Mailing Address:

Lazarus Gov. Center  
P.O. Box 1049

**Application No: 03-13387**

**DATE:** 1/2/2004

Wagner Quarries Company  
Martin Jones  
4203 Milan Road  
Sandusky, OH 44870

Enclosed Please find a modification to the Ohio EPA Permit To Install referenced above which will modify the terms and conditions.

You are hereby notified that this action by the Director is final and may be appealed to the Ohio Environmental Review Appeals Commission pursuant to Chapter 3745.04 of the Ohio Revised Code. The appeal must be in writing and set forth the action complained of and the grounds upon which the appeal is based. It must be filed within thirty (30) days after the notice of the Directors action. A copy of the appeal must be served on the Director of the Ohio Environmental Protection Agency within three (3) days of filing with the Commission. An appeal may be filed with the Environmental Review Appeals Commission at the following address:

Environmental Review Appeals Commission  
309 South Fourth Street, Room 222  
Columbus, Ohio 43215

Sincerely,

*Michael W. Ahern*

Michael W. Ahern, Supervisor  
Field Operations and Permit Section  
Division of Air Pollution Control

**Permit To Install  
Terms and Conditions**

**Issue Date: 1/2/2004  
Effective Date: 1/2/2004**

FINAL ADMINISTRATIVE MODIFICATION OF PERMIT TO INSTALL 03-13387

Application Number: 03-13387  
APS Premise Number: 0322020200  
Permit Fee: **\$0**  
Name of Facility: Wagner Quarries Company  
Person to Contact: Martin Jones  
Address: 4203 Milan Road  
Sandusky, OH 44870

Location of proposed air contaminant source(s) [emissions unit(s)]:  
**4203 Milan Road  
Sandusky, Ohio**

Description of proposed emissions unit(s):  
**Administrative modification to revise fugitive PE limit and establish fugitive PM<sub>10</sub> limit.**

The above named entity is hereby granted a modification to the permit to install described above pursuant to Chapter 3745-31 of the Ohio Administrative Code. Issuance of this modification does not constitute expressed or implied approval or agreement that, if constructed or modified in accordance with the plans included in the application, the above described source(s) of environmental pollutants will operate in compliance with applicable State and Federal laws and regulations, and does not constitute expressed or implied assurance that if constructed or modified in accordance with those plans included in the application, the above described source(s) of pollutants will be granted the necessary operating permits.

This permit is granted subject to the conditions attached hereto.

Ohio Environmental Protection Agency  

Director

## Part I - GENERAL TERMS AND CONDITIONS

### A. Permit to Install General Terms and Conditions

#### 1. Compliance Requirements

The emissions unit(s) identified in this Permit to Install shall remain in full compliance with all applicable State laws and regulations and the terms and conditions of this permit.

#### 2. Reporting Requirements

The permittee shall submit required reports in the following manner:

- a. Reports of any required monitoring and/or record keeping information shall be submitted to the appropriate Ohio EPA District Office or local air agency.
- b. Except as otherwise may be provided in the terms and conditions for a specific emissions unit, quarterly written reports of (a) any deviations (excursions) from emission limitations, operational restrictions, and control device operating parameter limitations that have been detected by the testing, monitoring, and record keeping requirements specified in this permit, (b) the probable cause of such deviations, and (c) any corrective actions or preventive measures which have been or will be taken, shall be submitted to the appropriate Ohio EPA District Office or local air agency. If no deviations occurred during a calendar quarter, the permittee shall submit a quarterly report, which states that no deviations occurred during that quarter. The reports shall be submitted quarterly, i.e., by January 31, April 30, July 31, and October 31 of each year and shall cover the previous calendar quarters. (These quarterly reports shall exclude deviations resulting from malfunctions reported in accordance with OAC rule 3745-15-06.)

#### 3. Records Retention Requirements

Each record of any monitoring data, testing data, and support information required pursuant to this permit shall be retained for a period of five years from the date the record was created. Support information shall include, but not be limited to, all calibration and maintenance records and all original strip-chart recordings for continuous monitoring instrumentation, and copies of all reports required by this permit. Such records may be maintained in computerized form.

#### 4. Inspections and Information Requests

The Director of the Ohio EPA, or an authorized representative of the Director, may, subject to the safety requirements of the permittee and without undue delay, enter upon the premises of this source at any reasonable time for purposes of making inspections, conducting tests, examining records or reports pertaining to any emission of air contaminants, and determining compliance with any applicable State air pollution laws and regulations and the terms and conditions of this permit. The permittee shall furnish to the Director of the Ohio EPA, or an authorized

representative of the Director, upon receipt of a written request and within a reasonable time, any information that may be requested to determine whether cause exists for modifying, reopening or revoking this permit or to determine compliance with this permit. Upon verbal or written request, the permittee shall also furnish to the Director of the Ohio EPA, or an authorized representative of the Director, copies of records required to be kept by this permit.

**5. Scheduled Maintenance/Malfunction Reporting**

Any scheduled maintenance of air pollution control equipment shall be performed in accordance with paragraph (A) of OAC rule 3745-15-06. The malfunction of any emissions units or any associated air pollution control system(s) shall be reported to the appropriate Ohio EPA District Office or local air agency in accordance with paragraph (B) of OAC rule 3745-15-06. Except as provided in that rule, any scheduled maintenance or malfunction necessitating the shutdown or bypassing of any air pollution control system(s) shall be accompanied by the shutdown of the emissions unit(s) that is (are) served by such control system(s).

**6. Permit Transfers**

Any transferee of this permit shall assume the responsibilities of the prior permit holder. The appropriate Ohio EPA District Office or local air agency must be notified in writing of any transfer of this permit.

**7. Air Pollution Nuisance**

The air contaminants emitted by the emissions units covered by this permit shall not cause a public nuisance, in violation of OAC rule 3745-15-07.

**8. Termination of Permit to Install**

This Permit to Install shall terminate within eighteen months of the effective date of the Permit to Install if the owner or operator has not undertaken a continuing program of installation or modification or has not entered into a binding contractual obligation to undertake and complete within a reasonable time a continuing program of installation or modification. This deadline may be extended by up to 12 months if application is made to the Director within a reasonable time before the termination date and the party shows good cause for any such extension.

**9. Construction of New Sources(s)**

The proposed emissions unit(s) shall be constructed in strict accordance with the plans and application submitted for this permit to the Director of the Ohio Environmental Protection Agency. There may be no deviation from the approved plans without the express, written approval of the Agency. Any deviations from the approved plans or the above conditions may lead to such sanctions and penalties as provided under Ohio law. Approval of these plans does not constitute an assurance that the proposed facilities will operate in compliance with all Ohio laws and regulations. Additional facilities shall be installed upon orders of the Ohio

**Wagner Quarries Company**  
**PTI Application: 03-13387**  
**Modification Issued: 1/2/2004**

**Facility ID: 0322020200**

Environmental Protection Agency if the proposed sources cannot meet the requirements of this permit or cannot meet applicable standards.

If the construction of the proposed emissions unit(s) has already begun or has been completed prior to the date the Director of the Environmental Protection Agency approves the permit application and plans, the approval does not constitute expressed or implied assurance that the proposed facility has been constructed in accordance with the approved plans. The action of beginning and/or completing construction prior to obtaining the Director's approval constitutes a violation of OAC rule 3745-31-02. Furthermore, issuance of the Permit to Install does not constitute an assurance that the proposed source will operate in compliance with all Ohio laws and regulations. Approval of the plans in any case is not to be construed as an approval of the facility as constructed and/or completed. Moreover, issuance of the Permit to Install is not to be construed as a waiver of any rights that the Ohio Environmental Protection Agency (or other persons) may have against the applicant for starting construction prior to the effective date of the permit. Additional facilities shall be installed upon orders of the Ohio Environmental Protection Agency if the proposed facilities cannot meet the requirements of this permit or cannot meet applicable standards.

**10. Public Disclosure**

The facility is hereby notified that this permit, and all agency records concerning the operation of this permitted source, are subject to public disclosure in accordance with OAC rule 3745-49-03.

**11. Applicability**

This Permit To Install is applicable only to the emissions unit(s) identified in the Permit To Install. Separate Permit To Install for the installation or modification of any other emissions unit(s) are required for any emissions unit for which a Permit To Install is required.

**12. Best Available Technology**

As specified in OAC Rule 3745-31-05, all new sources must employ Best Available Technology (BAT). Compliance with the terms and conditions of this permit will fulfill this requirement.

**13. Source Operation and Operating Permit Requirements After Completion of Construction**

- a. If the permittee is required to apply for a Title V permit pursuant to OAC Chapter 3745-77, the permittee shall submit a complete Title V permit application or a complete Title V permit modification application within twelve (12) months after commencing operation of the emissions units covered by this permit. However, if the proposed new or

Wagner Quarries Company  
 PTI Application: 03-13387  
 Modification Issued: 1/2/2004

Facility ID: 0322020200

modified source(s) would be prohibited by the terms and conditions of an existing Title V permit, a Title V permit modification must be obtained before the operation of such new or modified source(s) pursuant to OAC rule 3745-77-04(D) and OAC rule 3745-77-08(C)(3)(d).

- b. If the permittee is required to apply for permit(s) pursuant to OAC Chapter 3745-35, the source(s) identified in this Permit To Install is (are) permitted to operate for a period of up to one year from the date the source(s) commenced operation. Permission to operate is granted only if the facility complies with all requirements contained in this permit and all applicable air pollution laws, regulations, and policies. Pursuant to OAC Chapter 3745-35, the permittee shall submit a complete operating permit application within ninety (90) days after commencing operation of the source(s) covered by this permit.

#### 14. Construction Compliance Certification

The applicant shall provide Ohio EPA with a written certification (see enclosed form) that the facility has been constructed in accordance with the Permit to Install application and the terms and conditions of the Permit to Install. The certification shall be provided to Ohio EPA upon completion of construction but prior to startup of the source.

#### 15. Fees

The permittee shall pay fees to the Director of the Ohio EPA in accordance with ORC section 3745.11 and OAC Chapter 3745-78. The permittee shall pay all applicable Permit to Install fees within 30 days after the issuance of this Permit to Install.

### B. Permit to Install Summary of Allowable Emissions

The following information summarizes the total allowable emissions, by pollutant, based on the individual allowable emissions of each air contaminant source identified in this permit.

**SUMMARY (for informational purposes only)**  
**TOTAL PERMIT TO INSTALL ALLOWABLE EMISSIONS**

<u>Pollutant</u>	<u>Tons Per Year</u>
Particulate Emissions (PE) - stack	10.27
PE - fugitive	105.0
PM <sub>10</sub> - fugitive	50.0
Organic Compounds	95.0

**PART II - SPECIAL TERMS AND CONDITIONS FOR SPECIFIC EMISSIONS UNIT(S)**

**A. Applicable Emissions Limitations and/or Control Requirements**

- 1. The specific operations(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/Requirements</u>
P901 - aggregate processing plant (modification of PTI #03-13387 issued on February 25, 2003) modification to revise the fugitive PE limit and add a fugitive PM10 limit	OAC rule 3745-31-05(A)(3)
	OAC rule 3745-31-05(D)
	40 <u>CFR</u> Part 60, Subpart OOO
	OAC rule 3745-17-11(B)
	OAC rule 3475-17-07(A)
	OAC rule 3745-17-08(B)
	OAC rule 3745-17-07(B)

PTI A

Modification Issued: 1/2/2004

Emissions Unit ID: P901

Applicable Emissions	pounds OC/hour
<u>Limitations/Control Measures</u>	See A.2.f
See A.2.a.	95.0 tons OC/rolling 12-month period from stack emissions (see A.2.g)
<u>stack particulate emissions (PE):</u>	
primary crusher baghouse - 1.71 pounds PE/hour, 2.70 tons PE/year	See A.2.b
secondary crusher baghouse - 1.71 pounds PE/hour, 2.70 tons PE/year	See A.2.c
tertiary crusher (mill #1) baghouse - 2.57 pounds PE/hour, 4.06 tons PE/year	See A.2.d
mill #2 (small) baghouse - 0.51 pound PE/hour, 0.81 ton PE/year	See A.2.e
<u>fugitive PE:</u> 105.0 tons PE/year, 50.0 tons PM <sub>10</sub> /year	
<u>visible emissions restrictions:</u> (see A.2.b)	
<u>stack organic compound (OC) emissions:</u>	
primary crusher baghouse - 28.29 pounds OC/hour	
secondary crusher baghouse - 28.33 pounds OC/hour	
tertiary crusher (mill #1) baghouse - 66.95 pounds OC/hour	
mill #2 (small) baghouse - 10.48	

**2. Additional Terms and Conditions**

**2.a** The permittee shall employ best available technology (BAT) on this emissions unit. BAT has been determined to be the use of the control measures and visible emissions restrictions outlined in section A.2.b.

**2.b** Visible particulate emissions and control requirements shall comply with the following:

<b>Emissions Point (Company ID)</b>	<b>Equipment Type</b>	<b>Control Measure</b>	<b>Regulatory Basis for Control Measure</b>	<b>Opacity Limit</b>	<b>Regulatory Basis for Opacity Limitation</b>

Modification Issued: 1/2/2004

- 2.c The emission limitation specified by this rule is less stringent than the emissions limitation established pursuant to OAC rule 3745-31-05(A)(3).
- 2.d This emissions unit is exempt from the requirements specified in OAC rule 3745-17-08(B), pursuant to OAC rule 3745-17-08(A)(1), because this fugitive dust source is not located within the geographical areas specified in Appendix A of rule 3745-17-08.
- 2.e This emissions unit is exempt from the visible particulate emission limitations specified in OAC rule 3745-17-07(B), pursuant to OAC rule 3745-17-07(B)(11)(e), because this fugitive dust source is not located within the geographical areas specified in Appendix A of OAC rule 3745-17-08.
- 2.f The requirements of this rule include compliance with 40 CFR Part 60, Subpart OOO and OAC rule 3745-31-05(D).
- 2.g The permittee has requested a federally enforceable limitation of 95.0 tons OC per rolling twelve month period based on aggregate type/throughput restrictions (see B.1), for the purpose of avoiding Title V applicability.

For the purpose of federal enforceability, limitations on OC effectively limit VOC.

**B. Operational Restrictions**

- 1. The maximum rolling 12-month aggregate throughput\* for this emissions unit is limited by the following equation, but shall not exceed 3,283,700 tons:

$$\sum_{M=1}^{12} \sum_n U_n C_n \leq 95.0 \text{ 1ton/2000 lbs}$$

Where,

- M = the increment of the rolling 12-month period;
- n = the increment of the aggregate throughput during the period;
- U<sub>n</sub> = total throughput of the individual aggregate - 1st bench, 2nd bench, 3rd bench, 4th bench, etc.
- C<sub>n</sub> = emission factor for the individual aggregate in lbs OC/ton aggregate

\*aggregate throughput shall be based on the aggregate throughput of the feeder

2. The maximum annual hours of operation shall not exceed 3,159 hours.
3. The pressure drop across the primary crusher baghouse shall be maintained within the range of 1-6 inches of water while the primary crusher is in operation.

Modification Issued: 1/2/2004

4. The pressure drop across the secondary crusher baghouse shall be maintained within the range of 1-6 inches of water while the secondary crusher, and/or conveyor #26A to conveyor #9 are in operation.
5. The pressure drop across the mill #1 baghouse shall be maintained within the range of 1-6 inches of water while the tertiary crusher, screen #3, screen #4, screen #3 to conveyor #24, screen #4 to conveyor #24, conveyor #24 to conveyor #25, and/or tertiary crusher to conveyor #15 transfer point are in operation.
6. The pressure drop across the mill #2 baghouse shall be maintained within the range of 1-6 inches of water while the conveyor #12 to conveyor #13, conveyor #12 to conveyor #14, conveyor #15 to conveyor #13, conveyor #15 to conveyor #14, and/or conveyor #25 to conveyor #26 transfer point/s are in operation.

**C. Monitoring and/or Record keeping Requirements**

1. The permittee shall maintain monthly records of the following information:
  - a. The name and identification of each individual type of aggregate processed (1st bench, 2nd bench, 3rd bench, 4th bench, etc.);
  - b. The quantity of each individual type of aggregate processed, in tons;
  - c. The quantity of all aggregate processed, in tons (summation of C.1.b);
  - d. The rolling 12-month summation of all aggregate processed, in tons;
  - e. The OC emissions for each individual type of aggregate processed, in tons/month, calculated as follows:

$$E_n = U_n C_n \left( \frac{1 \text{ ton}}{2000 \text{ lbs}} \right)$$

$E_n$  = OC emissions from an individual type of aggregate

$U_n$  = total throughput of the individual type of aggregate - 1st bench, 2nd bench, 3rd bench, 4th bench, etc.

$C_n$  = emission factor for the individual aggregate in lbs OC/ton aggregate

- f. The total OC emission rate of all aggregate processed, in tons/month, calculated as

**Wagner Quarries Company**  
**PTI Application: 02 12207**  
**Modif**

**Facility ID: 0322020200**

Emissions Unit ID: **P901**

follows:

$$E_M = E_1 + E_2 + E_3 + \dots + E_n$$

Where:

$E_M$  = Monthly OC emissions, in tons/month; and,

$E_n$  = OC emissions from each individual aggregate processed (C.1.c)

- g. The rolling, 12-month OC emission rate calculated as follows:

$$E_T = E_{M1} + E_{M2} + E_{M3} + \dots + E_{M12}$$

Where:

$E_T$  = Annual OC emissions (tons) as summed from the previous 12 months of monthly OC emissions;

$E_M$  = Monthly OC emissions (tons/month).

- h. The total hours of operation each month;
- i. The total hours of operation, to date for the calendar year.
2. The permittee shall properly install, operate and maintain equipment to monitor the pressure drop across each of the 4 baghouses while the associated equipment is in operation. The monitoring equipment shall be installed, calibrated, operated, and maintained in accordance with the manufacturer's recommendations, instructions, and operating manual(s). The permittee shall record the pressure drop across each baghouse on a once-per-8 hour shift basis.
3. The permittee shall perform daily checks, when the emissions unit is in operation and when the weather conditions allow, for any visible particulate fugitive emissions from this emissions unit. The presence or absence of any visible fugitive emissions shall be noted in an operations log. If visible fugitive emissions are observed, the permittee shall also note the following in the operations log:
- a. The location and color of the emissions;
- b. Whether the emissions are representative of normal operations;
- c. If the emissions are not representative of normal operations, the cause of the abnormal emissions;
- d. The total duration of any visible emissions incident; and

- e. Any corrective actions taken to eliminate the visible emissions.

If visible emissions are present, a visible emission incident has occurred. The observer does not have to document the exact start and end times for the visible emission incident under item (d) above or continue the daily check until the incident has ended. The observer may indicate that the visible emission incident was continuous during the observation period (or, if known, continuous during the operation of the emissions unit). With respect to the documentation of corrective actions, the observer may indicate that no corrective actions were taken if the visible emissions were representative of normal operations, or specify the minor corrective actions that were taken to ensure that the emissions unit continued to operate under normal conditions, or specify the corrective actions that were taken to eliminate abnormal visible emissions.

#### **D. Reporting Requirements**

1. The permittee shall submit deviation (excursion) reports that identify all exceedances of the following:
  - a. The rolling, 12-month OC emissions limitation; and
  - b. The rolling, 12-month aggregate throughput limitation.

The permittee shall submit these deviation (excursion) reports in accordance with the General Terms and Conditions of this permit.
2. The permittee shall submit annual written reports of any deviation (excursion) from the annual hours of operation limitation in B.2. If no deviations occurred during a calendar year, the permittee shall submit an annual report which states that no deviations occurred. The report shall be submitted by January 31 of each year and shall cover the previous calendar year.
3. The permittee shall submit pressure drop deviation (excursion) reports that identify all periods of time during which the pressure drop across each baghouse did not comply with the allowable range specified above. The permittee shall submit these deviation (excursion) reports in accordance with the General Terms and Conditions of this permit.
4. The permittee shall submit semiannual written reports that (a) identify all days during which any abnormal visible particulate fugitive emissions were observed from this emissions unit, and (b) describe any corrective actions taken to minimize or eliminate the abnormal visible particulate fugitive emissions. These reports shall be submitted to the Director (the appropriate Ohio EPA District Office or local air agency) by January 31 and July 31 of each year and shall cover the previous 6-month period.

5. The permittee shall submit the following information for each piece of equipment that is replaced by a piece of equipment having the same function as the existing facility:
  - a. For a conveyor belt:
    - i. The width of the existing belt being replaced, and
    - ii. The width of the replacement conveyor belt.

The notification shall be submitted to the Director (the appropriate Ohio EPA District Office or local air agency) within 30 days after the equipment replacement.

6. Pursuant to the general provisions of NSPS, the source owner/operator is hereby advised of the requirement to report the following at the appropriate times for this emissions unit:
  - a. Construction date (no later than 30 days after such date); and
  - b. Date of performance testing (if required, at least 30 days prior to testing).

Reports are to be sent to:

Ohio Environmental Protection Agency  
 DAPC - Permit Management Unit  
 Lazarus Government Center  
 P.O. Box 1049  
 Columbus, Ohio 43216-1049

and:

Ohio EPA, Northwest District Office  
 347 North Dunbridge Road  
 Bowling Green, Ohio 43402

## E. Testing Requirements

1. The permittee shall conduct, or have conducted, emissions testing for all stack particulate emissions that are subject to 40 CFR Part 60, Subpart OOO. The permittee shall also conduct, or have conducted, visible emissions testing for all fugitive emissions points of emissions unit P901, that are subject to 40 CFR Part 60, Subpart OOO (See E.7.g).
2. Testing shall be conducted in accordance with the provisions of 40 CFR Part 60, Subpart OOO, Section 60.675.

**Modification Issued: 1/2/2004**

3. The emissions testing shall be conducted within 60 days after achieving the maximum production rate at which the affected facility will be operated, by not later than 180 days after initial startup of such facility and at such other times as may be required by the Ohio Environmental Protection Agency, Division of Air Pollution Control. The emissions testing shall be conducted to demonstrate compliance with the allowable stack particulate emissions rates and fugitive opacity limitations for particulate emissions.
4. The test methods and procedures outlined in 40 CFR 60.675 shall be employed to demonstrate compliance with the allowable emission limitations.

**Modification Issued: 1/2/2004**

5. The tests shall be conducted while the emissions unit is operating at its maximum capacity, unless otherwise specified or approved by the Ohio EPA, Division of Air Pollution Control. Not later than 30 days prior to the proposed test date(s), the permittee shall submit an "Intent to Test" notification to the Ohio EPA, Division of Air Pollution Control. The "Intent to Test" notification shall describe in detail the proposed test methods and procedures, the emissions unit operating parameters, the times and dates of the tests, and the person(s) who will be conducting the tests. Failure to submit such notification for review and approval prior to the tests may result in the Ohio EPA District Office's air agency's refusal to accept the results of the emissions tests.
6. Personnel from the Ohio EPA District Office's air agency shall be permitted to witness the test, examine the testing equipment, and acquire data and information necessary to ensure that the operation of the emissions unit and the testing procedures provide a valid characterization of the emissions unit and/or the performance of the control equipment. A comprehensive written report on the emissions tests shall be signed by the person or persons responsible for the tests and submitted to the Ohio EPA Division of Air Pollution Control within 30 days following completion of the tests.
7. Compliance Methods Requirements: Compliance with the emission limitation(s) in section A.1 of the terms and conditions of this permit shall be determined in accordance with the following method(s):
  - a. Emission Limitation:  
stack emissions with a maximum outlet concentration of 0.02 gr/dscf (0.05 g/dscm)  
  
Applicable Compliance Method:  
The permittee shall demonstrate compliance with the grain loading limitation through the testing requirements contained in section E.1. - E.6.
  - b. Emission Limitation:  
primary crusher baghouse - 1.71 pounds PE/hour, 2.70 tons PE/year  
  
Applicable Compliance Method:  
The permittee shall demonstrate compliance with the pounds per hour limitation through the testing requirements contained in section E.1. - E.6. Compliance with the tons/yr shall be determined by multiplying the lbs/hr limitation by a maximum operating schedule of 3,159 hrs/yr and dividing by 2000 lbs/ton. Therefore, provided compliance with the lb/hr limitation and annual hourly operating restriction are shown, compliance with the tons/yr limitation will be assumed.
  - c. Emission Limitation:

**Wagner Quarries Company**

**PTI Application: 02 12207**

**Modif**

**Facility ID: 0322020200**

Emissions Unit ID: **P901**

secondary crusher baghouse - 1.71 pounds PE/hour, 2.70 tons PE/year

Applicable Compliance Method:

The permittee shall demonstrate compliance with the pounds per hour limitation through the testing requirements contained in section E.1. - E.6. Compliance with the tons/yr shall be determined by multiplying the lbs/hr limitation by a maximum operating schedule of 3,159 hrs/yr and dividing by 2000 lbs/ton. Therefore, provided compliance with the lb/hr limitation and annual hourly operating restriction are shown, compliance with the tons/yr limitation will be assumed.

- d. Emission Limitation:  
tertiary crusher (mill #1) baghouse - 2.57 pounds PE/hour, 4.06 tons PE/year

Applicable Compliance Method:

The permittee shall demonstrate compliance with the pounds per hour limitation through the testing requirements contained in section E.1. - E.6. Compliance with the tons/yr shall be determined by multiplying the lbs/hr limitation by a maximum operating schedule of 3,159 hrs/yr and dividing by 2000 lbs/ton. Therefore, provided compliance with the lb/hr limitation and annual hourly operating restriction are shown, compliance with the tons/yr limitation will be assumed.

- e. Emission Limitation:  
mill #2 baghouse - 0.51 pound PE/hour, 0.81 ton PE/year

Applicable Compliance Method:

The permittee shall demonstrate compliance with the pounds per hour limitation through the testing requirements contained in section E.1. - E.6. Compliance with the tons/yr shall be determined by multiplying the lbs/hr limitation by a maximum operating schedule of 3,159 hrs/yr and dividing by 2000 lbs/ton. Therefore, provided compliance with the lb/hr limitation and annual hourly operating restriction are shown, compliance with the tons/yr limitation will be assumed.

- f. Emission Limitation:  
105.0 tons fugitive PE/year, 50.0 tons PM<sub>10</sub>/year

Applicable Compliance Method:

The permittee shall demonstrate compliance with the PM<sub>10</sub> limit by multiplying a maximum annual aggregate throughput limitation of 3,283,700 by the appropriate AP-42 emission factors for PM<sub>10</sub> from Table 11.19.2-2 (revised 1/95), and applying a 80% capture efficiency for the portion of the emissions which are controlled. Compliance with the PE limit may be demonstrated by multiplying the PM<sub>10</sub> limit by 2.1.

- g. Emission Limitation:

26

**Wagn**

**PTI A**

**Modification Issued: 1/2/2004**

Emissions Unit ID: **P901**

Visible PE limitations identified in sections II.A.2.b, 2.c and 2.e.

Applicable Compliance Method:

The permittee shall demonstrate compliance through the testing requirements contained in section E.1. - E.6. for visible fugitive emissions associated with the secondary crusher, screen #1, screen #2, and the following transfer points: conveyor #12 to #13, conveyor #12 to #14, conveyor #24 to conveyor #25, conveyor #25 to conveyor #26, conveyor #3 to screen#1, screen #1 to conveyor #4, screen #1 to conveyor #5, screen #1 to conveyor #6A, conveyor #6A to conveyor #6, conveyor #7 to conveyor #8, conveyor #8 to screen #2, screen #2 to secondary crusher, screen #2 to conveyor #9, conveyor #9 to conveyor #10, screen #2 to conveyor #12, screen #2 to conveyor #11, screen #2 to conveyor #8B, conveyor #8B to conveyor #8A, secondary crusher to conveyor #12A, conveyor #12A to conveyor #12, screen #5 to conveyor #17, screen #5 to conveyor #16, conveyor #17 to conveyor #18, screen #6 to conveyor #17, screen #6 to conveyor #16, conveyor #16 to conveyor #19, conveyor #20 to conveyor #21, conveyor #26 to conveyor #26a, conveyor 26a to conveyor #9, sandscrew to conveyor #22, screen #3 to conveyor #24, screen #4 to conveyor #24, #9 storage bin to belt feeder, and #4 storage bin to belt feeder. If required compliance with all other visible emissions not specified above shall be demonstrated by visible emissions testing using the methods and procedures specified in 40 CFR Part 60, Section 60.675.

- h. Emission Limitation:  
 primary crusher baghouse - 28.29 pounds OC/hour

Applicable Compliance Method:

The permittee may demonstrate compliance by multiplying a maximum aggregate throughput of 1300 TPH by an emissions factor of 0.02176 lb OC/ton (based on a September 1999 emissions test, processing 3rd bench material). If required, compliance with the hourly OC emissions rate may be based on stack testing using the methods and procedures specified in Methods 1 - 4, and 18, 25, or 25a, as appropriate, of 40 CFR Part 60, Appendix A.

- i. Emission Limitation:  
 secondary crusher baghouse - 28.33 pounds OC/hour

Applicable Compliance Method:

The permittee may demonstrate compliance by multiplying a maximum aggregate throughput of 1300 TPH by an emissions factor of 0.02179 lb OC/ton (based on a September 1999 emissions test, processing 3rd bench material). If required, compliance with the hourly OC emissions rate may be based on stack testing using the methods and procedures specified in Methods 1- 4, and 18, 25, or 25a, as appropriate, of 40 CFR Part 60, Appendix A.

- j. Emission Limitation:  
 tertiary crusher (mill #1) baghouse - 66.95 pounds OC/hour

28

**Wagn**

**PTI A**

**Modification Issued: 1/2/2004**

Emissions Unit ID: **P901**

Wagn

PTI A

Modification Issued: 1/2/2004

Emissions Unit ID: P901

**Applicable Compliance Method:**

The permittee may demonstrate compliance by multiplying a maximum aggregate throughput of 1300 TPH by an emissions factor of 0.05150 lb OC/ton (based on a September 1999 emissions test, processing 3rd bench material). If required, compliance with the hourly OC emissions rate may be based on stack testing using the methods and procedures specified in Methods 1- 4, and 18, 25, or 25a, as appropriate, of 40 CFR Part 60, Appendix A.

- k. Emission Limitation:  
mill #2 (small) baghouse - 10.48 pounds OC/hour

**Applicable Compliance Method:**

The permittee may demonstrate compliance by multiplying a maximum aggregate throughput of 1300 TPH by an emissions factor of 0.00806 lb OC/ton (based on a September 1999 emissions test, processing 3rd bench material). If required, compliance with the hourly OC emissions rate may be based on stack testing using the methods and procedures specified in Methods 1 - 4, and 18, 25, or 25a, as appropriate, of 40 CFR Part 60, Appendix A.

- l. Emission Limitation:  
95.0 tons OC/rolling 12-month period

**Applicable Compliance Method:**

The permittee shall demonstrate compliance by the monitoring and record keeping in section C.1.

**F. Miscellaneous Requirements**

None
