

Facility ID: 0634000088 Issuance type: Final State Permit To Operate

This version of facility specific terms and conditions was converted from a database format to an HTML file during an upgrade of the Ohio EPA, Division of Air Pollution Control's permitting software. Every attempt has been made to convert the terms and conditions to look and substantively conform to the permit issued or being drafted in STARS. However, the format of the terms may vary slightly from the original. In addition, although it is not expected, there is a slight possibility that a term and condition may have been inadvertently "left out" of this reproduction during the conversion process. Therefore, if this version is to be used as a starting point in drafting a new version of a permit, it is imperative that the entire set of terms and conditions be reviewed to ensure they substantively mimic the issued permit. The official version of any permit issued final by Ohio EPA is kept in the Agency's Legal section. The Legal section may be contacted at (614) 644-3037.

In addition to the terms and conditions, hyperlinks have been inserted into the document so you may more readily access the section of the document you wish to review.

Finally, the term language under "Part II" and before "A. Applicable Emissions Limitations..." has been added to aid in document conversion, and was not part of the original issued permit.

THIS IS NOT AN OFFICIAL VERSION OF THE PERMIT. SEE PAGE 1 FOR ADDITIONAL INFORMATION

Facility ID: 0634000088 Emissions Unit ID: F007 Issuance type: Final State Permit To Operate

Part II - Special Terms and Conditions

This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).

1. For the purpose of a permit-to-install document, the emissions unit terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.
 - (a) None.
2. For the purpose of a permit-to-operate document, the emissions unit terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.
 - (a) None.

A. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
loading, transferring, conveying with 8 transfer points	OAC rule 3745-31-05 (A)(3) PTI # 06-05975	10 % opacity as a three-minute average 4.01 TPY PM best available control measures that are sufficient to minimize or eliminate visible emissions of fugitive dust (see Sections A.2.b through A.2.d)
crusher/screen	OAC rule 3745-31-05 (A)(3) PTI # 06-05975 40 CFR Part 60 Subpart 000	15 % opacity as a three-minute average 3.30 TPY PM best available control measures that are sufficient to minimize or eliminate visible emissions of fugitive dust (see Sections A.2.b through A.2.d) The emission limitation specified by this rule is less stringent than the requirements specified pursuant to OAC rule 3745-31-05 (A)(3)

2. Additional Terms and Conditions

- (a) The material handling operations that are covered by this permit and subject to the above-mentioned requirements are listed below:
 - 6 conveyor belts w/ 8 transfer points
crusher and screen

The permittee shall employ best available control measures for the above-identified material handling operations for the purpose of ensuring compliance with the above-mentioned applicable requirements. In accordance with the permittee's permit application, the permittee has committed to perform the following control measures to ensure compliance:

 - material handling operation(s) control measure(s)
 - conveyor belts watering
 - transfer points watering
 - loading watering at storage pile
 - crusher/screen watering

Nothing in this paragraph shall prohibit the permittee from employing other control measures to ensure compliance.
For each material handling operation that is not adequately enclosed, the above-identified control measures shall be implemented if the permittee determines, as a result of the inspection conducted pursuant to the monitoring section of this permit, that the control measures are necessary to ensure compliance with the above-mentioned applicable requirements. Any required implementation of the control measures shall continue during the operation of the material handling operations until further observation confirms that use of the control measure(s) is unnecessary.
Implementation of the above-mentioned control measures in accordance with the terms and conditions of this permit is appropriate and sufficient to satisfy the requirements of OAC rule 3745-31-05.

B. Operational Restrictions

1. None
- C. **Monitoring and/or Record Keeping Requirements**
 1. Except as otherwise provided in this section, for material handling operations that are not adequately enclosed, the permittee shall perform inspections of such operations in accordance with the following minimum frequencies:

material handling operation(s) minimum inspection frequency

All Daily
 2. The above-mentioned inspections shall be performed during representative, normal operating conditions.
 3. The permittee may, upon receipt of written approval from the appropriate Ohio EPA District Office or local air agency, modify the above-mentioned inspection frequencies if operating experience indicates that less frequent inspections would be sufficient to ensure compliance with the above-mentioned applicable requirements.
 4. The permittee shall maintain records of the following information:
 - a. the date and reason any required inspection was not performed;
 - b. the date of each inspection where it was determined by the permittee that it was necessary to implement the control measures;
 - c. the dates the control measures were implemented; and,
 - d. on a calendar quarter basis, the total number of days the control measures were implemented.

The information in 4.d. shall be kept separately for each material handling operation identified above, and shall be updated on a calendar quarter basis within 30 days after the end of each calendar quarter.
- D. **Reporting Requirements**
 1. The permittee shall submit deviation reports that identify any of the following occurrences:
 - a. each day during which an inspection was not performed by the required frequency; and,
 - b. each instance when a control measure, that was to be performed as a result of an inspection, was not implemented.
 2. The deviation reports shall be submitted in accordance with the reporting requirements of the General Terms and Conditions of this permit.
 3. The permittee shall comply with the Reporting and Recordkeeping requirements contained in 40 CFR Part 60 Subpart OOO, Section 60.676 .
- E. **Testing Requirements**
 1. Compliance with the visible emission limitations identified above shall be determined in accordance with USEPA Test Method 9.
 2. Emission Limitation:

loading, transferring, conveying with 8 transfer points - 4.01 TPY PM
Crusher/screen - 3.30 TPY PM

Compliance Method:

Compliance with PM ton/yr emission limit shall be demonstrated by the use of emission factors calculated using AP-42, Compilation of Air Pollutant Emission Factors, Chapters 13.2.4 (1/95) and 11.19.2-2 (1/95), maximum annual production rates and estimated control efficiencies, as shown below using emission factors calculated with inputs from the application.

Screening: $(0.0315 \text{ lb/ton})(600,000 \text{ ton/yr})(1 - 0.70 \text{ control})(0.0005 \text{ ton/lb}) = 2.835 \text{ ton/yr}$

Crushing: $(0.00504 \text{ lb/ton})(600,000 \text{ ton/yr})(1 - 0.70 \text{ control})(0.0005 \text{ ton/lb}) = 0.454 \text{ ton/yr}$

TOTAL: $2.835 + 0.454 = 3.289 \text{ ton/yr}$ for crushing/screening

Truck loading: $(0.00021 \text{ lb/ton})(600,000 \text{ ton/yr})(1 - 0.70 \text{ control})(0.0005 \text{ ton/lb}) = 0.019 \text{ ton/yr}$

Transfer points: $(0.0444 \text{ lb/ton})(600,000 \text{ ton/yr})(1 - 0.70 \text{ control})(8 \text{ transfer points})(0.0005 \text{ ton/lb}) = 3.996 \text{ ton/yr}$

TOTAL: $0.019 + 3.996 = 4.015 \text{ ton/yr}$ for loading/transfer/conveying
 3. Emission Limitation:

loading, transferring, conveying w/8 transfer points - 10% opacity as a three-minute average
Crusher/screen - 15% opacity as a three-minute average

Compliance Method:

Within 60 days after achieving the maximum production rate, but not later than 180 days after initial startup of the emissions unit, the permittee shall demonstrate compliance with the opacity limits for the material handling operations identified above in accordance with Test Method 9, as set forth in "Appendix on Test Methods" in 40 CFR Part 60 ("Standards of performance for New Stationary Sources") and in accordance with 40 CFR Part 60 Subpart OOO Section 60.675 (c).

The permittee shall submit written reports of the results of all performance tests conducted to demonstrate compliance with the standards set forth in Section 60.672, including reports of opacity observations made using Method 9.

F. **Miscellaneous Requirements**

1. None
