**RE: DRAFT PERMIT TO INSTALL
LUCAS COUNTY
Application No: 04-01270**

CERTIFIED MAIL

DATE: 9/11/2001

The Dolphin Company
Lewis Smith
922 Locust Street
Toledo, OH 43604

You are hereby notified that the Ohio Environmental Protection Agency has made a draft action recommending that the Director issue a Permit to Install for the air contaminant source(s) [emissions unit(s)] shown on the enclosed draft permit. This draft action is not an authorization to begin construction or modification of your emissions unit(s). The purpose of this draft is to solicit public comments on the proposed installation. A public notice concerning the draft permit will appear in the Ohio EPA Weekly Review and the newspaper in the county where the facility will be located. Public comments will be accepted by the field office within 30 days of the date of publication in the newspaper. Any comments you have on the draft permit should be directed to the appropriate field office within the comment period. A copy of your comments should also be mailed to Robert Hodanbosi, Division of Air Pollution Control, Ohio EPA, P.O. Box 1049, Columbus, OH, 43266-0149.

A Permit to Install may be issued in proposed of final form based on the draft action, any written public comments received within 30 days of the public notice, or record of a public meeting if one is held. You will be notified in writing of a scheduled public meeting. Upon issuance of a final Permit to Install a fee of **\$400** will be due. Please do not submit any payment now.

The Ohio EPA is urging companies to investigate pollution prevention and energy conservation. Not only will this reduce pollution and energy consumption, but it can also save you money. If you would like to learn ways you can save money while protecting the environment, please contact our Office of Pollution Prevention at (614) 644-3469. If you have any questions about this draft permit, please contact the field office where you submitted your application, or Mike Ahern, Field Operations & Permit Section at (614) 644-3631.

Very truly yours,

Thomas G. Rigo, Manager
Field Operations and Permit Section
Division of Air Pollution Control

STATE OF OHIO ENVIRONMENTAL PROTECTION AGENCY

**Permit To Install
Terms and Conditions**

**Issue Date: To be entered upon final issuance
Effective Date: To be entered upon final issuance**

DRAFT PERMIT TO INSTALL 04-01270

Application Number: 04-01270
APS Premise Number: 0448010074
Permit Fee: **To be entered upon final issuance**
Name of Facility: The Dolphin Company
Person to Contact: Lewis Smith
Address: 922 Locust Street
Toledo, OH 43604

Location of proposed air contaminant source(s) [emissions unit(s)]:
**922 Locust Street
Toledo, Ohio**

Description of proposed emissions unit(s):
high speed disperser with three covered mixing tanks.

The above named entity is hereby granted a Permit to Install for the above described emissions unit(s) pursuant to Chapter 3745-31 of the Ohio Administrative Code. Issuance of this permit does not constitute expressed or implied approval or agreement that, if constructed or modified in accordance with the plans included in the application, the above described emissions unit(s) of environmental pollutants will operate in compliance with applicable State and Federal laws and regulations, and does not constitute expressed or implied assurance that if constructed or modified in accordance with those plans and specifications, the above described emissions unit(s) of pollutants will be granted the necessary permits to operate (air) or NPDES permits as applicable.

This permit is granted subject to the conditions attached hereto.

Ohio Environmental Protection Agency

Director

The Dolphin Company

Facility ID: 0448010074

PTI Application: 04-01270

Issued: To be entered upon final issuance

Part I - GENERAL TERMS AND CONDITIONS

A. Permit to Install General Terms and Conditions

1. Compliance Requirements

The emissions unit(s) identified in this Permit to Install shall remain in full compliance with all applicable State laws and regulations and the terms and conditions of this permit.

2. Reporting Requirements Related to Monitoring and Recordkeeping Requirements

The permittee shall submit required reports in the following manner:

- a. Reports of any required monitoring and/or recordkeeping information shall be submitted to the appropriate Ohio EPA District Office or local air agency.
- b. Except as otherwise may be provided in the terms and conditions for a specific emissions unit, quarterly written reports of (a) any deviations (excursions) from emission limitations, operational restrictions, and control device operating parameter limitations that have been detected by the testing, monitoring, and recordkeeping requirements specified in this permit, (b) the probable cause of such deviations, and (c) any corrective actions or preventive measures which have been or will be taken, shall be submitted to the appropriate Ohio EPA District Office or local air agency. If no deviations occurred during a calendar quarter, the permittee shall submit a quarterly report, which states that no deviations occurred during that quarter. The reports shall be submitted quarterly, i.e., by January 31, April 30, July 31, and October 31 of each year and shall cover the previous calendar quarters. (These quarterly reports shall exclude deviations resulting from malfunctions reported in accordance with OAC rule 3745-15-06.)

3. Records Retention Requirements

Each record of any monitoring data, testing data, and support information required pursuant to this permit shall be retained for a period of five years from the date the record was created. Support information shall include, but not be limited to, all calibration and maintenance records and all original strip-chart recordings for continuous monitoring instrumentation, and copies of all reports required by this permit. Such records may be maintained in computerized form.

4. Inspections and Information Requests

The Director of the Ohio EPA, or an authorized representative of the Director, may, subject to the safety requirements of the permittee and without undue delay, enter upon the premises of this source at any reasonable time for purposes of making inspections, conducting tests, examining records or reports pertaining to any emission of air contaminants, and determining compliance with any applicable State air pollution laws and regulations and the terms and conditions of this permit. The permittee shall furnish to the Director of the Ohio EPA, or an authorized representative of the Director, upon receipt of a written request and within a reasonable time, any

The Dolphin Company
PTI Application: 04-01270

Facility ID: 0448010074

Issued: To be entered upon final issuance

information that may be requested to determine whether cause exists for modifying, reopening or revoking this permit or to determine compliance with this permit. Upon verbal or written request, the permittee shall also furnish to the Director of the Ohio EPA, or an authorized representative of the Director, copies of records required to be kept by this permit.

5. Scheduled Maintenance/Malfunction Reporting

Any scheduled maintenance of air pollution control equipment shall be performed in accordance with paragraph (A) of OAC rule 3745-15-06. The malfunction of any emissions units or any associated air pollution control system(s) shall be reported to the appropriate Ohio EPA District Office or local air agency in accordance with paragraph (B) of OAC rule 3745-15-06. Except as provided in that rule, any scheduled maintenance or malfunction necessitating the shutdown or bypassing of any air pollution control system(s) shall be accompanied by the shutdown of the emissions unit(s) that is (are) served by such control system(s).

6. Permit Transfers

Any transferee of this permit shall assume the responsibilities of the prior permit holder. The appropriate Ohio EPA District Office or local air agency must be notified in writing of any transfer of this permit.

7. Air Pollution Nuisance

The air contaminants emitted by the emissions units covered by this permit shall not cause a public nuisance, in violation of OAC rule 3745-15-07.

8. Termination of Permit to Install

This Permit to Install shall terminate within eighteen months of the effective date of the Permit to Install if the owner or operator has not undertaken a continuing program of installation or modification or has not entered into a binding contractual obligation to undertake and complete within a reasonable time a continuing program of installation or modification. This deadline may be extended by up to 12 months if application is made to the Director within a reasonable time before the termination date and the party shows good cause for any such extension.

9. Construction of New Sources(s)

The proposed emissions unit(s) shall be constructed in strict accordance with the plans and application submitted for this permit to the Director of the Ohio Environmental Protection Agency. There may be no deviation from the approved plans without the express, written approval of the Agency. Any deviations from the approved plans or the above conditions may

5

Issued: To be entered upon final issuance

lead to such sanctions

Facility ID: 0448010074

The Dolphin Company
PTI Application: 04-01270

Facility ID: 0448010074

Issued: To be entered upon final issuance

and penalties as provided under Ohio law. Approval of these plans does not constitute an assurance that the proposed facilities will operate in compliance with all Ohio laws and regulations. Additional facilities shall be installed upon orders of the Ohio Environmental Protection Agency if the proposed sources cannot meet the requirements of this permit or cannot meet applicable standards.

If the construction of the proposed emissions unit(s) has already begun or has been completed prior to the date the Director of the Environmental Protection Agency approves the permit application and plans, the approval does not constitute expressed or implied assurance that the proposed facility has been constructed in accordance with the approved plans. The action of beginning and/or completing construction prior to obtaining the Director's approval constitutes a violation of OAC rule 3745-31-02. Furthermore, issuance of the Permit to Install does not constitute an assurance that the proposed source will operate in compliance with all Ohio laws and regulations. Approval of the plans in any case is not to be construed as an approval of the facility as constructed and/or completed. Moreover, issuance of the Permit to Install is not to be construed as a waiver of any rights that the Ohio Environmental Protection Agency (or other persons) may have against the applicant for starting construction prior to the effective date of the permit. Additional facilities shall be installed upon orders of the Ohio Environmental Protection Agency if the proposed facilities cannot meet the requirements of this permit or cannot meet applicable standards.

10. Public Disclosure

The facility is hereby notified that this permit, and all agency records concerning the operation of this permitted source, are subject to public disclosure in accordance with OAC rule 3745-49-03.

11. Applicability

This Permit to Install is applicable only to the emissions unit(s) identified in the Permit to Install. Separate application must be made to the Director for the installation or modification of any other emissions unit(s).

12. Best Available Technology

As specified in OAC Rule 3745-31-05, all new sources must employ Best Available Technology (BAT). Compliance with the terms and conditions of this permit will fulfill this requirement.

13. Source Operation and Operating Permit Requirements After Completion of Construction

- a. If the permittee is required to apply for a Title V permit pursuant to OAC Chapter 3745-77, the permittee shall submit a complete Title V permit application or a complete

The Dolphin Company

Facility ID: 0448010074

PTI Application: 04-01270

Issued: To be entered upon final issuance

Title V permit modification application within twelve (12) months after commencing operation of the emissions units covered by this permit. However, if the proposed new or modified source(s) would be prohibited by the terms and conditions of an existing Title V permit, a Title V permit modification must be obtained before the operation of such new or modified source(s) pursuant to OAC rule 3745-77-04(D) and OAC rule 3745-77-08(C)(3)(d).

Emissions Unit ID: P014

- b. If the permittee is required to apply for permit(s) pursuant to OAC Chapter 3745-35, the source(s) identified in this Permit To Install is (are) permitted to operate for a period of up to one year from the date the source(s) commenced operation. Permission to operate is granted only if the facility complies with all requirements contained in this permit and all applicable air pollution laws, regulations, and policies. Pursuant to OAC Chapter 3745-35, the permittee shall submit a complete operating permit application within thirty (30) days after commencing operation of the source(s) covered by this permit.

14. Construction Compliance Certification

The applicant shall provide Ohio EPA with a written certification (see enclosed form) that the facility has been constructed in accordance with the Permit to Install application and the terms and conditions of the Permit to Install. The certification shall be provided to Ohio EPA upon completion of construction but prior to startup of the source.

15. Fees

The permittee shall pay fees to the Director of the Ohio EPA in accordance with ORC section 3745.11 and OAC Chapter 3745-78. The permittee shall pay all applicable Permit to Install fees within 30 days after the issuance of this Permit to Install.

B. Permit to Install Summary of Allowable Emissions

The following information summarizes the total allowable emissions, by pollutant, based on the individual allowable emissions of each air contaminant source identified in this permit.

SUMMARY (for informational purposes only)

<u>Pollutant</u>	<u>Tons Per Year</u>
PE	0.10
VOC	7.3

PART II - SPECIAL TERMS AND CONDITIONS FOR SPECIFIC EMISSIONS UNIT(S)

A. Applicable Emissions Limitations and/or Control Requirements

1. The specific operations(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
P014 - high speed disperser with three covered mixing tanks	OAC rule 3745-31-05(A)(3)	0.02 pound of particulate emissions (PE) per hour, 0.10 ton of PE per year, 3.9 pounds of volatile organic compounds (VOC) per hour, 7.3 tons of VOC per year, and see 2.a.
	OAC rule 3745-31-05(D)	see 2.b.
	OAC rule 3745-17-07(A)(1)	see 2.c.
	OAC rule 3745-17-11(B)(1)	see 2.d.
	OAC rule 3745-21-07(G)(2)	40 pounds of organic material (OC) per day, and see 2.e.

2. Additional Terms and Conditions

- 2.a The requirements of this rule also include compliance with the requirements of OAC rule 3745-17-07(A)(1), and the 40 pounds of organic material (OC) per day limitation of OAC rule 3745-21-07(G)(2).
- 2.b The emissions of hazardous air pollutants (HAPs) from all emissions units at this facility, as identified in Section 112(b) of Title III of the Clean Air Act, shall not exceed 10 tons per year for any individual HAP, and 25 tons per year for any combination of HAPs, as rolling 12-month summations.
- 2.c Visible emissions shall not exceed 20% opacity as a 6-minute average, except as provided by rule.

10

The D

PTI A

Issued: To be entered upon final issuance

Emissions Unit ID: **P014**

Issued: To be entered upon final issuance

- 2.d** The emission limitation specified by this rule is less stringent than the emission limitation established pursuant to OAC rule 3745-31-05(A)(3).
- 2.e** The 8 pounds of OC per hour emission limitation specified by this rule is less stringent than the emission limitation established pursuant to OAC rule 3745-31-05(A)(3).

B. Operational Restrictions

- 1. The permittee shall operate the dry filtration system whenever this emissions unit is in operation.

C. Monitoring and/or Recordkeeping Requirements

- 1. The permittee shall maintain daily records that document any time periods when the dry filtration system was not in service when the emissions unit was in operation.
- 2. The permittee shall collect and record the following information for each day for this emissions unit:
 - a. The company identification for each solvent employed.
 - b. The total weight of all solvents employed, in pounds.
 - c. The total VOC emission rate for all solvents employed, in pounds per day, calculated using an emission factor of 0.02 pounds of VOC emitted per pound of solvent employed, i.e., 2% of (b).
 - d. The total number of hours the emissions unit was in operation.
 - e. The average hourly VOC emission rate for all solvents, i.e., (c)/(d), in pounds per hour (average).
- 3. The permittee shall maintain monthly records of the following information for all emissions units in the facility:
 - a. The company identification for each solvent employed.
 - b. The total weight of each solvent employed, in pounds.
 - c. The HAP content of each solvent, in pound of individual HAP per pound solvent.

- d. The total potential monthly HAP emission rate for all solvents, calculated as a summation of (b) times (c) for each HAP individually and for all HAPs in combination, in pounds per month.

Issued: To be entered upon final issuance

- e. The total monthly HAP emissions for all emission units at this facility, in pounds, calculated as the total potential monthly HAP emission rate calculated above multiplied by the emission factor of 0.02 pound of HAP emitted per pound of HAP employed, calculated as 2% of (d) for each HAP individually and for all HAPs in combination.
 - f. The rolling, 12-month total HAPS emissions for all emissions units at this facility, in tons, calculated as a summation of the monthly individual and combined HAPs emissions recorded in (e), divided by 2000 pounds per ton
4. The permit to install for the combined emissions from emissions unit P014 was evaluated based on the actual materials and the design parameters of the emissions unit's exhaust system, as specified by the permittee in the permit to install application. The Ohio EPA's "Review of New Sources of Air Toxic Emissions" policy ("Air Toxic Policy") was applied for each pollutant emitted by this emissions unit using data from the permit to install application and the SCREEN 3.0 model (or other Ohio EPA approved model). The predicted 1-hour maximum ground-level concentration from the use of the SCREEN 3.0 model was compared to the Maximum Acceptable Ground-Level Concentration (MAGLC). The following summarizes the results of the modeling for the "worst case" pollutant(s):

Pollutant: toluene

TLV (mg/m3): 191

Maximum Hourly Emission Rate (lbs/hr): 3.9

Predicted 1-Hour Maximum Ground-Level
Concentration (ug/m3): 1,612

MAGLC (ug/m3): 4,560

Physical changes to or changes in the method of operation of the emissions unit after its installation or modification could affect the parameters used to determine whether or not the "Air Toxic Policy" is satisfied. Consequently, prior to making a change that could impact such parameters, the permittee shall conduct an evaluation to determine that the "Air Toxic Policy" will still be satisfied. If, upon evaluation, the permittee determines that the "Air Toxic Policy" will not be satisfied, the permittee will not make the change. Changes that can affect the parameters used in applying the "Air Toxic Policy" include the following:

- a. changes in the composition of the materials used (typically for coatings or cleanup materials), or the use of new materials, that would result in the emission of a compound

The D

PTI A

Emissions Unit ID: **P014**

Issued: To be entered upon final issuance

with a lower Threshold Limit Value (TLV), as indicated in the most recent version of the handbook entitled "American Conference of Governmental Industrial Hygienists (ACGIH)," than the lowest TLV value previously modeled;

Issued: To be entered upon final issuance

- b. changes in the composition of the materials, or use of new materials, that would result in an increase in emissions of any pollutant with a listed TLV that was proposed in the application and modeled; and
- c. physical changes to the emissions unit or its exhaust parameters (e.g., increased/ decreased exhaust flow, changes in stack height, changes in stack diameter, etc.).

If the permittee determines that the "Air Toxic Policy" will be satisfied for the above changes, the Ohio EPA will not consider the change(s) to be a "modification" under OAC rule 3745-31-01(VV)(1)(a)(ii), and a modification of the existing permit to install will not be required. If the change(s) is (are) defined as a modification under other provisions of the modification definition (other than (VV)(1)(a)(ii)), then the permittee shall obtain a final permit to install prior to the change.

- 5. The permittee shall collect, record, and retain the following information when it conducts evaluations to determine that the changed emissions unit will still satisfy the "Air Toxic Policy:"
 - a. a description of the parameters changed (composition of materials, new pollutants emitted, change in stack/exhaust parameters, etc.);
 - b. documentation of its evaluation and determination that the changed emissions unit still satisfies the "Air Toxic Policy"; and
 - c. where computer modeling is performed, a copy of the resulting computer model runs that show the results of the application of the "Air Toxic Policy" for the change.

D. Reporting Requirements

- 1. The permittee shall notify the Toledo Division of Environmental Services in writing of any daily record showing that the dry filtration system was not in service when the emissions unit was in operation. The notification shall include a copy of such record and shall be sent to the Toledo Division of Environmental Services within 30 days after the event occurs.
- 2. The permittee shall submit deviation (excursion) reports which include the following information:
 - a. An identification of each day during which the average hourly VOC emissions from the coatings and photochemically reactive cleanup materials exceeded 3.9 pounds per hour, and the actual average hourly VOC emissions for each such day.
 - b. An identification of each day during which the VOC emissions from the coatings and

The Dolphin Company
PTI A
Issued

Facility ID: 0448010074

Emissions Unit ID: **P014**

photochemically reactive cleanup materials exceeded 40 pounds per day, and the actual VOC emissions for each such day.

Issued: To be entered upon final issuance

- c. An identification of each month during which the emissions of HAPs from all emissions units at this facility exceeded 10 tons per year for any individual HAP, and/or 25 tons per year for any combination of HAPs, as rolling 12-month summations, and the actual HAPs emissions for each such period.
3. Except as otherwise specified, the permittee shall submit semi-annual deviation (excursion) reports that identify all exceedances of the VOC and rolling, 12-month HAP limitations. If no deviations occurred, the permittee shall submit a semi-annual report, which states that no deviations occurred during the previous 6-month period. These reports are due by February 15 and August 15 of each year, and shall be submitted to the Toledo Division of Environmental Services.

E. Testing Requirements

1. Compliance with the allowable emission limitations in this permit shall be determined according to the following methods:
 - a. Emission Limitation

3.9 pounds of VOC per hour.

Applicable Compliance Method

Compliance with the hourly emission limitation shall be determined by the record keeping required in condition C.2.e. If required the permittee shall also perform stack testing utilizing the methods and procedures of Method 25 of 40 CFR 60, Appendix A.
 - b. Emission Limitation

40 pounds of VOC per day.

Applicable Compliance Method

Compliance with the daily emission limitations shall be determined by the record keeping required in condition C.2.c.
 - c. Emission Limitation

7.3 tons of OC per year.

The D
PTI A

Emissions Unit ID: **P014**

Issued: To be entered upon final issuance

Applicable Compliance Method

The 7.3 TPY emission limitation was developed by multiplying the 40 lb/day emission rate by a maximum operating schedule of 365 days/year and dividing by 2000 lbs/ton.

Issued: To be entered upon final issuance

Therefore, provided compliance is shown with the daily limitation, compliance shall also be shown with the annual emission limitation.

d. Emission Limitation

The emissions of HAPs from all emissions units at this facility shall not exceed 10 tons per year for any individual HAP, and 25 tons per year for any combination of HAPs, as rolling 12-month summations.

Applicable Compliance Method

Compliance with the rolling 12-month emission limitations shall be determined by the record keeping required in condition C.3.

d. Emission Limitation

Visible emissions shall not exceed 20% opacity as a 6-minute average, except as provided by rule.

Applicable Compliance Method

If required, the permittee shall demonstrate compliance by visible emission readings performed in compliance with the methods and procedures of OAC rule 3745-17-03(B)(1).

e. Emission Limitation

0.02 pound of PE hour and 0.10 ton PE per year.

Applicable Compliance Method

Compliance with the hourly emission limitation shall be demonstrated by multiplying the maximum solids usage rate of 659 pounds per 6 hour batch by the AP-42 emissions factor of 20 pounds of PE per ton of solids (Table 6.4.1 dated 1/95) times the estimated capture and control efficiency of the dry filtration system [1 - 0.98]. Compliance with the annual emission limitation shall be determined by multiplying the hourly emission rate by 8760 hours per year and dividing by 2000 pounds per ton and by the record keeping required in condition C.1. If required, the permittee shall also demonstrate compliance with the hourly limitation by stack testing in performed in compliance with the methods and procedures of OAC rule 3745-17-03(B)(10).
