Dear Permit Holder:

Enclosed please find a final Air Pollution Permit-to-Install (PTI) which will allow you to install or modify the described emissions unit(s) in a manner indicated in the permit. Because this permit contains several conditions and restrictions, we urge you to read it carefully. Please complete a survey at [www.epa.ohio.gov/dapc/permitsurvey.aspx](http://www.epa.ohio.gov/dapc/permitsurvey.aspx) and give us feedback on your permitting experience. We value your opinion.

The issuance of this PTI is a final action of the Director and may be appealed to the Environmental Review Appeals Commission pursuant to Section 3745.04 of the Ohio Revised Code. The appeal must be in writing and set forth the action complained of and the grounds upon which the appeal is based. The appeal must be filed with the Commission within thirty (30) days after notice of the Director's action. The appeal must be accompanied by a filing fee of \$70.00, made payable to "Ohio Treasurer Josh Mandel," which the Commission, in its discretion, may reduce if by affidavit you demonstrate that payment of the full amount of the fee would cause extreme hardship. Notice of the filing of the appeal shall be filed with the Director within three (3) days of filing with the Commission. Ohio EPA requests that a copy of the appeal be served upon the Ohio Attorney General's Office, Environmental Enforcement Section. An appeal may be filed with the Environmental Review Appeals Commission at the following address:

Environmental Review Appeals Commission  
309 South Fourth Street, Room 222  
Columbus, OH 43215

The Ohio EPA is encouraging companies to investigate pollution prevention and energy conservation. Not only will this reduce pollution and energy consumption, but it can also save you money. If you would like to learn ways you can save money while protecting the environment, please contact our Office of Compliance Assistance and Pollution Prevention at (614) 644-3469. If you have any questions regarding this permit, please contact the Ohio EPA DAPC, Southeast District Office. This permit can be accessed electronically on the Division of Air Pollution Control (DAPC) Web page, [www.epa.ohio.gov/dapc](http://www.epa.ohio.gov/dapc) by clicking the "Issued Air Pollution Control Permits" link.

Sincerely,

Michael W. Ahern, Manager  
Permit Issuance and Data Management Section, DAPC

| Permit:  | P0108298, Permit-To-Install - Administrative Modification       |
| A public notice for the draft permit issuance was published in the Ohio EPA Weekly Review and appeared in the Zanesville Times Recorder on 02/28/2012. The comment period ended on 03/29/2012. |   |
| Hearing date (if held)   |   |
| Hearing Public Notice Date (if different from draft public notice)   |   |

The following comments were received during the comment period specified. Ohio EPA reviewed and considered all comments received during the public comment period. By law, Ohio EPA has authority to consider specific issues related to protection of the environment and public health. Often, public concerns fall outside the scope of that authority. For example, concerns about zoning issues are addressed at the local level. Ohio EPA may respond to those concerns in this document by identifying another government agency with more direct authority over the issue.

In an effort to help you review this document, the questions are grouped by topic and organized in a consistent format. PDF copies of the original comments in the format submitted are available upon request.

**No public comments were received during the draft period. Comments submitted by the permittee have been addressed through separate correspondence.**

## Authorization

Facility ID: 0660000247  
Facility Description: Power Plant.  
Application Number(s): M0001293  
Permit Number: P0108298  
Permit Description: Administrative modification of 2001 PSD permit to: clarify startup/shutdown definition; correct startup/shutdown emission limitations for emission units P001 and P002; clarify rule applicability; and update monitoring, record keeping, reporting, and testing language.  
Permit Type: Administrative Modification  
Permit Fee: \$1,000.00  
Issue Date: 3/30/2012  
Effective Date: 3/30/2012

This document constitutes issuance to:

Appalachian Power Co, Dresden Plant  
9595 McGlade School Rd  
Dresden, OH 43821

of a Permit-to-Install for the emissions unit(s) identified on the following page.

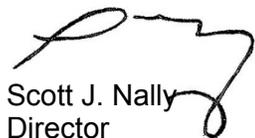

Ohio EPA District Office or local air agency responsible for processing and administering your permit:

Ohio EPA DAPC, Southeast District Office  
2195 Front Street  
Logan, OH 43138  
(740)385-8501

The above named entity is hereby granted a Permit-to-Install for the emissions unit(s) listed in this section pursuant to Chapter 3745-31 of the Ohio Administrative Code. Issuance of this permit does not constitute expressed or implied approval or agreement that, if constructed or modified in accordance with the plans included in the application, the emissions unit(s) of environmental pollutants will operate in compliance with applicable State and Federal laws and regulations, and does not constitute expressed or implied assurance that if constructed or modified in accordance with those plans and specifications, the above described emissions unit(s) of pollutants will be granted the necessary permits to operate (air) or NPDES permits as applicable.

This permit is granted subject to the conditions attached hereto.

Ohio Environmental Protection Agency

  
Scott J. Nally  
Director

## Authorization (continued)

Permit Number: P0108298

Permit Description: Administrative modification of 2001 PSD permit to: clarify startup/shutdown definition; correct startup/shutdown emission limitations for emission units P001 and P002; clarify rule applicability; and update monitoring, record keeping, reporting, and testing language.

Permits for the following Emissions Unit(s) or groups of Emissions Units are in this document as indicated below:

**Group Name: 171.7 MW Turbines**

## **A. Standard Terms and Conditions**

**1. Federally Enforceable Standard Terms and Conditions**

- a) All Standard Terms and Conditions are federally enforceable, with the exception of those listed below which are enforceable under State law only:
  - (1) Standard Term and Condition A.2.a), Severability Clause
  - (2) Standard Term and Condition A.3.c) through A. 3.e)General Requirements
  - (3) Standard Term and Condition A.6.c) and A. 6.d), Compliance Requirements
  - (4) Standard Term and Condition A.9., Reporting Requirements
  - (5) Standard Term and Condition A.10., Applicability
  - (6) Standard Term and Condition A.11.b) through A.11.e), Construction of New Source(s) and Authorization to Install
  - (7) Standard Term and Condition A.14., Public Disclosure
  - (8) Standard Term and Condition A.15., Additional Reporting Requirements When There Are No Deviations of Federally Enforceable Emission Limitations, Operational Restrictions, or Control Device Operating Parameter Limitations
  - (9) Standard Term and Condition A.16., Fees
  - (10) Standard Term and Condition A.17., Permit Transfers

**2. Severability Clause**

- a) A determination that any term or condition of this permit is invalid shall not invalidate the force or effect of any other term or condition thereof, except to the extent that any other term or condition depends in whole or in part for its operation or implementation upon the term or condition declared invalid.
- b) All terms and conditions designated in parts B and C of this permit are federally enforceable as a practical matter, if they are required under the Act, or any of its applicable requirements, including relevant provisions designed to limit the potential to emit of a source, are enforceable by the Administrator of the U.S. EPA and the State and by citizens (to the extent allowed by section 304 of the Act) under the Act. Terms and conditions in parts B and C of this permit shall not be federally enforceable and shall be enforceable under State law only, only if specifically identified in this permit as such.

**3. General Requirements**

- a) The permittee must comply with all terms and conditions of this permit. Any noncompliance with the federally enforceable terms and conditions of this permit constitutes a violation of the Act, and is grounds for enforcement action or for permit revocation, revocation and re-issuance, or modification.

- b) It shall not be a defense for the permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the federally enforceable terms and conditions of this permit.
- c) This permit may be modified, revoked, or revoked and reissued, for cause. The filing of a request by the permittee for a permit modification, revocation and reissuance, or revocation, or of a notification of planned changes or anticipated noncompliance does not stay any term and condition of this permit.
- d) This permit does not convey any property rights of any sort, or any exclusive privilege.
- e) The permittee shall furnish to the Director of the Ohio EPA, or an authorized representative of the Director, upon receipt of a written request and within a reasonable time, any information that may be requested to determine whether cause exists for modifying or revoking this permit or to determine compliance with this permit. Upon request, the permittee shall also furnish to the Director or an authorized representative of the Director, copies of records required to be kept by this permit. For information claimed to be confidential in the submittal to the Director, if the Administrator of the U.S. EPA requests such information, the permittee may furnish such records directly to the Administrator along with a claim of confidentiality.

#### **4. Monitoring and Related Record Keeping and Reporting Requirements**

- a) Except as may otherwise be provided in the terms and conditions for a specific emissions unit, the permittee shall maintain records that include the following, where applicable, for any required monitoring under this permit:
  - (1) The date, place (as defined in the permit), and time of sampling or measurements.
  - (2) The date(s) analyses were performed.
  - (3) The company or entity that performed the analyses.
  - (4) The analytical techniques or methods used.
  - (5) The results of such analyses.
  - (6) The operating conditions existing at the time of sampling or measurement.
- b) Each record of any monitoring data, testing data, and support information required pursuant to this permit shall be retained for a period of five years from the date the record was created. Support information shall include, but not be limited to all calibration and maintenance records and all original strip-chart recordings for continuous monitoring instrumentation, and copies of all reports required by this permit. Such records may be maintained in computerized form.
- c) Except as may otherwise be provided in the terms and conditions for a specific emissions unit, the permittee shall submit required reports in the following manner:
  - (1) Reports of any required monitoring and/or recordkeeping of federally enforceable information shall be submitted to the Ohio EPA DAPC, Southeast District Office.

- (2) Quarterly written reports of (i) any deviations from federally enforceable emission limitations, operational restrictions, and control device operating parameter limitations, excluding deviations resulting from malfunctions reported in accordance with OAC rule 3745-15-06, that have been detected by the testing, monitoring and recordkeeping requirements specified in this permit, (ii) the probable cause of such deviations, and (iii) any corrective actions or preventive measures taken, shall be made to the Ohio EPA DAPC, Southeast District Office. The written reports shall be submitted (i.e., postmarked) quarterly, by January 31, April 30, July 31, and October 31 of each year and shall cover the previous calendar quarters. See A.15. below if no deviations occurred during the quarter.
  - (3) Written reports, which identify any deviations from the federally enforceable monitoring, recordkeeping, and reporting requirements contained in this permit shall be submitted (i.e., postmarked) to the Ohio EPA DAPC, Southeast District Office every six months, by January 31 and July 31 of each year for the previous six calendar months. If no deviations occurred during a six-month period, the permittee shall submit a semi-annual report, which states that no deviations occurred during that period.
  - (4) This permit is for an emissions unit located at a Title V facility. Each written report shall be signed by a responsible official certifying that, based on information and belief formed after reasonable inquiry, the statements and information in the report are true, accurate, and complete.
- d) The permittee shall report actual emissions pursuant to OAC Chapter 3745-78 for the purpose of collecting Air Pollution Control Fees.

## 5. Scheduled Maintenance/Malfunction Reporting

Any scheduled maintenance of air pollution control equipment shall be performed in accordance with paragraph (A) of OAC rule 3745-15-06. The malfunction, i.e., upset, of any emissions units or any associated air pollution control system(s) shall be reported to the Ohio EPA DAPC, Southeast District Office in accordance with paragraph (B) of OAC rule 3745-15-06. (The definition of an upset condition shall be the same as that used in OAC rule 3745-15-06(B)(1) for a malfunction.) The verbal and written reports shall be submitted pursuant to OAC rule 3745-15-06.

Except as provided in that rule, any scheduled maintenance or malfunction necessitating the shutdown or bypassing of any air pollution control system(s) shall be accompanied by the shutdown of the emission unit(s) that is (are) served by such control system(s).

## 6. Compliance Requirements

- a) The emissions unit(s) identified in this Permit shall remain in full compliance with all applicable State laws and regulations and the terms and conditions of this permit.
- b) Any document (including reports) required to be submitted and required by a federally applicable requirement in this permit shall include a certification by a responsible official that, based on information and belief formed after reasonable inquiry, the statements in the document are true, accurate, and complete.

- c) Upon presentation of credentials and other documents as may be required by law, the permittee shall allow the Director of the Ohio EPA or an authorized representative of the Director to:
  - (1) At reasonable times, enter upon the permittee's premises where a source is located or the emissions-related activity is conducted, or where records must be kept under the conditions of this permit.
  - (2) Have access to and copy, at reasonable times, any records that must be kept under the conditions of this permit, subject to the protection from disclosure to the public of confidential information consistent with ORC section 3704.08.
  - (3) Inspect at reasonable times any facilities, equipment (including monitoring and air pollution control equipment), practices, or operations regulated or required under this permit.
  - (4) As authorized by the Act, sample or monitor at reasonable times substances or parameters for the purpose of assuring compliance with the permit and applicable requirements.
- d) The permittee shall submit progress reports to the Ohio EPA DAPC, Southeast District Office concerning any schedule of compliance for meeting an applicable requirement. Progress reports shall be submitted semiannually or more frequently if specified in the applicable requirement or by the Director of the Ohio EPA. Progress reports shall contain the following:
  - (1) Dates for achieving the activities, milestones, or compliance required in any schedule of compliance, and dates when such activities, milestones, or compliance were achieved.
  - (2) An explanation of why any dates in any schedule of compliance were not or will not be met, and any preventive or corrective measures adopted.

## **7. Best Available Technology**

As specified in OAC Rule 3745-31-05, new sources that must employ Best Available Technology (BAT) shall comply with the Applicable Emission Limitations/Control Measures identified as BAT for each subject emissions unit.

## **8. Air Pollution Nuisance**

The air contaminants emitted by the emissions units covered by this permit shall not cause a public nuisance, in violation of OAC rule 3745-15-07.

## **9. Reporting Requirements**

The permittee shall submit required reports in the following manner:

- a) Reports of any required monitoring and/or recordkeeping of state-only enforceable information shall be submitted to the Ohio EPA DAPC, Southeast District Office.
- b) Except as otherwise may be provided in the terms and conditions for a specific emissions unit, quarterly written reports of (a) any deviations (excursions) from state-only required emission limitations, operational restrictions, and control device operating parameter limitations that have

been detected by the testing, monitoring, and recordkeeping requirements specified in this permit, (b) the probable cause of such deviations, and (c) any corrective actions or preventive measures which have been or will be taken, shall be submitted to the Ohio EPA DAPC, Southeast District Office. If no deviations occurred during a calendar quarter, the permittee shall submit a quarterly report, which states that no deviations occurred during that quarter. The reports shall be submitted (i.e., postmarked) quarterly, by January 31, April 30, July 31, and October 31 of each year and shall cover the previous calendar quarters. (These quarterly reports shall exclude deviations resulting from malfunctions reported in accordance with OAC rule 3745-15-06.)

**10. Applicability**

This Permit-to-Install is applicable only to the emissions unit(s) identified in the Permit-to-Install. Separate application must be made to the Director for the installation or modification of any other emissions unit(s).

**11. Construction of New Sources(s) and Authorization to Install**

- a) This permit does not constitute an assurance that the proposed source will operate in compliance with all Ohio laws and regulations. This permit does not constitute expressed or implied assurance that the proposed facility has been constructed in accordance with the application and terms and conditions of this permit. The action of beginning and/or completing construction prior to obtaining the Director's approval constitutes a violation of OAC rule 3745-31-02. Furthermore, issuance of this permit does not constitute an assurance that the proposed source will operate in compliance with all Ohio laws and regulations. Issuance of this permit is not to be construed as a waiver of any rights that the Ohio Environmental Protection Agency (or other persons) may have against the applicant for starting construction prior to the effective date of the permit. Additional facilities shall be installed upon orders of the Ohio Environmental Protection Agency if the proposed facilities cannot meet the requirements of this permit or cannot meet applicable standards.
- b) If applicable, authorization to install any new emissions unit included in this permit shall terminate within eighteen months of the effective date of the permit if the owner or operator has not undertaken a continuing program of installation or has not entered into a binding contractual obligation to undertake and complete within a reasonable time a continuing program of installation. This deadline may be extended by up to 12 months if application is made to the Director within a reasonable time before the termination date and the party shows good cause for any such extension.
- c) The permittee may notify Ohio EPA of any emissions unit that is permanently shut down (i.e., the emissions unit has been physically removed from service or has been altered in such a way that it can no longer operate without a subsequent "modification" or "installation" as defined in OAC Chapter 3745-31) by submitting a certification from the authorized official that identifies the date on which the emissions unit was permanently shut down. Authorization to operate the affected emissions unit shall cease upon the date certified by the authorized official that the emissions unit was permanently shut down. At a minimum, notification of permanent shut down shall be made or confirmed by marking the affected emissions unit(s) as "permanently shut down" in Ohio EPA's "Air Services" along with the date the emissions unit(s) was permanently removed and/or disabled. Submitting the facility profile update will constitute notifying of the permanent shutdown of the affected emissions unit(s).

- d) The provisions of this permit shall cease to be enforceable for each affected emissions unit after the date on which an emissions unit is permanently shut down (i.e., emissions unit has been physically removed from service or has been altered in such a way that it can no longer operate without a subsequent "modification" or "installation" as defined in OAC Chapter 3745-31). All records relating to any permanently shutdown emissions unit, generated while the emissions unit was in operation, must be maintained in accordance with law. All reports required by this permit must be submitted for any period an affected emissions unit operated prior to permanent shut down. At a minimum, the permit requirements must be evaluated as part of the reporting requirements identified in this permit covering the last period the emissions unit operated.

No emissions unit certified by the authorized official as being permanently shut down may resume operation without first applying for and obtaining a permit pursuant to OAC Chapter 3745-31.

- e) The permittee shall comply with any residual requirements related to this permit, such as the requirement to submit a deviation report, air fee emission report, or other any reporting required by this permit for the period the operating provisions of this permit were enforceable, or as required by regulation or law. All reports shall be submitted in a form and manner prescribed by the Director. All records relating to this permit must be maintained in accordance with law.

**12. Permit-To-Operate Application**

The permittee is required to apply for a Title V permit pursuant to OAC Chapter 3745-77. The permittee shall submit a complete Title V permit application or a complete Title V permit modification application within twelve (12) months after commencing operation of the emissions units covered by this permit. However, if the proposed new or modified source(s) would be prohibited by the terms and conditions of an existing Title V permit, a Title V permit modification must be obtained before the operation of such new or modified source(s) pursuant to OAC rule 3745-77-04(D) and OAC rule 3745-77-08(C)(3)(d).

**13. Construction Compliance Certification**

The applicant shall identify the following dates in the online facility profile for each new emissions unit identified in this permit.

- a) Completion of initial installation date shall be entered upon completion of construction and prior to start-up.
- b) Commence operation after installation or latest modification date shall be entered within 90 days after commencing operation of the applicable emissions unit.

**14. Public Disclosure**

The facility is hereby notified that this permit, and all agency records concerning the operation of this permitted source, are subject to public disclosure in accordance with OAC rule 3745-49-03.

**15. Additional Reporting Requirements When There Are No Deviations of Federally Enforceable Emission Limitations, Operational Restrictions, or Control Device Operating Parameter Limitations**

If no deviations occurred during a calendar quarter, the permittee shall submit a quarterly report, which states that no deviations occurred during that quarter. The reports shall be submitted quarterly (i.e., postmarked), by January 31, April 30, July 31, and October 31 of each year and shall cover the previous calendar quarters.

**16. Fees**

The permittee shall pay fees to the Director of the Ohio EPA in accordance with ORC section 3745.11 and OAC Chapter 3745-78. The permittee shall pay all applicable permit-to-install fees within 30 days after the issuance of any permit-to-install. The permittee shall pay all applicable permit-to-operate fees within thirty days of the issuance of the invoice.

**17. Permit Transfers**

Any transferee of this permit shall assume the responsibilities of the prior permit holder. The new owner must update and submit the ownership information via the "Owner/Contact Change" functionality in Air Services once the transfer is legally completed. The change must be submitted through Air Services within thirty days of the ownership transfer date.

**18. Risk Management Plans**

If the permittee is required to develop and register a risk management plan pursuant to section 112(r) of the Clean Air Act, as amended, 42 U.S.C. 7401 et seq. ("Act"), the permittee shall comply with the requirement to register such a plan.

**19. Title IV Provisions**

If the permittee is subject to the requirements of 40 CFR Part 72 concerning acid rain, the permittee shall ensure that any affected emissions unit complies with those requirements. Emissions exceeding any allowances that are lawfully held under Title IV of the Act, or any regulations adopted thereunder, are prohibited.

## **B. Facility-Wide Terms and Conditions**

1. All the following facility-wide terms and conditions are federally enforceable with the exception of those listed below which are enforceable under state law only:
  - a) None.
2. The following emissions units contained in this permit are subject to 40 CFR Part 60, Subpart GG: P001 and P002. The complete NSPS requirements may be accessed via the internet from the Electronic Code of Federal Regulations (e-CFR) website <http://ecfr.gpoaccess.gov> or by contacting the appropriate Ohio EPA District Office or local air agency.
3. The following emissions units contained in this permit are subject to 40 CFR Part 60, Subpart Da: P001 and P002. The complete NSPS requirements may be accessed via the internet from the Electronic Code of Federal Regulations (e-CFR) website <http://ecfr.gpoaccess.gov> or by contacting the appropriate Ohio EPA District Office or local air agency.

## **C. Emissions Unit Terms and Conditions**

**1. Emissions Unit Group - 171.7 MW Turbines 1 and 2: P001, P002,**

| EU ID | Operations, Property and/or Equipment Description  |
|-------|--|
| P001  | Turbine No. 1 to generate electrical power.171.7 MW GE 7FA natural gas / fuel oil –fired dry low NO <sub>x</sub> (DLN) combustion turbine with duct firing operating in combined cycle mode controlled by Selective Catalytic Reduction (SCR). (Administrative modification to PTI 06-06238 issued 10/16/2001 to clarify the startup/shutdown definition and correct startup/shutdown emission limitations). |
| P002  | Turbine No. 2 to generate electrical power.171.7 MW GE 7FA natural gas / fuel oil –fired dry low NO <sub>x</sub> (DLN) combustion turbine with duct firing operating in combined cycle mode controlled by Selective Catalytic Reduction (SCR). (Administrative modification to PTI 06-06238 issued 10/16/2001 to clarify the startup/shutdown definition and correct startup/shutdown emission limitations). |

- a) The following emissions unit terms and conditions are federally enforceable with the exception of those listed below which are enforceable under state law only.
  - (1) g)(1), g)(2), and g)(3)
- b) Applicable Emissions Limitations and/or Control Requirements
  - (1) The specific operation(s), property, and/or equipment that constitute each emissions unit along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures are identified below. Emissions from each unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

|    | Applicable Rules/Requirements | Applicable Emissions Limitations/Control Measures  |
|----|-------------------------------|--|
| a. | OAC rule 3745-31-05(A)(3)     | <p><b>EMISSIONS LIMITS WHEN FIRING NATURAL GAS (WITHOUT DUCT BURNER FIRING), EXCEPT DURING PERIODS OF STARTUP/SHUTDOWN AS DEFINED IN c)(2)</b></p> <p>Nitrogen oxides (NO<sub>x</sub>) emissions shall not exceed 25.0 lbs/hr.</p> <p>Particulate emissions (PE) shall not exceed 18.3 lbs/hr.</p> <p>Sulfur dioxide (SO<sub>2</sub>) emissions shall not exceed 1.6 lbs/hr.</p> <p>See c)(1).</p> <p>Carbon monoxide (CO) emissions shall not exceed 22.0 lbs/hr.</p> |

|  | Applicable Rules/Requirements | Applicable Emissions Limitations/Control Measures  |
|--|-------------------------------|--|

| j. | OAC rule 3745-103  | <p>If the permittee is subject to the requirements of 40 CFR Part 75 concerning acid rain, the permittee shall ensure that any effected emissions unit complies with those requirements. Emissions exceeding any allowances that are lawfully held under Title IV of the Act, or any regulations adopted thereunder, are prohibited.</p>   |

(2) Additional Terms and Conditions

- a. As part of the Best Available Control Technology (BACT) determination for NO<sub>x</sub>, the permittee shall install and maintain dry low NO<sub>x</sub> burners, a selective catalytic reduction (SCR) system, and a water injection system on this emissions unit. Operation of these control systems shall reduce emissions to the NO<sub>x</sub> limitations specified in b)(1)c.
- b. As part of the Best Available Control Technology (BACT) determination for CO, the permittee shall establish and maintain a plan to ensure that the burners are operated in accordance with good combustion practices as recommended by the burner manufacturer.
- c. As part of the Best Available Control Technology (BACT) determination for PM/PM<sub>10</sub> and SO<sub>2</sub>, the permittee shall only use natural gas or low sulfur No. 2 fuel oil (as specified in c)(1)) in this emissions unit.
- d. As part of the Best Available Control Technology (BACT) determination for VOC, the permittee shall install and maintain dry low NO<sub>x</sub> burners, and shall establish and maintain a plan to ensure that the burners are operated in accordance with good combustion practices as recommended by the burner manufacturer.
- e. In accordance with good engineering practices, the dry low NO<sub>x</sub> burners, SCR system, and water injection system on this emissions unit shall be installed, operated and maintained in accordance with the manufacturer's recommendations, with any modifications deemed necessary by the permittee. The permittee shall maintain on site a copy of the operation & maintenance manuals, as provided by the manufacturer.
- f. The emissions of Hazardous Air Pollutants (HAPs), as defined in Section 112 (b) of the Clean Air Act, from emissions units P001 and P002 combined, shall not exceed 9.9 tons per year for an individual HAP and 24.9 tons per year for any combination of HAPs, per rolling 12 month period.
- g. The permittee shall evaluate CO emissions from the combustion turbine in accordance with e)(10) to determine whether a lower CO emission limit may be reliably achieved when the duct burners are being fired while complying with other emission limits and without significant risk to equipment or personnel. This evaluation shall also examine whether there will be significant increase in NO<sub>x</sub> or ammonia emissions, as well as unreasonable increase in maintenance and repair needed for the combustion turbine.

Based upon the results of this evaluation if Ohio EPA finds that the combustion turbine can consistently comply with a more stringent emissions limitation for CO emissions when the duct burners are being fired, it may set those limitations as a result of this evaluation. Additional parameters or factors, e.g., the firing rate of the duct burners may be included in such limits to address particular modes of operation during which such limits may or may not be readily achievable.

c) Operational Restrictions

- (1) The permittee shall burn only natural gas and No.2 distillate (fuel) oil in this emissions unit. The maximum sulfur content of the natural gas shall not exceed 0.3 grains per 100 standard cubic feet. The maximum sulfur content of the No. 2 fuel oil is 0.05 percent sulfur content by weight.
- (2) Startup shall be defined as the operating period prior to reaching Mode 6Q following the initiation operations and shutdown shall be defined as the operating period when the combustion turbine leaves Mode 6Q following the initiation of the cessation of operations. Under no circumstances shall startups exceed 4 hours in duration nor shall shutdowns exceed 1 hour in duration. Startups and shutdowns shall be limited to 285 cycles (one startup and one shutdown per cycle) per year for natural gas and 22 cycles (one startup and one shutdown per cycle) per year for fuel oil.

Hot Start - startup occurs within eight (8) hours after plant shutdown

Warm Start - startup occurs between eight (8) hours to seventy-two (72) hours after a plant shutdown

Cold Start - startup occurs more than seventy-two (72) hours after a plant shutdown

- (3) Startup and shutdown emissions when firing natural gas shall not cause emissions of NO<sub>x</sub> to exceed 32.1 tons, as a rolling, 12-month summation based on monitoring data from the NO<sub>x</sub> continuous emissions monitoring system. Additionally, each startup/shutdown cycle shall not exceed 391 lbsNO<sub>x</sub>.
- (4) Startup and shutdown emissions when firing No. 2 fuel oil shall not cause emissions of NO<sub>x</sub> to exceed 4.45 tons, as a rolling, 12-month summation based on monitoring data from the NO<sub>x</sub> continuous emissions monitoring system. Additionally, each startup/shutdown cycle shall not exceed 604 lbsNO<sub>x</sub>.
- (5) Startup and shutdown emissions when firing natural gas shall not cause emissions of CO to exceed 97.6 tons, as a rolling, 12-month summation based on monitoring data from the CO continuous emissions monitoring system. Additionally, each startup/shutdown cycle shall not exceed 1,566 lbs CO.
- (6) Startup and shutdown emissions when firing No. 2 fuel oil shall not cause emissions of CO to exceed 10.6 tons, as a rolling, 12-month summation based on monitoring data from the CO continuous emissions monitoring system. Additionally, each startup/shutdown cycle shall not exceed 4,208 lbs CO.
- (7) Startup and shutdown emissions when firing natural gas shall not cause emissions of VOC to exceed 13.9 tons, as a rolling, 12-month summation based on the following equations:

$$X = \sum_{i=1}^n ((CS * VOC_c) + (CS_2 * VOC_{c2}) + (WS * VOC_w) + (WS_2 * VOC_{w2}) + (HS * VOC_h)) / 2000$$

where:

X = total tons of VOC emissions per month  
 CS = number of cold startup/shutdown cycles per month when firing natural gas  
 VOC<sub>c</sub> = VOC emission factor for cold startup/shutdown cycle (407 lbs/startup/shutdown)  
 CS<sub>2</sub> = number of cold startup/shutdown cycles per month when firing natural gas with second unit on-line  
 VOC<sub>c2</sub> = VOC emission factor for cold startup/shutdown cycle with other unit on-line (86 lbs/startup/shutdown)  
 WS = number of warm startup/shutdown cycles per month when firing natural gas  
 VOC<sub>w</sub> = VOC emission factor for warm startup/shutdown cycle (122 lbs/startup/shutdown)  
 WS<sub>2</sub> = number of warm startup/shutdown cycles per month when firing natural gas with second unit on-line  
 VOC<sub>w2</sub> = VOC emission factor for warm startup/shutdown cycle with other unit on-line (18 lbs/startup/shutdown)  
 HS = number of hot startup/shutdown cycles per month when firing natural gas  
 VOC<sub>h</sub> = VOC emission factor for hot startup/shutdown cycle (18 lbs/startup/shutdown)  
 n = total number of startup/shutdown cycles per month when firing natural gas

Note: Emission factors for startup/shutdown cycles are the same operating with and without the other unit on-line.

and

$$\sum_{i=1}^{n=12} (X_i) \leq 13.6 \text{ tons VOC, as a rolling, 12-month summation}$$

Note: The above emission factors may be revised based upon Ohio EPA validated emissions testing.

- (8) Startup and shutdown emissions when firing No. 2 fuel oil shall not cause emissions of VOC to exceed 1.35 tons, as a rolling, 12-month summation based on the following equations:

$$X = \sum_{i=1}^n ((CS * VOC_c) + (CS_2 * VOC_{c2}) + (WS * VOC_w) + (WS_2 * VOC_{w2}) + (HS * VOC_h)) / 2000$$

where:

X = total tons of VOC emissions per month  
 CS = number of cold startup/shutdown cycles per month when firing No. 2 fuel oil  
 VOC<sub>c</sub> = VOC emission factor for cold startup/shutdown cycle (382 lbs/startup/shutdown)  
 CS<sub>2</sub> = number of cold startup/shutdown cycles per month when firing No. 2 fuel oil with second unit on-line  
 VOC<sub>c2</sub> = VOC emission factor for cold startup/shutdown cycle with other unit on-line (123 lbs/startup/shutdown)

WS = WS = number of warm startup/shutdown cycles per month when firing No. 2 fuel oil  
 VOC<sub>w</sub> = VOC emission factor for warm startup/shutdown cycle (114 lbs/startup/shutdown)  
 WS<sub>2</sub> = number of warm startup/shutdown cycles per month when firing No. 2 fuel oil with second unit on-line  
 VOC<sub>w2</sub> = VOC emission factor for warm startup/shutdown cycle with other unit on-line (77 lbs/startup/shutdown)  
 HS = number of hot startup/shutdown cycles per month when firing No. 2 fuel oil  
 VOC<sub>h</sub> = VOC emission factor for startup/shutdown cycle (77 lbs/startup/shutdown)  
 n = total number of startup/shutdown cycles per month when firing No. 2 fuel oil

Note: Emission factors for hot startup/shutdown cycles are the same operating with and without the other unit on-line.

and

$$\sum_{i=1}^{n=12} (X_i) \leq 1.35 \text{ tons VOC, as a rolling, 12-month summation}$$

Note: The above emission factors may be revised based upon Ohio EPA validated emissions testing.

- (9) The maximum annual hours of operation of the turbine for this emissions unit shall not exceed 8,260 hours, based upon a rolling, 12-month summation for the firing of natural gas.

To ensure enforceability during the first 12 calendar months following the startup of this emissions unit, the permittee shall not exceed the monthly hours of operation restrictions specified in the following table:

| <u>Month</u> | <u>Cumulative hours of Operation for Natural Gas</u> |
|--------------|--|
| 1            | 720  |
| 1-2          | 1,440  |
| 1-3          | 2,160  |
| 1-4          | 2,880  |
| 1-5          | 3,600  |
| 1-6          | 4,320  |
| 1-7          | 5,040  |
| 1-8          | 5,760  |
| 1-9          | 6,480  |
| 1-10         | 7,200  |
| 1-11         | 7,920  |
| 1-12         | 8,260  |

After the first 12 calendar months following the startup of this emissions unit, compliance with the annual hours of operation restriction shall be based on a rolling, 12-month summation.

- (10) The maximum annual hours of operation of the turbine for this emissions unit shall not exceed 500 hours, based upon a rolling, 12-month summation when firing No. 2 fuel oil.

To ensure enforceability during the first 12 calendar months following the startup of this emissions unit, the permittee shall not exceed the monthly hours of operation restrictions specified in the following table:

| <u>Month</u> | <u>Cumulative hours of Operation for No.2 Distillate (Fuel) Oil</u> |
|--------------|---|
| 1            | 500   |
| 1-2          | 500   |
| 1-3          | 500   |
| 1-4          | 500   |
| 1-5          | 500   |
| 1-6          | 500   |
| 1-7          | 500   |
| 1-8          | 500   |
| 1-9          | 500   |
| 1-10         | 500   |
| 1-11         | 500   |
| 1-12         | 500   |

After the first 12 calendar months following the startup of this emissions unit, compliance with the annual hours of operation restriction shall be based on a rolling, 12-month summation.

- (11) The maximum annual hours of operation of the duct burners for this emissions unit shall not exceed 2,000 hours, based upon a rolling, 12-month summation.

To ensure enforceability during the first 12 calendar months following the startup of this emissions unit, the permittee shall not exceed the monthly hours of operation restrictions specified in the following table:

| <u>Month</u> | <u>Cumulative hours of Operation</u> |
|--------------|--------------------------------------|
| 1            | 720                                  |
| 1-2          | 1440                                 |
| 1-3          | 2,000                                |
| 1-4          | 2,000                                |
| 1-5          | 2,000                                |
| 1-6          | 2,000                                |
| 1-7          | 2,000                                |
| 1-8          | 2,000                                |
| 1-9          | 2,000                                |

|      |       |
|------|-------|
| 1-10 | 2,000 |
| 1-11 | 2,000 |
| 1-12 | 2,000 |

After the first 12 calendar months following the startup of this emissions unit, compliance with the annual hours of operation restriction shall be based on a rolling, 12-month summation.

(12) Continuous NO<sub>x</sub> Monitoring - Certified Systems  
Statement of Certification

Prior to the installation of the continuous NO<sub>x</sub> monitoring system, the permittee shall submit information detailing the proposed location of the sampling site in accordance with the siting requirements in 40 CFR Part 60, Appendix B, Performance Specification 6 for approval by the Ohio EPA, Central Office.

Within 60 days after achieving the maximum production rate at which the emissions unit will be operated, but not later than 180 days after initial startup of such emissions unit, the permittee shall conduct certification tests of such equipment pursuant to the appropriate sections of ORC section 3704.03(I), 40 CFR Part 60, Appendix B, Performance Specifications 2, and 6, as well as 40 CFR Part 75. (40 CFR Part 75 NO<sub>x</sub> mass emissions determinations as allowed in 40 CFR Part 75, Appendix F, using the emissions unit's heat input may be used in lieu of certification testing to show compliance with 40 CFR Part 60, Appendix B, Performance Specification 6.). Personnel from the appropriate Ohio EPA District Office or local air agency shall be notified 30 days prior to initiation of the applicable tests and shall be permitted to examine equipment and witness the certification tests. In accordance with OAC rule 3745-15-04, all copies of the test results shall be submitted to the appropriate Ohio EPA District Office or local air agency within 60 days after the test is completed. Copies of the test results shall be sent to the appropriate Ohio EPA District Office or local air agency and the Ohio EPA, Central Office. Certification of the continuous NO<sub>x</sub> monitoring system shall be granted upon determination by the Ohio EPA, Central Office that the system meets all requirements of the appropriate sections of ORC section 3704.03(I), 40 CFR Part 60, Appendix B, Performance Specification 6, and 40 CFR Part 75.

- (13) Within 180 days of initial unit startup, the permittee shall develop a written quality assurance/quality control plan for the continuous NO<sub>x</sub> monitoring system designed to ensure continuous valid and representative readings of NO<sub>x</sub> emissions in units of the applicable standard. The plan shall follow the requirements of the appropriate sections of 40 CFR Part 60, Appendix F and 40 CFR Part 75, Appendix B. The quality assurance/quality control plan and a logbook dedicated to the continuous NO<sub>x</sub> monitoring system must be kept on site and available for inspection during regular office hours.

(14) Continuous CO Monitoring - Certified Systems  
Statement of Certification

Prior to the installation of the continuous CO monitoring system, the permittee shall submit information detailing the proposed location of the sampling site in accordance

with the siting requirements in 40 CFR Part 60, Appendix B, Performance Specification 4 and 6 for approval by the Ohio EPA, Central Office.

Within 60 days after achieving the maximum production rate at which the emissions unit will be operated, but not later than 180 days after initial startup of such emissions unit, the permittee shall conduct certification tests of the continuous CO monitoring system pursuant to ORC section 3704.03(I) and 40 CFR Part 60, Appendix B, Performance Specifications 4 and 6. (CO mass emissions may be calculated in the same manner as NO<sub>x</sub> emissions as allowed in Section II(6), using the appropriate CO values in place of the cited NO<sub>x</sub> values.). Personnel from the appropriate Ohio EPA District Office or local air agency shall be notified 30 days prior to initiation of the applicable tests and shall be permitted to examine equipment and witness the certification tests. In accordance with OAC rule 3745-15-04, all copies of the test results shall be submitted to the appropriate Ohio EPA District Office or local air agency within 60 days after the test is completed. Copies of the test results shall be sent to the appropriate Ohio EPA District Office or local air agency and the Ohio EPA, Central Office. Certification of the continuous CO monitoring system shall be granted upon determination by the Ohio EPA Central Office that the system meets all requirements of ORC section 3704.03(I) and 40 CFR Part 60, Appendix B, Performance Specification 4 and 6.

- (15) Within 180 days of initial unit startup, the permittee shall develop a written quality assurance/quality control plan for the continuous CO monitoring system designed to ensure continuous valid and representative readings of CO. The plan shall follow the requirements of 40 CFR Part 60, Appendix F. The quality assurance/quality control plan and a logbook dedicated to the continuous CO monitoring system must be kept on site and available for inspection during regular office hours.

(16) Continuous O<sub>2</sub> Monitoring - Certified Systems  
Statement of Certification

Prior to the installation of the continuous O<sub>2</sub> monitoring system, the permittee shall submit information detailing the proposed location of the sampling site in accordance with the siting requirements in 40 CFR Part 60, Appendix B, Performance Specification 3 for approval by the Ohio EPA, Central Office.

Within 60 days after achieving the maximum production rate at which the emissions unit will be operated, but not later than 180 days after initial startup of such emissions unit, the permittee shall conduct certification tests of such equipment pursuant to the appropriate sections of ORC section 3704.03(I), 40 CFR Part 60, Appendix B, Performance Specification 3, and 40 CFR Part 75. Personnel from the appropriate Ohio EPA District Office or local air agency shall be notified 30 days prior to initiation of the applicable tests and shall be permitted to examine equipment and witness the certification tests. In accordance with OAC rule 3745-15-04, all copies of the test results shall be submitted to the appropriate Ohio EPA District Office or local air agency within 60 days after the test is completed. Copies of the test results shall be sent to the appropriate Ohio EPA District Office or local air agency and the Ohio EPA, Central Office.

Certification of the continuous O<sub>2</sub> monitoring system shall be granted upon determination by the Ohio EPA, Central Office that the system meets all requirements of the appropriate sections of ORC section 3704.03(l), 40 CFR Part 60, Appendix B, Performance Specification 3, and 40 CFR Part 75.

- (17) Within 180 days of initial unit startup, the permittee shall develop a written quality assurance/quality control plan for the continuous O<sub>2</sub> monitoring system designed to ensure continuous valid and representative readings of O<sub>2</sub> emissions in units of the applicable standard. The plan shall follow the requirements of the appropriate sections of 40 CFR Part 60, Appendix F and 40 CFR Part 75, Appendix B. The quality assurance/quality control plan and a logbook dedicated to the continuous O<sub>2</sub> monitoring system must be kept on site and available for inspection during regular office hours.
  - (18) This source shall be constructed such that emissions testing in accordance with 40 CFR Part 60.8 may be accomplished, if required.
  - (19) See 40 CFR Part 60, Subpart GG (40 CFR 60.330-60.335).
  - (20) See 40 CFR Part 60, Subpart Da (40 CFR 60.40Da-60.52Da).
- d) Monitoring and/or Recordkeeping Requirements
- (1) The permittee shall maintain monthly records of the following information for this emissions unit:
    - a. the natural gas usage rate for each month (in million standard cubic feet); and
    - b. the No. 2 fuel oil usage for each month in gallons.
  - (2) The permittee shall maintain monthly records of the following information for this emissions unit:
    - a. hours of operation of the turbine;
    - b. hours of operation of the duct burners;
    - c. hours of operation when firing No. 2 fuel;
    - d. beginning after the first 12 calendar months of operation following issuance of this permit, the rolling, 12-month summation of the hours of operation for each of a. though c. above; and
    - e. also, during the first 12 calendar months of operation following issuance of this permit, the permittee shall record the cumulative hours of operation for each calendar month for each of a. though c. above.
  - (3) The permittee shall operate and maintain existing equipment to continuously monitor and record NO<sub>x</sub> from this emissions unit in units of the applicable standard. Such continuous monitoring and recording equipment shall comply with the requirements specified in 40 CFR Part 60.13 and 40 CFR Part 75.

The permittee shall maintain records of all data obtained by the continuous NO<sub>x</sub> monitoring system including, but not limited to, parts per million NO<sub>x</sub> on an instantaneous (one-minute) basis, emissions of NO<sub>x</sub> in units of the applicable standard in the appropriate averaging period, results of daily zero/span calibration checks, and magnitude of manual calibration adjustments.

- (4) The permittee shall operate and maintain equipment to continuously monitor and record CO from this emissions unit in units of the applicable standard. Such continuous monitoring and recording equipment shall comply with the requirements specified in 40 CFR Part 60.13.

The permittee shall maintain records of all data obtained by the continuous CO monitoring system including, but not limited to, parts per million CO on an instantaneous (one minute) basis, emissions of CO in units of the applicable standard in the appropriate averaging period, results of daily zero/span calibration checks, and magnitude of manual calibration adjustments.

- (5) The permittee shall operate and maintain equipment to continuously monitor and record O<sub>2</sub> from this emissions unit in percent O<sub>2</sub>. Such continuous monitoring and recording equipment shall comply with the requirements in the appropriate sections specified in 40 CFR Part 60.13 and 40 CFR Part 75.

The permittee shall maintain records of all data obtained by the continuous O<sub>2</sub> monitoring system including, but not limited to, percent O<sub>2</sub> on an instantaneous (one-minute) basis, emissions of O<sub>2</sub> in units of the applicable standard in the appropriate averaging period, results of daily zero/span calibration checks, and magnitude of manual calibration adjustments.

- (6) The permittee shall install, calibrate, operate, and maintain continuous monitoring systems to monitor and record the average hourly fuel consumption of the combustion turbine and duct burner. The fuel flow monitoring systems shall comply with the requirements of 40 CFR Part 75, Appendix D.

- (7) The permittee shall monitor the sulfur content and gross calorific value of the fuel being fired in the combustion turbine and duct burner. Fuel sampling and analysis shall be conducted according to the procedures and at the frequency specified by 40 CFR Part 75, Appendix D and 40 CFR Part 60, Subpart GG.

- (8) The permittee shall determine the hourly heat input rate to the combustion turbine and duct burner from the fuel flow rate as determined in term d)(6) and fuel gross calorific value as determined in term d)(7). The heat input rate shall be calculated in accordance with the procedures in Section 5 of 40 CFR Part 75, Appendix F.

- (9) The permittee shall maintain monthly records of the following information for each emissions unit:
- a. number of cold, warm, and hot startup/shutdown cycles when firing natural gas and when firing No. 2 fuel oil with only one unit on-line (P001 or P002);
  - b. number of cold, warm, and hot startup/shutdown cycles when firing natural gas and when firing No. 2 fuel oil with the other unit on-line (P001 or P002);

- c. the duration of each startup;
  - d. number of shutdowns, and the duration of each shutdown;
  - e. NO<sub>x</sub>, CO, and VOC emissions when firing natural gas and when firing No. 2 fuel oil as determined in accordance with c)(3) through c)(8), in tons; and,
  - f. rolling, 12-month total NO<sub>x</sub>, CO, and VOC startup/shutdown emissions when firing natural gas and when firing No. 2 fuel oil.
- (10) The permittee shall maintain hourly records of the NO<sub>x</sub> and CO emissions rates, in lbs/hr, as obtained from d)(3) and (4) based upon an hourly averaging period as allowed in the appropriate sections of 40 CFR Part 60.
- (11) The permittee shall maintain monthly records of the following information for this emissions unit:
- a. during the first 12 calendar months of operation, the cumulative NO<sub>x</sub>, PE, SO<sub>2</sub>, CO, VOC, NH<sub>3</sub>, formaldehyde, and H<sub>2</sub>SO<sub>4</sub> emissions, in tons;
  - b. beginning after the first 12 calendar months of operation, the rolling, 12-month NO<sub>x</sub>, PE, SO<sub>2</sub>, CO, VOC, NH<sub>3</sub>, formaldehyde, and H<sub>2</sub>SO<sub>4</sub> emissions, in tons.
- (12) For each day during which the permittee burns a fuel other than natural gas or No. 2 fuel oil, the permittee shall maintain a record of the type and quantity of fuel burned in the emissions unit.
- (13) See 40 CFR Part 60, Subpart GG (40 CFR 60.330-60.335).
- (14) See 40 CFR Part 60, Subpart Da (40 CFR 60.40Da-60.52Da).
- e) Reporting Requirements
- (1) The permittee shall submit deviation (excursion) reports that identify each day when a fuel other than natural gas or No. 2 fuel oil fuel was burned in this emissions unit. Each report shall be submitted within 30 days after the deviation occurred.
- (2) The permittee shall submit deviation (excursion) reports which identify the following:
- a. all exceedances of the rolling, 12-month operating hours limitations specified in c)(9) through c)(11);
  - b. all exceedances of the rolling, 12-month NO<sub>x</sub>, PE, SO<sub>2</sub>, CO, VOC, NH<sub>3</sub>, formaldehyde, and H<sub>2</sub>SO<sub>4</sub> emissions, in tons;
  - c. for the first 12 calendar months of operation, all exceedances of the maximum allowable cumulative operating hours limitations;
  - d. For the first 12 calendar months of operation, all exceedances of the cumulative NO<sub>x</sub>, PE, SO<sub>2</sub>, CO, VOC, NH<sub>3</sub>, formaldehyde, and H<sub>2</sub>SO<sub>4</sub> emissions, in tons;

These reports are due by the date described in the Standard Terms and Conditions of this permit.

- (3) Pursuant to OAC rule 3745-15-04, ORC sections 3704.03(l) and 3704.031, and 40 CFR Parts 60.7 and 60.13(h), the permittee shall submit reports within 30 days following the end of each calendar quarter to the appropriate Ohio EPA District Office or local air agency documenting the date, commencement and completion times, duration, magnitude, reason (if known), and corrective actions taken (if any), of all instances of NO<sub>x</sub> values in excess of the applicable limits specified in 40 CFR Part 76 or any limitations specified in the terms and conditions of this permit or variance. These reports shall also contain the total NO<sub>x</sub> emissions for the calendar quarter (in tons).

The permittee shall submit reports within 30 days following the end of each calendar quarter through the Ohio EPA's eBusiness Center: Air Services online web portal documenting any continuous NO<sub>x</sub> monitoring system downtime while the emissions unit was on line (date, time, duration and reason) along with any corrective action(s) taken. The permittee shall provide the emissions unit operating time during the reporting period and the date, time, reason and corrective action(s) taken for each time period of emissions unit and control equipment malfunctions. The total operating time of the emissions unit and the total operating time of the analyzer while the emissions unit was on line shall also be included in the quarterly report.

If there are no excess emissions during the calendar quarter, the permittee shall submit a statement to that effect along with the emissions unit operating time during the reporting period and the date, time, reason, and corrective action(s) taken for each time period of emissions unit, control equipment, and monitoring system malfunctions. The total operating time of the emissions unit and the total operating time of the analyzer while the emissions unit was on line also shall be included in the quarterly report. These quarterly excess emission reports shall be submitted by January 30, April 30, July 30, and October 30 of each year and shall address the data obtained during the previous calendar quarter.

- (4) Pursuant to OAC rule 3745-15-04, and ORC sections 3704.03(l) and 3704.031, the permittee shall submit a summary of the excess emission report pursuant to 40 CFR Part 60.7. The summary shall be submitted to the appropriate Ohio EPA District Office or local air agency within 30 days following the end of each calendar quarter in a manner prescribed by the Director.
- (5) Pursuant to OAC rule 3745-15-04, ORC sections 3704.03(l) and 3704.031, and 40 CFR Parts 60.7 and 60.13(h), the permittee shall submit reports within 30 days following the end of each calendar quarter to the appropriate Ohio EPA District Office or local air agency documenting the date, commencement and completion times, duration, magnitude, reason (if known), and corrective actions taken (if any) of all instances of CO values in excess of any applicable limitation(s) specified in OAC Chapter 3745-21, 40 CFR Part 60, or any limitation(s) specified in the terms and conditions of this permit, in units of the standard. These reports shall also contain the total CO emissions for the calendar quarter (in tons).

The permittee shall submit reports within 30 days following the end of each calendar quarter through the Ohio EPA's eBusiness Center: Air Services online web portal documenting any continuous CO monitoring system downtime while the emissions unit was on line (date, time, duration and reason) along with any corrective action(s) taken. The permittee shall provide the emissions unit operating time during the reporting period and the date, time, reason and corrective action(s) taken for each time period of emissions unit and control equipment malfunctions. The total operating time of the emissions unit and the total operating time of the analyzer while the emissions unit was on line shall also be included in the quarterly report.

If there are no excess emissions during the calendar quarter, the permittee shall submit a statement to that effect along with the emissions unit operating time during the reporting period and the date, time, reason, and corrective action(s) taken for each time period of emissions unit, control equipment, and monitoring system malfunctions. The total operating time of the emissions unit and the total operating time of the analyzer while the emissions unit was on line shall also be included in the quarterly report. These quarterly excess emission reports shall be submitted by January 30, April 30, July 30, and October 30 of each year and shall address the data obtained during the previous calendar quarter.

- (6) Pursuant to 40 CFR Parts 60.7 and 60.13(h), the permittee shall submit reports within 30 days following the end of each calendar quarter through the Ohio EPA's eBusiness Center: Air Services online web portal documenting all instances of continuous O<sub>2</sub> monitoring system downtime while the emissions unit was on line (date, time, duration and reason) along with any corrective action(s) taken. The permittee shall provide the emissions unit operating time during the reporting period and the date, time, reason and corrective action(s) taken for each time period of emissions unit malfunctions. The total operating time of the emissions unit and the total operating time of the analyzer while the emissions unit was on line shall be included in the quarterly report. These quarterly reports shall be submitted by January 30, April 30, July 30, and October 30 of each year and shall address the data obtained during the previous calendar quarter.
- (7) The permittee shall submit deviation (excursion) reports that identify any record which shows that the sulfur content of the natural gas exceeded 0.3 grains per 100 standard cubic foot and 0.05 percent sulfur content by weight for No. 2 fuel oil. These reports are due by the date described the Standard Terms and Conditions of this permit.
- (8) The permittee shall submit deviation (excursion) reports that identify each time when this emissions unit was not in compliance with the startup and shutdown requirements of condition c)(2) above, or the lbs/startup/shutdown cycle emissions, or the rolling, 12-month total NO<sub>x</sub>, CO, and VOC startup/shutdown emissions as described in c)(3) through c)(8). These reports are due by the date described in the Standard Terms and Conditions of this permit.
- (9) In lieu of the excess emissions reports required under 40 CFR Part 60.334, the permittee shall submit excess emissions reports for this emissions unit in accordance with this permit.

- (10) The permittee shall perform the evaluation of CO emissions from the combustion turbine when the duct burners are being fired, as required by section b)(2)f. in accordance with a plan submitted through the Ohio EPA's eBusiness Center: Air Services online web portal for review and comment. The plan shall be submitted to the appropriate Ohio EPA District Office or local air agency for review and comment no later than 1 year after initial start-up of the combustion turbine

The plan shall describe the permittee's findings with respect to control of CO emissions during the shakedown of the combustion turbine, which highlights possible areas of concern for the evaluation. The plan shall then provide for systematic evaluation of changes, within the normal or feasible range of operation of the combustion turbine/duct burners, in the following elements as related to the monitored CO emissions:

- a. operating load and operating settings of duct burners; and
- b. combustion turbine and combustion settings, including excess oxygen.

- (11) See 40 CFR Part 60, Subpart GG (40 CFR 60.330-60.335).

- (12) See 40 CFR Part 60, Subpart Da (40 CFR 60.40Da-60.52Da).

f) Testing Requirements

- (1) The permittee shall conduct, or have conducted, emission testing for this emissions unit in accordance with the following requirements:

- a. The emission testing shall be conducted within 60 days after achieving the maximum production rate at which the emissions unit will be operated, but not later than 180 days after initial startup of such emissions unit.
- b. The emission testing shall be conducted to demonstrate compliance with the NO<sub>x</sub> and CO outlet concentration, and the mass emissions limitations for NO<sub>x</sub>, CO, formaldehyde\*, VOC, PE, SO<sub>2</sub>\*\* and visible emission limitation.

\*Only natural gas will be fired when demonstrating compliance with the mass emissions limitation for formaldehyde.

\*\*The compliance demonstration for the mass emissions limitation for SO<sub>2</sub> is only required with duct burner firing.

- c. The following test method(s) shall be employed to demonstrate compliance with the above emissions limitations: Methods 1 through 4 of 40 CFR Part 60, Appendix A; for NO<sub>x</sub>, Method 20 of 40 CFR Part 60, Appendix A; for PE, Method 5 of 40 CFR Part 60, Appendix A; for formaldehyde, Method 0011 of 40 CFR Part 266, Appendix IX; for VOC, Method 25 of 40 CFR Part 60, Appendix A; for CO, Method 10 of 40 CFR Part 60, Appendix A; for SO<sub>2</sub>, Method 6 of 40 CFR Part 60, Appendix A; and for visible PE, Method 9 of 40 CFR Part 60, Appendix A. Alternative U.S. EPA approved test methods may be used with prior approval from the Ohio EPA.

- d. The testing shall be performed at peak load (as defined by 40 CFR part 60.331) with and without duct burner firing, unless otherwise specified or approved by the appropriate Ohio EPA District Office or local air agency.
  - e. The permittee shall follow all test methods and procedures as specified in 40 CFR 60.335, and 60.48Da through 60.50Da.
  - f. Not later than 30 days prior to the proposed test date(s), the permittee shall submit an "Intent to Test" notification to the Ohio EPA, Southeast District Office. The "Intent to Test" notification shall describe in detail the proposed test methods and procedures, the emissions unit operating parameters, the time(s) and date(s) of the test(s), and the person(s) who will be conducting the test(s). Failure to submit such notification for review and approval prior to the test(s) may result in the Ohio EPA, Southeast District Office refusal to accept the results of the emission test(s).
  - g. Personnel from the Ohio EPA, Southeast District Office shall be permitted to witness the test(s), examine the testing equipment, and acquire data and information necessary to ensure that the operation of the emissions unit and the testing procedures provide a valid characterization of the emissions from the emissions unit and the performance of the control equipment.
  - h. A comprehensive written report on the results of the emissions test(s) shall be signed by the person or persons responsible for the tests and submitted through the Ohio EPA's eBusiness Center: Air Services online web portal within 30 days following completion of the test(s). The permittee may request additional time for the submittal of the written report, where warranted, with prior approval from the Ohio EPA, Southeast District Office.
- (2) Compliance with the allowable emissions limitations in this permit shall be determined according to the following methods:
- a. Emissions Limitations:  
  
NO<sub>x</sub> emissions shall not exceed:  
  
when firing natural gas:  
3.5 ppmvd at 15% O<sub>2</sub> with or without duct burner firing  
25.0 lbs/hr without duct burner firing  
29.0 lbs/hr with duct burner firing  
139.3 tons per rolling, 12-month period, which includes 32.1 tons for startup/  
shutdown emissions  
  
when firing No. 2 fuel oil:  
21.8 ppmvd at 15% O<sub>2</sub> without duct burner firing  
177 lbs/hr without duct burner firing  
48.7 tons per rolling, 12-month period, which includes 4.45 tons for startup/  
shutdown emissions

99 ppmvd at 15% O<sub>2</sub>  
200ng/J gross energy output (1.6lb/MWh), as a 30-day rolling average, except as provided under 40 CFR 60.48Da(k) with duct burner firing  
65 ng/J heat input (0.15 lb/mmBtu), as a 30-day rolling average, with duct burner firing

Total NO<sub>x</sub> emissions shall not exceed 188.0 tons per rolling 12-month period.

Applicable Compliance Method:

Initial compliance with the allowable outlet concentration, and the hourly emission limitations shall be demonstrated by the performance testing as described in condition f)(1) and continual compliance with those limitations shall be demonstrated by the use of the CEM in d)(3) based upon an hourly averaging period as allowed in 40 CFR Part 60.

Ongoing compliance with the annual emissions limitations, including natural gas, No.2 fuel, and start-up and shutdown emissions, shall be demonstrated based upon the CEM data and the records required pursuant to this permit.

b. Emissions Limitations:

PE emissions shall not exceed:

when firing natural gas:

18.3 lbs/hr without duct burner firing  
21.8 lbs/hr with duct burner firing  
79.1 tons per rolling, 12-month period

when firing No. 2 fuel oil:

60.0 lbs/hr without duct burner firing  
15.0 tons per rolling, 12-month period

13ng/J (0.03 lb/mmBtu) with duct burner firing

Total PE emissions shall not exceed 94.1 tons per rolling 12-month period.

Applicable Compliance Method:

Compliance with the hourly emission limitations shall be demonstrated by the performance testing in f)(1). Compliance with the annual emission limitation for each fuel type shall be determined by multiplying the tested hourly emission rate by the actual rolling, 12-month hours of operation both with and without the duct burner firing (as recorded in d)(2)), and dividing by 2000 lbs/ton.

Total PE emissions shall be determined by adding the rolling, 12-month emissions for both natural gas and No.2 fuel oil.

c. Emissions Limitations:

SO<sub>2</sub> emissions shall not exceed:

when firing natural gas:

1.6 lbs/hr without duct burner firing

1.8 lbs/hr with duct burner firing

6.8 tons per rolling, 12-month period

when firing No. 2 fuel oil:

101 lbs/hr without duct burner firing

25.3 tons per rolling, 12-month period

150 ppmvd at 15% O<sub>2</sub>

86 ng/J (0.20 lb/mmBtu), as a 30-day rolling average, with duct burner firing

Total SO<sub>2</sub> emissions shall not exceed 32.1 tons per rolling 12-month period.

Applicable Compliance Method:

Compliance with the hourly emission limitation without duct burning shall be determined by the record keeping required in condition d)(1), (2), and (7). Compliance with the short term emission limitation with duct burner firing shall be demonstrated by the performance testing in f)(1). Compliance with the annual emission limitation for each fuel type shall be determined by multiplying the hourly emission rate by the actual rolling, 12-month hours of operation both with and without the duct burner firing (as recorded in d)(2)), and dividing by 2000 lbs/ton.

Total SO<sub>2</sub> emissions shall be determined by adding the rolling, 12-month emissions for both natural gas and No.2 fuel oil.

d. Emissions Limitations:

VOC emissions shall not exceed:

when firing natural gas:

when firing natural gas:

3.2 lbs/hr without duct burner firing

6.6 lbs/hr with duct burner firing

30.5 tons per rolling, 12-month period, which includes 13.9 tons for startup/shutdown emissions

when firing No. 2 fuel oil:

8.0 lbs/hr without duct burner firing

3.4 tons per rolling, 12-month period, which includes 1.35 tons for startup/shutdown emissions

Total VOC emissions shall not exceed 33.9 tons per rolling 12-month period.

Applicable Compliance Method:

Compliance with the hourly emissions limitations shall be demonstrated by the performance testing described in condition f)(1). Compliance with the annual emission limitation shall be determined by multiplying the tested hourly emissions rate by the actual rolling, 12-month hours of operation with and without the duct burner firing (as recorded in d)(2)), dividing by 2000 lbs/ton, summing the values and adding the startup/shutdown cycle emissions. The emissions associated with the startup/shutdown cycles shall be based upon the equations specified in c)(7) and c)(8) and the records required pursuant to d)(9).

Total VOC emissions shall be determined by adding the rolling, 12-month emissions for both natural gas and No.2 fuel oil.

e. Emissions Limitations:

CO emissions shall not exceed:

when firing natural gas:

22.0 lbs/hr without duct burner firing

6 ppmvd at 15% O<sub>2</sub> without duct burner firing

49.0 lbs/hr with duct burner firing

13.5 ppmvd at 15% O<sub>2</sub> without duct burner firing

215.5 tons per rolling, 12-month period, which includes 97.6 tons for startup/shutdown emissions

when firing No. 2 fuel oil:

72 lbs/hr without duct burner firing

38 ppmvd at 15% O<sub>2</sub> without duct burner firing

28.6 tons per rolling, 12-month period, which includes 10.6 tons for startup/shutdown emissions

Total CO emissions shall not exceed 244.1 tons per rolling, 12-month period.

Applicable Compliance Method:

Initial compliance with the allowable outlet concentration, and the lbs/hr emission limitations shall be demonstrated by the performance testing as described in condition f)(1) and continual compliance with those limitations shall be demonstrated by the use of the CEM in d)(4) based upon an hourly averaging period as allowed in 40 CFR Part 60.

Ongoing compliance with the annual emissions limitations, including natural gas, No.2 fuel, and start-up and shutdown emissions, shall be demonstrated based upon the CEM data and the records required pursuant to this permit.

f. Emissions Limitations:

NH<sub>3</sub> emissions shall not exceed:

when firing natural gas:

26.0 lbs/hr without duct burner firing

31.0 lbs/hr with duct burner firing

112.4 tons per rolling, 12-month period

when firing No. 2 fuel oil:

25.0 lbs/hr without duct burner firing

6.3 tons per rolling, 12-month period

Total NH<sub>3</sub> emissions shall not exceed 118.7 tons per rolling, 12-month period.

Applicable Compliance Method:

Compliance with the hourly emission limitation shall be demonstrated by multiplying the emissions factors provided by the permittee (natural gas: 26 lbs ammonia/hr without duct burner firing, 31 lbs ammonia/hr with duct burner firing; and No.2 fuel oil: 24 lbs / hr). If required, the permittee shall demonstrate compliance by emissions testing in accordance with approved US EPA test methods. Compliance with the annual emission limitation for each fuel type shall be determined by multiplying the hourly emissions rate by the actual rolling, 12-month hours of operation both with and without the duct burner firing (as recorded in d)(2)), and dividing by 2000 lbs/ton.

Total NH<sub>3</sub> emissions shall be determined by adding the rolling, 12-month emissions for both natural gas and No.2 fuel oil.

g. Emissions Limitations:

Formaldehyde emissions shall not exceed:

when firing natural gas:

1.1 lbs/hr without duct burner firing

1.13 lbs/hr with duct burner firing

4.6 tons per rolling, 12-month period

when firing No. 2 fuel oil:

0.58 lbs/hr without duct burner firing

0.1 ton per rolling, 12-month period

Total formaldehyde emissions shall not exceed 4.7 tons per rolling, 12-month period.

Applicable Compliance Method:

Compliance with the hourly emissions limitations shall be demonstrated by the performance testing in f)(1). Compliance with the annual emission limitation shall be determined by multiplying the tested hourly emission rate by the actual rolling, 12-month hours of operation both with and without duct burner firing (as recorded in d)(2)) and dividing by 2000 lbs/ton.

h. Emissions Limitations:

H<sub>2</sub>SO<sub>4</sub> emissions shall not exceed:

when firing natural gas:

0.2 lb/hr with or without duct burner firing  
0.8 ton per rolling, 12-month period

when firing No. 2 fuel oil:

9.5 lbs/hr without duct burner firing  
2.4 tons per rolling, 12-month period

Total H<sub>2</sub>SO<sub>4</sub> emissions shall not exceed 3.2 tons per rolling, 12-month period.

Applicable Compliance Method:

Compliance with the hourly emission limitation shall be demonstrated by multiplying the emissions factors supplied by the permittee (natural gas: 0.2 lb H<sub>2</sub>SO<sub>4</sub>/hr with or without duct burner firing; and No.2 fuel oil: 9.5 lbs/hr). If required, the permittee shall demonstrate compliance by emission testing in accordance with approved US EPA test methods. Compliance with the annual emissions limitations for each fuel type shall be determined by multiplying the hourly emission rates by the actual rolling, 12-month hours of operation, and dividing by 2000 lbs/ton.

Total H<sub>2</sub>SO<sub>4</sub> emissions shall be determined by adding the rolling, 12-month emissions for both natural gas and No.2 fuel oil.

i. Emissions Limitations:

Visible particulate emissions from any stack shall not exceed 20 percent opacity as a six-minute average.

No owner or operator shall cause to be discharged into the atmosphere any emissions in excess of 20% opacity (6-minute average), except for one 6-minute period per hour of not more than 27% opacity, with duct burner firing.

Applicable Compliance Method:

Compliance with the visible emissions limitation shall be demonstrated by USEPA Method 9. See f)(1).

g) Miscellaneous Requirements

- (1) The emission limitations specified in this permit were established using the Ohio EPA's "Air Toxic Policy" and are based on both the materials used and the design parameters of the emissions unit's exhaust system, as specified in the application. The Ohio EPA's "Air Toxic Policy" was applied for each pollutant using the SCREEN 3.0 model (or other Ohio EPA approved model) and comparing the predicted 1-hour maximum ground-level concentration to the Maximum Acceptable Ground-Level Concentration (MAGLC). The following summarizes the results of the modeling:

Pollutant: Formaldehyde

TLV (ug/m3): 271 (Converted from the STEL)  
Maximum Hourly Emission Rate (lbs/hr): 2.14\*  
Predicted 1-Hour Maximum Ground-Level Concentration (ug/m3): 0.3  
MAGLC (ug/m3): 6.45

Pollutant: Sulfuric Acid

TLV (ug/m3): 1000  
Maximum Hourly Emission Rate (lbs/hr): 4.4\*  
Predicted 1-Hour Maximum Ground-Level Concentration (ug/m3): 2.5  
MAGLC (ug/m3): 23.8

Pollutant: Ammonia

TLV (ug/m3): 25,000  
Maximum Hourly Emission Rate (lbs/hr): 69.2\*  
Predicted 1-Hour Maximum Ground-Level Concentration (ug/m3): 39.2  
MAGLC (ug/m3): 595.2

\* This was modeled for emissions units P001 & P002 combined.

- (2) OAC Chapter 3745-31 requires permittees to apply for and obtain a new or modified permit to install prior to making a "modification" as defined by the OAC rule 3745-31-01. The permittee is hereby advised that the following changes to the process may be determined to be a "modification":
- a. changes in the composition of the materials used, or the use of new materials, that would result in the emission of a compound with a lower Threshold Limit Value (TLV), as indicated in the most recent version of the handbook entitled "American Conference of Governmental Industrial Hygienists (ACGIH)," than the lowest TLV value specified in the above table;
  - b. changes to the emissions unit or its exhaust parameters (e.g., increased emission rate [not including an increase in an "allowable" emission limitation specified in the terms and conditions of this permit], reduced exhaust gas flow rate, and decreased stack height);
  - c. changes in the composition of the materials used, or use of new materials, that would result in the emission of an air contaminant not previously permitted; and,

- d. changes in the composition of the materials, or use of new materials, that would result in an increase in emissions of any pollutant that has a listed TLV.
- (3) The Ohio EPA will not consider any of the above-mentioned as a “modification” requiring a permit to install, if the following conditions are met:
- a. the change is not otherwise considered a “modification” under OAC Chapter 3745-31;
  - b. the permittee can continue to comply with the allowable emission limitations specified in its permit to install; and,
  - c. prior to the change, the applicant conducts an evaluation pursuant to the Air Toxic Policy, determines that the changed emissions unit still satisfies the Air Toxic Policy, and the permittee maintains documentation that identifies the change and the results of the application of the Air Toxic Policy for the change.

For any change to the emissions unit or its method of operation that either would require an increase in the emission limitation(s) established by this permit or would otherwise be considered a "modification" as defined in OAC rule 3745-31-01, the permittee shall obtain a final permit to install prior to the change.
