

Facility ID: 0278060352 Issuance type: Final State Permit To Operate

This version of facility specific terms and conditions was converted from a database format to an HTML file during an upgrade of the Ohio EPA, Division of Air Pollution Control's permitting software. Every attempt has been made to convert the terms and conditions to look and substantively conform to the permit issued or being drafted in STARS. However, the format of the terms may vary slightly from the original. In addition, although it is not expected, there is a slight possibility that a term and condition may have been inadvertently "left out" of this reproduction during the conversion process. Therefore, if this version is to be used as a starting point in drafting a new version of a permit, it is imperative that the entire set of terms and conditions be reviewed to ensure they substantively mimic the issued permit. The official version of any permit issued final by Ohio EPA is kept in the Agency's Legal section. The Legal section may be contacted at (614) 644-3037.

In addition to the terms and conditions, hyperlinks have been inserted into the document so you may more readily access the section of the document you wish to review.

Finally, the term language under "Part II" and before "A. Applicable Emissions Limitations..." has been added to aid in document conversion, and was not part of the original issued permit.

THIS IS NOT AN OFFICIAL VERSION OF THE PERMIT. SEE PAGE 1 FOR ADDITIONAL INFORMATION

Facility ID: 0278060352 Emissions Unit ID: P901 Issuance type: Final State Permit To Operate

Part II - Special Terms and Conditions

This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).

1. For the purpose of a permit-to-install document, the emissions unit terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.
 - (a) None.
2. For the purpose of a permit-to-operate document, the emissions unit terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.
 - (a) None.

A. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
ADM Mill Scale Dryer and Screening Plant with Wet Scrubber	OAC rule 3745-31-05 PTI No. 02-3996	0.04 grain of particulate emission ("PE") per dry standard cubic foot of exhaust gases and 4.53 pounds per hour. Visible particulate emissions from the scrubber and process fugitive emissions of this emissions unit shall not exceed 10% as a 6-minute average. 25.1 tpy particulate emissions.
	OAC rule 3745-21-07(G)	7.3 tpy organic compound emissions. Emissions of organic compounds shall not exceed 8 pounds per hour and 40 pounds per day.
	OAC rule 3745-17-11 OAC rule 3745-17-07 OAC rule 3745-17-08	The emission limitations specified by these rules are less stringent than the emission limitations established pursuant to OAC rule 3745-31-05.

2. **Additional Terms and Conditions**
 - (a) None

B. Operational Restrictions

1. The pressure drop across the scrubber shall be maintained within the range of 4 to 8 inches of water while the emissions unit is in operation.
2. This emissions unit shall restrict operation to a maximum of 16 hours per day.
3. The permittee shall continue to minimize fugitive particulate emission from the screener by maintaining a tight cover on the screen and by maintaining the screener house (enclosure) in good condition.
4. The permittee shall continue to minimize fugitive particulate emissions from material transfer operations by the use of enclosures and good operating practices.
5. The permittee shall continue to keep an inspection and maintenance log for the dryer, scrubber, and screener house enclosure.

C. Monitoring and/or Record Keeping Requirements

1. The permittee shall properly operate and maintain equipment to monitor the pressure drop across the scrubber while the emissions unit is in operation. The monitoring equipment shall be installed, calibrated, operated, and maintained in accordance with the manufacturer's recommendations, instructions, and operating manual(s). The permittee shall record the pressure drop across the scrubber on daily basis.
2. The permittee shall maintain records for this emissions unit which indicate the total hours of operation.

D. Reporting Requirements

1. The permittee shall submit pressure drop deviation (excursion) reports that identify all periods of time during which the pressure drop across the scrubber did not comply with the allowable range specified above.

2. The permittee shall submit deviation (excurion) reports that identify each day the operation hour restriction was exceeded. Each report shall be submitted within 30 days after the deviation occurs.

E. Testing Requirements

1. Compliance with the emissions limitation(s) in section A.I.1. of these terms and conditions shall be determined in accordance with the following method(s):
Emission Limitation: 10% opacity of visible particulate emissions

Applicable Compliance Method: Compliance shall be determined based upon OAC rule 3745-17-03(B)(1).
Emission Limitation: 0.04 grain of particulate emssion ("PE") per dry standard cubic foot of exhaust gases and 4.53 pounds per hour.

Applicable Compliance Method: Compliance shall be based upon OAC rule 3745-17-03(B)(10).
Emission Limitation: 8 pounds per hour and 40 pounds per day of organic emissions.

Applicable Compliance Method: Compliance has been demonstrated by the testing done on Oct. 11, 1994, with results of 2.4 pounds per hour, and compliance with term B.2.
If required pursuant to OAC 3745-15-04, the permittee shall demonstrate compliance with the hourly OC emission limit of this permit by means of physical testing of the effluent from this emissions unit in accordance with testing procedures listed in 40 CFR Part 60, "Standards of Performance for New Stationary Sources", Appendix A, Method 25 or 25A.
Emission Limitation: 25.1 tpy particulate emissions and 7.3 tpy organic compound emissions

Applicable Compliance Method: Compliance shall be based upon the most recent stack test hourly emissiom rates multiplied by the yearly hours of operation and divided by 2000.
2. The permittee shall conduct, or have conducted, emission testing for this emissions unit in accordance with the following requirements:
The emission testing shall be conducted within 3 months after issuance of the permit and approximately 2.5 years after issuance of the permit .
The emission testing shall be conducted to demonstrate compliance with the allowable mass emission rates for particulate matter .
The following test method(s) shall be employed to demonstrate compliance with the allowable mass emission rate(s): for particulate matter, Method 5 of 40 CFR Part 60, Appendix A.
The test(s) shall be conducted while the emissions unit is operating at or near its maximum capacity, unless otherwise specified or approved by the Ohio EPA Northeast District Office.
3. Not later than 30 days prior to the proposed test date(s), the permittee shall submit an "Intent to Test" notification to the Ohio EPA Northeast District Office. The "Intent to Test" notification shall describe in detail the proposed test methods and procedures, the emissions unit operating parameters, the time(s) and date(s) of the test(s), and the person(s) who will be conducting the test(s). Failure to submit such notification for review and approval prior to the test(s) may result in the Ohio EPA Northeast District Offices refusal to accept the results of the emission test(s).
4. Personnel from the Ohio EPA Northeast District Office shall be permitted to witness the test(s), examine the testing equipment, and acquire data and information necessary to ensure that the operation of the emissions unit and the testing procedures provide a valid characterization of the emissions from the emissions unit and/or the performance of the control equipment.
5. A comprehensive written report on the results of the emissions test(s) shall be signed by the person or persons responsible for the tests and submitted to the Ohio EPA Northeast District Office within 30 days following completion of the test(s). The permittee may request additional time for the submittal of the written report, where warranted, with prior approval from the Ohio EPA Northeast District Office.

F. Miscellaneous Requirements

1. None
