

Facility ID: 0607090218 Issuance type: Final State Permit To Operate

This version of facility specific terms and conditions was converted from a database format to an HTML file during an upgrade of the Ohio EPA, Division of Air Pollution Control's permitting software. Every attempt has been made to convert the terms and conditions to look and substantively conform to the permit issued or being drafted in STARS. However, the format of the terms may vary slightly from the original. In addition, although it is not expected, there is a slight possibility that a term and condition may have been inadvertently "left out" of this reproduction during the conversion process. Therefore, if this version is to be used as a starting point in drafting a new version of a permit, it is imperative that the entire set of terms and conditions be reviewed to ensure they substantively mimic the issued permit. The official version of any permit issued final by Ohio EPA is kept in the Agency's Legal section. The Legal section may be contacted at (614) 644-3037.

In addition to the terms and conditions, hyperlinks have been inserted into the document so you may more readily access the section of the document you wish to review.

Finally, the term language under "Part II" and before "A. Applicable Emissions Limitations..." has been added to aid in document conversion, and was not part of the original issued permit.

THIS IS NOT AN OFFICIAL VERSION OF THE PERMIT. SEE PAGE 1 FOR ADDITIONAL INFORMATION

Part II - Special Terms and Conditions

This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).

1. For the purpose of a permit-to-install document, the emissions unit terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.
 - (a) None.
2. For the purpose of a permit-to-operate document, the emissions unit terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.
 - (a) None.

A. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
Galvanizing line with fabric filter (baghouse).	PTI 17-1481	0.57 lb PM/hr ; 1.78 TPY PM Visible particulate emissions from the baghouse exhaust shall not exceed 20% opacity as a 6-minute average, except as provided by rule.
-	3745-17-07(A)(1)	See T&C B.1. Less stringent than PTI.
-	3745-17-11(A)(2)	Less stringent than PTI.

2. Additional Terms and Conditions

- (a) None

B. Operational Restrictions

1. The permittee shall operate the fabric filter during any operation of this emissions unit.
2. The pressure drop across the baghouse shall be maintained within the range of 2.0 to 10.0 inches of water while the emissions unit is in operation.

C. Monitoring and/or Record Keeping Requirements

1. The permittee shall properly install, operate, and maintain equipment to monitor the pressure drop across the baghouse while the emissions unit is in operation. The monitoring equipment shall be installed, calibrated, operated, and maintained in accordance with the manufacturer's recommendations, instructions, and operating manual(s). The permittee shall record the pressure drop across the baghouse on daily basis.

D. Reporting Requirements

1. The permittee shall notify the Director of any exceedance of the PM emission limits or visible particulate emission limit in section A.1 of these terms and conditions. The permittee shall also notify the Director of each day in which the recorded pressure drop across the baghouse is not in the range of 2.0 to 10.0 inches of water pursuant to section A.2. of these terms and conditions. The permittee shall notify the Director within 30 days of each such exceedance.

E. Testing Requirements

1. Compliance with the visible particulate emission limit in section A.1. of these terms and conditions shall be determined in accordance with the test method and procedures in OAC 3745-17-03(B)(1).
2. Compliance with the PM emission limits in section A.1. of these terms and conditions shall be demonstrated by the following:
 - a. Multiply the production rate (tons of material galvanized / hour) by the emission factor of 0.19 pounds/ton from the uncontrolled stack test on January 25, and 26, 1995.
 - b. Multiply the pounds/hr by hours/yr = pounds/yr
Divide pounds/yr by 2000 = tons/yr uncontrolled
Multiply the tons/yr by .01 (baghouse control efficiency) = TPY PM controlled

F. **Miscellaneous Requirements**

1. None
