Dear Permit Holder:

A draft of the Ohio Administrative Code (OAC) Chapter 3745-31 Air Pollution Permit-to-Install and Operate (PTIO) for the referenced facility has been issued for the emissions unit(s) listed in the Authorization section of the enclosed draft permit. This draft action is not an authorization to begin construction or modification of your emissions unit(s). The purpose of this draft is to solicit public comments on the permit. A public notice will appear in the Ohio EPA Weekly Review and the local newspaper, The Plain Dealer. A copy of the public notice and the draft permit are enclosed. This permit can be accessed electronically on the Division of Air Pollution Control (DAPC) Web page, www.epa.ohio.gov/dapc by clicking the "Issued Air Pollution Control Permits" link. Comments will be accepted as a marked-up copy of the draft permit or in narrative format. Any comments must be sent to the following:

Andrew Hall Permit Review/Development Section Ohio EPA, DAPC 122 South Front Street Columbus, Ohio 43215	and	Cleveland Division of Air Quality 2nd Floor 75 Erieview Plaza Cleveland, OH 44114
--	-----	--

Comments and/or a request for a public hearing will be accepted within 30 days of the date the notice is published in the newspaper. You will be notified in writing if a public hearing is scheduled. A decision on issuing a final permit-to-install will be made after consideration of comments received and oral testimony if a public hearing is conducted. Any permit fee that will be due upon issuance of a final Permit-to-Install is indicated in the Authorization section. Please do not submit any payment now. If you have any questions, please contact Cleveland Division of Air Quality at (216)664-2297.

Sincerely,

Michael W. Ahern, Manager
Permit Issuance and Data Management Section, DAPC

Cc: U.S. EPA Region 5 *Via E-Mail Notification*
CDAQ; Pennsylvania; Canada

Permit Strategy Write-Up

1. Check all that apply:

- Synthetic Minor Determination (FEPTIO to avoid Title V)
 Netting Determination

2. Source Description:

Univar USA, Inc. is a chemical storage, blending and distribution facility that purchases chemical products from various manufacturers for resale to industrial users. Facility receives bulk products via tank trucks or railcars that are stored in various service storage tanks, T001 to T014. Products purchased in bulk are typically stored, T001 – T014, blended at P004 (TM1) and P005 (TM2) and/or repackaged direct to tank trucks, J001 to J003, or drums/totes/IBCs, P001 to P003 and P006, prior to distribution and sale. This permit is for emissions unit P006 only which is identical to emissions units P001 – P003.

3. Facility Emissions and Attainment Status:

Univar USA, Inc. currently has the potential to emit (PTE) of 41.1 tons of VOC/year, and 9.9 tons single HAP/year and 24.9 tons combined HAPs/year which was established in the Synthetic Minor PTI 13-03591 that was issued on 5/29/2001 and PTI 13-04038 issued on 12/17/2002 for the storage tanks. Cuyahoga County is currently designated as attainment for regulated air pollutants except PM2.5 and partial nonattainment for lead.

4. Source Emissions:

In order to ensure that the requirements of Title V do not apply, the facility requested to include restrictions on HAP emissions below the major source thresholds. Facility-wide HAP emissions have been restricted to less than 10 tons/yr for any single HAP and less than 25 tons/yr for combined HAPs as rolling, 12-month summation of emissions. The permit contains record keeping requirements to track material usage and calculate HAP emissions on a monthly basis. Quarterly deviation reports are required if HAP emissions exceed the allowable limits.

5. Conclusion:

The proposed FEPTIO permit carries forward the VOC and HAP emission limitations that were established for P001 – P003 previously that have established emission limits below the major source thresholds as a rolling, 12-month summation of emissions. Emissions from P001 – P003 and P006 combined are limited to 9.2 tpy VOC. Therefore this facility is a Synthetic Minor/FEPTIO, and is not subject to the Title V permitting requirements.

6. Please provide additional notes or comments as necessary:

None

7. Total Permit Allowable Emissions Summary (for informational purposes only):

<u>Pollutant</u>	<u>Tons Per Year</u>
VOC	9.2
Single HAP	9.9
Combined HAPs	24.9

PUBLIC NOTICE
Issuance of Draft Air Pollution Permit-To-Install and Operate
UNIVAR USA INC.

Issue Date: 9/29/2011

Permit Number: P0108589

Permit Type: Initial Installation

Permit Description: Initial PTIO for Univar USA for emissions unit P006 which is a non-fixed/movable drum and tote container organic chemical filling operation.

Facility ID: 1318557875

Facility Location: UNIVAR USA INC.

21600 DRAKE RD.,

STRONGSVILLE, OH 44149

Facility Description: Other Chemical and Allied Products Merchant Wholesalers

The Director of the Ohio Environmental Protection Agency issued the draft permit above. The permit and complete instructions for requesting information or submitting comments may be obtained at: epa.ohio.gov/dapc/permit by entering the permit # or: David Hearne, Cleveland Division of Air Quality, 2nd Floor 75 Erieview Plaza, Cleveland, OH 44114. Ph: (216)664-2297

Authorization

Facility ID: 1318557875

Application Number(s): A0042449

Permit Number: P0108589

Permit Description: Initial PTIO for Univar USA for emissions unit P006 which is a non-fixed/movable drum and tote container organic chemical filling operation.

Permit Type: Initial Installation

Permit Fee: \$400.00 *DO NOT send payment at this time, subject to change before final issuance*

Issue Date: 9/29/2011

Effective Date: To be entered upon final issuance

Expiration Date: To be entered upon final issuance

Permit Evaluation Report (PER) Annual Date: To be entered upon final issuance

This document constitutes issuance to:

UNIVAR USA INC.
21600 DRAKE RD.
STRONGSVILLE, OH 44149

of a Permit-to-Install and Operate for the emissions unit(s) identified on the following page.

Ohio EPA District Office or local air agency responsible for processing and administering your permit:

Cleveland Division of Air Quality
2nd Floor
75 Erievue Plaza
Cleveland, OH 44114
(216)664-2297

The above named entity is hereby granted this Permit-to-Install and Operate for the air contaminant source(s) (emissions unit(s)) listed in this section pursuant to Chapter 3745-31 of the Ohio Administrative Code. Issuance of this permit does not constitute expressed or implied approval or agreement that, if constructed or modified in accordance with the plans included in the application, the described emissions unit(s) will operate in compliance with applicable State and Federal laws and regulations.

This permit is granted subject to the conditions attached hereto.

Ohio Environmental Protection Agency

Scott J. Nally
Director

Authorization (continued)

Permit Number: P0108589

Permit Description: Initial PTIO for Univar USA for emissions unit P006 which is a non-fixed/movable drum and tote container organic chemical filling operation.

Permits for the following Emissions Unit(s) or groups of Emissions Units are in this document as indicated below:

Emissions Unit ID:	P006
Company Equipment ID:	Drum filling station
Superseded Permit Number:	
General Permit Category and Type:	Not Applicable

A. Standard Terms and Conditions

1. What does this permit-to-install and operate ("PTIO") allow me to do?

This permit allows you to install and operate the emissions unit(s) identified in this PTIO. You must install and operate the unit(s) in accordance with the application you submitted and all the terms and conditions contained in this PTIO, including emission limits and those terms that ensure compliance with the emission limits (for example, operating, recordkeeping and monitoring requirements).

2. Who is responsible for complying with this permit?

The person identified on the "Authorization" page, above, is responsible for complying with this permit until the permit is revoked, terminated, or transferred. "Person" means a person, firm, corporation, association, or partnership. The words "you," "your," or "permittee" refer to the "person" identified on the "Authorization" page above.

The permit applies only to the emissions unit(s) identified in the permit. If you install or modify any other equipment that requires an air permit, you must apply for an additional PTIO(s) for these sources.

3. What records must I keep under this permit?

You must keep all records required by this permit, including monitoring data, test results, strip-chart recordings, calibration data, maintenance records, and any other record required by this permit for five years from the date the record was created. You can keep these records electronically, provided they can be made available to Ohio EPA during an inspection at the facility. Failure to make requested records available to Ohio EPA upon request is a violation of this permit requirement.

4. What are my permit fees and when do I pay them?

There are two fees associated with permitted air contaminant sources in Ohio:

PTIO fee. This one-time fee is based on a fee schedule in accordance with Ohio Revised Code (ORC) section 3745.11, or based on a time and materials charge for permit application review and permit processing if required by the Director.

You will be sent an invoice for this fee after you receive this PTIO and payment is due within 30 days of the invoice date. You are required to pay the fee for this PTIO even if you do not install or modify your operations as authorized by this permit.

Annual emissions fee. Ohio EPA will assess a separate fee based on the total annual emissions from your facility. You self-report your emissions in accordance with Ohio Administrative Code (OAC) Chapter 3745-78. This fee assessed is based on a fee schedule in ORC section 3745.11 and funds Ohio EPA's permit compliance oversight activities. Unless otherwise specified, facilities subject to one or more synthetic minor restrictions must use Ohio EPA's "Air Services" to submit annual emissions associated with this permit requirement. Ohio EPA will notify you when it is time to report your emissions and to pay your annual emission fees.

5. When does my PTIO expire, and when do I need to submit my renewal application?

This permit expires on the date identified at the beginning of this permit document (see "Authorization" page above) and you must submit a renewal application to renew the permit. Ohio EPA will send a renewal notice to you approximately six months prior to the expiration date of this permit. However, it is

very important that you submit a complete renewal permit application (postmarked prior to expiration of this permit) even if you do not receive the renewal notice.

If a complete renewal application is submitted before the expiration date, Ohio EPA considers this a timely application for purposes of ORC section 119.06, and you are authorized to continue operating the emissions unit(s) covered by this permit beyond the expiration date of this permit until final action is taken by Ohio EPA on the renewal application.

6. What happens to this permit if my project is delayed or I do not install or modify my source?

This PTIO expires 18 months after the issue date identified on the "Authorization" page above unless otherwise specified if you have not (1) started constructing the new or modified emission sources identified in this permit, or (2) entered into a binding contract to undertake such construction. This deadline can be extended by up to 12 months, provided you apply to Ohio EPA for this extension within a reasonable time before the 18-month period has ended and you can show good cause for any such extension.

7. What reports must I submit under this permit?

An annual permit evaluation report (PER) is required in addition to any malfunction reporting required by OAC rule 3745-15-06 or other specific rule-based reporting requirement identified in this permit. Your PER due date is identified in the Authorization section of this permit.

8. If I am required to obtain a Title V operating permit in the future, what happens to the operating provisions and PER obligations under this permit?

If you are required to obtain a Title V permit under OAC Chapter 3745-77 in the future, the permit-to-operate portion of this permit will be superseded by the issued Title V permit. From the effective date of the Title V permit forward, this PTIO will effectively become a PTI (permit-to-install) in accordance with OAC rule 3745-31-02(B). The following terms and conditions will no longer be applicable after issuance of the Title V permit: Section B, Term 1.b) and Section C, for each emissions unit, Term a)(2).

The PER requirements in this permit remain effective until the date the Title V permit is issued and is effective, and cease to apply after the effective date of the Title V permit. The final PER obligation will cover operations up to the effective date of the Title V permit and must be submitted on or before the submission deadline identified in this permit on the last day prior to the effective date of the Title V permit.

9. What are my obligations when I perform scheduled maintenance on air pollution control equipment?

You must perform scheduled maintenance of air pollution control equipment in accordance with OAC rule 3745-15-06(A). If scheduled maintenance requires shutting down or bypassing any air pollution control equipment, you must also shut down the emissions unit(s) served by the air pollution control equipment during maintenance, unless the conditions of OAC rule 3745-15-06(A)(3) are met. Any emissions that exceed permitted amount(s) under this permit (unless specifically exempted by rule) must be reported as deviations in the annual permit evaluation report (PER), including nonexempt excess emissions that occur during approved scheduled maintenance.

10. Do I have to report malfunctions of emissions units or air pollution control equipment? If so, how must I report?

If you have a reportable malfunction of any emissions unit(s) or any associated air pollution control system, you must report this to the Cleveland Division of Air Quality in accordance with OAC rule 3745-15-06(B). Malfunctions that must be reported are those that result in emissions that exceed permitted emission levels. It is your responsibility to evaluate control equipment breakdowns and operational upsets to determine if a reportable malfunction has occurred.

If you have a malfunction, but determine that it is not a reportable malfunction under OAC rule 3745-15-06(B), it is recommended that you maintain records associated with control equipment breakdown or process upsets. Although it is not a requirement of this permit, Ohio EPA recommends that you maintain records for non-reportable malfunctions.

11. Can Ohio EPA or my local air agency inspect the facility where the emission unit(s) is/are located?

Yes. Under Ohio law, the Director or his authorized representative may inspect the facility, conduct tests, examine records or reports to determine compliance with air pollution laws and regulations and the terms and conditions of this permit. You must provide, within a reasonable time, any information Ohio EPA requests either verbally or in writing.

12. What happens if one or more emissions units operated under this permit is/are shut down permanently?

Ohio EPA can terminate the permit terms associated with any permanently shut down emissions unit. "Shut down" means the emissions unit has been physically removed from service or has been altered in such a way that it can no longer operate without a subsequent "modification" or "installation" as defined in OAC Chapter 3745-31.

You should notify Ohio EPA of any emissions unit that is permanently shut down by submitting¹ a certification that identifies the date on which the emissions unit was permanently shut down. The certification must be submitted by an authorized official from the facility. You cannot continue to operate an emissions unit once the certification has been submitted to Ohio EPA by the authorized official.

You must comply with all recordkeeping and reporting for any permanently shut down emissions unit in accordance with the provisions of the permit, regulations or laws that were enforceable during the period of operation, such as the requirement to submit a PER, air fee emission report, or malfunction report. You must also keep all records relating to any permanently shutdown emissions unit, generated while the emissions unit was in operation, for at least five years from the date the record was generated.

Again, you cannot resume operation of any emissions unit certified by the authorized official as being permanently shut down without first applying for and obtaining a permit pursuant to OAC Chapter 3745-31.

¹ Permittees that use Ohio EPA's "Air Services" can mark the affected emissions unit(s) as "permanently shutdown" in the facility profile along with the date the emissions unit(s) was permanently removed and/or disabled. Submitting the facility profile update will constitute notifying of the permanent shutdown of the affected emissions unit(s).

13. Can I transfer this permit to a new owner or operator?

You can transfer this permit to a new owner or operator. If you transfer the permit, you must follow the procedures in OAC Chapter 3745-31, including notifying Ohio EPA or the local air agency of the change in ownership or operator. Any transferee of this permit must assume the responsibilities of the transferor permit holder.

14. Does compliance with this permit constitute compliance with OAC rule 3745-15-07, "air pollution nuisance"?

This permit and OAC rule 3745-15-07 prohibit operation of the air contaminant source(s) regulated under this permit in a manner that causes a nuisance. Ohio EPA can require additional controls or modification of the requirements of this permit through enforcement orders or judicial enforcement action if, upon investigation, Ohio EPA determines existing operations are causing a nuisance.

15. What happens if a portion of this permit is determined to be invalid?

If a portion of this permit is determined to be invalid, the remainder of the terms and conditions remain valid and enforceable. The exception is where the enforceability of terms and conditions are dependent on the term or condition that was declared invalid.

B. Facility-Wide Terms and Conditions

1. This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).
 - a) For the purpose of a permit-to-install document, the facility-wide terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.
 - (1) None.
 - b) For the purpose of a permit-to-operate document, the facility-wide terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.
 - (1) None.

C. Emissions Unit Terms and Conditions

1. P006, Drum filling station

Operations, Property and/or Equipment Description:

Movable drum and tote container filling operation - drum filling station No.6

a) This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).

(1) For the purpose of a permit-to-install document, the emissions unit terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.

a. None.

(2) For the purpose of a permit-to-operate document, the emissions unit terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.

a. b)(1)c., d)(1), e)(2), f)(1)a., f)(1)b., f)(1)c.

b) Applicable Emissions Limitations and/or Control Requirements

(1) The specific operation(s), property, and/or equipment that constitute each emissions unit along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures are identified below. Emissions from each unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

	Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures
a.	OAC rule 3745-31-05(A)(3)	The requirements of this rule also include compliance with the requirements of OAC rule OAC rule 3745-31-05(D)(1)(b). See b)(2)a. below.
b.	OAC rule 3745-21-07(M)	See b)(2)b. below.
c.	OAC rule 3745-31-05(D)(1)(b) FEPTIO to avoid Title V	Combined OC emissions (for P001-P003 and P006) shall not exceed 9.2 tons per rolling, 12-month period. Facility-wide HAP emission limitations: 9.9 tons per rolling, 12-month period for any single hazardous air pollutant (HAP) and 24.9 tons per rolling, 12-month period for total combined HAPs.

Table with 2 columns: Applicable Rules/Requirements, Applicable Emissions Limitations/Control Measures. Row d: OAC rule 3745-114-01, See d)(2) below.

(2) Additional Terms and Conditions

- a. The Best Available Technology determination for this emissions unit is the use of submerged filling or bottom filling system for all containers and tote containers with a capacity greater than 55 gallons.
b. The requirements of OAC rule 3745-21-07(M) do not apply to this emissions unit.
c. The emissions units at this facility that generate HAP emissions are the following: J001 – J003, P001 – P006, and T001 –T014.

c) Operational Restrictions

- (1) None.

d) Monitoring and/or Recordkeeping Requirements

- (1) The permittee shall collect and maintain the following information, on a monthly basis, while this emissions unit is in operation:
a. the name and identification of each product;
b. identify each product that is a HAP;
c. the volume throughput of each product in gallons;
d. the density of each product, in pounds per gallon;
e. the molecular weight of each product;
f. the vapor pressure of each OC product in pounds per square inch absolute;
g. the total OC emission rate for all products, in pounds per month, as determined in f)(1)a. below;
h. the total OC emission rate for all products, in tons per rolling, 12-months as determined in f)(1)a. below;
i. the total HAPs emission rate for each single HAP, in tons per rolling, 12-months period as determined in f)(1)b. below; and
j. the total HAPs emission rate for total combined HAPs, in tons per rolling, 12-months period as determined in f)(1)c. below.

- (2) Modeling to demonstrate compliance with, the "Toxic Air Contaminant Statute", ORC 3704.03(F)(4)(b), was not necessary because the emissions unit's maximum annual emissions for each toxic air contaminant, as defined in OAC rule 3745-114-01, will be less than 1.0 ton per year. OAC Chapter 3745-31 requires permittees to apply for and obtain a new or modified FEPTIO prior to making a "modification" as defined by OAC rule 3745-31-01. The permittee is hereby advised that changes in the composition of the materials, or use of new materials, that would cause the emissions of any toxic air contaminant to increase to above 1.0 ton per year may require the permittee to apply for and obtain a new FEPTIO.
- e) Reporting Requirements
- (1) The permittee shall submit an annual Permit Evaluation Report (PER) to the Ohio EPA. The PER must be completed electronically and submitted via the Ohio EPA eBusiness Center: Air Services by the due date identified in the Authorization section of this permit. The permit evaluation report shall cover a reporting period of no more than twelve-months for each air contaminant source identified in this permit.
- (2) The permittee shall submit quarterly deviation (excursion) reports that identify:
- a. all deviations (excursions) of the following emission limitations, operational restrictions and/or control device operating parameter limitations that restrict the potential to emit (PTE) of any regulated air pollutant and have been detected by the monitoring, record keeping and/or testing requirements in this permit:
 - i. identification of each rolling, 12-month period during which any single HAP emissions from the list of emissions units in b)(2)d. exceeded 9.9 tons, and the actual single HAP emissions for each such rolling, 12-month period;
 - ii. identification of each rolling, 12-month period during which the combined HAP emissions from the list of emissions units in b)(2)d. exceeded 24.9 tons, and the actual combined HAP emissions for each such rolling 12-month period; and
 - iii. identify all exceedances of the rolling, 12-month emission limitation for OC.
 - b. the probable cause of each deviation (excursion);
 - c. any corrective actions that were taken to remedy the deviations (excursions) or prevent future deviations (excursions); and
 - d. the magnitude and duration of each deviation (excursion).

If no deviations (excursions) occurred during a calendar quarter, the permittee shall submit a report that states that no deviations (excursions) occurred during the quarter.

The quarterly reports shall be submitted, electronically through Ohio EPA Air Services, each year by January 31 (covering October to December), April 30 (covering January to

March), July 31 (covering April to June), and October 31 (covering July to September), unless an alternative schedule has been established and approved by the Cleveland Division of Air Quality.

- (3) Unless other arrangements have been approved by the Director, all notifications and reports shall be submitted through the Ohio EPA's eBusiness Center: Air Services online web portal.
- f) Testing Requirements
- (1) Compliance with the Emissions Limitations and/or Control Requirements specified in b) of these terms and conditions shall be determined in accordance with the following methods:
- a. Emission Limitation:
- 9.2 tons OC per rolling, 12-month period (combined total for P001-P003 and P006)
- Compliance Method:
- Compliance shall be determined based on a rolling, 12-month summation of OC emissions based on the record keeping in d)(1) above and calculated as follows:
- AP-42, section 5.2 (5/95), Table 5.2-1:
- $$L_L = (\text{lbs}/1000 \text{ gallons}) = 12.46 \frac{\text{SPM}}{T}$$
- $$\text{lbs/month} = (LL) * (\text{gallons/month})$$
- where:
- L_L = loading loss, pounds per 1000 gallons of liquid loaded;
 - S = a saturation factor (see Table 5.2-1);
 - P = true vapor pressure of liquid loaded, pounds per square inch absolute (psia);
 - M = molecular weight of vapors, pounds per pound-mole (lb/lb-mole)
 - T = temperature of bulk liquid loaded, °R (°F + 460)
- Sum the total lbs OC emissions/month to obtain a rolling, 12-month summation, after the first twelve (12) months, each new month constitutes a new 12-month summation, divide the rolling 12-month summation by 2000 lbs. Sum the OC emissions from P006 with the OC emissions from P001-P003 to determine total combined emissions.
- b. Emission Limitation:
- 9.9 tons per rolling, 12-month period for any single HAP facility-wide for the list of emissions units in b)(2)c.

Applicable Compliance Method:

Compliance shall be based on the record keeping requirements for each HAP product as specified in d)(1) of these terms and conditions and the following equation for P006:

AP-42, section 5.2;

$$\text{Loading losses} = LL = (\text{lbs}/1000 \text{ gallons}) = 12.46 \frac{\text{SPM}}{T};$$

S= Saturation factor (0.6 for submerged filling dedicated normal service tank, (0.5 for submerged filling clean tank, Table 5.2-1);

P= Vapor pressure of material loaded at T, in pounds per square inch absolute;

M= Molecular weight of material loaded;

T= Temperature of material loaded, degrees Rankine;

$$\text{lbs/month} = (LL) * \text{gallons/month}$$

Apply the above equation to each single HAP from emissions unit P006.

Sum total the monthly emissions for each single HAP (total lbs HAP emissions/month) from emissions unit P006 to obtain a rolling, 12-month summation for each HAP, after the first twelve (12) months, each new month constitutes a new 12-month summation, divide the rolling, 12-month summation by 2000 lbs. Repeat for each single HAP.

To determine the total facility-wide HAP emissions, sum the HAP emissions for all of the emissions units listed in b)(2)c.

c. Emission Limitation:

24.9 tons per rolling, 12-month period for total combined HAPs for the list of emissions units in b)(2)c.

Applicable Compliance Method:

Compliance shall be based on a rolling, 12-month summation of all HAPs emissions as calculated as follows:

Sum total individual HAPs emissions as calculated from f)(1)b. to obtain total lbs HAPs emissions/month, sum total of the total monthly emissions (total lbs HAPs emissions/month) to obtain a rolling, 12-month summation, after the first twelve (12) months, each new month constitutes a new 12-month summation, divide the rolling, 12-month summation by 2000 lbs.

To determine the total facility-wide HAP emissions, sum the HAP emissions for all of the emissions units listed in b)(2)c.

g) Miscellaneous Requirements

- (1) The combined annual emission 9.2 TPY OC in b)(1) includes the emissions from P001-P003 which were permitted previously and the renewal PTIO is processed in a separate permit action for emissions unit P001-P003.
- (2) This emissions unit was installed in 1979 and modified in 1993.
