C)(1) and PTI 02-2982]

c. Emission Limitation:

HAP emissions from this emissions unit shall not exceed 1.6 percent of the mass of coating materials applied for each month.

Applicable Compliance Method:

Compliance shall be demonstrated based upon the record keeping requirements specified in d)(4) and d)(5).

[Authority for Term: OAC rule 3745-77-07(C)(1) and 40 CFR Part 63, Subpart JJJJ]

(2) USEPA Method 24 shall be used, in accordance with OAC rule 3745-21-04(B)(5), to determine the VOC contents for all coatings. If, pursuant to section 11.4 of Method 24, 40 CFR Part 60, Appendix A (revised as of July 1, 2001), an owner or operator determines that Method 24 cannot be used for a particular coating, the permittee shall so notify the Administrator of the USEPA and shall use formulation data for that coating to demonstrate compliance until the USEPA provides alternative analytical procedures or alternative precision statements for Method 24. Formulation data or USEPA Method 24 shall be used to determine the VOC contents of the cleanup materials.

Effective Date: To be entered upon final issuance

[Authority for Term: OAC rule 3745-77-07(C)(1) and 40 CFR Part 60, Appendix A, Method 24]

- (3) The permittee shall comply with the applicable testing requirements pursuant to 40 CFR Part 63, Subpart JJJJ, including the applicable parts of the following sections:

63.3360	Performance Tests
63.3370(a)(4)	Overall organic HAP control efficiency (destruction and capture efficiency)

[Authority for Term: OAC rule 3745-77-07(A)(1) and 40 CFR Part 63, Subpart JJJJ]

- g) Miscellaneous Requirements

- (1) None.

3. K005, I-10 Adhesive Coater

Operations, Property and/or Equipment Description:

(K005) - Adhesive coater equipped with web unwind, web treatment roll-coat station, drying oven, web rewind, and a regenerative thermal oxidizer (RTO) (K005) - Building #19

- a) The following emissions unit terms and conditions are federally enforceable with the exception of those listed below which are enforceable under state law only.
(1) None.
b) Applicable Emissions Limitations and/or Control Requirements
(1) The specific operations(s), property, and/or equipment that constitute each emissions unit along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from each unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

Table with 2 columns: Applicable Rules/Requirements and Applicable Emissions Limitations/Control Measures. Row 'a.' contains details for OAC rule 3745-31-05(A)(3) and associated emission limits for VOC, BAT, NOx, and CO.

Effective Date: To be entered upon final issuance

	Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures
b.	OAC rule 3745-31-05(A)(3)(b) as effective 12/01/06	See b)(2)b.
c.	OAC rule 3745-31-05(D) (synthetic minor for NNSR)	VOC emissions shall not exceed 23.0 tons per rolling, 12-month period, including coatings and cleanup materials.
d.	OAC rule 3745-21-09(F)	The control efficiency limitation of 81% overall reduction of VOCs by weight (and 90% destruction) specified by this rule for all solvent based coatings is less stringent than the emission limitation established pursuant to OAC rule 3745-31-05(A)(3). For non-solvent based coatings, the VOC content limitation specified in this rule is less stringent than the VOC content limitation established pursuant to 40 CFR Part 60, Subpart RR. See b)(2)i.
e.	OAC rule 3745-21-09(F)(2)(a)and (b)	The control efficiency of 90% overall reduction of VOCs is less stringent than the control efficiency established pursuant to OAC rule 3745-31-05(A)(3). See c)(3) and c)(7).
f.	40 CFR Part 60, Subpart RR	For solvent based coatings, the overall VOC emission reduction control efficiency emission limitation specified by this rule is less stringent than the overall VOC emission reduction control efficiency emission limitation established pursuant to OAC rule 3745-31-05(A)(3). See b)(2)h. For all coatings that are not vented to the RTO (non solvent based coatings) the VOC content shall not exceed 0.2 kg of VOC per kg of solids, applied as calculated on a weighted average basis for one calendar month.
g.	40 CFR Part 63, Subpart JJJJ	See B.2, b)(2)k and b)(2)l. For the coatings that are vented to the RTO, the control efficiency requirement / emission limitation of 98% reduction of VOCs (hazardous air pollutants(HAPs)), by weight, specified by this rule for all coatings is less stringent than the

Effective Date: To be entered upon final issuance

	Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures
		emission limitation established pursuant to OAC rule 3745-31-05(A)(3).
h.	40 CFR Part 63, Subpart A	Table 2 to Subpart JJJJ of 40 CFR Part 63 – Applicability of General Provisions to Subpart JJJJ shows which parts of the General Provisions in 40 CFR Part 63.1 through 63.15 apply.
i.	40 CFR Part 63, Subpart DDDDD	See b)(2)f.

(2) Additional Terms and Conditions

a. The permittee has satisfied the Best Available Technology (BAT) requirements for NO_x and CO pursuant to OAC paragraph 3745-31-05(A)(3), as effective November 30, 2001, in this permit. On December 1, 2006, paragraph(A)(3) of OAC rule 3745-31-05 was revised to conform to ORC changes effective August 3, 2006 (S.B. 265 changes), such that BAT is no longer required by state regulations for NAAQS pollutants less than ten tons per year. However, that rule revision has not yet been approved by U.S. EPA as a revision to Ohio's State Implementation Plan (SIP). Therefore, until the SIP revision occurs and the U.S. EPA approves the revisions to OAC rule 3745-31-05, the requirements to satisfy BAT still exists as part of the federally approved SIP for Ohio. Once U.S. EPA approves the December 1, 2006, version of 3745-31-05, then these emission limits/control measures for NO_x and CO no longer apply.

BAT emission limitations for NO_x and CO for this emissions unit are based on maximum capacity and operating hours for this emissions unit, i.e. the potential to emit and therefore record keeping and monitoring is not required.

b. This rule paragraph applies once U.S. EPA approves the December 1, 2006, version of OAC rule 3745-31-05 as part of the SIP.

Then, BAT requirements under OAC rule 3745-31-05(A) do not apply to the NO_x and CO emissions from this air contaminant source since the uncontrolled potential to emit for NO_x and CO is less than 10 tons per year.

c. During solvent based coating operations, this emissions unit shall be vented to the RTO. This emissions unit has no bypass of the thermal oxidizer which would allow for intermittently controlled coating operations, however emergency dampers have been installed that would allow bypassing to protect employee safety and the facility.

Therefore, at this time, this emissions unit is not capable of routinely venting emissions from coating to atmosphere.

In the event that this venting configuration is modified such that this emissions unit is capable of venting emissions from coating to atmosphere, the Northeast District of the Ohio EPA shall be notified, and, if required, an appropriate permit application shall be submitted.

Effective Date: To be entered upon final issuance

- d. The permittee shall not concurrently apply solvent based coatings through the roll and the die coater.
- e. VOC emissions before control from this emissions unit shall not exceed 4,444 tons per rolling, 12 months, unless approved by Ohio EPA, calculated using the following formula:

n

$$4,444.0 \text{ tons VOC} > \sum_{i=1}^n (\text{Pi})(\text{VOC}_i) \times (1-.995) + 0.32 = 23.0 \text{ TPY}$$

i=1 2000lbs/ton (RTO)

$$[4,444 \times (1- 99.5) = 22.2 (+ 0.32) = 23.0 \text{ TPY}]$$

where:

Pi = usage of the coating and cleanup material i, in gallons during the last 12 months; and

VOCi = volatile organic compound content of coating i, cleanup material i, in pounds per gallon.

- f. This facility may be subject to 40 CFR Part 63, Subpart DDDDD, National Emission Standards for Hazardous Air Pollutants for Major Sources: Industrial/Commercial/Institutional Boilers and Process Heaters upon final promulgation. Applicability can not be determined until final promulgation of the rule. The permittee will be required to comply with all applicable requirements of 40 CFR Part 63, Subpart DDDDD. The permittee will also be required to comply with all applicable requirements of 40 CFR Part 63, Subpart A (General Provisions) as identified in Table 10 of 40 CFR Part 63, Subpart DDDDD. If required, compliance with all applicable requirements shall be achieved by the dates set forth in 40 CFR Part 63, Subpart DDDDD and Subpart A.
- g. A solvent based coating is any coating that has a VOC content greater than 0.20 kg VOC per kg coating solids or 2.9 pounds of VOC per gallon of coating, as applied, whichever is more stringent, depending on the coating. All solvent based coatings from the adhesive coating operation shall be vented to the RTO.
- h. A non-solvent based coating is any coating that has a VOC content less than or equal to 0.20 kg VOC per kg coating solids or 2.9 pounds of VOC per gallon of coating, as applied, whichever is more stringent, depending on the coating.
- i. The permittee shall maintain a permanent total enclosure (PTE) that complies with the requirements of 40 CFR Part 51, Appendix M, Reference Method 204, to capture all VOC emissions from this emissions unit during solvent based coatings.
- j. Pursuant to 40 CFR 63.3320 and on the compliance date specified in 40 CFR Part 63.3330, and for all coatings that are not vented to the RTO, the source must limit HAP emissions from the affected source to no more than 1.6 percent of the mass of coating materials applied for each month. See d)(7)f.

Effective Date: To be entered upon final issuance

- k. The permittee shall comply with all applicable requirements in the MACT for Paper and Other Web Coating, 40 CFR Part 63, Subpart JJJJ.

c) Operational Restrictions

- (1) The average combustion temperature within the thermal oxidizer, for any 3-hour block of time when this emissions unit is in operation and employing solvent based coatings, shall not be below the average temperature during the most recent emission test that demonstrated this emissions unit was in compliance.

[Authority for term: OAC rule 3745-77-07(A)(1) and 40 CFR Section 63.3360 and PTI 02-22438]

- (2) When employing solvent based coatings, this emissions unit shall be totally enclosed such that all VOC emissions are captured, contained, and vented to the RTO. Compliance with the following criteria, as specified in 40 CFR Part 51, Appendix M, Method 204, shall be met by the permittee when employing coatings:

- a. Any natural draft opening (NDO) shall be at least four equivalent opening diameters from each VOC emitting point unless otherwise specified by the Administrator.
- b. The total area of all NDOs shall not exceed 5 percent of the surface area of the enclosure's four walls, floor and ceiling.
- c. The average facial velocity (FV) of air through all NDOs shall be either at least 3,600 meters/hr (200 fpm) or meet the pressure differential requirement across the enclosure as described in the Method. The direction of air flow through all NDOs shall be into the enclosure.
- d. All access doors and windows whose areas are not included in section (b) and are not included in the calculation in section (c) shall be closed during routine operation of the process.

[Authority for term: OAC rule 3745-77-07(A)(1) and PTI 02-22438]

- (3) The thermal oxidizer control system shall be designed and operated according to good engineering practices and the manufacturer's recommendations and specifications.

[Authority for term: OAC rule 3745-77-07(A)(1) and PTI 02-22438]

- (4) When this emissions unit is in operation, the PTE shall be maintained under negative pressure at a minimum differential pressure, in inches of water as a 3-hour average, that is equal to or greater than the differential pressure that was established at the time of the last emissions test that demonstrated compliance with the corresponding facial velocity or pressure drop criteria for the PTE. The differential pressure corresponding to the 200 fpm facial velocity shall be determined for the PTE when compliance with the facial velocity is demonstrated.

[Authority for term: OAC rule 3745-77-07(A)(1) and PTI 02-22438]

Effective Date: To be entered upon final issuance

- (5) The concentrations of VOC emissions from the positive pressure locations for this emissions unit, determined in accordance with the leak monitoring program currently used at Building 5 for the PTE, shall not exceed 100 ppm, by volume.

[Authority for term: OAC rule 3745-77-07(A)(1) and PTI 02-22438]

- (6) Pursuant to 40 CFR 63.6(e), the owner or operator of an affected source must develop and implement a written startup, shutdown, and malfunction plan that describes, in detail, procedures for operating and maintaining the source during periods of startup, shutdown, and malfunction; a program of corrective action for malfunctioning process; and air pollution control and monitoring equipment used to comply with the relevant standard. This plan must be developed by the owner or operator by the source's compliance date for that relevant standard. The purpose of the startup, shutdown, and malfunction plan is listed below:

- a. ensure that, at all times, the owner or operator operate and maintain affected sources, including associated air pollution control and monitoring equipment, in a manner consistent with safety and good air pollution control practices for minimizing emissions to the levels required by the relevant standards;
- b. ensure that owners or operators are prepared to correct malfunctions as soon as practicable after their occurrence in order to minimize excess emissions of hazardous air pollutants; and
- c. reduce the reporting burden associated with periods of startup, shutdown, and malfunction (including corrective action taken to restore malfunctioning process and air pollution control equipment to its normal or usual manner of operation).

[Authority for Term: OAC rule 3745-77-07(A)(1) and PTI 02-22438]

- (7) Work practice standards for cleaning materials

For emissions from the use of organic solvents for clean up, the permittee shall:

- a. store all VOC containing cleaning materials and used shop towels in closed containers;
- b. ensure that mixing and storage containers used for VOC-containing cleaning materials are kept closed at all time except when depositing or removing these materials;
- c. minimize spills of VOC-containing cleaning materials from one location to another in closed containers or pipes; and
- d. minimize VOC emissions from cleaning storage, mixing, and conveying equipment.

[Authority for Term: OAC rule 3745-77-07(A)(1) and OAC rule 3745-21-09(F)(2)]

- (8) The permittee shall comply with the applicable restrictions required pursuant to 40 CFR Part 63, Subpart JJJJ, including the applicable parts of the following sections:

Effective Date: To be entered upon final issuance

Table with 2 columns: Regulatory Reference and Description. Rows include 63.3320 (Organic HAP emissions), 63.3321 and Table 1 to Subpart JJJJ (Capture system, control devices and operating limits), 63.3360 (Performance Tests), 63.3370(a)(4) (Overall organic HAP control efficiency), 63.3370(c)(4) (HAP content restrictions in coatings), and 63.3370(e)(f)(h)(k) (Capture and control requirements; restriction of HAP emissions).

[Authority for Term: OAC rule 3745-77-07(A)(1) and 40 CFR Part 63, Subpart JJJJ]

d) Monitoring and/or Recordkeeping Requirements

- (1) The permittee shall operate and maintain a continuous temperature monitor and recorder that measures and records the combustion temperature within the thermal oxidizer when this emissions unit is in operation. Units shall be in degrees Fahrenheit. The monitoring and recording devices shall be capable of accurately measuring the desired parameter. The temperature monitors and recorders shall be installed, calibrated, operated and maintained in accordance with the manufacturer's recommendations, with any modifications deemed necessary by the permittee.

The permittee shall collect and record the following information each day:

- a. all 3-hour blocks of time during which the average combustion temperature within the RTO, when the emissions unit was in operation, was below the average temperature during the most recent emission test that demonstrated that the emissions unit was in compliance;
b. a log or record of the downtime for the capture (collection) system, control device, and monitoring equipment, when the emissions unit was in operation; and
c. a record of any periods of time when the emissions unit is in operation, but the VOC emissions are not vented to the RTO.

[Authority for term: OAC rule 3745-77-07(C)(1) and PTI 02-22438]

- (2) The permittee shall operate and maintain a continuous pressure drop monitor and recorder that continuously measures and records the pressure drop across the PTE when the permittee is employing solvent based coatings. Units shall be in inches of water. The monitoring and recording devices shall be capable of accurately measuring the desired parameter. The pressure drop monitor and recorder shall be installed, calibrated, operated and maintained in accordance with the manufacturer's recommendations, with any modifications deemed necessary by the permittee.

The permittee shall collect and record the following information each day when employing solvent based coatings:

Effective Date: To be entered upon final issuance

- a. all 3-hour blocks of time when the emissions unit is in operation, during which the PTE was not maintained at or above the minimum pressure differential, in inches of water as a 3-hour average, specified in c)4; and
- b. a log or record of downtime for the capture (collection) system when the emissions unit was in operation.

[Authority for term: OAC rule 3745-77-07(C)(1) and PTI 02-22438]

- (3) The permittee shall collect and record the following information daily for all coatings employed in this emissions unit:
 - a. the name and identification number of each coating employed;
 - b. the VOC content of each coating, as applied, in pounds per gallon, excluding water and exempt solvents;
 - c. whether or not the emissions from the coating were vented to the RTO or to atmosphere;
 - d. the number of gallons of each coating employed, excluding water and exempt solvents;
 - e. the total uncontrolled VOC emissions from all coatings employed, in pounds and tons;
 - f. the total uncontrolled VOC emissions from all coatings employed, vented to atmosphere; and
 - g. the calculated, controlled VOC emission rate for all coatings, in pounds and tons (the controlled VOC emission rate for coatings shall be calculated using the overall control efficiency for the control equipment as determined during the most recent compliance test that demonstrated that the emissions unit was in compliance).

[Authority for term: OAC rule 3745-77-07(C)(1) and PTI 02-22438]

- (4) The permittee shall collect and record the following information daily for all cleanup materials:
 - a. the name and identification of each cleanup material employed;
 - b. the number of gallons of each cleanup material employed;
 - c. the VOC content of each cleanup material, in pounds per gallon; and
 - d. the total VOC emissions from all cleanup materials employed in pounds and tons.

[Authority for term: OAC rule 3745-77-07(C)(1) and PTI 02-22438]

Effective Date: To be entered upon final issuance

- (5) The permittee shall record the following information daily:
- a. the total VOC emissions from all coatings and cleanup materials (the sum of the values from d)(3)f, d)(3)g and d)(4)d, in pounds;
 - b. the total operating hours for the emissions unit;
 - c. the average hourly emission rate, in pounds per hour (a/b); and
 - d. after the first year, the rolling, 12-month summation of the controlled VOC emissions from all coatings and cleanup materials, in tons (365-day summation of d)(3)f)

Note: If any coatings were employed in this emissions unit and not vented to the RTO, their VOC contents shall be included in the 12-month summation in d)(5)d.

[Authority for term: OAC rule 3745-77-07(C)(1) and PTI 02-22438]

- (6) For all coatings that are employed in this emissions unit, and not vented to the RTO, the permittee shall collect and record the following information monthly:
- a. the name and identification number of each coating employed;
 - b. the VOC content of each coating, in kg/kg of coating solids, as applied;
 - c. the weight fraction of VOC in each coating;
 - d. the weight fraction of solids in each coating;
 - e. the total mass of each coating, in kgs; and
 - f. the mass-weighted average VOC content for all the coatings employed, in kg/kg of coating solids, calculated in accordance with the equation in 40 CFR 60.443(a)(2).

If the VOC content of each coating employed during the calendar month does not exceed 0.20 kg of VOC/kg of solids, the permittee has demonstrated compliance with the VOC content limitation for that month and is not required to calculate the mass-weighted VOC content for all the coatings employed during the calendar month.

[Authority for term: OAC rule 3745-77-07(C)(1) and PTI 02-22438]

- (7) The permittee shall collect and record the following information monthly for all organic HAPs from all coatings that are not vented to the RTO:
- a. the name and identification number of each coating employed;
 - b. the total mass of organic HAPs applied in all coatings employed, in pounds and tons;
 - c. the mass of coating materials applied, in pounds and tons;
 - d. the mass of coating solids applied, in pounds and tons;

Effective Date: To be entered upon final issuance

- e. the percent of HAPs, applied per coating materials applied; and/or
 - f. the percent of HAPs, applied per coating solids applied.
- (8) The total monthly HAP, applied shall be determined by Equation 6 of Section 63.3370 of 40 CFR Part 63, Subpart JJJJ, as follows:

$$H_m = \sum_{i=1}^p C_{hi}M_i + \sum_{j=1}^q C_{hij}M_{ij} - M_{vret}$$

where:

H_m = total monthly organic HAP applied;

P = number of different coating materials applied in a month;

C_{hi} = organic HAP content of coating material, i , as-purchased, expressed as a mass fraction, lb/lb;

M_i = mass of as-purchased coating material, i , applied in a month, lb;

q = number of different materials added to the coating material;

C_{hij} = organic HAP content of material, j , added to as-purchased coating material, i , expressed as a mass fraction, lb/lb;

M_{ij} = mass of material, j , added to as-purchased coating material, i , in a month, lb; and

M_{vret} = mass of volatile matter retained in the coated web after curing or drying, or otherwise not emitted to the atmosphere, kg. The value of this term will be zero in all cases except where you choose to take into account the volatile matter retained in the coated web or otherwise not emitted to the atmosphere for the compliance demonstration procedures in 40 CFR 63.3370.

[Authority for term: OAC rule 3745-77-07(C)(1)]

- (9) The permittee shall inspect and monitor quarterly with a Photoionization Detector or equivalent device all positive pressure locations between the permanent total enclosure of the coater and the RTO for unacceptable VOC levels (greater than 100 ppm) and maintain records of the results in accordance with the permittee's 1998 preventive maintenance plan or equivalent. Records shall be maintained of the inspection results and shall include the following:
- a. line speed;
 - b. fan speed (frequency may be measured in hertz, an indirect measure of fan speed);
 - c. VOC content or coating specification at the time of monitoring;

Effective Date: To be entered upon final issuance

- d. documentation of any unacceptable VOC levels; and
e. any corrective actions taken in response to any detected leaks.

The concentrations of VOC emissions measured in accordance with the leak monitoring program for the permanent total enclosure shall not exceed 100 ppm, by volume.

[Authority for term: OAC rule 3745-77-07(C)(1) and PTI 02-22438]

- (10) The permittee shall employ the plan for preventive maintenance and repair of leaks within the solvent capture and destruction system, as submitted by Avery Dennison to the Ohio EPA on August 10, 1998, or equivalent.

Equipment subject to the plan shall include all ductwork from the enclosures of the heads of the coaters to the RTO fan covers.

[Authority for term: OAC rule 3745-77-07(C)(1) and PTI 02-22438]

- (11) Any calculations used to determine compliance shall be maintained at the facility and made available to the Director or his representative, upon request, during normal business hours.

[Authority for term: OAC rule 3745-77-07(C)(1) and PTI 02-22438]

- (12) The permittee shall comply with the applicable monitoring and record keeping requirements pursuant to 40 CFR Part 63, Subpart JJJJ, including the applicable parts of the following sections:

Table with 2 columns: Reference Number and Description. Rows include 63.3340 (Startup, Shutdown and Malfunction Plans...), 63.3350 (Control Device Monitoring...), and 63.3350(b)(c)(e) and (f); 63.3410(a)(1)ii, v, and (2) (Capture System and Control Device operating parameter data...).

[Authority for term: OAC rule 3745-77-07(C)(1) and 40 CFR Part 63, Subpart JJJJ]

e) Reporting Requirements

- (1) The permittee shall submit quarterly summary reports that identify the following information:
a. all 3-hour blocks of time during which the average combustion temperature within the RTO did not comply with the temperature limitation specified above; and
b. all periods of downtime for the capture (collection) system, control device, and monitoring equipment, when the associated coating or printing line was operating and employing coatings.

Effective Date: To be entered upon final issuance

These quarterly reports shall be submitted by April 30, July 31, October 31, and January 31, and shall cover the records for the previous calendar quarters.

[Authority for term: OAC rule 3745-77-07(C)(1) and PTI 02-22438]

- (2) The permittee shall submit quarterly deviation (excursion) reports that identify all 3-hour blocks of time, when the emissions unit was in operation, during which the permanent total enclosure was not maintained at the minimum pressure differential required in c)(4).

[Authority for term: OAC rule 3745-77-07(C)(1) and PTI 02-22438]

- (3) The permittee shall submit annual reports that specify the total VOC emissions from this emissions unit for the previous calendar year. These reports shall be submitted by January 31 of each year.

[Authority for term: OAC rule 3745-77-07(C)(1) and PTI 02-22438]

- (4) The permittee shall submit deviation (excursion) reports that identify all exceedances of the rolling, 12-month emission limitation for VOC of 23.0 tons.

[Authority for term: OAC rule 3745-77-07(C)(1) and PTI 02-22438]

- (5) The permittee shall submit deviation (excursion) reports that identify all exceedances of the average hourly emission limitation for VOC of 5.1 pounds.

[Authority for term: OAC rule 3745-77-07(C)(1) and PTI 02-22438]

- (6) The permittee shall submit deviation (excursion) reports that identify all exceedances of the percent HAP content of the mass of coating materials applied for each month.

[Authority for term: OAC rule 3745-77-07(C)(1) and PTI 02-22438]

- (7) The permittee shall notify the Director (Ohio EPA Northeast District Office) in writing of any quarterly record showing any unacceptable level of VOCs (greater than 100 ppm) from the positive pressure locations of the lines between the PTE and the RTO. A copy of the record shall be sent to the Ohio EPA Northeast District Office within 30 days following the end of the calendar month in which the exceedance occurred.

[Authority for term: OAC rule 3745-77-07(C)(1) and PTI 02-22438]

- (8) The permittee shall notify the Director (the Ohio EPA Northeast District Office) in writing of any record showing that emissions from solvent based coatings employed in this emissions unit were not vented to the RTO.

[Authority for term: OAC rule 3745-77-07(C)(1) and PTI 02-22438]

- (9) The permittee shall notify the Director (the Ohio EPA Northeast District Office) in writing of any record showing that emissions from non-solvent based coatings employed in this emissions unit exceeded the maximum allowable VOC content of 0.20 kilogram of VOC per kilogram of solids, calculated as a monthly mass weighted average.

[Authority for term: OAC rule 3745-77-07(C)(1) and PTI 02-22438]

Effective Date: To be entered upon final issuance

- (10) The permittee shall submit semiannual reports and such other notifications and reports to the Administrator and/or the Ohio EPA Northeast District Office as are required pursuant to 40 CFR Part 63, Subpart JJJJ, including the applicable parts of the following sections:

63.3400(b)	Initial notification report
63.3400(c)	Semiannual compliance report
63.3400(d)	Notification of performance test
63.3400(e) and	Notification of compliance status
63.3400(f)	Notification of performance test results

[Authority for Term: OAC rule 3745-77-07(c)(1) and 40 CFR Part 63, Subpart JJJJ]

f) Testing Requirements

- (1) Compliance with the emission limitations established in section b)(1) of this permit shall be determined in accordance with the following methods:

a. Emission Limitation:

The permittee shall maintain a 99.5% overall reduction of VOC, by weight, for all solvent based coatings accomplished through the use of a PTE with a 100% capture efficiency and a RTO with a 99.5% destruction efficiency.

Applicable Compliance Method:

Compliance shall be demonstrated based upon an emission test performed in accordance with the methods and procedures specified in f)(2).

Performance testing shall be conducted for the permanent total enclosure and the destruction efficiency within 5 years of the most recent performance test using the methods specified in f)(2) of this section.

b. Emission Limitation:

VOC emissions shall not exceed 5.1 pounds per hour from the coating line, including cleanup, as a daily average.

Applicable Compliance Method:

Compliance shall be demonstrated based upon the record keeping requirements specified in d)5 and an emission test performed in accordance with the methods and procedures specified in f)(2).

c. Emission Limitation:

VOC emissions shall not exceed 23.0 tons per rolling, 12 month period, including cleanup.

Applicable Compliance Method:

Compliance shall be demonstrated based upon the record keeping requirements specified in d)5.

d. Emission Limitation:

For all coatings that are not vented to the RTO (non solvent based coatings) the VOC content shall not exceed 0.2 kg of VOC per kg of solids, applied as calculated on a weighted average basis for one calendar month.

Applicable Compliance Method:

Compliance shall be demonstrated based upon the use of Method 24, or any alternative compliance method approved by the USEPA for determining the VOC content of each coating, and on the record keeping requirements specified in d)(6).

e. Emission Limitation:

For all coatings that are not vented to the RTO, the permittee shall limit HAP emissions from this emissions unit to no more than 1.6 percent of the mass of coating materials applied for each month.

Applicable Compliance Method:

Compliance shall be demonstrated based upon the use of Method 24, or any alternative compliance method approved by the USEPA for determining the VOC/HAP content of each coating, and on the record keeping requirements specified in d)(7) and d)(8).

f. Emission Limitation:

NO_x emissions from this emissions unit shall not exceed 1.4 pounds per hour and 6.1 tons per year.

Once U.S. EPA approves the December 1, 2006 version of OAC rule 3745-31-05 as part of the Ohio SIP, BAT shall not be applicable as the potential to emit for NO_x (including controls) will be less than 10 tons per year and b)(1)b will be voided.

Applicable Compliance Method:

Compliance may be determined by multiplying the emission factor of 100 pounds of NO_x per million cubic feet of natural gas (EPA AP-42, July 1998, Section 1.4, Natural Gas Combustion) by the maximum hourly natural gas combustion capacity (14,000 ft³/hr) of this unit.

If required, emission testing to demonstrate compliance with the pound per hour emission limitation shall be performed in accordance with the methods and procedures specified in 40 CFR Part 60, Appendix A, Methods 1 through 4 and Method 7.

Effective Date: To be entered upon final issuance

The ton per year emission limitation was developed by multiplying the short-term allowable NO_x emission limitation (1.4 lbs/hr) by the maximum annual hours of operation (8760 hours), and then dividing by 2000 lbs per ton. Therefore, if compliance is shown with the short-term emission limitation, compliance shall also be shown with the annual emission limitation.

g. Emission Limitation:

CO emissions from this emissions unit shall not exceed 1.2 pounds per hour and 4.9 tons per year.

Once U.S. EPA approves the December 1, 2006 version of OAC rule 3745-31-05 as part of the Ohio SIP, BAT shall not be applicable as the potential to emit for CO (including controls) will be less than 10 tons per year and b)(1)b will be voided.

Applicable Compliance Method:

Compliance may be determined by multiplying the emission factor of 84 pounds of CO per million cubic feet of natural gas (EPA AP-42, July 1998, Section 1.4, Natural Gas Combustion) by the maximum hourly natural gas combustion capacity (14,000 ft³/hr) of this unit.

If required, emission testing to demonstrate compliance with the pound per hour emission limitation shall be performed in accordance with the methods and procedures specified in 40 CFR Part 60, Appendix A, Methods 1 through 4 and Method 10.

The ton per year emission limitation was developed by multiplying the short-term allowable CO emission limitation (1.2 lbs/hr) by the maximum annual hours of operation (8760 hours), and then dividing by 2000 lbs per ton. Therefore, if compliance is shown with the short-term emission limitation, compliance shall also be shown with the annual emission limitation.

[Authority for Term: OAC rule 3745-77-07(C)(1) and PTI 02-22438]

(2) The permittee shall conduct, or have conducted, emission testing for this emissions unit in accordance with the following requirements:

- a. Emission testing, following initial start up (first day that the unit is used in normal production) was completed on 10/31/2008 and demonstrated compliance with the overall control efficiency limitation and capture efficiency for VOC of 99.5% and 100%, respectively and the hourly mass emission limitation of 5.1 pounds per hour.

The permittee shall conduct emission testing within 5 years of the most recent performance test using the methods specified in this section.

The emission testing shall be conducted to demonstrate compliance with the overall control efficiency limitation and capture efficiency limitation for VOC of 99.5% and 100%, respectively, and the hourly mass emission limitation of 5.1 pounds per hour.

Effective Date: To be entered upon final issuance

- b. The following test methods shall be employed to demonstrate compliance with the capture efficiency and control efficiency limitations for VOC:

Method 25 of 40 CFR, Part 60 Appendix A, if the VOC concentrations as carbon in the outlet are greater than 50 ppm; or

Method 25A of 40 CFR, Part 60 Appendix A, if the VOC concentrations as carbon in the outlet are less than 50ppm; and

Method 204 of 40 CFR Part 51 Appendix M.

Method 2 of 40 CFR Part 60 Appendix A and Method 204, if differential pressure is selected as a means of complying with the required facial velocity as described in Method 204.

Performance testing shall be conducted in accordance with OAC rule 3745-21-10(C).

Alternative USEPA-approved test methods may be used with prior approval from the Ohio EPA.

- c. The test shall be conducted while the emissions unit is operating at or near its maximum capacity, unless otherwise specified or approved by the Ohio EPA Northeast District Office.
- d. The capture efficiency shall be determined using Methods 204 through Method 204F, as specified 40 CFR Part 51, Appendix M, or the permittee may request to use an alternative method or procedure for the determination of capture efficiency in accordance with the "Guidelines for Determining Capture Efficiency" dated January 9, 1995. (The Ohio EPA will consider the request for the use of an alternative method, including an evaluation of the applicability, necessity, and validity of the alternative method, and may approve its use, if such approval does not contravene any other applicable requirement.)
- e. The control or destruction efficiency defined as the percent reduction of mass emissions between the inlet and outlet of the control system shall be determined in accordance with the test methods and procedures specified in Ohio Administrative Code 3745-21-10. The test methods and procedures selected shall be based on a consideration of the diversity of the organic species present and their total concentration, and on a consideration of the potential presence of interfering gases.
- f. Not later than 30 days prior to the proposed test date(s), the permittee shall submit an "Intent to Test" notification to the Ohio EPA Northeast District Office. The "Intent to Test" notification shall describe in detail the proposed test methods and procedures, the emissions unit operating parameters, the time(s) and date(s) of the test(s), and the person(s) who will be conducting the test(s). Failure to submit such notification for review and approval prior to the test(s) may result in the Ohio EPA Northeast District Office's refusal to accept the results of the emission test(s).

Effective Date: To be entered upon final issuance

- g. Personnel from the Ohio EPA Northeast District Office shall be permitted to witness the test(s), examine the testing equipment, and acquire data and information necessary to ensure that the operation of the emissions unit and the testing procedures provide a valid characterization of the emissions from the emissions unit and/or the performance of the control equipment.
h. A comprehensive written report on the results of the emissions test(s) shall be signed by the person or persons responsible for the tests and submitted to the Ohio EPA Northeast District Office within 30 days following completion of the test(s).

[Authority for term: OAC rule 3745-77-07(C)(1) and PTI 02-22438]

- (3) USEPA Method 24 shall be used, in accordance with OAC rule 3745-21-04(B)(5), to determine the VOC contents for all coatings. VOC content data from data sheets, resulting from the use of Method 24 may also be used. If pursuant to section 11.4 of Method 24, 40 CFR Part 60, Appendix A (revised as of July 1, 2001), an owner or operator determines that Method 24 cannot be used for a particular coating, the permittee shall notify the Administrator of the USEPA and shall use formulation data for that coating to demonstrate compliance until the USEPA provides alternative analytical procedures or alternative precision statements for Method 24.

Other EPA test methods, including SW-846 and 8260 A, or any alternative compliance method including formulation data, manufacturer's specifications, alternative equivalent test methods, may also be used, if approved by USEPA.

[Authority for term: OAC rule 3745-77-07(C)(1) and PTI 02-22438]

- (4) The permittee shall comply with the applicable testing requirements pursuant to 40 CFR Part 63, Subpart JJJJ, including the applicable parts of the following sections:

Table with 2 columns: Code and Description. Row 1: 63.3360, Performance Tests. Row 2: 63.3370(a)(4), Overall organic HAP control efficiency (destruction and capture efficiency).

[Authority for Term: OAC rule 3745-77-07(C)(1) and 40 CFR Part 63, Subpart JJJJ]

g. Miscellaneous Requirements

None.
