**RE: FINAL PERMIT TO INSTALL  
LORAIN COUNTY**

**CERTIFIED MAIL**

Street Address:

122 S. Front Street

Lazarus Gov. Center TELE: (614) 644-3020 FAX: (614) 644-2329

Mailing Address:

Lazarus Gov. Center  
P.O. Box 1049

**Application No: 02-13130**

**DATE: 10/16/2001**

BF Goodrich Company - Avon Lake Plant  
John Uptmor  
550 Moore Rd  
Avon Lake, OH 440120134

Enclosed please find an Ohio EPA Permit to Install which will allow you to install the described source(s) in a manner indicated in the permit. Because this permit contains several conditions and restrictions, I urge you to read it carefully.

The Ohio EPA is urging companies to investigate pollution prevention and energy conservation. Not only will this reduce pollution and energy consumption, but it can also save you money. If you would like to learn ways you can save money while protecting the environment, please contact our Office of Pollution Prevention at (614) 644-3469.

You are hereby notified that this action by the Director is final and may be appealed to the Ohio Environmental Review Appeals Commission pursuant to Chapter 3745.04 of the Ohio Revised Code. The appeal must be in writing and set forth the action complained of and the grounds upon which the appeal is based. It must be filed within thirty (30) days after the notice of the Directors action. A copy of the appeal must be served on the Director of the Ohio Environmental Protection Agency within three (3) days of filing with the Commission. An appeal may be filed with the Environmental Review Appeals Commission at the following address:

Environmental Review Appeals Commission  
236 East Town Street, Room 300  
Columbus, Ohio 43215

Very truly yours,

Thomas G. Rigo, Manager  
Field Operations and Permit Section  
Division of Air Pollution Control

cc: USEPA

**Permit To Install  
Terms and Conditions**

**Issue Date: 10/16/2001  
Effective Date: 10/16/2001**

---

**FINAL PERMIT TO INSTALL 02-13130**

Application Number: 02-13130  
APS Premise Number: 0247030004  
Permit Fee: **\$400**  
Name of Facility: BF Goodrich Company - Avon Lake Plant  
Person to Contact: John Uptmor  
Address: 550 Moore Rd  
Avon Lake, OH 440120134

Location of proposed air contaminant source(s) [emissions unit(s)]:  
**550 Moore Rd  
Avon Lake, Ohio**

Description of proposed emissions unit(s):  
**Production of acrylic polymers.**

The above named entity is hereby granted a Permit to Install for the above described emissions unit(s) pursuant to Chapter 3745-31 of the Ohio Administrative Code. Issuance of this permit does not constitute expressed or implied approval or agreement that, if constructed or modified in accordance with the plans included in the application, the above described emissions unit(s) of environmental pollutants will operate in compliance with applicable State and Federal laws and regulations, and does not constitute expressed or implied assurance that if constructed or modified in accordance with those plans and specifications, the above described emissions unit(s) of pollutants will be granted the necessary permits to operate (air) or NPDES permits as applicable.

This permit is granted subject to the conditions attached hereto.

Ohio Environmental Protection Agency

Director

**Part I - GENERAL TERMS AND CONDITIONS****A. Permit to Install General Terms and Conditions****1. Compliance Requirements**

The emissions unit(s) identified in this Permit to Install shall remain in full compliance with all applicable State laws and regulations and the terms and conditions of this permit.

**2. Reporting Requirements Related to Monitoring and Recordkeeping Requirements**

The permittee shall submit required reports in the following manner:

- a. Reports of any required monitoring and/or recordkeeping information shall be submitted to the appropriate Ohio EPA District Office or local air agency.
- b. Except as otherwise may be provided in the terms and conditions for a specific emissions unit, quarterly written reports of (a) any deviations (excursions) from emission limitations, operational restrictions, and control device operating parameter limitations that have been detected by the testing, monitoring, and recordkeeping requirements specified in this permit, (b) the probable cause of such deviations, and (c) any corrective actions or preventive measures which have been or will be taken, shall be submitted to the appropriate Ohio EPA District Office or local air agency. If no deviations occurred during a calendar quarter, the permittee shall submit a quarterly report, which states that no deviations occurred during that quarter. The reports shall be submitted quarterly, i.e., by January 31, April 30, July 31, and October 31 of each year and shall cover the previous calendar quarters. (These quarterly reports shall exclude deviations resulting from malfunctions reported in accordance with OAC rule 3745-15-06.)

**3. Records Retention Requirements**

Each record of any monitoring data, testing data, and support information required pursuant to this permit shall be retained for a period of five years from the date the record was created. Support information shall include, but not be limited to, all calibration and maintenance records and all original strip-chart recordings for continuous monitoring instrumentation, and copies of all reports required by this permit. Such records may be maintained in computerized form.

**4. Inspections and Information Requests**

The Director of the Ohio EPA, or an authorized representative of the Director, may, subject to the safety requirements of the permittee and without undue delay, enter upon the premises of this source at any reasonable time for purposes of making inspections, conducting tests, examining records or reports pertaining to any emission of air contaminants, and determining compliance with any applicable State air pollution laws and regulations and the terms and conditions of this permit. The permittee shall furnish to the Director of the Ohio EPA, or an authorized

**BF Goodrich Company - Avon Lake Plant**  
**PTI Application: 02-13130**  
**Issued: 10/16/2001**

**Facility ID: 0247030004**

representative of the Director, upon receipt of a written request and within a reasonable time, any information that may be requested to determine whether cause exists for modifying, reopening or revoking this permit or to determine compliance with this permit. Upon verbal or written request, the permittee shall also furnish to the Director of the Ohio EPA, or an authorized representative of the Director, copies of records required to be kept by this permit.

**5. Scheduled Maintenance/Malfunction Reporting**

Any scheduled maintenance of air pollution control equipment shall be performed in accordance with paragraph (A) of OAC rule 3745-15-06. The malfunction of any emissions units or any associated air pollution control system(s) shall be reported to the appropriate Ohio EPA District Office or local air agency in accordance with paragraph (B) of OAC rule 3745-15-06. Except as provided in that rule, any scheduled maintenance or malfunction necessitating the shutdown or bypassing of any air pollution control system(s) shall be accompanied by the shutdown of the emissions unit(s) that is (are) served by such control system(s).

**6. Permit Transfers**

Any transferee of this permit shall assume the responsibilities of the prior permit holder. The appropriate Ohio EPA District Office or local air agency must be notified in writing of any transfer of this permit.

**7. Air Pollution Nuisance**

The air contaminants emitted by the emissions units covered by this permit shall not cause a public nuisance, in violation of OAC rule 3745-15-07.

**8. Termination of Permit to Install**

This Permit to Install shall terminate within eighteen months of the effective date of the Permit to Install if the owner or operator has not undertaken a continuing program of installation or modification or has not entered into a binding contractual obligation to undertake and complete within a reasonable time a continuing program of installation or modification. This deadline may be extended by up to 12 months if application is made to the Director within a reasonable time before the termination date and the party shows good cause for any such extension.

**9. Construction of New Sources(s)**

The proposed emissions unit(s) shall be constructed in strict accordance with the plans and application submitted for this permit to the Director of the Ohio Environmental Protection Agency. There may be no deviation from the approved plans without the express, written approval of the Agency. Any deviations from the approved plans or the above conditions may lead to such sanctions and penalties as provided under Ohio law. Approval of these plans does not constitute an assurance that the proposed facilities will operate in compliance with all Ohio laws and regulations. Additional facilities shall be installed upon orders of the Ohio

Environmental Protection Agency if the proposed sources cannot meet the requirements of this permit or cannot meet applicable standards.

If the construction of the proposed emissions unit(s) has already begun or has been completed prior to the date the Director of the Environmental Protection Agency approves the permit application and plans, the approval does not constitute expressed or implied assurance that the proposed facility has been constructed in accordance with the approved plans. The action of beginning and/or completing construction prior to obtaining the Director's approval constitutes a violation of OAC rule 3745-31-02. Furthermore, issuance of the Permit to Install does not constitute an assurance that the proposed source will operate in compliance with all Ohio laws and regulations. Approval of the plans in any case is not to be construed as an approval of the facility as constructed and/or completed. Moreover, issuance of the Permit to Install is not to be construed as a waiver of any rights that the Ohio Environmental Protection Agency (or other persons) may have against the applicant for starting construction prior to the effective date of the permit. Additional facilities shall be installed upon orders of the Ohio Environmental Protection Agency if the proposed facilities cannot meet the requirements of this permit or cannot meet applicable standards.

#### **10. Public Disclosure**

The facility is hereby notified that this permit, and all agency records concerning the operation of this permitted source, are subject to public disclosure in accordance with OAC rule 3745-49-03.

#### **11. Applicability**

This Permit to Install is applicable only to the emissions unit(s) identified in the Permit to Install. Separate application must be made to the Director for the installation or modification of any other emissions unit(s).

#### **12. Best Available Technology**

As specified in OAC Rule 3745-31-05, all new sources must employ Best Available Technology (BAT). Compliance with the terms and conditions of this permit will fulfill this requirement.

#### **13. Source Operation and Operating Permit Requirements After Completion of Construction**

This facility is permitted to operate each source described by this Permit to Install for a period of up to one year from the date the source commenced operation. This permission to operate is granted only if the facility complies with all requirements contained in this permit and all applicable air pollution laws, regulations, and policies. Pursuant to OAC Chapter 3745-35, the permittee shall submit a complete operating permit application within thirty (30) days after commencing operation of the emissions unit(s) covered by this permit.

**BF Goodrich Company - Avon Lake Plant**  
**PTI Application: 02-13130**  
**Issued: 10/16/2001**

**Facility ID: 0247030004**

**14. Construction Compliance Certification**

The applicant shall provide Ohio EPA with a written certification (see enclosed form) that the facility has been constructed in accordance with the Permit to Install application and the terms and conditions of the Permit to Install. The certification shall be provided to Ohio EPA upon completion of construction but prior to startup of the source.

**15. Fees**

The permittee shall pay fees to the Director of the Ohio EPA in accordance with ORC section 3745.11 and OAC Chapter 3745-78. The permittee shall pay all applicable Permit to Install fees within 30 days after the issuance of this Permit to Install.

**B. Permit to Install Summary of Allowable Emissions**

The following information summarizes the total allowable emissions, by pollutant, based on the individual allowable emissions of each air contaminant source identified in this permit.

**SUMMARY (for informational purposes only)**  
**TOTAL PERMIT TO INSTALL ALLOWABLE EMISSIONS**

<u>Pollutant</u>	<u>Tons Per Year</u>
Organic Compounds	15.5
Particulate Emissions	0.8
HAPs	1.16

**PART II - SPECIAL TERMS AND CONDITIONS FOR SPECIFIC EMISSIONS UNIT(S)**

**A. Applicable Emissions Limitations and/or Control Requirements**

1. The specific operations(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
P007 - Modification to the existing specialty additives process unit located in Building 437, for the production of acrylic polymers	OAC rule 3745-31-05 (A)(3)	Visible particulate stack emissions shall not exceed 10 percent opacity as a six-minute average.  OC: 3.54 pounds/hour and 15.5 tons/year.
Organic compound control equipment: Thermal Oxidizer at Egress Point No. 9; Condenser at Egress Point No. 21; Ammonia scrubber at Egress Point No. 37; and Barometric condenser/surface condenser tandem at Egress Point No. 44.	OAC rule 3745-21-07(G)(2)	PM: 0.18 pounds/hour and 0.8 tons/year.  Emissions of organic compounds from this emissions unit, shall be reduced by at least 85 percent.
Particulate Matter control equipment: Baghouse at Egress Point No. 46; Baghouse at Egress Point No. 61; and System Filter at Egress Point No. 68.	OAC rule 3745-17-07(A)  OAC rule 3745-17-11(B)	Exempt, because emissions unit is not located within an Appendix A area.  Less stringent than limit established pursuant to OAC rule 3745-31-05.
Organic Compound Uncontrolled Egress Points: 1, 5, 6, 8, 14, 15, 16, 20, 22, 23, 24, 32, 33, 34, 35, 36, 38, 41, 42, 43, 45, 48, 49, 50, 55, 58, 59, 60, 62, 63, 67.	OAC rule 3745-31-05  OAC rule 3745-31-05	Compliance with the Air Toxics Policy.  HAP's: 0.26 pounds/hour and 1.16 tons/year.

**2. Additional Terms and Conditions****2.a** None**B. Operational Restrictions**

1. The average thermal oxidizer Zone 1 temperature from the thermal incinerator (egress point no. 9), for any 3-hour block of time, shall not be less than 1350 degrees Fahrenheit or more than 50 degrees Fahrenheit below the average temperature during the most recent test that demonstrated the emissions unit was in compliance.
2. The pressure drop across both baghouses (egress point nos. 46 and 61) shall be maintained within the range of 0.4 - 10 inches of water while the emissions unit is in operation.
3. The average temperature of the exhaust gases from the scrubber-condenser (egress point no. 44), for any 3-hour block of time, shall not be more than 11 degrees Fahrenheit above the average temperature during the most recent test that demonstrated the emissions unit was in compliance.
4. The average temperature of the exhaust gases from the condenser (egress point no. 21), for any 3-hour block of time, shall not be more than 11 degrees Fahrenheit above the average temperature during the most recent test that demonstrated the emissions unit was in compliance.
5. The water flow rate of the scrubber (egress point no. 37) liquor shall be no less than 1 gpm.

**C. Monitoring and/or Recordkeeping Requirements**

1. The permittee shall operate and maintain a continuous temperature monitor and recorder which measures and records the combustion temperature within Zone 1 of the thermal incinerator (egress point no. 9) when the emissions unit is in operation. Units shall be in degrees Fahrenheit. The monitoring and recording devices shall be capable of accurately measuring the desired parameter. The temperature monitor and recorder shall be installed, calibrated, operated and maintained in accordance with the manufacturer's recommendations, with any modifications deemed necessary by the permittee.
2. The permittee shall collect and record the following information each day:
  - a. all 3-hour blocks of time during which the average combustion temperature within the thermal incinerator (egress point no. 9), when the emissions unit was in operation, was more than 50 degrees Fahrenheit below the average temperature during the most recent emission test that demonstrated the emissions unit was in compliance.

Emissions Unit ID: P007

- b. a log of the downtime for the capture (collection) system, control device, and monitoring equipment, when the associated emissions unit was in operation.
3. The permittee shall properly install, operate, and maintain equipment to monitor the pressure drop across all baghouses (egress point nos. 46 and 61 ) while the emissions unit is in operation. The monitoring equipment shall be installed, calibrated, operated, and maintained in accordance with the manufacturer's recommendations, instructions, and operating manual(s). The permittee shall record the pressure drop across the baghouses on a daily basis.
4. The permittee shall operate and maintain a continuous temperature monitor and recorder which measures and records the temperature of the exhaust gases from the scrubber-condenser (egress point no. 44) when the emissions unit is in operation. Units shall be in degrees Fahrenheit. The accuracy for each thermocouple, monitor, and recorder shall be guaranteed by the manufacturer to be within plus or minus 1 percent of the temperature being measured or plus or minus 5 degrees Fahrenheit, whichever is greater. The temperature monitor and recorder shall be installed, calibrated, operated and maintained in accordance with the manufacturer's recommendations, instructions and operating manuals.
5. The permittee shall operate and maintain a continuous temperature monitor and recorder which measures and records the temperature of the exhaust gases from the condenser (egress point no. 21) when the emissions unit is in operation. Units shall be in degrees Fahrenheit. The accuracy for each thermocouple, monitor, and recorder shall be guaranteed by the manufacturer to be within plus or minus 1 percent of the temperature being measured or plus or minus 5 degrees Fahrenheit, whichever is greater. The temperature monitor and recorder shall be installed, calibrated, operated and maintained in accordance with the manufacturer's recommendations, instructions and operating manuals.
6. The permittee shall collect and record the following information each day:
  - a. The average temperature of the exhaust gases from the scrubber-condenser (egress point no. 44) during each of the eight 3-hour blocks of time during the day; and,
  - b. A log or record of operating time for the capture (collection) system, control device, monitoring equipment, and the associated emissions unit.
7. The permittee shall collect and record the following information each day:
  - a. The average temperature of the exhaust gases from the condenser (egress point no. 21) during each of the eight 3-hour blocks of time during the day; and,
  - b. A log or record of operating time for the capture (collection) system, control device, monitoring equipment, and the associated emissions unit.

8. The permittee shall collect and record the following information each day:
  - a. The water flow rate of the scrubber (egress point no. 37) liquor, on a daily basis.
  - b. A log or record of operating time for the capture (collection) system, control device, monitoring equipment, and the associated emissions unit.
9. Each record of any monitoring data, testing data, and support information required pursuant to this permit shall be retained for a period of five years from the date the record was created. Support information shall include, but not be limited to, all calibration and maintenance records and all original strip-chart recordings, if a strip-chart recorder is employed, for continuous monitoring instrumentation, and copies of all reports required by the permit. Such records may be maintained in computerized form.
10. The permittee shall collect and record the following information for each change where the air toxic modeling was required pursuant to the Air Toxic Policy:
  - a. background data that describes the parameters changed (composition of materials, new pollutants emitted, change in stack/exhaust parameters, etc.); and
  - b. a copy of the resulting computer model runs that show the results of the application of the Air Toxic Policy for the change.
11. The emissions unit's monthly hours of operation.
12. This permit allows the use of materials specified by the permittee in the permit to install application for this emissions unit. To fulfill the best available technology requirements of (OAC) rule 3745-31-05 and to ensure compliance with OAC rule 3745-15-07 (Air Pollution Nuisances Prohibited), the emission limitation(s) specified in this permit was (were) established using the Ohio EPA's "Air Toxic Policy" and is (are) based on both the materials used and the design parameters of the emissions unit's exhaust system, as specified in the application. The Ohio EPA's "Air Toxic Policy" was applied for each pollutant using the SCREEN 3.0 model and comparing the predicted 1-hour maximum ground-level concentration to the Maximum Acceptable Ground-Level Concentration (MAGLC). The following summarizes the results of the modeling for each pollutant:

Pollutant: Ammonia

TLV (ug/m3): 17000

Maximum Hourly Emission Rate (lbs/hr): 0.54

Predicted 1-Hour Maximum Ground-Level Concentration (ug/m3): 0.287

MAGLC (ug/m3): 404

OAC Chapter 3745-31 requires permittees to apply for and obtain a new or modified permit to install prior to making a "modification" as defined by the OAC rule 3745-31-01. The permittee is hereby advised that the following changes to the process may be determined to be a "modification":

- a. changes in the composition of the materials used (typically for coatings or cleanup materials), or the use of new materials, that would result in the emission of a compound with a lower Threshold Limit Value (TLV), as indicated in the most recent version of the handbook entitled "American Conference of Governmental Industrial Hygienists (ACGIH)," than the lowest TLV value specified in the above table;
- b. changes to the emissions unit or its exhaust parameters (e.g., increased emission rate [not including an increase in an "allowable" emission limitation specified in the terms and conditions of this permit], reduced exhaust gas flow rate, and decreased stack height);
- c. changes in the composition of the materials used, or use of new materials, that would result in the emission of an air contaminant not previously permitted; and
- d. changes in the composition of the materials, or use of new materials, that would result in an increase in emissions of any pollutant that has a listed TLV.

The Ohio EPA will not consider any of the above-mentioned as a "modification" requiring a permit to install, if the following conditions are met:

- a. the change is not otherwise considered a "modification" under OAC Chapter 3745-31;
- b. the permittee can continue to comply with the allowable emission limitations specified in its permit to install; and
- c. prior to the change, the applicant conducts an evaluation pursuant to the Air Toxic Policy, determines that the changed emissions unit still satisfies the Air Toxic Policy, and the permittee maintains documentation that identifies the change and the results of the application of the Air Toxic Policy for the change.

For any change to the emissions unit or its method of operation that either would require an increase in the emission limitation(s) established by this permit or would otherwise be considered a "modification" as defined in OAC rule 3745-31-01, the permittee shall obtain a final permit to install prior to the change.

#### **D. Reporting Requirements**

1. The permittee shall submit required reports in the following manner:
  - a. Reports of any required monitoring and/or record keeping information shall be submitted to the Ohio EPA Northeast District Office.
  - b. Except as otherwise may be provided in the terms and conditions for a specific emissions unit, quarterly written reports of (a) any deviations (excursions) from emission limitations, operational restrictions, and control device operating parameter limitations that have been detected by the testing, monitoring, and record keeping requirements specified in this permit, (b) the probable cause of such deviations, and (c) any corrective actions or preventive measures which have been or will be taken, shall be submitted to the Northeast District Office of the Ohio EPA. If no deviations occurred during the calendar quarter, the permittee shall submit a quarterly report, which states that no deviations occurred during that quarter. The reports shall be submitted quarterly, i.e., by January 31, April 30, July 31, and October 31 of each year and shall cover the previous calendar quarters. (These quarterly reports shall exclude deviations resulting from malfunctions reported in accordance with OAC rule 3745-15-06.)
2. The permittee shall submit semi-annual deviation (excursion) reports which identify all 3-hour blocks of time during which the average combustion temperature within the thermal incinerator (egress point no. 9) does not comply with the temperature limitation specified above.
3. The permittee shall submit semi-annual pressure drop deviation (excursion) reports that identify that all periods of time during which the pressure drop across any baghouses (egress point nos. 46 and 61 ) did not comply with the allowable range specified above.
4. The permittee shall submit semi-annual temperature (excursion) reports that identify all 3-hour blocks of time during which the average temperature of the exhaust gases from the scrubber-condenser (egress point no. 44) exceeded the temperature limitation specified above.
5. The permittee shall submit semi-annual temperature (excursion) reports that identify all 3-hour blocks of time during which the average temperature of the exhaust gases from the scrubber-condenser (egress point no. 21) exceeded the temperature limitation specified above.

6. The permittee shall submit water flow rate deviation (excursion) reports that identify all periods of time during which the scrubber (egress point no. 37) liquor water flow rate did not comply with the water flow rate requirements specified above

#### E. Testing Requirements

1. The permittee shall conduct, or have conducted, emission testing for this emissions unit in accordance with the following requirements:
  - a. The emission testing shall be conducted within 90 days of issuance of this permit to install.
  - b. The emission testing shall be conducted to demonstrate compliance with the allowable mass emission rate(s) for organic compounds and to demonstrate that all organic compound emissions from this emissions unit are reduced by at least 85 percent.
  - c. The following test method(s) shall be employed to demonstrate compliance with the allowable mass emission rate(s) and to demonstrate at least 85 percent reduction in organic compound emissions: Method 25 or 25A of 40 CFR, Part 60, Appendix A. Alternative U.S. EPA approved test methods may be used with prior approval from the Ohio EPA.
  - d. The test(s) shall be conducted while the emissions unit is operating at or near its maximum capacity, unless otherwise specified or approved by the Ohio EPA Northeast District Office.

Not later than 30 days prior to the proposed test date(s), the permittee shall submit an "Intent to Test" notification to the Ohio EPA Northeast District Office. The "Intent to Test" notification shall describe in detail the proposed test methods and procedures, the emissions unit operating parameters, the time(s) and date(s) of the test(s), and the person(s) who will be conducting the test(s). Failure to submit such notification for review and approval prior to the test(s) may result in the Ohio EPA District Office's refusal to accept the results of the emission test(s).

Personnel from the Ohio EPA Northeast District Office shall be permitted to witness the test(s), examine the testing equipment, and acquire data and information necessary to ensure that the operation of the emissions unit and the testing procedures provide a valid characterization of the emissions from the emissions unit and/or the performance of the control equipment.

A comprehensive written report on the results of the emissions test(s) shall be signed by

the person or persons responsible for the tests and submitted to the Ohio EPA Northeast District Office within 30 days following completion of the test(s). The permittee may request additional time for the submittal of the written report, where warranted, with prior approval from the Ohio EPA Northeast District Office.

2. Compliance with the emission limitations above shall be determined in accordance with the following methods:

Emission Limitation: 85 percent reduction of organic compounds.

Applicable Compliance Method: Percent reduction shall be calculated by comparing the amount of organic compounds entering all of the control equipment with the amount of organic compounds exiting all of the control equipment. The egress points that need to show compliance with this limitation are as follows 9, 21,37, and 44. The amount of organic compounds in both gas streams shall be determined by using one of the following method(s) : Method 25 or 25A of 40 CFR Part 60, Appendix A.

Emission Limitation: 3.54 pounds of Organic Compounds per hour.

Applicable Compliance Method: This emission limitation shall apply to the summation of controlled and uncontrolled organic compound emissions. Controlled organic emissions shall be determined by Method 25 or 25A of 40 CFR Part 60, Appendix A. Uncontrolled emissions shall be determined by mass balance calculations provided by the facility.

Emission Limitation: 15.5 tons of Organic Compounds per year.

Applicable Compliance Method: This emission limitation shall apply to the summation of controlled and uncontrolled organic compound emissions. Controlled organic compound emissions shall be determined by multiplying the hourly emission rate (established by the initial compliance test or most recent compliance test) by the emission units hours of operation and then dividing by 2000 (pounds per ton). Uncontrolled organic compound emissions shall be determined by mass balance calculations supplied by the facility.

Emission Limitation: 0.18 pounds of Particulate Matter per hour.

Applicable Compliance Method: Particulate Matter emissions shall be determined in accordance with the following method, if required: Method 5 of 40 CFR, Part 60, Appendix A. Emissions are based on maximum facility operation.

Emission Limitation: 0.8 tons of Particulate Matter per year.

**BF Goodrich Company - Avon Lake Plant****PTI Application: 02-12120****Issued****Facility ID: 0247030004**Emissions Unit ID: **P007**

Applicable Compliance Method: Annual Particulate Matter emissions shall be determined by multiplying pounds of particulate matter per hour (determined by the most recent compliance test, if required) by hours of operation and dividing by 2000 (pounds per ton).

Emission Limitation: Visible particulate stack emissions shall not exceed 10 percent opacity as a 6-minute average.

Applicable Compliance Method: Compliance with the visible emission limitation shall be determined in accordance with Method 9 of 40 CFR, Part 60, Appendix A.

Emission Limitation: 0.26 pounds of Hazardous Air Pollutants per hour

Applicable Compliance Method: This emission limitation shall apply to the summation of controlled and uncontrolled hazardous air pollutant (HAP) emissions. Controlled HAP emissions shall be determined in accordance with Method 18 of 40 CFR, Part 60, Appendix A or equivalent method, if required. Uncontrolled HAP emissions shall be based on material balance calculations and facilities knowledge of operations.

Emission Limitation: 1.16 tons of Hazardous Air Pollutants per year.

Applicable Compliance Method: This emission limitation shall apply to the summation of controlled and uncontrolled hazardous air pollutant (HAP) emissions. Controlled HAP emissions shall be determined by multiplying the hourly emission rate (established by the most recent compliance test, or material balance calculation) by the emission units hours of operation and then dividing by 2000 (pounds per ton). Uncontrolled HAP emissions shall be determined by material balance calculations supplied by the facility.
