

1

Facility Name: **Technocast Inc**

Application Number: **02-2255**

Date: **September 23, 1998**

GENERAL PERMIT CONDITIONS

TERMINATION OF PERMIT TO INSTALL

Substantial construction for installation must take place within 18 months of the effective date of this permit. This deadline may be extended by up to 12 months if application is made to the Director within a reasonable time before the termination date and the party shows good cause for any such extension.

NOTICE OF INSPECTION

The Director of the Ohio Environmental Protection Agency, or his authorized representatives, may enter upon the premises of the above-named applicant during construction and operation at any reasonable time for the purpose of making inspections, conducting tests, or to examine records or reports pertaining to the construction, modification or installation of the source(s) of environmental pollutants identified within this permit.

CONSTRUCTION OF NEW SOURCES

The proposed source(s) shall be constructed in strict accordance with the plans and application submitted for this permit to the Director of the Ohio Environmental Protection Agency. There may be no deviation from the approved plans without the express, written approval of the Agency. Any deviations from the approved plans or the above conditions may lead to such sanctions and penalties as provided under Ohio law. Approval of these plans does not constitute an assurance that the proposed facilities will operate in compliance with all Ohio laws and regulations. Additional facilities shall be installed upon orders of the Ohio Environmental Protection Agency if the proposed sources are inadequate or cannot meet applicable standards.

If the construction of the proposed source(s) has already begun or has been completed prior to the date the Director of the Environmental Protection Agency approves the permit application and plans, the approval does not constitute expressed or implied assurance that the proposed facility has been constructed in accordance with the approved plans. The action of beginning and/or completing construction prior to obtaining the Director's approval constitutes a violation of Ohio Administrative Code (OAC) Rule 3745-31-02. Furthermore, issuance of the Permit to Install does not constitute an assurance that the proposed source will operate in compliance with all Ohio laws and regulations. Approval of the plans in any case is not to be construed as

2

Facility Name: **Technocast Inc**

Application Number: **02-2255**

Date: **September 23, 1998**

an approval of the facility as constructed and/or completed. Moreover, issuance of the Permit to Install is not to be construed as a waiver of any rights that the Ohio Environmental Protection Agency (or other persons) may have against the applicant for starting construction prior to the effective date of the permit. Additional facilities shall be installed upon orders of the Ohio Environmental Protection Agency if the proposed facilities cannot meet applicable standards.

PERMIT TO INSTALL FEE

In accordance with Ohio Revised Code 3745.11, the specified Permit to Install fee must be remitted within 30 days of the effective date of this permit to install.

PUBLIC DISCLOSURE

The facility is hereby notified that this permit, and all agency records concerning the operation of this permitted source, are subject to public disclosure in accordance with OAC Rule 3745-49-03.

APPLICABILITY

This Permit to Install is applicable only to the contaminant sources identified. Separate application must be made to the Director for the installation or modification of any other contaminant sources.

Facility Name: **Technocast Inc**

Application Number: **02-2255**

Date: **September 23, 1998**

BEST AVAILABLE TECHNOLOGY

As specified in OAC Rule 3745-31-05, all new sources must employ Best Available Technology (BAT). Compliance with the terms and conditions of this permit will fulfill this requirement.

PERMIT TO OPERATE APPLICATION

A Permit to Operate application must be submitted to the appropriate field office for each air contaminant source in this Permit to Install. In accordance with OAC Rule 3745-35-02, the application shall be filed no later than thirty days after commencement of operation.

SOURCE OPERATION AFTER COMPLETION OF CONSTRUCTION

This facility is permitted to operate each source described by this permit to install for a period of up to one year from the date the source commenced operation. This permission to operate is granted only if the facility complies with all requirements contained in this permit and all applicable air pollution laws and regulations.

AIR EMISSION SUMMARY

The air contaminant emissions units listed below comprise the Permit to Install for **Technocast Inc** located in **Wayne** County. The emissions units listed below shall not exceed the emission limits/control requirements contained in the table. This condition in no way limits the applicability of any other state or federal regulations. Additionally, this condition does not limit the applicability of additional special terms and conditions of this permit.

<u>Ohio EPA Source Number</u>	<u>Source Identification Description</u>	<u>BAT Determination</u>	<u>Applicable Federal & OAC Rules</u>	<u>Permit Allowable Mass Emissions and/or Control/Usage Requirements</u>
P014	Modification to No. 1 - large wheelabrator shot blast machine to increase PM allowable emission rate	Use of a fabric filter	3745-31-05	PM: 0.01 gr/dscf of exhaust gases from the fabric filter, 0.39 pound/hour, 1.7 TPY; fugitive emissions not to exceed 3.0 TPY. Visible emissions of fugitive dust not to exceed 20 percent opacity as a 3 minute average.
			3745-17-11	Less stringent than limit from 3745-31-05.

Date: **September 23, 1998**

WASTE DISPOSAL

The owner/operator shall comply with any applicable state and federal requirements governing the storage, treatment, transport and disposal of any waste material generated by the operation of the sources.

MAINTENANCE OF EQUIPMENT

This source and its associated air pollution control system(s) shall be maintained regularly in accordance with good engineering practices and the recommendations of the respective manufacturers in order to minimize air contaminant emissions.

MALFUNCTION/ABATEMENT

In accordance with OAC RULE 3745-15-06, any malfunction of the source(s) or associated air pollution control system(s) shall be reported immediately to the **Ohio EPA, Northeast District Office, 2110 E. Aurora Road, Twinsburg, OH 44087.**

Except as provided by OAC Rule 3745-15-06(A)(3), scheduled maintenance of air pollution control equipment that requires the shutdown or bypassing of air pollution control system(s) must be accompanied by the shutdown of the associated air pollution sources.

AIR POLLUTION NUISANCES PROHIBITED

The air contaminant source(s) identified in this permit may not cause a public nuisance in violation of OAC Rule 3745-15-07.

ADDITIONAL SPECIAL TERMS AND CONDITIONS

1. PTI 02-2255 is for the modification of an existing shotblast machine (emissions unit P014) to allow an increase in particulate matter emissions. Emissions unit P014 was installed under PTI application no. 02-1511, effective January 23, 1986.
2. Particulate emissions from the shotblast machine (emissions

Date: **September 23, 1998**

unit P014) shall be controlled by a fabric filter baghouse.

Facility Name: **Technocast Inc**

Application Number: **02-2255**

Date: **September 23, 1998**

A. Allowable Emission Limitation(s)

1. For emissions unit P014 No. 1 Tumbblast machine:
 - a. the emission of PM from the fabric filter's exhaust stack shall not exceed 0.01 grain per dry standard cubic foot of exhaust gases;
 - b. the stack emissions of PM from emissions unit P014 shall not exceed 0.39 pound per hour. This is based on a grain loading limit of 0.01 gr/dscf and the anticipated gas flow rate from P014 of 4500 SCFM; and,
 - c. the emissions of fugitive PM into the ambient air from emissions nit P014 shall not exceed 3.0 tons per year. (This emission limit is based on AP-42 emission factors and an estimate of the capture efficiency of the control system's enclosure).

B. Operational Restriction

1. The pressure drop across the baghouse shall be maintained within the range of 2 to 8 inches of water while the emissions unit is in operation.

C. Monitoring and/or Recordkeeping Requirements

1. The permittee shall properly install, operate, and maintain equipment to monitor the pressure drop across the baghouse while the emissions unit is in operation. The monitoring equipment shall be installed, calibrated, operated, and maintained in accordance with the manufacturer's recommendations, instructions, and operating manual(s). The permittee shall record the pressure drop across the baghouse on a weekly basis.

D. Reporting Requirements

1. The permittee shall submit pressure drop deviation (excursion) reports that identify all periods of time during the pressure drop across the baghouse did not comply with the allowable range specified above.

E. Testing Requirements

Facility Name: **Technocast Inc**

Application Number: **02-2255**

Date: **September 23, 1998**

1. Compliance with the emission limitations contained in the permit shall be determined in accordance with the following methods:

- a. Emission Limit

PM emissions not to exceed 0.01 gr/dscf and 0.39 pound/hour.

Applicable Compliance Method

Compliance with the above limitation shall be demonstrated by U.S. EPA reference method 5, if required by the Ohio EPA.

- b. Emission Limit

Stack PM emissions not to exceed 1.7 tons/year.

Applicable Compliance Method

Compliance with the above limitation shall be demonstrated by calculations, using the design control efficiency of the fabric filter and the technical data provided in the PTI application.

- c. Emission Limit

Fugitive PM emissions not to exceed 3.0 tons/year.

Applicable Compliance Method

Compliance with the above limitation shall be demonstrated by calculations, using an estimate of the capture efficiency for PM emissions and the technical data provided in the PTI application.
