24145 W. Moline Martin Road
Millbury, OH 43447

Enclosed please find an Ohio EPA Permit to Install which will allow you to install the described source(s) in a manner indicated in the permit. Because this permit contains several conditions and restrictions, I urge you to read it carefully.

The Ohio EPA is urging companies to investigate pollution prevention and energy conservation. Not only will this reduce pollution and energy consumption, but it can also save you money. If you would like to learn ways you can save money while protecting the environment, please contact our Office of Pollution Prevention at (614) 644-3469.

You are hereby notified that this action by the Director is final and may be appealed to the Ohio Environmental Review Appeals Commission pursuant to Chapter 3745.04 of the Ohio Revised Code. The appeal must be in writing and set forth the action complained of and the grounds upon which the appeal is based. It must be filed within thirty (30) days after the notice of the Directors action. A copy of the appeal must be served on the Director of the Ohio Environmental Protection Agency within three (3) days of filing with the Commission. An appeal may be filed with the Environmental Review Appeals Commission at the following address:

Environmental Review Appeals Commission
309 South Fourth Street, Room 222
Columbus, Ohio 43215

Sincerely,

Michael W. Ahern, Supervisor
Field Operations and Permit Section
Division of Air Pollution Control

**Permit To Install
Terms and Conditions**

**Issue Date: 8/3/2004
Effective Date: 8/3/2004**

FINAL PERMIT TO INSTALL 03-16151

Application Number: 03-16151
APS Premise Number: 0362000114
Permit Fee: **\$100**
Name of Facility: Guardian Fabrication, Inc.
Person to Contact: Sandra Muehling
Address: 24145 W. Moline Martin Road
Millbury, OH 43447

Location of proposed air contaminant source(s) [emissions unit(s)]:
**24145 W. Moline Martin Road
Millbury, Ohio**

Description of proposed emissions unit(s):
Modification to silkscreen printer, dryer and tempering furnace.

The above named entity is hereby granted a Permit to Install for the above described emissions unit(s) pursuant to Chapter 3745-31 of the Ohio Administrative Code. Issuance of this permit does not constitute expressed or implied approval or agreement that, if constructed or modified in accordance with the plans included in the application, the above described emissions unit(s) of environmental pollutants will operate in compliance with applicable State and Federal laws and regulations, and does not constitute expressed or implied assurance that if constructed or modified in accordance with those plans and specifications, the above described emissions unit(s) of pollutants will be granted the necessary permits to operate (air) or NPDES permits as applicable.

This permit is granted subject to the conditions attached hereto.

Ohio Environmental Protection Agency

Director

Part I - GENERAL TERMS AND CONDITIONS

A. Permit to Install General Terms and Conditions

1. Compliance Requirements

The emissions unit(s) identified in this Permit to Install shall remain in full compliance with all applicable State laws and regulations and the terms and conditions of this permit.

2. Reporting Requirements

The permittee shall submit required reports in the following manner:

- a. Reports of any required monitoring and/or recordkeeping information shall be submitted to the appropriate Ohio EPA District Office or local air agency.
- b. Except as otherwise may be provided in the terms and conditions for a specific emissions unit, quarterly written reports of (a) any deviations (excursions) from emission limitations, operational restrictions, and control device operating parameter limitations that have been detected by the testing, monitoring, and recordkeeping requirements specified in this permit, (b) the probable cause of such deviations, and (c) any corrective actions or preventive measures which have been or will be taken, shall be submitted to the appropriate Ohio EPA District Office or local air agency. If no deviations occurred during a calendar quarter, the permittee shall submit a quarterly report, which states that no deviations occurred during that quarter. The reports shall be submitted quarterly, i.e., by January 31, April 30, July 31, and October 31 of each year and shall cover the previous calendar quarters. (These quarterly reports shall exclude deviations resulting from malfunctions reported in accordance with OAC rule 3745-15-06.)

3. Records Retention Requirements

Each record of any monitoring data, testing data, and support information required pursuant to this permit shall be retained for a period of five years from the date the record was created. Support information shall include, but not be limited to, all calibration and maintenance records and all original strip-chart recordings for continuous monitoring instrumentation, and copies of all reports required by this permit. Such records may be maintained in computerized form.

4. Inspections and Information Requests

The Director of the Ohio EPA, or an authorized representative of the Director, may, subject to the safety requirements of the permittee and without undue delay, enter upon the premises of this source at any reasonable time for purposes of making inspections, conducting tests, examining records or reports pertaining to any emission of air contaminants, and determining compliance with any applicable State air pollution laws and regulations and the terms and conditions of this permit. The permittee shall furnish to the Director of the Ohio EPA, or an authorized

representative of the Director, upon receipt of a written request and within a reasonable time, any information that may be requested to determine whether cause exists for modifying, reopening or revoking this permit or to determine compliance with this permit. Upon verbal or written request, the permittee shall also furnish to the Director of the Ohio EPA, or an authorized representative of the Director, copies of records required to be kept by this permit.

5. Scheduled Maintenance/Malfunction Reporting

Any scheduled maintenance of air pollution control equipment shall be performed in accordance with paragraph (A) of OAC rule 3745-15-06. The malfunction of any emissions units or any associated air pollution control system(s) shall be reported to the appropriate Ohio EPA District Office or local air agency in accordance with paragraph (B) of OAC rule 3745-15-06. Except as provided in that rule, any scheduled maintenance or malfunction necessitating the shutdown or bypassing of any air pollution control system(s) shall be accompanied by the shutdown of the emissions unit(s) that is (are) served by such control system(s).

6. Permit Transfers

Any transferee of this permit shall assume the responsibilities of the prior permit holder. The appropriate Ohio EPA District Office or local air agency must be notified in writing of any transfer of this permit.

7. Air Pollution Nuisance

The air contaminants emitted by the emissions units covered by this permit shall not cause a public nuisance, in violation of OAC rule 3745-15-07.

8. Termination of Permit to Install

This Permit to Install shall terminate within eighteen months of the effective date of the Permit to Install if the owner or operator has not undertaken a continuing program of installation or modification or has not entered into a binding contractual obligation to undertake and complete within a reasonable time a continuing program of installation or modification. This deadline may be extended by up to 12 months if application is made to the Director within a reasonable time before the termination date and the party shows good cause for any such extension.

9. Construction of New Sources(s)

The proposed emissions unit(s) shall be constructed in strict accordance with the plans and application submitted for this permit to the Director of the Ohio Environmental Protection Agency. There may be no deviation from the approved plans without the express, written approval of the Agency. Any deviations from the approved plans or the above conditions may lead to such sanctions

Guardian Fabrication, Inc.
PTI Application: 03-16151
Issued: 8/3/2004

Facility ID: 0362000114

and penalties as provided under Ohio law. Approval of these plans does not constitute an assurance that the proposed facilities will operate in compliance with all Ohio laws and regulations. Additional facilities shall be installed upon orders of the Ohio Environmental Protection Agency if the proposed sources cannot meet the requirements of this permit or cannot meet applicable standards.

If the construction of the proposed emissions unit(s) has already begun or has been completed prior to the date the Director of the Environmental Protection Agency approves the permit application and plans, the approval does not constitute expressed or implied assurance that the proposed facility has been constructed in accordance with the approved plans. The action of beginning and/or completing construction prior to obtaining the Director's approval constitutes a violation of OAC rule 3745-31-02. Furthermore, issuance of the Permit to Install does not constitute an assurance that the proposed source will operate in compliance with all Ohio laws and regulations. Approval of the plans in any case is not to be construed as an approval of the facility as constructed and/or completed. Moreover, issuance of the Permit to Install is not to be construed as a waiver of any rights that the Ohio Environmental Protection Agency (or other persons) may have against the applicant for starting construction prior to the effective date of the permit. Additional facilities shall be installed upon orders of the Ohio Environmental Protection Agency if the proposed facilities cannot meet the requirements of this permit or cannot meet applicable standards.

10. Public Disclosure

The facility is hereby notified that this permit, and all agency records concerning the operation of this permitted source, are subject to public disclosure in accordance with OAC rule 3745-49-03.

11. Applicability

This Permit To Install is applicable only to the emissions unit(s) identified in the Permit To Install. Separate Permit To Install for the installation or modification of any other emissions unit(s) are required for any emissions unit for which a Permit To Install is required.

12. Best Available Technology

As specified in OAC Rule 3745-31-05, all new sources must employ Best Available Technology (BAT). Compliance with the terms and conditions of this permit will fulfill this requirement.

13. Source Operation and Operating Permit Requirements After Completion of Construction

This facility is permitted to operate each source described by this Permit to Install for a period of up to one year from the date the source commenced operation. This permission to operate is granted only if the facility complies with all requirements contained in this permit and all applicable air pollution laws, regulations, and policies. Pursuant to OAC Chapter 3745-35, the permittee shall submit a complete operating permit application within ninety (90) days after commencing operation of the emissions unit(s) covered by this permit.

Guardian Fabrication, Inc.
PTI Application: 03-16151
Issued: 8/3/2004

Facility ID: 0362000114

14. Construction Compliance Certification

The applicant shall provide Ohio EPA with a written certification (see enclosed form) that the facility has been constructed in accordance with the Permit to Install application and the terms and conditions of the Permit to Install. The certification shall be provided to Ohio EPA upon completion of construction but prior to startup of the source.

15. Fees

The permittee shall pay fees to the Director of the Ohio EPA in accordance with ORC section 3745.11 and OAC Chapter 3745-78. The permittee shall pay all applicable Permit to Install fees within 30 days after the issuance of this Permit to Install.

B. Permit to Install Summary of Allowable Emissions

The following information summarizes the total allowable emissions, by pollutant, based on the individual allowable emissions of each air contaminant source identified in this permit.

SUMMARY (for informational purposes only)
 TOTAL PERMIT TO INSTALL ALLOWABLE EMISSIONS

<u>Pollutant</u>	<u>Tons Per Year</u>
OC	10.80

PART II - SPECIAL TERMS AND CONDITIONS FOR SPECIFIC EMISSIONS UNIT(S)

A. Applicable Emissions Limitations and/or Control Requirements

1. The specific operations(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
P008 - Modification to silkscreen printer, dryer and tempering furnace. (modification of PTI 03-14021 issued June 5, 2003 to allow for use of photochemically reactive material)	OAC rule 3745-31-05(A)(3)	2.46 organic compounds (OC) lbs/hr and 10.77 tons OC/yr (See A.2.a)
	OAC rule 3745-21-07(G)(2)	5.60 lbs OC/month, 0.03 tons OC/yr from cleanup operations (See B.1)
		OC emissions shall not exceed 8 lbs /hr and 40 lbs/day (See A.2.b).

2. Additional Terms and Conditions

- 2.a This emissions unit is subject to 2.46 lbs organic compound (OC)/hr from coating operations at all times except for when subject to OAC rule 3745-21-07(G)(2) as specified in section A.2.b.
- 2.b This emissions unit becomes subject to OAC rule 3745-21-07(G)(2) for each day when any photochemically reactive material is employed. On any such day, all emissions from both the application of photochemically reactive and non-photochemically reactive materials (coatings) is applicable to the requirement that OC emissions shall not exceed 8 pounds per hour and 40 pounds per day.

B. Operational Restrictions

1. The use of photochemically reactive materials, as defined in OAC rule 3745-21-01, for cleanup operations in this emissions unit is prohibited.

C. Monitoring and/or Record keeping Requirements

1. The permittee shall maintain daily records that document whether or not each coating employed is a photochemically reactive material as defined in OAC rule 3745-21-01(C)(5);

2. On any day when any photochemically reactive material is employed, the permittee shall collect and record the following information for this emissions unit for such day:
 - a. the company name and identification for each coating employed;
 - b. the number of gallons of each coating applied;
 - c. the organic compound content of each coating, in pounds/gallon, as applied;
 - d. the total organic compound emission rate for all coatings applied, in pounds per day (summation of C.2.c);
 - e. the total number of hours the emissions unit was in the operation;
 - f. the average hourly organic compound emission rate (C.2.d/C.2.e.), in pounds per hour (average).

[Note: The coating information must be for the coatings as employed, including any thinning solvents added at the emissions unit. Also, the definitions of "photochemically reactive" and "nonphotochemically reactive" are based upon OAC rule 3745-21-01.]

3. On any day when only non-photochemically reactive materials are employed (for coatings), the permittee shall collect and record the following information for this emissions unit for such day:
 - a. the name and identification number of each coating employed;
 - b. the OC content of each coating, as applied, in pounds per gallon;
 - c. the number of gallons of each coating employed;
 - d. the OC emission rate for each coating employed, in lbs/month (C.3.b x C.3.c);
 - e. the total OC emission rate for all coating materials employed (sum of (C.3.d));
4. In conjunction with the record keeping in C.2 and C.3, the permittee shall collect and record the following information for this emissions unit each month:
 - a. the total OC emission rate from all coatings employed, in tons/month;
 - b. the annual, year-to-date, OC emissions from all coatings employed [sum of C.4.a for each

calendar month to date from January to December).

5. The permittee shall collect and record the following each month for cleanup operations:
 - a. the name and identification of each cleanup material employed;
 - b. documentation was to whether or not each cleanup material employed is a photochemically reactive material as defined in OAC rule 3745-21-01;
 - c. the OC content of each cleanup material employed, in pounds per gallon;
 - d. the number of gallons of each cleanup material employed;
 - e. the OC emissions from each cleanup material employed (C.5.c x C.5.d);
 - f. the total OC emissions from all cleanup materials employed (summation of C.5.e), in pounds or tons;
 - g. the annual year to date OC emissions from cleanup operations, in tons per year (summation of C.5.f for each calendar month to date from January to December).

The company may calculate OC emissions from cleanup operations in accordance with the following formula if waste cleanup materials are sent off-site for reclamation/disposal:

OC emissions from cleanup operations = (total gallons of cleanup material used x solvent density of cleanup material) - (total gallons cleanup material sent off-site for disposal or reclamation [minus solids content of said material]) x solvent density.

D. Reporting Requirements

1. The permittee shall submit deviation (excursion) reports which identify any exceedances of the following:
 - a. for the days during which a photochemically reactive material was employed, an identification of each day during which the average hourly organic compound emissions as calculated by term and condition C.2.f exceeded 8 pounds per hour.
 - b. for the days during which a photochemically reactive material applied, an identification of each day during which the average hourly organic compound emissions as calculated by term and condition C.2.d exceeded 40 pounds per day.
 - c. any exceedances of the 5.60 lbs OC/month from cleanup operations.

These reports shall be submitted in accordance with the general terms and conditions of this

permit.

2. The permittee shall notify the Northwest District Office in writing of any monthly record showing the use of photochemically reactive material for cleanup operations in this emissions unit. The notification shall include a copy of such record and shall be sent to the Northwest District Office within 30 days following the end of the calendar month.

E. Testing Requirements

1. Compliance with the emission limitations specified in section A.1 of these terms and conditions shall be determined in accordance with the following methods:

- a. Emission Limitation: 2.46 lbs OC/hr from coating operations

Applicable Compliance Method: The hourly emission limitation represents the potential to emit* of the emissions unit. Therefore, no record keeping, deviation reporting, or compliance method calculations are required to demonstrate compliance with this limitation.

* The potential to emit is based on a worst-case coating operation involving a maximum coating usage rate of 0.70 gallons per hour and a maximum OC content of 3.51 pounds per gallon.

- b. Emission Limitation: 10.77 tons OC/year from coating operations

Applicable Compliance Method: Compliance shall be based upon the record keeping requirements specified in section C.4 of this permit.

- c. Emission Limitation: 5.60 lbs OC/month, 0.03 tpy OC from cleanup operations

Applicable Compliance Method: Compliance with the above emission limitation shall be based upon the record keeping requirements specified in section C.5.

- d. Emission Limitation: OC emissions shall not exceed 8 pounds per hour and 40 pounds per day (See A.2.b)

Applicable Compliance Method: Compliance shall be based upon the record keeping requirements in section C.2.

F. Miscellaneous Requirements

1. Modeling to demonstrate compliance with the Ohio EPA's "Air Toxic Policy" was not necessary because the emissions unit's annual emission for each toxic compound will be less than 1.0 ton. OAC Chapter 3745-31 requires permittee to apply for and obtain a new or modified permit to install prior to making a "modification" as defined by OAC rule 3745-31-01. The permittee is hereby advised that changes in the composition of the materials, or use of new materials, that would cause the emissions of any pollutant that has a listed TLV to increase to above 1.0 ton per

12

Guard

PTI A

Issued: 8/3/2004

year may require the permittee to apply for and obtain a new permit to install.
