Dear Permit Holder:

A draft of the Ohio Administrative Code (OAC) Chapter 3745-31 Air Pollution Permit-to-Install and Operate (PTIO) for the referenced facility has been issued for the emissions unit(s) listed in the Authorization section of the enclosed draft permit. This draft action is not an authorization to begin construction or modification of your emissions unit(s). The purpose of this draft is to solicit public comments on the permit. A public notice will appear in the Ohio EPA Weekly Review and the local newspaper, The Sentinil-Tribune. A copy of the public notice and the draft permit are enclosed. This permit can be accessed electronically on the Division of Air Pollution Control (DAPC) Web page, www.epa.ohio.gov/dapc by clicking the "Issued Air Pollution Control Permits" link. Comments will be accepted as a marked-up copy of the draft permit or in narrative format. Any comments must be sent to the following:

Andrew Hall
Permit Review/Development Section
Ohio EPA, DAPC
122 South Front Street
Columbus, Ohio 43215

and Ohio EPA DAPC, Northwest District Office
347 North Dunbridge Road
Bowling Green, OH 43402

Comments and/or a request for a public hearing will be accepted within 30 days of the date the notice is published in the newspaper. You will be notified in writing if a public hearing is scheduled. A decision on issuing a final permit-to-install will be made after consideration of comments received and oral testimony if a public hearing is conducted. Any permit fee that will be due upon issuance of a final Permit-to-Install is indicated in the Authorization section. Please do not submit any payment now. If you have any questions, please contact Ohio EPA DAPC, Northwest District Office at (419)352-8461.

Sincerely,

Michael W. Ahern, Manager
Permit Issuance and Data Management Section, DAPC

Permit Strategy Write-Up

1. Check all that apply:

xSynthetic Minor Determination

Netting Determination

2. Source Description:

Univar USA, Inc. receives materials by truck, rail and totes then repackages and/or blends them for shipping by truck or totes.

3. Facility Emissions and Attainment Status:

Univar USA, Inc. is located in Wood County and is classified as a synthetic minor facility and is not considered "major" for Title V purposes. Wood County is designated attainment for all criteria pollutants.

4. Source Emissions:

Univar USA, Inc. has requested synthetic minor restrictions which will limit facilitywide VOC emissions to 24.9 tons per rolling, 12-month period and facility wide HAPs emissions to 9.9 tons per rolling, 12-month period for any individual HAP and 24.9 tons per rolling 12-month for combined HAPs.

Conclusion:

With the synthetic minor restrictions in place, the facility will not trigger the thresholds for Title V.

5. Please provide additional notes or comments as necessary:

None

6. Total Permit Allowable Emissions Summary (for informational purposes only):

Table with 2 columns: Pollutant, Tons Per Year. Rows include Individual HAP (9.9), Combined HAPs (24.9), and VOC's (24.9).

PUBLIC NOTICE

5/1/2012 Issuance of Draft Air Pollution Permit-To-Install and Operate

UNIVAR USA, INC.
30450 TRACY ROAD,
WALBRIDGE, OH 43465
Wood County

FACILITY DESC.: Other Chemical and Allied Products Merchant Wholesalers

PERMIT #: P0109336

PERMIT TYPE: Initial Installation

PERMIT DESC: This is a PTIO for the transport loading and product packaging operations. A wide variety of materials are received repackaged and shipped.

The Director of the Ohio Environmental Protection Agency issued the draft permit above. The permit and complete instructions for requesting information or submitting comments may be obtained at: <http://epa.ohio.gov/dapc/permitsonline.aspx> by entering the permit # or: Andrea Moore, Ohio EPA DAPC, Northwest District Office, 347 North Dunbridge Road, Bowling Green, OH 43402. Authorization

Facility ID: 0387000094
Application Number(s): A0043440
Permit Number: P0109336
Permit Description: This is a PTIO for the transport loading and product packaging operations. A wide variety of materials are received repackaged and shipped.
Permit Type: Initial Installation
Permit Fee: \$400.00 *DO NOT send payment at this time, subject to change before final issuance*
Issue Date: 5/1/2012
Effective Date: To be entered upon final issuance
Expiration Date: To be entered upon final issuance
Permit Evaluation Report (PER) Annual Date: To be entered upon final issuance

This document constitutes issuance to:

UNIVAR USA, INC.
30450 TRACY ROAD
WALBRIDGE, OH 43465

of a Permit-to-Install and Operate for the emissions unit(s) identified on the following page.

Ohio EPA District Office or local air agency responsible for processing and administering your permit:

Ohio EPA DAPC, Northwest District Office
347 North Dunbridge Road
Bowling Green, OH 43402
(419)352-8461

The above named entity is hereby granted this Permit-to-Install and Operate for the air contaminant source(s) (emissions unit(s)) listed in this section pursuant to Chapter 3745-31 of the Ohio Administrative Code. Issuance of this permit does not constitute expressed or implied approval or agreement that, if constructed or modified in accordance with the plans included in the application, the described emissions unit(s) will operate in compliance with applicable State and Federal laws and regulations.

This permit is granted subject to the conditions attached hereto.

Ohio Environmental Protection Agency

Scott J. Nally
Director

Authorization (continued)

Permit Number: P0109336

Permit Description: This is a PTIO for the transport loading and product packaging operations. A wide variety of materials are received repackaged and shipped.

Permits for the following Emissions Unit(s) or groups of Emissions Units are in this document as indicated below:

Emissions Unit ID:	J001
Company Equipment ID:	P001
Superseded Permit Number:	
General Permit Category and Type:	Not Applicable

Emissions Unit ID:	P801
Company Equipment ID:	J001
Superseded Permit Number:	
General Permit Category and Type:	Not Applicable

A. Standard Terms and Conditions

1. What does this permit-to-install and operate ("PTIO") allow me to do?

This permit allows you to install and operate the emissions unit(s) identified in this PTIO. You must install and operate the unit(s) in accordance with the application you submitted and all the terms and conditions contained in this PTIO, including emission limits and those terms that ensure compliance with the emission limits (for example, operating, recordkeeping and monitoring requirements).

2. Who is responsible for complying with this permit?

The person identified on the "Authorization" page, above, is responsible for complying with this permit until the permit is revoked, terminated, or transferred. "Person" means a person, firm, corporation, association, or partnership. The words "you," "your," or "permittee" refer to the "person" identified on the "Authorization" page above.

The permit applies only to the emissions unit(s) identified in the permit. If you install or modify any other equipment that requires an air permit, you must apply for an additional PTIO(s) for these sources.

3. What records must I keep under this permit?

You must keep all records required by this permit, including monitoring data, test results, strip-chart recordings, calibration data, maintenance records, and any other record required by this permit for five years from the date the record was created. You can keep these records electronically, provided they can be made available to Ohio EPA during an inspection at the facility. Failure to make requested records available to Ohio EPA upon request is a violation of this permit requirement.

4. What are my permit fees and when do I pay them?

There are two fees associated with permitted air contaminant sources in Ohio:

- PTIO fee. This one-time fee is based on a fee schedule in accordance with Ohio Revised Code (ORC) section 3745.11, or based on a time and materials charge for permit application review and permit processing if required by the Director.

You will be sent an invoice for this fee after you receive this PTIO and payment is due within 30 days of the invoice date. You are required to pay the fee for this PTIO even if you do not install or modify your operations as authorized by this permit.

- Annual emissions fee. Ohio EPA will assess a separate fee based on the total annual emissions from your facility. You self-report your emissions in accordance with Ohio Administrative Code (OAC) Chapter 3745-78. This fee assessed is based on a fee schedule in ORC section 3745.11 and funds Ohio EPA's permit compliance oversight activities. Unless otherwise specified, facilities subject to one or more synthetic minor restrictions must use Ohio EPA's "Air Services" to submit annual emissions associated with this permit requirement. Ohio EPA will notify you when it is time to report your emissions and to pay your annual emission fees.

5. When does my PTIO expire, and when do I need to submit my renewal application?

This permit expires on the date identified at the beginning of this permit document (see "Authorization" page above) and you must submit a renewal application to renew the permit. Ohio EPA will send a renewal notice to you approximately six months prior to the expiration date of this permit. However, it is

very important that you submit a complete renewal permit application (postmarked prior to expiration of this permit) even if you do not receive the renewal notice.

If a complete renewal application is submitted before the expiration date, Ohio EPA considers this a timely application for purposes of ORC section 119.06, and you are authorized to continue operating the emissions unit(s) covered by this permit beyond the expiration date of this permit until final action is taken by Ohio EPA on the renewal application.

6. What happens to this permit if my project is delayed or I do not install or modify my source?

This PTIO expires 18 months after the issue date identified on the "Authorization" page above unless otherwise specified if you have not (1) started constructing the new or modified emission sources identified in this permit, or (2) entered into a binding contract to undertake such construction. This deadline can be extended by up to 12 months, provided you apply to Ohio EPA for this extension within a reasonable time before the 18-month period has ended and you can show good cause for any such extension.

7. What reports must I submit under this permit?

An annual permit evaluation report (PER) is required in addition to any malfunction reporting required by OAC rule 3745-15-06 or other specific rule-based reporting requirement identified in this permit. Your PER due date is identified in the Authorization section of this permit.

8. If I am required to obtain a Title V operating permit in the future, what happens to the operating provisions and PER obligations under this permit?

If you are required to obtain a Title V permit under OAC Chapter 3745-77 in the future, the permit-to-operate portion of this permit will be superseded by the issued Title V permit. From the effective date of the Title V permit forward, this PTIO will effectively become a PTI (permit-to-install) in accordance with OAC rule 3745-31-02(B). The following terms and conditions will no longer be applicable after issuance of the Title V permit: Section B, Term 1.b) and Section C, for each emissions unit, Term a)(2).

The PER requirements in this permit remain effective until the date the Title V permit is issued and is effective, and cease to apply after the effective date of the Title V permit. The final PER obligation will cover operations up to the effective date of the Title V permit and must be submitted on or before the submission deadline identified in this permit on the last day prior to the effective date of the Title V permit.

9. What are my obligations when I perform scheduled maintenance on air pollution control equipment?

You must perform scheduled maintenance of air pollution control equipment in accordance with OAC rule 3745-15-06(A). If scheduled maintenance requires shutting down or bypassing any air pollution control equipment, you must also shut down the emissions unit(s) served by the air pollution control equipment during maintenance, unless the conditions of OAC rule 3745-15-06(A)(3) are met. Any emissions that exceed permitted amount(s) under this permit (unless specifically exempted by rule) must be reported as deviations in the annual permit evaluation report (PER), including nonexempt excess emissions that occur during approved scheduled maintenance.

10. Do I have to report malfunctions of emissions units or air pollution control equipment? If so, how must I report?

If you have a reportable malfunction of any emissions unit(s) or any associated air pollution control system, you must report this to the Ohio EPA DAPC, Northwest District Office in accordance with OAC rule 3745-15-06(B). Malfunctions that must be reported are those that result in emissions that exceed permitted emission levels. It is your responsibility to evaluate control equipment breakdowns and operational upsets to determine if a reportable malfunction has occurred.

If you have a malfunction, but determine that it is not a reportable malfunction under OAC rule 3745-15-06(B), it is recommended that you maintain records associated with control equipment breakdown or process upsets. Although it is not a requirement of this permit, Ohio EPA recommends that you maintain records for non-reportable malfunctions.

11. Can Ohio EPA or my local air agency inspect the facility where the emission unit(s) is/are located?

Yes. Under Ohio law, the Director or his authorized representative may inspect the facility, conduct tests, examine records or reports to determine compliance with air pollution laws and regulations and the terms and conditions of this permit. You must provide, within a reasonable time, any information Ohio EPA requests either verbally or in writing.

12. What happens if one or more emissions units operated under this permit is/are shut down permanently?

Ohio EPA can terminate the permit terms associated with any permanently shut down emissions unit. "Shut down" means the emissions unit has been physically removed from service or has been altered in such a way that it can no longer operate without a subsequent "modification" or "installation" as defined in OAC Chapter 3745-31.

You should notify Ohio EPA of any emissions unit that is permanently shut down by submitting¹ a certification that identifies the date on which the emissions unit was permanently shut down. The certification must be submitted by an authorized official from the facility. You cannot continue to operate an emissions unit once the certification has been submitted to Ohio EPA by the authorized official.

You must comply with all recordkeeping and reporting for any permanently shut down emissions unit in accordance with the provisions of the permit, regulations or laws that were enforceable during the period of operation, such as the requirement to submit a PER, air fee emission report, or malfunction report. You must also keep all records relating to any permanently shutdown emissions unit, generated while the emissions unit was in operation, for at least five years from the date the record was generated.

Again, you cannot resume operation of any emissions unit certified by the authorized official as being permanently shut down without first applying for and obtaining a permit pursuant to OAC Chapter 3745-31.

¹Permittees that use Ohio EPA's "Air Services" can mark the affected emissions unit(s) as "permanently shutdown" in the facility profile along with the date the emissions unit(s) was permanently removed and/or disabled. Submitting the facility profile update will constitute notifying of the permanent shutdown of the affected emissions unit(s).

13. Can I transfer this permit to a new owner or operator?

You can transfer this permit to a new owner or operator. If you transfer the permit, you must follow the procedures in OAC Chapter 3745-31, including notifying Ohio EPA or the local air agency of the change in ownership or operator. Any transferee of this permit must assume the responsibilities of the transferor permit holder.

14. Does compliance with this permit constitute compliance with OAC rule 3745-15-07, "air pollution nuisance"?

This permit and OAC rule 3745-15-07 prohibit operation of the air contaminant source(s) regulated under this permit in a manner that causes a nuisance. Ohio EPA can require additional controls or modification of the requirements of this permit through enforcement orders or judicial enforcement action if, upon investigation, Ohio EPA determines existing operations are causing a nuisance.

15. What happens if a portion of this permit is determined to be invalid?

If a portion of this permit is determined to be invalid, the remainder of the terms and conditions remain valid and enforceable. The exception is where the enforceability of terms and conditions are dependent on the term or condition that was declared invalid.

B. Facility-Wide Terms and Conditions

1. This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).

a) For the purpose of a permit-to-install document, the facility-wide terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.

(1) None.

b) For the purpose of a permit-to-operate document, the facility-wide terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.

(1) B.2. and B.3.

2. This permit establishes the following facility-wide terms and conditions for purposes of establishing federally enforceable requirements to limit the potential to emit (PTE) of volatile organic compounds (VOC) from the facility to 24.9 tons per rolling, 12-month period. The federally enforceable restrictions are being established for purposes of avoiding Title V permitting requirements:

a) This permit establishes an operational restriction which limits the quantity of materials processed or employed at the facility. The maximum rolling, 12-month quantity of materials processed or employed in emissions units J001, P801, de minimis and exempt sources, combined, is limited by the following equation:

12 n
sum_{M=1}^{12} [sum_{i=1}^n (V_i)(G_i)] / 2000 lbs <= 24.9 tons of VOC per year

where

M = the increment of the rolling, 12-month period

n = the total number of unique materials processed or employed in emissions units J001, P801, de minimis and exempt sources

V_i = emission factor in pounds per gallon of each material processed or employed

G_i = number of gallons of each material processed or employed for the rolling, 12-month period

To ensure federal enforceability during the first 12 calendar months of operation following the issuance of this permit, the permittee shall not exceed the VOC emission rates specified in the following table:

Maximum Allowable Cumulative VOC Emission Rates (tons):

Table with 2 columns: Month(s) and VOC Emissions. Rows: 1 - 1 (5.0), 1 - 2 (10.0), 1 - 3 (15.0), 1 - 4 (20.0)

1 - 12	24.9
--------	------

After the first 12 calendar months of operation following the issuance of this permit, compliance with the annual VOC limitation shall be based upon a rolling 12-month summation of the monthly emission rates.

b) The permittee shall collect and record the following VOC information each month for emissions units J001, P801, de minimis and exempt sources, combined:

- (1) The name and identification number of each product or material processed or employed including materials stored, materials blended, and materials packaged;
- (2) The number of gallons of each material processed or employed;
- (3) The VOC emission rate for each material processed or employed, in pounds per month [B.2.b)(2) times the appropriate emission factor for each material processed or employed];
- (4) The total VOC emission rate from all materials processed or employed, in tons per month [the summation of B.2.b)(3) times 1 ton/2000 lbs]; and
- (5) Beginning after the first 12 calendar months of operation or the first 12 calendar months following the issuance of this permit, the rolling, 12-month summation of the VOC emissions, in tons, from J001, P801, de minimis and exempt sources, combined.

Also, during the first 12 calendar months of operation or the first 12 calendar months following the issuance of this permit, the permittee shall record the cumulative monthly VOC emissions, in tons, from J001, P801, de minimis and exempt sources, combined.

c) The permittee shall submit quarterly deviation reports that identify:

- (1) all deviations (excursions) of the following emission limitations, operational restrictions and/or control device operating parameter limitations that restrict the potential to emit (PTE) of any regulated air pollutant and have been detected by the monitoring, record keeping and/or testing requirements in this permit:
 - a. all exceedance of the rolling, 12-month VOC limitation of 24.9 tons for emissions units J001, P801, de minimis and exempt sources, combined.
 - b. For the first 12 months of operation following the issuance of this permit, all exceedances of the maximum allowable cumulative VOC emission limitations specified in section B.2.a) for emissions units J001, P801, de minimis and exempt sources, combined.
- (2) the probable cause of each deviation (excursion);
- (3) any corrective actions that were taken to remedy the deviations (excursions) or prevent future deviations (excursions); and
- (4) the magnitude and duration of each deviation (excursion).

If no deviations (excursions) occurred during a calendar quarter, the permittee shall submit a report that states that no deviations (excursions) occurred during the quarter.

The quarterly reports shall be submitted, electronically through Ohio EPA Air Services, each year by January 31 (covering October to December), April 30 (covering January to March), July 31 (covering April to June), and October 31 (covering July to September), unless an alternative schedule has been established and approved by the Director (the appropriate District Office or local air agency).

3. This permit establishes the following facility-wide terms and conditions for purposes of establishing federally enforceable requirements to limit the PTE of hazardous air pollutant (HAP) emissions from the facility for purposes of avoiding Title V permitting requirements:

- a) Annual hazardous air pollutant (HAP) emissions from emissions units J001, P801, de minimis and exempt sources, combined, shall not exceed 9.9 tons per rolling, 12-month period for any individual HAP or 24.9 tons per rolling, 12-month period for any combination of HAPs.

To ensure federal enforceability during the first 12 calendar months of operation following the issuance of this permit, the permittee shall not exceed the HAPs emission rates specified in the following table:

Maximum Allowable Cumulative HAP Emission Rates (tons):

Table with 3 columns: Month(s), Individual HAP Emissions, Combined HAPs Emissions. Rows include 1-1, 1-2, 1-3, 1-4, and 1-12.

After the first 12 calendar months of operation following the issuance of this permit, compliance with the annual HAP limitations shall be based upon the rolling, 12-month summations of the monthly emission rates.

- b) The permittee shall collect and record the following HAP information each month for emissions units J001, P801, de minimis and exempt sources, combined:
(1) The name and identification number of each product or material processed or employed including materials stored, materials blended, and materials packaged;
(2) The number of gallons of each material processed or employed;
(3) The emission rate for each individual HAP from each material processed or employed, in pounds per month [B.3.b)(2) times the appropriate emission factor for each material processed or employed];
(4) The total emission rate for each individual HAP from all materials processed or employed, in tons per month [for each individual HAP, the summation of B.3.b)(3) for all materials processed or employed times 1 ton/2000 lbs]; and

- (5) The total HAP emission rate from all materials processed or employed, in tons per month [the summation of B.3.b)(4)]; and
- (6) Beginning after the first 12 calendar months of operation or the first 12 calendar months following the issuance of this permit, the rolling, 12-month summation of the HAP emissions, in tons, from J001, P801, de minimis and exempt sources, combined; and

Also, during the first 12 calendar months of operation or the first 12 calendar months following the issuance of this permit, the permittee shall record the cumulative monthly HAP emissions, in tons, from J001, P801, de minimis and exempt sources, combined.

- c) The permittee shall submit quarterly deviation reports that identify:
 - (1) all deviations (excursions) of the following emission limitations, operational restrictions and/or control device operating parameter limitations that restrict the potential to emit (PTE) of any regulated air pollutant and have been detected by the monitoring, record keeping and/or testing requirements in this permit:
 - a. all exceedances of the rolling, 12-month period individual HAP and combined HAPs emissions limitations of 9.9 tons and 24.9 tons, respectively, for emissions units J001, P801, de minimis and exempt sources, combined.
 - b. For the first 12 months of operation following the issuance of this permit, all exceedances of the maximum allowable cumulative individual and combined HAPs emission limitations specified in section B.3.a) for emissions units J001, P801, de minimis and exempt sources, combined.
 - (2) the probable cause of each deviation (excursion);
 - (3) any corrective actions that were taken to remedy the deviations (excursions) or prevent future deviations (excursions); and
 - (4) the magnitude and duration of each deviation (excursion).

If no deviations (excursions) occurred during a calendar quarter, the permittee shall submit a report that states that no deviations (excursions) occurred during the quarter.

The quarterly reports shall be submitted electronically through Ohio EPA Air Services, each year by January 31 (covering October to December), April 30 (covering January to March), July 31 (covering April to June), and October 31 (covering July to September), unless an alternative schedule has been established and approved by the Director (the appropriate District Office or local air agency).

C. Emissions Unit Terms and Conditions

1. Emissions Unit Group -J001 and P801

EU ID	Operations, Property and/or Equipment Description
J001	Transport Loading with submerged fill. (4 rail and 3 truck)
P801	Product Packaging (3 rooms - solvent, corrosive and surfactant packaging)

a) This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).

(1) For the purpose of a permit-to-install document, the emissions unit terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.

a. b)(1)c. and d)(1).

(2) For the purpose of a permit-to-operate document, the emissions unit terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.

a. b)(1)b., b)(2)b., f)(1)a. and f)(1)b.

b) Applicable Emissions Limitations and/or Control Requirements

(1) The specific operation(s), property, and/or equipment that constitute each emissions unit along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures are identified below. Emissions from each unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

	Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures
a.	ORC 3704.03(T)	See b)(2)a.
b.	OAC rule 3745-31-05(D)	24.9 tons volatile organic compounds (VOC) per rolling, 12-month period from emission units J001, P801 and de minimis and exempt sources, combined [See Facility-Wide Terms and Conditions] 9.9 tons per rolling, 12-month period for any individual hazardous air pollutant (HAP) and 24.9 tons per rolling, 12-month period for combined HAPs from emission units J001, P801 and de minimis and exempt sources, combined [See Facility-Wide Terms and Conditions] See b)(2)b.
c.	OAC rule 3745-114-01 ORC 3704.03(F)	See d)(1)

- (2) Additional Terms and Conditions
 - a. The Best Available Technology (BAT) requirements under ORC 3704.03(T) have been determined to be compliance with the emission limitations established under OAC rule 3745-31-05(D).
 - b. This permit establishes the following federally enforceable emission limitations for purposes of avoiding applicability of Title V regulations [See Facility-Wide Terms and Conditions B.2 and B.3]:
 - i. 24.9 tons VOC per rolling, 12-month period from emission units J001, P801, de minimis and exempt sources, combined.
 - ii. 9.9 tons per rolling, 12-month period for any individual HAP from emission units J001, P801, de minimis and exempt sources, combined.
 - iii. 24.9 tons per rolling, 12-month period for combined HAPs from emission units J001, P801, de minimis and exempt sources, combined.
- c) Operational Restrictions
 - (1) See Facility-Wide Terms and Conditions.
- d) Recordkeeping Requirements
 - (1) Modeling to demonstrate compliance with, the "Toxic Air Contaminant Statute", ORC 3704.03(F)(4)(b), was not necessary because the emissions unit's maximum annual emissions for each toxic air contaminant, as defined in OAC rule 3745-114-01, will be less than 1.0 ton per year. OAC Chapter 3745-31 requires a permittee to apply for and obtain a new or modified PTIO prior to making a "modification" as defined by OAC rule 3745-31-01. The permittee is hereby advised that changes in the composition of the materials or use of new materials that would cause the emissions of any toxic air contaminant to increase to above 1.0 ton per year may require the permittee to apply for and obtain a new PTIO.
 - (2) See Facility-Wide Terms and Conditions.
- e) Reporting Requirements
 - (1) Unless other arrangements have been approved by the Director, all notifications and reports shall be submitted through the Ohio EPA's eBusiness Center: Air Services online web portal.
 - (2) The permittee shall submit an annual Permit Evaluation Report (PER) to the Ohio EPA. The PER must be completed electronically and submitted via the Ohio EPA eBusiness Center: Air Services by the due date identified in the Authorization section of this permit. The permit evaluation report shall cover a reporting period of no more than twelve-months for each air contaminant source identified in this permit.

(3) See Facility-Wide Terms and Conditions.

f) Testing Requirements

(1) Compliance with the Emissions Limitations and/or Control Requirements specified in section b) of these terms and conditions shall be determined in accordance with the following methods:

a. Emission Limitation: 24.9 tons VOC per rolling, 12-month period from emission units J001, P801 and de minimis and exempt sources, combined

Applicable Compliance Method: Compliance with the emission limitation above shall be demonstrated by the record keeping identified in the Facility-Wide Term and Condition B.2.b) using the emission factors calculated from AP-42, Section 5.2, Equation 1 (June 2008).

b. Emission Limitations: 9.9 tons per rolling, 12-month period for any individual HAP and 24.9 tons per rolling, 12-month period for combined HAPs from emission units J001, P801 and de minimis and exempt sources, combined

Applicable Compliance Method: Compliance with the emission limitations above shall be demonstrated by the record keeping identified in the Facility-Wide Term and Condition B.3.b) using the emission factors calculated from AP-42, Section 5.2, Equation 1 (June 2008).

g) Miscellaneous Requirements

(1) None.
