

**Synthetic Minor Determination and/or**  **Netting Determination**

Permit To Install **03-16112**

**A. Source Description**

MGQ, Inc. is proposing to install the following diesel-fired, portable crushing engines: P001/CAT 3508 (1144 horsepower); P002/Cummins N14-p (405 horsepower); and P003/Perkins (102 horsepower). The company is only requesting federally enforceable limits on the two larger engines (P001 and P002).

**B. Facility Emissions and Attainment Status**

Without restrictions, this portable emissions unit would be considered a Title V major facility but not PSD major facility as the potential to emit for the facility is >100 TPY but <250 TPY for NO<sub>x</sub>. The requested limits of 22.50 tons NO<sub>x</sub>/year for P001 and 19.45 tons NO<sub>x</sub>/year for P002 are sufficient to establish the facility as a minor source. There are no applicable NSPS or MACT standards for the facility at this time.

**C. Source Emissions**

This permit allows for the operation of three portable generators. This permit will place federally enforceable restrictions on emissions units P001 and P002, by establishing a 100,450 gallon/year fuel usage restriction on emissions unit P001 and a 63,000 gallons/year fuel usage restriction on emissions unit P002. This permit action will result in potential emissions being less than all major source thresholds.

**D. Conclusion**

With the restriction on fuel usage limiting NO<sub>x</sub> emissions, MGQ, Inc. will be able to maintain its status as a non-Title V facility.

**RE: DRAFT PERMIT TO INSTALL  
SENECA COUNTY**

**CERTIFIED MAIL**

**Application No: 03-16112**

**DATE: 8/10/2004**

MGQ Aggregates, Inc.  
Farley Wood  
P.O. Box 130  
Old Fort, OH 44861

You are hereby notified that the Ohio Environmental Protection Agency has made a draft action recommending that the Director issue a Permit to Install for the air contaminant source(s) [emissions unit(s)] shown on the enclosed draft permit. This draft action is not an authorization to begin construction or modification of your emissions unit(s). The purpose of this draft is to solicit public comments on the proposed installation. A public notice concerning the draft permit will appear in the Ohio EPA Weekly Review and the newspaper in the county where the facility will be located. Public comments will be accepted by the field office within 30 days of the date of publication in the newspaper. Any comments you have on the draft permit should be directed to the appropriate field office within the comment period. A copy of your comments should also be mailed to Robert Hodanbosi, Division of Air Pollution Control, Ohio EPA, P.O. Box 1049, Columbus, OH, 43266-0149.

A Permit to Install may be issued in proposed or final form based on the draft action, any written public comments received within 30 days of the public notice, or record of a public meeting if one is held. You will be notified in writing of a scheduled public meeting. Upon issuance of a final Permit to Install a fee of **\$3800** will be due. Please do not submit any payment now.

The Ohio EPA is urging companies to investigate pollution prevention and energy conservation. Not only will this reduce pollution and energy consumption, but it can also save you money. If you would like to learn ways you can save money while protecting the environment, please contact our Office of Pollution Prevention at (614) 644-3469. If you have any questions about this draft permit, please contact the field office where you submitted your application, or Mike Ahern, Field Operations & Permit Section at (614) 644-3631.

Very truly yours,

*Michael W. Ahern*

Michael W. Ahern, Supervisor  
Field Operations and Permit Section

**SENECA COUNTY**

**PUBLIC NOTICE**

**ISSUANCE OF DRAFT PERMIT TO INSTALL 03-16112 FOR AN AIR CONTAMINANT SOURCE FOR  
MGQ AGGREGATES, INC.**

On 8/10/2004 the Director of the Ohio Environmental Protection Agency issued a draft action of a Permit To Install an air contaminant source for **MGQ Aggregates, Inc.**, located at **PO Box 130, Old Fort**, Ohio.

Installation of the air contaminant source identified below may proceed upon final issuance of Permit To Install 03-16112:

**portable aggregate plant with diesel engines.**

Comments concerning this draft action, or a request for a public meeting, must be sent in writing to the address identified below no later than thirty (30) days from the date this notice is published. All inquiries concerning this draft action may be directed to the contact identified below.

Don Waltermeyer, Ohio EPA, Northwest District Office, 347 North Dunbridge Road, Bowling Green, OH 43402 [(419)352-8461]

**Permit To Install  
Terms and Conditions**

**Issue Date: To be entered upon final issuance  
Effective Date: To be entered upon final issuance**

**DRAFT PERMIT TO INSTALL 03-16112**

Application Number: 03-16112  
APS Premise Number: 0374950001  
Permit Fee: **To be entered upon final issuance**  
Name of Facility: MGQ Aggregates, Inc.  
Person to Contact: Farley Wood  
Address: P.O. Box 130  
Old Fort, OH 44861

Location of proposed air contaminant source(s) [emissions unit(s)]:

**PO Box 130  
Old Fort, Ohio**

Description of proposed emissions unit(s):

**portable aggregate plant with diesel engines.**

The above named entity is hereby granted a Permit to Install for the above described emissions unit(s) pursuant to Chapter 3745-31 of the Ohio Administrative Code. Issuance of this permit does not constitute expressed or implied approval or agreement that, if constructed or modified in accordance with the plans included in the application, the above described emissions unit(s) of environmental pollutants will operate in compliance with applicable State and Federal laws and regulations, and does not constitute expressed or implied assurance that if constructed or modified in accordance with those plans and specifications, the above described emissions unit(s) of pollutants will be granted the necessary permits to operate (air) or NPDES permits as applicable.

This permit is granted subject to the conditions attached hereto.

Ohio Environmental Protection Agency

---

Director

**Part I - GENERAL TERMS AND CONDITIONS**

**A. Permit to Install General Terms and Conditions**

**1. Compliance Requirements**

The emissions unit(s) identified in this Permit to Install shall remain in full compliance with all applicable State laws and regulations and the terms and conditions of this permit.

**2. Reporting Requirements**

The permittee shall submit required reports in the following manner:

- a. Reports of any required monitoring and/or recordkeeping information shall be submitted to the appropriate Ohio EPA District Office or local air agency.
- b. Except as otherwise may be provided in the terms and conditions for a specific emissions unit, quarterly written reports of (a) any deviations (excursions) from emission limitations, operational restrictions, and control device operating parameter limitations that have been detected by the testing, monitoring, and recordkeeping requirements specified in this permit, (b) the probable cause of such deviations, and (c) any corrective actions or preventive measures which have been or will be taken, shall be submitted to the appropriate Ohio EPA District Office or local air agency. If no deviations occurred during a calendar quarter, the permittee shall submit a quarterly report, which states that no deviations occurred during that quarter. The reports shall be submitted quarterly, i.e., by January 31, April 30, July 31, and October 31 of each year and shall cover the previous calendar quarters. (These quarterly reports shall exclude deviations resulting from malfunctions reported in accordance with OAC rule 3745-15-06.)

**3. Records Retention Requirements**

Each record of any monitoring data, testing data, and support information required pursuant to this permit shall be retained for a period of five years from the date the record was created. Support information shall include, but not be limited to, all calibration and maintenance records and all original strip-chart recordings for continuous monitoring instrumentation, and copies of all reports required by this permit. Such records may be maintained in computerized form.

**4. Inspections and Information Requests**

The Director of the Ohio EPA, or an authorized representative of the Director, may, subject to the safety requirements of the permittee and without undue delay, enter upon the premises of this source at any reasonable time for purposes of making inspections, conducting tests, examining records or reports pertaining to any emission of air contaminants, and determining compliance with any applicable State air pollution laws and regulations and the terms and conditions of this permit. The permittee shall furnish to the Director of the Ohio EPA, or an authorized representative of the Director, upon receipt of a written request and within a reasonable time, any

information that may be requested to determine whether cause exists for modifying, reopening or revoking this permit or to determine compliance with this permit. Upon verbal or written request, the permittee shall also furnish to the Director of the Ohio EPA, or an authorized representative of the Director, copies of records required to be kept by this permit.

**5. Scheduled Maintenance/Malfunction Reporting**

Any scheduled maintenance of air pollution control equipment shall be performed in accordance with paragraph (A) of OAC rule 3745-15-06. The malfunction of any emissions units or any associated air pollution control system(s) shall be reported to the appropriate Ohio EPA District Office or local air agency in accordance with paragraph (B) of OAC rule 3745-15-06. Except as provided in that rule, any scheduled maintenance or malfunction necessitating the shutdown or bypassing of any air pollution control system(s) shall be accompanied by the shutdown of the emissions unit(s) that is (are) served by such control system(s).

**6. Permit Transfers**

Any transferee of this permit shall assume the responsibilities of the prior permit holder. The appropriate Ohio EPA District Office or local air agency must be notified in writing of any transfer of this permit.

**7. Air Pollution Nuisance**

The air contaminants emitted by the emissions units covered by this permit shall not cause a public nuisance, in violation of OAC rule 3745-15-07.

**8. Termination of Permit to Install**

This Permit to Install shall terminate within eighteen months of the effective date of the Permit to Install if the owner or operator has not undertaken a continuing program of installation or modification or has not entered into a binding contractual obligation to undertake and complete within a reasonable time a continuing program of installation or modification. This deadline may be extended by up to 12 months if application is made to the Director within a reasonable time before the termination date and the party shows good cause for any such extension.

**9. Construction of New Sources(s)**

The proposed emissions unit(s) shall be constructed in strict accordance with the plans and application submitted for this permit to the Director of the Ohio Environmental Protection Agency. There may be no deviation from the approved plans without the express, written approval of the Agency. Any deviations from the approved plans or the above conditions may lead to such sanctions

**MGQ Aggregates, Inc.**

**Facility ID: 0374950001**

**PTI Application: 03-16112**

**Issued: To be entered upon final issuance**

and penalties as provided under Ohio law. Approval of these plans does not constitute an assurance that the proposed facilities will operate in compliance with all Ohio laws and regulations. Additional facilities shall be installed upon orders of the Ohio Environmental Protection Agency if the proposed sources cannot meet the requirements of this permit or cannot meet applicable standards.

If the construction of the proposed emissions unit(s) has already begun or has been completed prior to the date the Director of the Environmental Protection Agency approves the permit application and plans, the approval does not constitute expressed or implied assurance that the proposed facility has been constructed in accordance with the approved plans. The action of beginning and/or completing construction prior to obtaining the Director's approval constitutes a violation of OAC rule 3745-31-02. Furthermore, issuance of the Permit to Install does not constitute an assurance that the proposed source will operate in compliance with all Ohio laws and regulations. Approval of the plans in any case is not to be construed as an approval of the facility as constructed and/or completed. Moreover, issuance of the Permit to Install is not to be construed as a waiver of any rights that the Ohio Environmental Protection Agency (or other persons) may have against the applicant for starting construction prior to the effective date of the permit. Additional facilities shall be installed upon orders of the Ohio Environmental Protection Agency if the proposed facilities cannot meet the requirements of this permit or cannot meet applicable standards.

**10. Public Disclosure**

The facility is hereby notified that this permit, and all agency records concerning the operation of this permitted source, are subject to public disclosure in accordance with OAC rule 3745-49-03.

**11. Applicability**

This Permit To Install is applicable only to the emissions unit(s) identified in the Permit To Install. Separate Permit To Install for the installation or modification of any other emissions unit(s) are required for any emissions unit for which a Permit To Install is required.

**12. Best Available Technology**

As specified in OAC Rule 3745-31-05, all new sources must employ Best Available Technology (BAT). Compliance with the terms and conditions of this permit will fulfill this requirement.

**13. Source Operation and Operating Permit Requirements After Completion of Construction**

This facility is permitted to operate each source described by this Permit to Install for a period of up to one year from the date the source commenced operation. This permission to operate is

**MGQ Aggregates, Inc.**

**Facility ID: 0374950001**

**PTI Application: 03-16112**

**Issued: To be entered upon final issuance**

granted only if the facility complies with all requirements contained in this permit and all applicable air pollution laws, regulations, and policies. Pursuant to OAC Chapter 3745-35, the permittee shall submit a complete operating permit application within ninety (90) days after commencing operation of the emissions unit(s) covered by this permit.

**14. Construction Compliance Certification**

The applicant shall provide Ohio EPA with a written certification (see enclosed form) that the facility has been constructed in accordance with the Permit to Install application and the terms and conditions of the Permit to Install. The certification shall be provided to Ohio EPA upon completion of construction but prior to startup of the source.

**15. Fees**

The permittee shall pay fees to the Director of the Ohio EPA in accordance with ORC section 3745.11 and OAC Chapter 3745-78. The permittee shall pay all applicable Permit to Install fees within 30 days after the issuance of this Permit to Install.

**B. Permit to Install Summary of Allowable Emissions**

The following information summarizes the total allowable emissions, by pollutant, based on the individual allowable emissions of each air contaminant source identified in this permit.

SUMMARY (for informational purposes only)  
TOTAL PERMIT TO INSTALL ALLOWABLE EMISSIONS

<u>Pollutant</u>	<u>Tons Per Year</u>
PE (fug)	34.99
PE	1.91
NOx	47.73
SO2	5.19
VOC	2.65
CO	11.44

**PART II - SPECIAL TERMS AND CONDITIONS FOR SPECIFIC EMISSIONS UNIT(S)**

**A. Applicable Emissions Limitations and/or Control Requirements**

1. The specific operations(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
F001 - unpaved roadways and parking areas	OAC rule 3745-31-05 (A)(3)	12.80 tons fugitive particulate emissions (PE)/year  There shall be no visible PE from any unpaved roadway and parking area except for a period of time not to exceed three minutes during any 60-minute observation period.  best available control measures that are sufficient to minimize or eliminate visible emissions of fugitive dust (See A.2.b through A.2.g.)
	OAC rule 3745-17-07 (B)	See A.2.h.
	OAC rule 3745-17-08 (B)	See A.2.h.

**2. Additional Terms and Conditions**

- 2.a The unpaved roadways and parking areas that are covered by this permit and subject to the above-mentioned requirements are listed below:

All Unpaved Roadways and Parking Areas

- 2.b The permittee shall employ best available control measures on all unpaved roadways and parking areas for the purpose of ensuring compliance with the above-mentioned applicable requirements. In accordance with the permittee's permit application, the permittee has

Emissions Unit ID: **F001**

committed to treat the unpaved roadways and parking areas with speed reduction, good housekeeping practices, watering, resurfacing, and/or chemical stabilization, at sufficient treatment frequencies to ensure compliance. Nothing in this paragraph shall prohibit the permittee from employing other control measures to ensure compliance.

- 2.c** The needed frequencies of implementation of the control measures shall be determined by the permittee's inspections pursuant to the monitoring section of this permit. Implementation of the control measures shall not be necessary for an unpaved roadway or parking area that is covered with snow and/or ice or if precipitation has occurred that is sufficient for that day to ensure compliance with the above-mentioned applicable requirements. Implementation of any control measure may be suspended if unsafe or hazardous driving conditions would be created by its use.
- 2.d** Any unpaved roadway or parking area, which during the term of this permit is paved or takes the characteristics of a paved surface due to the application of certain types of dust suppressants, may be controlled using appropriate dust control measures for paved surfaces. Any unpaved roadway or parking area that takes the characteristics of a paved roadway or parking area due to the application of certain types of dust suppressants shall remain subject to the visible emission limitation for unpaved roadways and parking areas. Any unpaved roadway or parking area that is paved shall be subject to a visible emission limitation of no visible particulate emissions except for one minute during any 60-minute period.
- 2.e** The permittee shall promptly remove, in such a manner as to minimize or prevent resuspension, earth and/or other material from paved streets onto which such material has been deposited by trucking or earth moving equipment or erosion by water or other means.
- 2.f** Open-bodied vehicles transporting materials likely to become airborne shall have such materials covered at all times if the control measure is necessary for the materials being transported.
- 2.g** Implementation of the above-mentioned control measures in accordance with the terms and conditions of this permit is appropriate and sufficient to satisfy the best available technology requirements of OAC rule 3745-31-05.
- 2.h** The unpaved roadways are associated with the portable crushing system permitted under facility ID 0374950001, F003. The emission limitation of 12.80 tons fugitive PE/year represents the maximum emissions which will be emitted from the unpaved roadways for any proposed site for relocation of the portable crushing system.

**Issued: To be entered upon final issuance**

The roadways are associated with a portable source and are applicable to the requirements of OAC rule 3745-17-07 (B) and 3745-17-08 (B) when located in an "Appendix A" area as identified in OAC rule 3745-17-08. The emission limitations and control requirements established by OAC rule 3745-17-07 (B) and OAC rule 3745-17-08 (B) are less stringent than the requirements established pursuant to OAC rule 3745-31-05 (A)(3).

**B. Operational Restrictions**

None

**C. Monitoring and/or Recordkeeping Requirements**

1. Except as otherwise provided in this section, the permittee shall perform inspections of the unpaved roadways and parking areas in accordance with the following frequencies:

Unpaved Roadways and Parking Areas  
All

Minimum Inspection Frequency  
Once during each day of operation

2. The purpose of the inspections is to determine the need for implementing the above-mentioned control measures. The inspections shall be performed during representative, normal traffic conditions. No inspection shall be necessary for a roadway that is covered with snow and/or ice or if precipitation has occurred that is sufficient for that day to ensure compliance with the above-mentioned applicable requirements. Any required inspection that is not performed due to any of the above-identified events shall be performed as soon as such event(s) has (have) ended, except if the next required inspection is within one week.
3. The permittee may, upon receipt of written approval from the appropriate Ohio EPA District Office or local air agency, modify the above-mentioned inspection frequencies if operating experience indicates that less frequent inspections would be sufficient to ensure compliance with the above-mentioned applicable requirements.
4. The permittee shall maintain records of the following information:
  - a. the date and reason any required inspection was not performed, including those inspections that were not performed due to snow and/or ice cover or precipitation;
  - b. the date of each inspection where it was determined by the permittee that it was necessary to implement the control measures;
  - c. the dates the control measures were implemented; and

- d. on a calendar quarter basis, the total number of days the control measures were implemented and the total number of days where snow and/or ice cover or precipitation were sufficient to not require the control measures.

The information required in 4.d shall be updated on a calendar quarter basis within 30 days after the end of each calendar quarter.

**D. Reporting Requirements**

1. The permittee shall submit deviation reports, in accordance with the General Terms and Conditions of this permit, that identify any of the following occurrences:

MGQ

PTI A

Emissions Unit ID: F001

Issued: To be entered upon final issuance

- a. each day during which an inspection was not performed by the required frequency, excluding an inspection which was not performed due to an exemption for snow and/or ice cover or precipitation; and
- b. each instance when a control measure, that was to be implemented as a result of an inspection, was not implemented.

## E. Testing Requirements

1. Compliance with the emission limitations specified in Section A.1. of the terms and conditions of this permit shall be determined in accordance with the following methods:

- a. Emission Limitation:  
12.80 tons fugitive PE/year

Applicable Compliance Method:

The annual limitation was developed by summing the total emissions from the unpaved parking areas and roadways, and then dividing by 2000 lbs/ton.

The emission rate was determined as follows:

- i. for unpaved roadways, multiply the appropriate emission factor from AP-42 of 4.19 lbs PE/vehicle mile traveled (VMT) (Chapter 13.2.2.2 - 12/03) by the maximum VMT of 61,058 miles/year, and a control factor of  $(1 - 0.9)^*$ ; and
- ii. for unpaved parking areas, multiply the appropriate emission factor from AP-42 of 1.84 lbs PE/VMT (Chapter 13.2.2.2 - 12/03) by the maximum VMT of 150 miles/year, and a control factor of  $(1 - 0.9)^*$ .

\*The control efficiency for dust suppression is assumed to be 90%.

Provided compliance is shown with the requirements of this permit to apply best available control measures, compliance with the annual PE limitation will be assumed.

- b. Emission Limitation:  
There shall be no visible PE from any unpaved roadway or parking area except for a period of time not to exceed three minutes during any 60-minute observation period.

Applicable Compliance Method:

**MGQ**

**PTI A**

Emissions Unit ID: **F001**

**Issued: To be entered upon final issuance**

Compliance with the visible emission limitation specified above shall be determined in accordance with Test Method 22 as set forth in "Appendix on Test Methods" in 40 CFR, Part 60 ("Standards of Performance for New Stationary Sources"), as such Appendix existed on July 1, 1996, and the modifications listed in paragraphs (B)(4)(a) through (B)(4)(c) of OAC rule 3745-17-03.

**F. Miscellaneous Requirements**

None

**PART II - SPECIAL TERMS AND CONDITIONS FOR SPECIFIC EMISSIONS UNIT(S)**

**A. Applicable Emissions Limitations and/or Control Requirements**

- The specific operations(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/Requirements</u>	OAC rule 3745-17-08 (B)
F002 - material storage piles	OAC rule 3745-31-05 (A)(3)

best available control measures that are sufficient to minimize or eliminate visible emissions of fugitive dust (See A.2.d through A.2.f.)

See A.2.g.

See A.2.g.

Issued: To be entered upon final issuance

**2. Additional Terms and Conditions**

- 2.a** The storage piles that are covered by this permit and subject to the requirements of OAC rule 3745-31-05 are all the aggregate piles of crushed limestone (various gradations) located at the facility.
- 2.b** The permittee shall employ best available control measures on all load-in and load-out operations associated with the storage piles for the purpose of ensuring compliance with the above-mentioned applicable requirements. In accordance with the permittee's permit application, the permittee maintains that the inherent moisture content and low silt content of the materials processed/handled is at a level which is more than sufficient to comply with all applicable requirements. If at any time the moisture content and/or low silt content is not sufficient to meet the above applicable requirements, the permittee has committed to watering, as needed. In addition, the permittee has committed to reduce drop heights and to maintain as low of a pile height as possible to ensure compliance. Nothing in this paragraph shall prohibit the permittee from employing other control measures to ensure compliance.
- 2.c** The above-mentioned control measures shall be employed for each load-in and load-out operation of each storage pile if the permittee determines, as a result of the inspection conducted pursuant to the monitoring section of this permit, that the control measures are necessary to ensure compliance with the above-mentioned applicable requirements. Any required implementation of the control measures shall continue during any such operation until further observation confirms that use of the measures is unnecessary.
- 2.d** The permittee shall employ best available control measures for wind erosion from the surfaces of all storage piles for the purpose of ensuring compliance with the above-mentioned applicable requirements. In accordance with the permittee's permit application, the permittee maintains that the inherent moisture content and low silt content of the materials processed/handled is at a level which is more than sufficient to comply with all applicable requirements. If at any time the moisture content and/or low silt content is not sufficient to meet the above applicable requirements, the permittee has committed to watering, as needed. In addition, the permittee has committed to reduce drop heights and to maintain as low of a pile height as possible to ensure compliance. Nothing in this paragraph shall prohibit the permittee from employing other control measures to ensure compliance.
- 2.e** The above-mentioned control measures shall be employed for wind erosion from each pile if the permittee determines, as a result of the inspection conducted pursuant to the monitoring section of this permit, that the control measures are necessary to ensure

**MGQ Aggregates, Inc.**  
**PTI A**  
**Issued**

**Facility ID: 0374950001**

Emissions Unit ID: **F002**

compliance with the above-mentioned applicable requirements. Implementation of the control measures shall not be necessary for a storage pile that is covered with snow and/or ice or if precipitation has occurred that is sufficient for that day to ensure compliance with the above-mentioned applicable requirements.

**Issued: To be entered upon final issuance**

- 2.f Implementation of the above-mentioned control measures in accordance with the terms and conditions of this permit is appropriate and sufficient to satisfy the requirements of OAC rule 3745-31-05.
  
- 2.g The storage piles are associated with the portable crushing system permitted under facility ID 0374950001, F003. The emission limitation of 2.12 tons fugitive PE/yr represents the maximum emissions which will be emitted from the storage piles for any proposed site for relocation of the portable crushing system.

The storage piles are associated with a portable source and are applicable to the requirements of OAC rule 3745-17-07 (B) and 3745-17-08 (B) when located in an "Appendix A" area as identified in OAC rule 3745-17-08. The emission limitations and control requirements established by OAC rule 3745-17-07 (B) and OAC rule 3745-17-08(B) are less stringent than the requirements established pursuant to OAC rule 3745-31-05 (A)(3).

**B. Operational Restrictions**

None

**C. Monitoring and/or Recordkeeping Requirements**

- 1. Except as otherwise provided in this section, the permittee shall perform inspections of each load-in operation at each storage pile in accordance with the following frequencies:

Storage Pile Identification  
All Storage Piles

Minimum Load-In Inspection Frequency  
Once during each day of operation

- 2. Except as otherwise provided in this section, the permittee shall perform inspections of each load-out operation at each storage pile in accordance with the following frequencies:

Storage Pile identification  
All Storage Piles

Minimum Load-Out Inspection Frequency  
Once during each day of operation

- 3. Except as otherwise provided in this section, the permittee shall perform inspections of the wind erosion from pile surfaces associated with each storage pile in accordance with the following frequencies:

Issued: To be entered upon final issuance

Storage Pile Identification

All Storage Piles

Minimum Wind Erosion Inspection Frequency

Once during each day of operation

4. No inspection shall be necessary for wind erosion from the surface of a storage pile when the pile is covered with snow and/or ice and for any storage pile activity if precipitation has occurred that is sufficient for that day to ensure compliance with the above-mentioned applicable requirements. Any required inspection that is not performed due to any of the above identified events shall be performed as soon as such event(s) has (have) ended, except if the next required inspection is within one week.
5. The purpose of the inspections is to determine the need for implementing the control measures specified in this permit for load-in and load-out of a storage pile, and wind erosion from the surface of a storage pile. The inspections shall be performed during representative, normal storage pile operating conditions.
6. The permittee may, upon receipt of written approval from the appropriate Ohio EPA District Office or local air agency, modify the above-mentioned inspection frequencies if operating experience indicates that less frequent inspections would be sufficient to ensure compliance with the above-mentioned applicable requirements.
7. The permittee shall maintain records of the following information:
  - a. the date and reason any required inspection was not performed, including those inspections that were not performed due to snow and/or ice cover or precipitation;
  - b. the date of each inspection where it was determined by the permittee that it was necessary to implement the control measures;
  - c. the dates the control measures were implemented; and
  - d. on a calendar quarter basis, the total number of days the control measures were implemented and, for wind erosion from pile surfaces, the total number of days where snow and/or ice cover or precipitation were sufficient to not require the control measure(s).

The information required in 7.d. shall be kept separately for (i) the load-in operations, (ii) the load-out operations, and (iii) the pile surfaces (wind erosion), and shall be updated on

a calendar quarter basis within 30 days after the end of each calendar quarter.

#### D. Reporting Requirements

1. The permittee shall submit deviation reports, in accordance with the General Terms and Conditions of this permit, that identify any of the following occurrences:
  - a. each day during which an inspection was not performed by the required frequency, excluding an inspection which was not performed due to an exemption for snow and/or ice cover or precipitation; and
  - b. each instance when a control measure, that was to be implemented as a result of an inspection, was not implemented.

#### E. Testing Requirements

1. Compliance with the emission limitations specified in Section A.1 of the terms and conditions of this permit shall be determined in accordance with the following methods:
  - a. Emission Limitation:  
2.12 tons fugitive PE/year

Applicable Compliance Method:

The annual limitation was developed by summing the total emissions from the load-in operations, load-out operations, and wind erosion, and then dividing by 2000 lbs/ton.

The emission rate was determined as follows:

- i. for load-in operations, multiply the emission factor developed from AP-42 of 0.002 lb PE/ton stone processed (Chapter 13.2.4 - 1/95) by the maximum, annual load-in rate of 1,500,000 tons, and then multiply by a control factor of  $(1 - 0.9)^*$ ;
- ii. for load-out operations, multiply the emission factor developed from AP-42 of 0.002 lb PE/ton stone processed (Chapter 13.2.4 - 1/95) by the maximum, annual load-out rate of 1,500,000 tons, and then multiply by a control factor of  $(1 - 0.9)^*$ ; and
- iii. for wind erosion, multiply the emissions factor developed from USEPA's Control of Open Fugitive Dust Sources (9/98) of 9.07 lbs PE/day/acre by 365 days/year, and a maximum surface area of 11 acres, and then multiply by a control factor of  $(1 - 0.9)^*$ .

**MGQ**

**PTI A**

Emissions Unit ID: **F002**

**Issued: To be entered upon final issuance**

Provided compliance is shown with the requirements of this permit to apply best available control measures, compliance with the annual PE limitation will be assumed.

- b. Emission Limitation:  
There shall be no visible PE, except for a period of time not to exceed one minute during any 60-minute observation period, from the load-in and load-out operations of the storage piles

Applicable Compliance Method:

Compliance with the visible emission limitations for the storage piles identified above shall be determined in accordance with Test Method 22 as set forth in "Appendix on Test Methods" in 40 CFR, Part 60 ("Standards of Performance for New Stationary Sources"), as such Appendix existed on July 1, 1996, and the modifications listed in paragraphs (B)(4)(a) through (B)(4)(c) of OAC rule 3745-17-03.

- c. Emission Limitation:  
There shall be no visible PE, except for a period of time not to exceed one minute during any 60-minute observation period, from wind erosion of the storage piles.

Applicable Compliance Method:

Compliance with the visible emission limitation for the storage piles identified above shall be determined in accordance with Test Method 22 as set forth in "Appendix on Test Methods" in 40 CFR, Part 60 ("Standards of Performance for New Stationary Sources"), as such Appendix existed on July 1, 1996, and the modifications listed in paragraphs (B)(4)(a) through (B)(4)(c) of OAC rule 3745-17-03.

**F. Miscellaneous Requirements**

None

**PART II - SPECIAL TERMS AND CONDITIONS FOR SPECIFIC EMISSIONS UNIT(S)**

**A. Applicable Emissions Limitations and/or Control Requirements**

1. The specific operations(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
F003 - portable aggregate processing plant with loading, crushing, screening, and conveying	OAC rule 3745-31-05 (A)(3)	20.07 tons fugitive particulate emissions (PE)/year  visible PE restrictions (See A.2.f.)  best available control measures that are sufficient to minimize or eliminate visible emissions of fugitive dust (See A.2.a through A.2.c.)
	OAC rule 3745-17-07 (B)	See A.2.d.
	OAC rule 3745-17-08 (B)	See A.2.e.
	40 CFR, Part 60, Subpart OOO	visible PE restrictions (See A.2.f.)

**2. Additional Terms and Conditions**

- 2.a The permittee shall employ best available control measures for the material processing/handling operations identified below, for the purpose of ensuring compliance with the above mentioned applicable requirements. In accordance with the permit application, the permittee maintains that the inherent moisture content of the materials processed/handled is at a level which is more than sufficient to comply with all applicable requirements. If at anytime the moisture content is not sufficient to meet the above applicable requirements, the permittee shall employ best available control measures to ensure compliance.

**MGQ Aggregates, Inc.**  
**PTI A**  
**Issued**

**Facility ID: 0374950001**

**Emissions Unit ID: F003**

**Issued: To be entered upon final issuance**

<u>material handling operation</u>	<u>control measure(s)</u>
loading	reduced drop height
crushing and screening	water application, if needed
transfer/conveying	water application, if needed

Nothing in this paragraph shall prohibit the permittee from employing other control measures to ensure compliance.

- 2.b** For each material handling operation that is not adequately enclosed, the above-identified control measures shall be implemented if the permittee determines, as a result of the inspection conducted pursuant to the monitoring section of this permit, that the control measures are necessary to ensure compliance with the above-mentioned applicable requirements. Any required implementation of the control measures shall continue during the operation of the material handling operations until further observation confirms that use of the control measures is unnecessary.
- 2.c** Implementation of the above-mentioned control measures in accordance with the terms and conditions of this permit is appropriate and sufficient to satisfy the requirements of OAC rule 3745-31-05.
- 2.d** The requirements of this rule also include compliance with OAC rule 3745-17-07 (B), OAC rule 3745-17-08 (B) and CFR 40 Part 60, Subpart OOO.
- 2.e** This emissions unit is a portable source and is applicable to the requirements of OAC rule 3745-17-07 (B) and 3745-17-08 (B) when located in an "Appendix A" area as identified in OAC rule 3745-17-08. The emission limitations and control requirements established by OAC rule 3745-17-07 (B) and 3745-17-08 (B) are equivalent to or less stringent than the requirements established pursuant to OAC rule 3745-31-05 and NSPS Subpart OOO.

When the emissions unit is not located within an "Appendix A" area as identified in OAC rule 3745-17-08, this emission unit is exempt from the requirements of OAC rule 3745-17-08 (B) pursuant to OAC rule 3745-17-08 (A) and is exempt from the visible particulate emission limitations specified in OAC rule 3745-17-07 (B)(1) pursuant to OAC rule 3745-17-07 (B)(11)(e).

- 2.f** Visible emissions from the material processing equipment shall not exceed the following opacity restrictions:

MGQ

PTI A

Emissions Unit ID: F003

2.g The application and enforcement of the provisions of NSPS, as promulgated by the United

Emissions Unit ID: F003

States Environmental Protection Agency, 40 CFR Part 60, are delegated to the Ohio Environmental Protection Agency. The requirements for 40 CFR Part 60 are also federally enforceable.

**B. Operational Restrictions**

None

**C. Monitoring and/or Recordkeeping Requirements**

1. Except as otherwise provided in this section, for material handling operations that are not adequately enclosed, the permittee shall perform inspections of such operations in accordance with the following minimum frequencies:

<u>Material Handling Operations</u>	<u>Minimum Inspection Frequency</u>
All	Once During Each Day of Operation

2. The above-mentioned inspections shall be performed during representative, normal operating conditions.
3. The permittee may, upon receipt of written approval from the appropriate Ohio EPA District Office or local air agency, modify the above-mentioned inspection frequencies if operating experience indicates that less frequent inspections would be sufficient to ensure compliance with the above-mentioned applicable requirements.
4. The permittee shall maintain records of the following information:
  - a. the date and reason any required inspection was not performed;
  - b. the date of each inspection where it was determined by the permittee that it was necessary to implement the control measure(s);
  - c. the dates the control measure(s) was (were) implemented; and
  - d. on a calendar quarter basis, the total number of days the control measure(s) was (were) implemented.

The information in 4.d shall be kept separately for each material handling operation identified above, and shall be updated on a calendar quarter basis within 30 days after the end of each calendar quarter.

**MGQ**

**PTI A**

Emissions Unit ID: **F003**

**Issued: To be entered upon final issuance**

**D. Reporting Requirements**

1. The permittee shall submit deviation reports, in accordance with the General Terms and Conditions of this permit, that identify any of the following occurrences:
  - a. each day during which an inspection was not performed by the required frequency; and
  - b. each instance when a control measure, that was to be performed as a result of an inspection, was not implemented.
2. The permittee shall submit written reports of the results of all performance tests conducted to demonstrate compliance with the standards set forth in 40 CFR, Part 60, Subpart OOO, including the reports of opacity observations using Method 9 to demonstrate compliance with this subpart.
3. The permittee shall submit the following information for each piece of equipment that is replaced by a piece of equipment having the same function as the existing facility:
  - a. for a crusher, grinding mill, bucket elevator, bagging operations, or enclosed truck or railcar loading station:
    - i. the rated capacity, in tons per hour, of the existing facility being replaced, and
    - ii. the rated capacity, in tons per hour, of the replacement equipment;
  - b. for a conveyor belt:
    - i. the width of the existing belt being replaced, and
    - ii. the width of the replacement conveyor belt; and

The notification shall be submitted within 30 days after the equipment replacement.

4. Pursuant to the general provisions of NSPS, the source owner/operator is hereby advised of the requirement to report the following at the appropriate times for this emissions unit:
  - a. construction date (no later than 30 days after such date);
  - b. actual start-up date (within 15 days after such date); and
  - c. date of performance testing (if required, at least 30 days prior to testing).

Reports are to be sent to:

Ohio Environmental Protection Agency  
DAPC - Permit Management Unit  
Lazarus Government Center  
P.O. Box 1049  
Columbus, OH 43216-1049

and Ohio EPA, Northwest District Office  
347 North Dunbridge Road  
Bowling Green, OH 43402

5. The permittee shall submit annual reports that identify the amount of material processed through the feeder of this emissions unit, in tons per year. These reports shall be submitted by January 31 of each year and shall cover the previous calendar year.

#### **E. Testing Requirements**

1. The permittee shall conduct, or have conducted, emission testing for all transfer points, screens, and crushers of emissions unit F003.
2. Testing shall be conducted in accordance with the provisions of 40 CFR Part 60, Subpart A, Section 60.8 and 40 CFR Part 60, Subpart OOO, Section 60.675.
3. The emission testing shall be conducted within 60 days after achieving the maximum production rate at which the affected facility will be operated, by not later than 180 days after initial startup of such facility and at such other times as may be required by the Ohio Environmental Protection Agency, Division of Air Pollution Control. The emission testing shall be conducted to demonstrate compliance with the allowable visible emission rates for particulate emissions. (This emissions unit has already been installed and is currently operational. Therefore, the permittee shall conduct emission testing within 90 days after the final issuance of this permit.)
4. The following test methods shall be employed to demonstrate compliance with the allowable

**Issued: To be entered upon final issuance**

visible emissions rates:

- a. Method 9 of 40 CFR Part 60, Appendix A shall be used to determine opacity.
5. The tests shall be conducted while the emissions unit is operating at its maximum capacity, unless otherwise specified or approved by the Ohio EPA, Division of Air Pollution Control. Not later than 30 days prior to the proposed test date(s), the permittee shall submit an "Intent to Test" notification to the Ohio EPA, Division of Air Pollution Control. The "Intent to Test" notification shall describe in detail the proposed test methods and procedures, the emissions unit operation parameters, the times and dates of the tests, and the person(s) who will be conducting the tests. Failure to submit such notification for review and approval prior to the tests may result in the Ohio EPA District Office's air agency's refusal to accept the results of the emission tests.
6. Personnel from the Ohio EPA District Office's air agency shall be permitted to witness the test, examine the testing equipment, and acquire data and information necessary to ensure that the operation of the emissions unit and the testing procedures provide a valid characterization of the emissions unit and /or the performance of the control equipment. A comprehensive written report on the emissions tests shall be signed by the person or persons responsible for the tests and submitted to the Ohio EPA Division of Air Pollution Control within 30 days following completion of the tests.
7. Compliance with the emissions limitations specified in Section A.1 of these terms and conditions shall be determined in accordance with the following methods:

- a. Emission Limitation:  
20.07 tons fugitive PE/year

Applicable Compliance Method:

The annual PE limitation was established by multiplying the sum of fugitive PE from the crushing, screening, and transfer operations associated with this emissions unit by the maximum hourly operating rate of 8760 hrs/year, and then dividing by 2000 lbs/ton.

The emission rate was determined as follows:

- i. for each crusher (3), multiply the appropriate emission factor from AP-42 of 0.0012 lb PE/ton processed (Chapter 11.19.2 - 1/95) by the maximum hourly throughput of the crusher;
- ii. for each screen (3), multiply the appropriate emission factor from AP-42 of 0.0018 lb PE/ton processed (Chapter 11.19.2 - 1/95) by the maximum hourly throughput

of the screen; and

- iii. for each transfer point (25), multiply the appropriate emission factor from AP-42 of 0.00001 lb PE/ton processed (Chapter 11.19.2 - 1/95) by the maximum hourly throughput of the transfer point.

Provided compliance is shown with the requirements of this permit to apply best available control measures, compliance with the annual PE limitation will be assumed.

- b. Emission Limitation:  
Visible PE shall not exceed 20% opacity, as a 3-minute average during loading operations of the feeder.

Applicable Compliance Method:

If required, compliance shall be demonstrated using Test Method 9 as set forth in "Appendix on Test Methods" in 40 CFR, Part 60 (Standards of Performance for New Stationary Sources") as such Appendix existed on July 1, 2002, and the modifications listed in paragraphs (B)(3)(a) and (B)(3)(b) of OAC rule 3745-17-03.

- c. Emission Limitation:  
The permittee shall not cause to be discharged into the atmosphere from any crusher, at which a capture system is not used, fugitive emissions which exhibit greater than 15% opacity.

Applicable Compliance Method:

Compliance shall be demonstrated using Method 9 of 40 CFR, Part 60, Appendix A, and the procedures in 40 CFR, Part 60, Subpart OOO as specified in Sections E.1 through E.6 above.

- d. Emission Limitation:  
The permittee shall not cause to be discharged into the atmosphere from any transfer point or screen any fugitive emissions which exhibit greater than 10% opacity.

Applicable Compliance Method:

Compliance shall be demonstrated using Method 9 of 40 CFR, Part 60, Appendix A, and the procedures in 40 CFR, Part 60, Subpart OOO as specified in Sections E.1 through E.6 above.

## F. Miscellaneous Requirements

1. Pursuant to Ohio Administrative Code (OAC) rule 3745-31-03 (A)(1)(p)(i), the permittee of a

**MGQ**

**PTI A**

Emissions Unit ID: **F003**

**Issued: To be entered upon final issuance**

portable or mobile emissions unit may relocate within the State of Ohio without first obtaining a PTI providing the following criteria are met:

- a. the portable emissions unit is equipped with the best available control technology for such portable emissions unit;
- b. the portable emissions unit is operating pursuant to a currently effective permit to install, permit to operate or registration;
- c. the applicant has provided proper notice of intent to relocate the portable emissions unit to the Northwest District Office (NWDO) and the appropriate field office having jurisdiction over the new site within a minimum of thirty days prior to the scheduled relocation; and,

**MGQ**

**PTI A**

Emissions Unit ID: **F003**

**Issued: To be entered upon final issuance**

- d. in the NWDO's and the appropriate field office's judgement, the proposed site is acceptable under the rule 3745-15-07 of the Administrative Code.
2. In the alternative, pursuant to OAC rule 3745-31-03 (A)(1)(p)(ii), the permittee of a portable or mobile emissions unit may relocate within the State of Ohio without first obtaining a PTI providing the following criteria of OAC rule 3745-31-05 (F) are met:
    - a. the portable emissions unit permittee possesses an Ohio EPA PTI, PTO or registration status;
    - b. the portable emissions unit is equipped with best available technology;
    - c. the portable emissions unit owner has identified the proposed site to Ohio EPA;
    - d. Ohio EPA has determined that the portable emissions unit, at the proposed site, will have an acceptable environmental impact;
    - e. a public notice, consistent with Chapter 3745-47 of the Administrative Code, is published in the county where the proposed site is located;
    - f. the owner of the proposed site has provided the portable emissions unit owner with approval or equivalent declaration that it is acceptable to the site owner to move the portable emissions unit to the proposed site; and,
    - g. the portable emissions unit owner has provided the Ohio EPA with fifteen days written notice of the relocation.

Any site approvals issued by the Ohio EPA, pursuant to Section F.2. above, shall be valid for no longer than three years and are subject to renewal.

3. In order for the NWDO and the appropriate field office having jurisdiction over the new site to determine compliance with all of the above criteria, the owner or operator of the portable or mobile emissions unit must file a "Notice of Intent to Relocate", within the specified time frame (30 or 15 days) prior to the relocation of the emissions unit with the NWDO (347 North Dunbridge Road, Bowling Green, OH 43402) and the appropriate office having jurisdiction over the new site. Upon receipt of the notice, the NWDO and/or the appropriate field office having jurisdiction over the new site, will evaluate the request in accordance with the above criteria. The "Notice of Intent to Relocate" shall also include any other associated emission units, such as storage piles, roadways, and the engine.

See A.2.e.	

MGQ

PTI A

Emissions Unit ID: **P001**

**Issued: To be entered upon final issuance**

**2. Additional Terms and Conditions**

- 2.a** The requirements of this rule also include compliance with the requirements of OAC rule 3745-31-05 (C) and OAC rule 3745-17-11 (B)(5)(a).
- 2.b** The emissions of NO<sub>x</sub> from this emissions unit shall not exceed 22.50 tons per rolling 12-month period based on a fuel usage restriction (see Section B.2). The 22.50 tons NO<sub>x</sub> per year is a federally enforceable limitation established for purposes of limiting the potential to emit to avoid Title V applicability.
- 2.c** The emission limitation specified by this rule is less stringent than the emission limitation established pursuant to OAC rule 3745-31-05 (A)(3).
- 2.d** This emissions unit is exempt from the requirements of OAC rule 3745-18-06 pursuant to OAC rule 3745-18-06 (B).
- 2.e** The permittee has satisfied the "latest available control techniques and operating practices" required pursuant to OAC rule 3745-23-06 (B) and OAC rule 3745-21-07 (B) and the "best available control techniques and operating practices" required pursuant to OAC rule 3745-21-08 (B) by committing to comply with the best available technology requirements established pursuant to OAC rule 3745-31-05 (A)(3) in this permit to install.

On November 5, 2002, OAC rule 3745-21-08 was revised to delete paragraph (B); therefore, paragraph (B) is no longer part of the State regulations. However, that rule revision has not yet been submitted to the U.S. EPA as a revision to Ohio's State Implementation Plan (SIP). Therefore, until the SIP revision occurs and the U.S. EPA approves the revisions to OAC rule 3745-21-08, the requirement to satisfy the "best available control techniques and operating practices" still exists as part of the federally-approved SIP for Ohio.

**B. Operational Restrictions**

- 1. The permittee shall combust only distillate fuel oil in this emissions unit.

The oil combusted in this emissions unit shall only be distillate oil (fuel oil numbers 1 or 2, as defined by the American Society for Testing and Materials in ASTM D396-78, 89, 90, 92, 96, or 98, "Standard Specification for Fuel Oils"). The sulfur content of the distillate oil shall contain no more than 0.5 weight percent sulfur.

Emissions Unit ID: P001

2. The maximum annual fuel usage for emissions unit P001 shall not exceed 100,450 gallons, based upon a rolling, 12-month summation of the gallon usage. To ensure enforceability during the first 12 calendar months of operation following the issuance of this permit, the permittee shall not exceed the levels specified in the following table:

<u>Month(s)</u>	<u>Maximum Allowable Fuel Usage</u>
1	8,371
1-2	16,742
1-3	25,113
1-4	33,484
1-5	41,855
1-6	50,226
1-7	58,597
1-8	66,968
1-9	75,339
1-10	83,710
1-11	92,081
1-12	100,450

After the first 12 calendar months of operation following the issuance of this permit, compliance with the annual fuel usage limitation shall be based upon a rolling 12-month summation of fuel usage.

**C. Monitoring and/or Recordkeeping Requirements**

1. For each day during which the permittee burns a fuel other than distillate oil the permittee shall maintain a record of the type and quantity of fuel burned in this emissions unit.
2. The permittee shall use records of fuel supplier certification to demonstrate compliance with the operational restriction specified in Section B.1. Records of fuel supplier certification shall include the following information:
  - i. the name of the oil supplier; and
  - ii. a statement from the oil supplier that the oil complies with the specifications under the definition of distillate oil in B.1 above.

**Issued: To be entered upon final issuance**

3. The permittee shall maintain monthly records of the following information for this emissions unit:
  - a. fuel usage each month, in gallons;
  - b. during the first 12 calendar months of operation, the cumulative fuel usage, in gallons;
  - c. beginning the first month after the first 12 calendar months of operation, the rolling, 12-month summation of the fuel usage, in gallons;
  - d. the calculated monthly emission rate for NO<sub>x</sub> using the following equation:  
$$\text{NO}_x \text{ emissions in tons} = (\text{fuel usage}) \times (\text{emission factor from AP-42, Chapter 3.4, Table 3.4-1}) \times (\text{heat content of fuel used}) (1 \text{ ton}/2000 \text{ lbs}) = (\text{C.3.a}) \times (3.2 \text{ lbs NO}_x/\text{mmBtu}) \times (0.140 \text{ mmBtu}/\text{gal}) \times (1 \text{ ton}/2000 \text{ lbs}); \text{ and}$$
  - e. beginning the first month after the 12 calendar months of operation, the rolling, 12-month summation of the emission rate for NO<sub>x</sub>, in tons.

**D. Reporting Requirements**

1. The permittee shall submit deviation (excursion) reports, in accordance with the General Terms and Conditions of this permit, which identify the following exceedances:
  - a. the rolling, 12-month gallon fuel usage limitation;
  - b. the rolling, 12-month NO<sub>x</sub> emissions;
  - c. for the first 12 calendar months of operation following the issuance of this permit, all exceedances of the maximum allowable cumulative gallons of fuel; and
  - d. sulfur content fuel restriction specified in Section B.1.
2. The permittee shall submit deviation (excursion) reports that identify each day when a fuel other than distillate oil was burned in this emissions unit. Each report shall be submitted within 30 days after the deviation occurs.

**E. Testing Requirements**

1. Compliance with the emission limitations specified in Section A.1 of this permit shall be

**MGQ**

**PTI A**

**Issued: To be entered upon final issuance**

determined in accordance with the following methods:

Emissions Unit ID: **P001**

MGQ

PTI A

Emissions Unit ID: P001

Issued: To be entered upon final issuance

- a. Emission Limitation:  
23.46 lbs NO<sub>x</sub>/hr and 22.50 tons NO<sub>x</sub> per rolling, 12-month period.

Applicable Compliance Method:

Compliance with the hourly emission limitation shall be determined by multiplying an emission factor of 3.2 lbs NO<sub>x</sub>/mmBtu derived from AP-42, Table 3.4-1 (revised 10/96) and a maximum heat input of 7.33 mmBtu/hr. If required, the permittee shall demonstrate compliance by testing in accordance with Methods 1 - 4, and 7 of 40 CFR Part 60, Appendix A.

Compliance with the rolling, 12-month limit shall be demonstrated in accordance with the recordkeeping requirements specified in Section C.3.

- b. Emission Limitation:  
6.23 lbs CO/hr and 5.98 tons CO/yr

Applicable Compliance Method:

Compliance with the hourly emission limitation shall be determined by multiplying an emission factor of 0.85 lb CO/mmBtu derived from AP-42, Table 3.4-1 (revised 10/96) and a maximum heat input of 7.33 mmBtu/hr. If required, the permittee shall demonstrate compliance by testing in accordance with Methods 1 - 4, and 10 of 40 CFR Part 60, Appendix A.

The annual emission limitation was established by multiplying the emission factor of 0.85 lb CO/mmBtu, a heat content of 0.140 mmBtu/gal, and a maximum annual gallon usage of 100,450 gallons, and then dividing by 2000 lbs/ton. Therefore provided compliance is shown with the rolling, 12-month fuel usage restriction, compliance with the annual limitation will be assumed.

- c. Emission Limitation:  
0.66 lb VOC/hour and 0.63 ton VOC/year

Applicable Compliance Method:

Compliance with the hourly emission limitation shall be determined by multiplying an emission factor of 0.09 lb VOC/mmBtu derived from AP-42, Table 3.4-1 (revised 10/96) and a maximum heat input of 7.33 mmBtu/hr. If required, the permittee shall demonstrate compliance by testing in accordance with Methods 1 - 4, and 18, 25 or 25A of 40 CFR Part 60, Appendix A.

**MGQ Aggregates, Inc.**  
**PTI A**  
**Issued**

**Facility ID: 0374950001**

Emissions Unit ID: **P001**

The annual emission limitation was established by multiplying the emission factor of 0.09 lb VOC/mmBtu, a heat content of 0.140 mmBtu/gal, and a maximum annual gallon usage

**Issued: To be entered upon final issuance**

of 100,450 gallons, and then dividing by 2000 lbs/ton. Therefore provided compliance is shown with the rolling, 12-month fuel usage restriction, compliance with the annual limitation will be assumed.

- d. Emission Limitation:  
0.062 lb PE/mmBtu and 0.44 ton PE/yr

Applicable Compliance Method:

The lbs PE/mmBtu emission limitation represents the potential to emit\* for this emissions unit. Therefore no hourly recordkeeping, deviation reporting, or compliance method calculations are required to demonstrate compliance with this limitation.

\*Potential to emit was determined using AP-42, Chapter 3.4, Table 3.4-2 (revised 10/96).

If required, the permittee shall demonstrate compliance by testing in accordance with Methods 1 - 5 of 40 CFR Part 60, Appendix A.

The annual emission limitation was established by multiplying the emission limitation of 0.062 lb PE/mmBtu, a heat content of 0.140 mmBtu/gal, and a maximum annual gallon usage of 100,450 gallons, and then dividing by 2000 lbs/ton. Therefore provided compliance is shown with the rolling, 12-month fuel usage restriction, compliance with the annual limitation will be assumed.

- e. Emission Limitation:  
3.74 lbs SO<sub>2</sub>/hr and 3.59 ton SO<sub>2</sub>/yr

Applicable Compliance Method:

Compliance with the hourly emission limitation shall be determined by multiplying an emission factor of 0.51 lb SO<sub>2</sub>/mmBtu derived from AP-42, Table 3.4-1 (revised 10/96) and a maximum heat input of 7.33 mmBtu/hr. If required, the permittee shall demonstrate compliance by testing in accordance with Methods 1 - 4, and 6 of 40 CFR Part 60, Appendix A.

The annual emission limitation was established by multiplying the emission limitation of 0.51 lb SO<sub>2</sub>/mmBtu, a heat content of 0.140 mmBtu/gal, and a maximum annual gallon usage of 100,450 gallons, and then dividing by 2000 lbs/ton. Therefore provided compliance is shown with the rolling, 12-month fuel usage restriction, compliance with the annual limitation will be assumed.

- f. Emission Limitation:

**MGQ**

**PTI A**

Emissions Unit ID: **P001**

**Issued: To be entered upon final issuance**

Visible PE shall not exceed 10% opacity as a 6-minute average, except during start-up and shutdown.

**MGQ**

**PTI A**

Emissions Unit ID: **P001**

**Issued: To be entered upon final issuance**

Applicable Compliance Method:

If required, the permittee shall demonstrate compliance in accordance with Method 9 of 40 CFR Part 60, Appendix A.

**F. Miscellaneous Requirements**

1. Pursuant to Ohio Administrative Code (OAC) rule 3745-31-03 (A)(1)(p)(i), the permittee of a portable or mobile emissions unit may relocate within the State of Ohio without first obtaining a PTI providing the following criteria are met:
  - a. the portable emissions unit is equipped with the best available control technology for such portable emissions unit;
  - b. the portable emissions unit is operating pursuant to a currently effective permit to install, permit to operate or registration;
  - c. the applicant has provided proper notice of intent to relocate the portable emissions unit to the Northwest District Office (NWDO) and the appropriate field office having jurisdiction over the new site within a minimum of thirty days prior to the scheduled relocation; and,
  - d. in the NWDO's and the appropriate field office's judgement, the proposed site is acceptable under the rule 3745-15-07 of the Administrative Code.
  
2. In the alternative, pursuant to OAC rule 3745-31-03 (A)(1)(p)(ii), the permittee of a portable or mobile emissions unit may relocate within the State of Ohio without first obtaining a PTI providing the following criteria of OAC rule 3745-31-05 (F) are met:
  - a. the portable emissions unit permittee possesses an Ohio EPA PTI, PTO or registration status;
  - b. the portable emissions unit is equipped with best available technology;
  - c. the portable emission unit owner has identified the proposed site to Ohio EPA;
  - d. Ohio EPA has determined that the portable emissions unit, at the proposed site, will have an acceptable environmental impact;
  - e. a public notice, consistent with Chapter 3745-47 of the Administrative Code, is published in the county where the proposed site is located;

**MGQ Aggregates, Inc.**  
**PTI A**  
**Issued**

**Facility ID: 0374950001**

**Emissions Unit ID: P001**

**MGQ**

**PTI A**

Emissions Unit ID: **P001**

**Issued: To be entered upon final issuance**

- f. the owner of the proposed site has provided the portable emissions unit owner with approval or equivalent declaration that it is acceptable to the site owner to move the portable emissions unit to the proposed site; and,
- g. the portable emissions unit owner has provided the Ohio EPA with fifteen days written notice of the relocation.

Any site approvals issued by the Ohio EPA, pursuant to this section, shall be valid for no longer than three years and are subject to renewal.

- 3. In order for the NWDO and the appropriate field office having jurisdiction over the new site to determine compliance with all of the above criteria, the owner or operator of the portable or mobile emissions unit must file a "Notice of Intent to Relocate", within the specified time frame (30 or 15 days) prior to the relocation of the emissions unit with the NWDO (347 North Dunbridge Road, Bowling Green, OH 43402) and the appropriate office having jurisdiction over the new site. Upon receipt of the notice, the NWDO and/or the appropriate field office having jurisdiction over the new site, will evaluate the request in accordance with the above criteria.
- 4. The permittee should be advised that when portable emission units are located at a stationary source or at a source comprised of portable emission units, potential emissions from the portable emission units are included in the facility potential to emit calculations for Title V applicability.

The permittee shall include a potential to emit analysis of facility-wide emissions (including the portable sources) for the proposed relocation in the "Notice of Intent to Relocate".

- 5. The following terms and conditions are federally enforceable: A.1, B.2, C.3, D.1, E.1.a.

MGQ

PTI A

Emissions Unit ID: P002

Issued: To be entered upon final issuance

**PART II - SPECIAL TERMS AND CONDITIONS FOR SPECIFIC EMISSIONS UNIT(S)**

**A. Applicable Emissions Limitations and/or Control Requirements**

1. The specific operations(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/Requirements</u>	
P002 - 3.01 mmBtu/hr portable diesel engine (Cummins N14-p)		OAC rule 3745-18-06 (G)
	OAC rule 3745-31-05 (A)(3)	OAC rule 3745-23-06 (B)
		OAC rule 3745-21-08 (B)
		OAC rule 3745-21-07 (B)
	OAC rule 3745-31-05 (C)	
	OAC rule 3745-17-07 (A)	
	OAC rule 3745-17-11 (B)(5)(a)	

**MGQ**

**PTI A**

Emissions Unit ID: **P002**

**Issued: To be entered upon final issuance**

<u>Applicable Emissions Limitations/Control Measures</u>	See A.2.e.
13.27 lbs nitrogen oxides (NO <sub>x</sub> )/hour	
2.86 lbs carbon monoxide (CO)/hour 4.19 tons CO/year	
1.05 lbs volatile organic compounds (VOC)/hour 1.54 tons VOC/year	
0.87 lb sulfur dioxide (SO <sub>2</sub> )/hour & 1.28 tons SO <sub>2</sub> /year	
1.37 ton particulate emissions (PE)/year	
Visible PE shall not exceed 10% opacity as a 6-minute average, except during start-up and shutdown	
See A.2.a and B.1.	
19.45 tons NO <sub>x</sub> per rolling, 12-month period (See A.2.b.)	
See A.2.c.	
0.310 lb PE/mmBtu	
See A.2.d.	
See A.2.e.	
See A.2.e.	

**2. Additional Terms and Conditions**

- 2.a The requirements of this rule also include compliance with the requirements of OAC rule 3745-31-05 (C) and OAC rule 3745-17-11 (B)(5)(a).
- 2.b The emissions of NOx from this emissions unit shall not exceed 19.45 tons per rolling 12-month period based on a fuel usage restriction (see Section B.2). The 19.45 tons NOx per year is a federally enforceable limitation established for purposes of limiting the potential to emit to avoid Title V applicability.
- 2.c The emission limitation specified by this rule is less stringent than the emission limitation established pursuant to OAC rule 3745-31-05 (A)(3).
- 2.d This emissions unit is exempt from the requirements of OAC rule 3745-18-06 pursuant to OAC rule 3745-18-06 (B).
- 2.e The permittee has satisfied the "latest available control techniques and operating practices" required pursuant to OAC rule 3745-23-06 (B) and OAC rule 3745-21-07 (B) and the "best available control techniques and operating practices" required pursuant to OAC rule 3745-21-08 (B) by committing to comply with the best available technology requirements established pursuant to OAC rule 3745-31-05 (A)(3) in this permit to install.

On November 5, 2002, OAC rule 3745-21-08 was revised to delete paragraph (B); therefore, paragraph (B) is no longer part of the State regulations. However, that rule revision has not yet been submitted to the U.S. EPA as a revision to Ohio's State Implementation Plan (SIP). Therefore, until the SIP revision occurs and the U.S. EPA approves the revisions to OAC rule 3745-21-08, the requirement to satisfy the "best available control techniques and operating practices" still exists as part of the federally-approved SIP for Ohio.

**B. Operational Restrictions**

- 1. The permittee shall combust only distillate fuel oil in this emissions unit.

The oil combusted in this emissions unit shall only be distillate oil (fuel oil numbers 1 or 2, as defined by the American Society for Testing and Materials in ASTM D396-78, 89, 90, 92, 96, or 98, "Standard Specification for Fuel Oils"). The sulfur content of the distillate oil shall contain no more than 0.5 weight percent sulfur.

- 2. The maximum annual fuel usage for emissions unit P002 shall not exceed 63,000 gallons, based upon a rolling, 12-month summation of the gallon usage. To ensure enforceability during the first

**Issued: To be entered upon final issuance**

12 calendar months of operation following the issuance of this permit, the permittee shall not exceed the levels specified in the following table:

<u>Month(s)</u>	<u>Maximum Allowable Fuel Usage</u>
1	5,250
1-2	10,500
1-3	15,750
1-4	21,000
1-5	26,250
1-6	31,500
1-7	36,750
1-8	42,000
1-9	47,250
1-10	52,500
1-11	57,750
1-12	63,000

After the first 12 calendar months of operation following the issuance of this permit, compliance with the annual fuel usage limitation shall be based upon a rolling 12-month summation of fuel usage.

**C. Monitoring and/or Recordkeeping Requirements**

1. For each day during which the permittee burns a fuel other than distillate oil the permittee shall maintain a record of the type and quantity of fuel burned in this emissions unit.
2. The permittee shall use records of fuel supplier certification to demonstrate compliance with the operational restriction specified in Section B.1. Records of fuel supplier certification shall include the following information:
  - i. the name of the oil supplier; and
  - ii. a statement from the oil supplier that the oil complies with the specifications under the definition of distillate oil specified in Section B.1 above.
3. The permittee shall maintain monthly records of the following information for this emissions unit:
  - a. fuel usage each month, in gallons;

- b. during the first 12 calendar months of operation, the cumulative fuel usage, in gallons;
- c. beginning the first month after the first 12 calendar months of operation, the rolling, 12-month summation of the fuel usage, in gallons;
- d. the calculated monthly emission rate for NO<sub>x</sub> using the following equation:  
  
$$\text{NO}_x \text{ emissions in tons} = (\text{fuel usage}) \times (\text{emission factor from AP-42, Chapter 3.3, Table 3.3-1}) \times (\text{heat content of fuel used}) (1 \text{ tons}/2000 \text{ lbs}) = (\text{C.3.a}) \times (4.41 \text{ lbs NO}_x/\text{mmBtu}) \times (0.140 \text{ mmBtu}/\text{gal}) \times (1 \text{ ton}/2000 \text{ lbs}); \text{ and}$$
- e. beginning the first month after the 12 calendar months of operation, the rolling, 12-month summation of the emission rate for NO<sub>x</sub>, in tons.

#### D. Reporting Requirements

1. The permittee shall submit deviation (excursion) reports, in accordance with the General Terms and Conditions of this permit, which identify the following exceedances:
  - a. the rolling, 12-month gallon fuel usage limitation;
  - b. the rolling, 12-month NO<sub>x</sub> emissions;
  - c. for the first 12 calendar months of operation following the issuance of this permit, all exceedances of the maximum allowable cumulative gallons of fuel; and
  - d. sulfur content fuel restriction specified in Section B.1.
2. The permittee shall submit deviation (excursion) reports that identify each day when a fuel other than distillate oil was burned in this emissions unit. Each report shall be submitted within 30 days after the deviation occurs.

#### E. Testing Requirements

1. Compliance with the emission limitations specified in Section A.1 of this permit shall be determined in accordance with the following methods:
  - a. Emission Limitation:  
13.27 lbs NO<sub>x</sub>/hr and 19.45 tons NO<sub>x</sub> per rolling, 12-month period.

Issued: To be entered upon final issuance

Applicable Compliance Method:

Compliance with the hourly emission limitation shall be determined by multiplying an emission factor of 4.41 lbs NO<sub>x</sub>/mmBtu derived from AP-42, Table 3.3-1 (revised 10/96) and a maximum heat input of 3.01 mmBtu/hr. If required, the permittee shall demonstrate compliance by testing in accordance with Methods 1 - 4, and 7 of 40 CFR Part 60, Appendix A.

Compliance with the rolling, 12-month limit shall be demonstrated in accordance with the recordkeeping requirements specified in Section C.3.

- b. Emission Limitation:  
2.86 lbs CO/hr and 4.19 tons CO/yr

Applicable Compliance Method:

Compliance with the hourly emission limitation shall be determined by multiplying an emission factor of 0.95 lb CO/mmBtu derived from AP-42, Table 3.3-1 (revised 10/96) and a maximum heat input of 3.01 mmBtu/hr. If required, the permittee shall demonstrate compliance by testing in accordance with Methods 1 - 4, and 10 of 40 CFR Part 60, Appendix A.

The annual emission limitation was established by multiplying the emission factor of 0.95 lb CO/mmBtu, a heat content of 0.140 mmBtu/gal, and a maximum annual gallon usage of 63,000 gallons, and then dividing by 2000 lbs/ton. Therefore provided compliance is shown with the rolling, 12-month fuel usage restriction, compliance with the annual limitation will be assumed.

- c. Emission Limitation:  
1.05 lbs VOC/hour and 1.54 tons VOC/year

Applicable Compliance Method:

Compliance with the hourly emission limitation shall be determined by multiplying an emission factor of 0.35 lb VOC/mmBtu derived from AP-42, Table 3.3-1 (revised 10/96) and a maximum heat input of 3.01 mmBtu/hr. If required, the permittee shall demonstrate compliance by testing in accordance with Methods 1 - 4, and 18, 25 or 25A of 40 CFR Part 60, Appendix A.

The annual emission limitation was established by multiplying the emission factor of 0.35 lb VOC/mmBtu, a heat content of 0.140 mmBtu/gal, and a maximum annual gallon usage of 63,000 gallons, and then dividing by 2000 lbs/ton. Therefore provided compliance is

**MGQ**

**PTI A**

Emissions Unit ID: **P002**

**Issued: To be entered upon final issuance**

shown with the rolling, 12-month fuel usage restriction, compliance with the annual limitation will be assumed.

Issued: To be entered upon final issuance

- d. Emission Limitation:  
0.310 lb PE/mmBtu and 1.37 tons PE/yr

Applicable Compliance Method:

The lbs PE/mmBtu emission limitation represents the potential to emit\* for this emissions unit. Therefore no hourly recordkeeping, deviation reporting, or compliance method calculations are required to demonstrate compliance with this limitation.

\*Potential to emit was determined using AP-42, Chapter 3.3, Table 3.3-1 (revised 10/96).

If required, the permittee shall demonstrate compliance by testing in accordance with Methods 1 - 5 of 40 CFR Part 60, Appendix A.

The annual emission limitation was established by multiplying the emission limitation of 0.310 lb PE/mmBtu, a heat content of 0.140 mmBtu/gal, and a maximum annual gallon usage of 63,000 gallons, and then dividing by 2000 lbs/ton. Therefore provided compliance is shown with the rolling, 12-month fuel usage restriction, compliance with the annual limitation will be assumed.

- e. Emission Limitation:  
0.87 lb SO<sub>2</sub>/hr and 1.28 tons SO<sub>2</sub>/yr

Applicable Compliance Method:

Compliance with the hourly emission limitation shall be determined by multiplying an emission factor of 0.29 lb SO<sub>2</sub>/mmBtu derived from AP-42, Table 3.3-1 (revised 10/96) and a maximum heat input of 3.01 mmBtu/hr. If required, the permittee shall demonstrate compliance by testing in accordance with Methods 1 - 4, and 6 of 40 CFR Part 60, Appendix A.

The annual emission limitation was established by multiplying the emission limitation of 0.29 lb SO<sub>2</sub>/mmBtu, a heat content of 0.140 mmBtu/gal, and a maximum annual gallon usage of 63,000 gallons, and then dividing by 2000 lbs/ton. Therefore provided compliance is shown with the rolling, 12-month fuel usage restriction, compliance with the annual limitation will be assumed.

- f. Emission Limitation:  
Visible PE shall not exceed 10% opacity as a 6-minute average, except during start-up and shutdown.

Applicable Compliance Method:

If required, the permittee shall demonstrate compliance in accordance with Method 9 of 40 CFR Part 60, Appendix A.

**F. Miscellaneous Requirements**

1. Pursuant to Ohio Administrative Code (OAC) rule 3745-31-03 (A)(1)(p)(i), the permittee of a portable or mobile emissions unit may relocate within the State of Ohio without first obtaining a PTI providing the following criteria are met:
  - a. the portable emissions unit is equipped with the best available control technology for such portable emissions unit;
  - b. the portable emissions unit is operating pursuant to a currently effective permit to install, permit to operate or registration;
  - c. the applicant has provided proper notice of intent to relocate the portable emissions unit to the Northwest District Office (NWDO) and the appropriate field office having jurisdiction over the new site within a minimum of thirty days prior to the scheduled relocation; and,
  - d. in the NWDO's and the appropriate field office's judgement, the proposed site is acceptable under the rule 3745-15-07 of the Administrative Code.
  
2. In the alternative, pursuant to OAC rule 3745-31-03 (A)(1)(p)(ii), the permittee of a portable or mobile emissions unit may relocate within the State of Ohio without first obtaining a PTI providing the following criteria of OAC rule 3745-31-05 (F) are met:
  - a. the portable emissions unit permittee possesses an Ohio EPA PTI, PTO or registration status;
  - b. the portable emissions unit is equipped with best available technology;
  - c. the portable emission unit owner has identified the proposed site to Ohio EPA;
  - d. Ohio EPA has determined that the portable emissions unit, at the proposed site, will have an acceptable environmental impact;
  - e. a public notice, consistent with Chapter 3745-47 of the Administrative Code, is published in the county where the proposed site is located;
  - f. the owner of the proposed site has provided the portable emissions unit owner with

**MGQ**

**PTI A**

Emissions Unit ID: **P002**

**Issued: To be entered upon final issuance**

approval or equivalent declaration that it is acceptable to the site owner to move the portable emissions unit to the proposed site; and,

- g. the portable emissions unit owner has provided the Ohio EPA with fifteen days written notice of the relocation.

Any site approvals issued by the Ohio EPA, pursuant to this section, shall be valid for no longer than three years and are subject to renewal.

3. In order for the NWDO and the appropriate field office having jurisdiction over the new site to determine compliance with all of the above criteria, the owner or operator of the portable or mobile emissions unit must file a "Notice of Intent to Relocate", within the specified time frame (30 or 15 days) prior to the relocation of the emissions unit with the NWDO (347 North Dunbridge Road, Bowling Green, OH 43402) and the appropriate office having jurisdiction over the new site. Upon receipt of the notice, the NWDO and/or the appropriate field office having jurisdiction over the new site, will evaluate the request in accordance with the above criteria.
4. The permittee should be advised that when portable emission units are located at a stationary source or at a source comprised of portable emission units, potential emissions from the portable emission units are included in the facility potential to emit calculations for Title V applicability.

The permittee shall include a potential to emit analysis of facility-wide emissions (including the portable sources) for the proposed relocation in the "Notice of Intent to Relocate".

5. The following terms and conditions are federally enforceable: A.1, B.2, C.3, D.1, E.1.a.

**PART II - SPECIAL TERMS AND CONDITIONS FOR SPECIFIC EMISSIONS UNIT(S)**

**A. Applicable Emissions Limitations and/or Control Requirements**

1. The specific operations(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/Requirements</u>

**2. Additional Terms and Conditions**

- 2.a** The requirements of this rule also include compliance with the requirements of OAC rule 3745-17-11 (B)(5)(a).
- 2.b** The emission limitation specified by this rule is less stringent than the emission limitation established pursuant to OAC rule 3745-31-05 (A)(3).
- 2.c** This emissions unit is exempt from the requirements of OAC rule 3745-18-06 pursuant to OAC rule 3745-18-06 (B).
- 2.d** The permittee has satisfied the "latest available control techniques and operating practices" required pursuant to OAC rule 3745-23-06 (B) and OAC rule 3745-21-07 (B) and the "best available control techniques and operating practices" required pursuant to OAC rule 3745-21-08 (B) by committing to comply with the best available technology requirements established pursuant to OAC rule 3745-31-05 (A)(3) in this permit to install.

On November 5, 2002, OAC rule 3745-21-08 was revised to delete paragraph (B); therefore, paragraph (B) is no longer part of the State regulations. However, that rule revision has not yet been submitted to the U.S. EPA as a revision to Ohio's State Implementation Plan (SIP). Therefore, until the SIP revision occurs and the U.S. EPA approves the revisions to OAC rule 3745-21-08, the requirement to satisfy the "best available control techniques and operating practices" still exists as part of the federally-approved SIP for Ohio.

**B. Operational Restrictions**

- 1. The permittee shall combust only distillate fuel oil in this emissions unit.

The oil combusted in this emissions unit shall only be distillate oil (fuel oil numbers 1 or 2, as defined by the American Society for Testing and Materials in ASTM D396-78, 89, 90, 92, 96, or 98, "Standard Specification for Fuel Oils"). The sulfur content of the distillate oil shall contain no more than 0.5 weight percent sulfur.

**C. Monitoring and/or Recordkeeping Requirements**

- 1. For each day during which the permittee burns a fuel other than distillate oil the permittee shall maintain a record of the type and quantity of fuel burned in this emissions unit.

MGQ

PTI A

Emissions Unit ID: P003

Issued: To be entered upon final issuance

2. The permittee shall use records of fuel supplier certification to demonstrate compliance with the operational restriction specified in Section B.1. Records of fuel supplier certification shall include the following information:
  - a. the name of the oil supplier; and
  - b. a statement from the oil supplier that the oil complies with the specifications under the definition of distillate oil specified in Section B.1 above.

**D. Reporting Requirements**

1. The permittee shall submit deviation (excursion) reports, in accordance with the General Terms and Conditions of this permit, which identify any exceedances of the sulfur content fuel restriction specified in Section B.1.
2. The permittee shall submit deviation (excursion) reports that identify each day when a fuel other than distillate oil was burned in this emissions unit. Each report shall be submitted within 30 days after the deviation occurs.

**E. Testing Requirements**

1. Compliance with the emission limitations specified in Section A.1 of this permit shall be determined in accordance with the following methods:
  - a. Emission Limitation:  
1.32 lbs NO<sub>x</sub>/hr and 5.78 tons NO<sub>x</sub> per rolling, 12-month period.

Applicable Compliance Method:

Compliance with the hourly emission limitation shall be determined by multiplying an emission factor of 4.41 lbs NO<sub>x</sub>/mmBtu derived from AP-42, Table 3.3-1 (revised 10/96) and a maximum heat input of 0.30 mmBtu/hr. If required, the permittee shall demonstrate compliance by testing in accordance with Methods 1 - 4, and 7 of 40 CFR Part 60, Appendix A.

The annual emission limitation was established by multiplying the hourly limitation by 8760 hours/year, and then dividing by 2000 lbs/ton. Therefore provided compliance is shown with the hourly limitation, compliance with the annual limitation will be assumed.

- b. Emission Limitation:

**MGQ Aggregates, Inc.**  
**PTI A**  
**Issued**

**Facility ID: 0374950001**

0.29 lb CO/hr and 1.27 tons CO/yr

Emissions Unit ID: **P003**

MGQ

PTI A

Issued: To be entered upon final issuance

Emissions Unit ID: P003

Applicable Compliance Method:

Compliance with the hourly emission limitation shall be determined by multiplying an emission factor of 0.95 lb CO/mmBtu derived from AP-42, Table 3.3-1 (revised 10/96) and a maximum heat input of 0.30 mmBtu/hr. If required, the permittee shall demonstrate compliance by testing in accordance with Methods 1 - 4, and 10 of 40 CFR Part 60, Appendix A.

The annual emission limitation was established by multiplying the hourly limitation by 8760 hours/year, and then dividing by 2000 lbs/ton. Therefore provided compliance is shown with the hourly limitation, compliance with the annual limitation will be assumed.

- c. Emission Limitation:  
0.11 lb VOC/hour and 0.48 ton VOC/year

Applicable Compliance Method:

Compliance with the hourly emission limitation shall be determined by multiplying an emission factor of 0.35 lb VOC/mmBtu derived from AP-42, Table 3.3-1 (revised 10/96) and a maximum heat input of 0.30 mmBtu/hr. If required, the permittee shall demonstrate compliance by testing in accordance with Methods 1 - 4, and 18, 25 or 25A of 40 CFR Part 60, Appendix A.

The annual emission limitation was established by multiplying the hourly limitation by 8760 hours/year, and then dividing by 2000 lbs/ton. Therefore provided compliance is shown with the hourly limitation, compliance with the annual limitation will be assumed.

- d. Emission Limitation:  
0.310 lb PE/mmBtu and 0.39 ton PE/yr

Applicable Compliance Method:

The lbs PE/mmBtu emission limitation represents the potential to emit\* for this emissions unit. Therefore no hourly recordkeeping, deviation reporting, or compliance method calculations are required to demonstrate compliance with this limitation.

\*Potential to emit was determined using AP-42, Chapter 3.3, Table 3.3-1 (revised 10/96).

If required, the permittee shall demonstrate compliance by testing in accordance with Methods 1 - 5 of 40 CFR Part 60, Appendix A.

**MGQ**

**PTI A**

Emissions Unit ID: **P003**

**Issued: To be entered upon final issuance**

The annual emission limitation was established by multiplying the hourly limitation by 8760 hours/year, and then dividing by 2000 lbs/ton. Therefore provided compliance is shown with the hourly limitation, compliance with the annual limitation will be assumed.

MGQ

PTI A

Emissions Unit ID: P003

Issued: To be entered upon final issuance

- e. Emission Limitation:  
0.09 lb SO<sub>2</sub>/hr and 0.39 ton SO<sub>2</sub>/yr

Applicable Compliance Method:

Compliance with the hourly emission limitation shall be determined by multiplying an emission factor of 0.29 lb SO<sub>2</sub>/mmBtu derived from AP-42, Table 3.3-1 (revised 10/96) and a maximum heat input of 0.30 mmBtu/hr. If required, the permittee shall demonstrate compliance by testing in accordance with Methods 1 - 4, and 6 of 40 CFR Part 60, Appendix A.

The annual emission limitation was established by multiplying the hourly limitation by 8760 hours/year, and then dividing by 2000 lbs/ton. Therefore provided compliance is shown with the hourly limitation, compliance with the annual limitation will be assumed.

- f. Emission Limitation:  
Visible PE shall not exceed 10% opacity as a 6-minute average, except during start-up and shutdown.

Applicable Compliance Method:

If required, the permittee shall demonstrate compliance in accordance with Method 9 of 40 CFR Part 60, Appendix A.

**F. Miscellaneous Requirements**

1. Pursuant to Ohio Administrative Code (OAC) rule 3745-31-03 (A)(1)(p)(i), the permittee of a portable or mobile emissions unit may relocate within the State of Ohio without first obtaining a PTI providing the following criteria are met:
  - a. the portable emissions unit is equipped with the best available control technology for such portable emissions unit;
  - b. the portable emissions unit is operating pursuant to a currently effective permit to install, permit to operate or registration;
  - c. the applicant has provided proper notice of intent to relocate the portable emissions unit to the Northwest District Office (NWDO) and the appropriate field office having jurisdiction over the new site within a minimum of thirty days prior to the scheduled relocation; and,
  - d. in the NWDO's and the appropriate field office's judgement, the proposed site is

**Facility ID: 0374950001**

Emissions Unit ID: **P003**

acceptable under the rule 3745-15-07 of the Administrative Code.

**MGQ**

**PTI A**

Emissions Unit ID: **P003**

**Issued: To be entered upon final issuance**

2. In the alternative, pursuant to OAC rule 3745-31-03 (A)(1)(p)(ii), the permittee of a portable or mobile emissions unit may relocate within the State of Ohio without first obtaining a PTI providing the following criteria of OAC rule 3745-31-05 (F) are met:
  - a. the portable emissions unit permittee possesses an Ohio EPA PTI, PTO or registration status;
  - b. the portable emissions unit is equipped with best available technology;
  - c. the portable emission unit owner has identified the proposed site to Ohio EPA;
  - d. Ohio EPA has determined that the portable emissions unit, at the proposed site, will have an acceptable environmental impact;
  - e. a public notice, consistent with Chapter 3745-47 of the Administrative Code, is published in the county where the proposed site is located;
  - f. the owner of the proposed site has provided the portable emissions unit owner with approval or equivalent declaration that it is acceptable to the site owner to move the portable emissions unit to the proposed site; and,
  - g. the portable emissions unit owner has provided the Ohio EPA with fifteen days written notice of the relocation.

Any site approvals issued by the Ohio EPA, pursuant to this section, shall be valid for no longer than three years and are subject to renewal.
3. In order for the NWDO and the appropriate field office having jurisdiction over the new site to determine compliance with all of the above criteria, the owner or operator of the portable or mobile emissions unit must file a "Notice of Intent to Relocate", within the specified time frame (30 or 15 days) prior to the relocation of the emissions unit with the NWDO (347 North Dunbridge Road, Bowling Green, OH 43402) and the appropriate office having jurisdiction over the new site. Upon receipt of the notice, the NWDO and/or the appropriate field office having jurisdiction over the new site, will evaluate the request in accordance with the above criteria.
4. The permittee should be advised that when portable emission units are located at a stationary source or at a source comprised of portable emission units, potential emissions from the portable emission units are included in the facility potential to emit calculations for Title V applicability.

**MGQ**

**PTI A**

Emissions Unit ID: **P003**

**Issued: To be entered upon final issuance**

The permittee shall include a potential to emit analysis of facility-wide emissions (including the portable sources) for the proposed relocation in the "Notice of Intent to Relocate".
