Enclosed please find an Ohio EPA Permit to Install which will allow you to install the described source(s) in a manner indicated in the permit. Because this permit contains several conditions and restrictions, I urge you to read it carefully.

The Ohio EPA is urging companies to investigate pollution prevention and energy conservation. Not only will this reduce pollution and energy consumption, but it can also save you money. If you would like to learn ways you can save money while protecting the environment, please contact our Office of Pollution Prevention at (614) 644-3469.

You are hereby notified that this action of the Director is final and may be appealed to the Environmental Review Appeals Commission pursuant to Section 3745.04 of the Ohio Revised Code. The appeal must be in writing and set forth the action complained of and the grounds upon which the appeal is based. The appeal must be filed with the Commission within thirty (30) days after notice of the Director's action. The appeal must be accompanied by a filing fee of \$70.00 which the Commission, in its discretion, may reduce if by affidavit you demonstrate that payment of the full amount of the fee would cause extreme hardship. Notice of the filing of the appeal shall be filed with the Director within three (3) days of filing with the Commission. Ohio EPA requests that a copy of the appeal be served upon the Ohio Attorney General's Office, Environmental Enforcement Section. An appeal may be filed with the Environmental Review Appeals Commission at the following address:

Environmental Review Appeals Commission
309 South Fourth Street, Room 222
Columbus, OH 43215

Sincerely,

Michael W. Ahern, Manager
Permit Issuance and Data Management Section
Division of Air Pollution Control

Effective Date: 8/22/2006**

FINAL PERMIT TO INSTALL 01-12031

Application Number: 01-12031
Facility ID: 0165010125
Permit Fee: **\$100**
Name of Facility: TriMold, LLC
Person to Contact: Steve Furniss
Address: N A 200 Pittsburgh Rd
Circleville, OH 43113

Location of proposed air contaminant source(s) [emissions unit(s)]:
**200 Pittsburg Rd
Circleville, Ohio**

Description of proposed emissions unit(s):
Two adhesive spray booths equipped with high volume low pressure HVLP spray guns and a single electric infrared heater.

The above named entity is hereby granted a Permit to Install for the above described emissions unit(s) pursuant to Chapter 3745-31 of the Ohio Administrative Code. Issuance of this permit does not constitute expressed or implied approval or agreement that, if constructed or modified in accordance with the plans included in the application, the above described emissions unit(s) of environmental pollutants will operate in compliance with applicable State and Federal laws and regulations, and does not constitute expressed or implied assurance that if constructed or modified in accordance with those plans and specifications, the above described emissions unit(s) of pollutants will be granted the necessary permits to operate (air) or NPDES permits as applicable.

This permit is granted subject to the conditions attached hereto.

Ohio Environmental Protection Agency

Director

Part I - GENERAL TERMS AND CONDITIONS

A. Permit to Install General Terms and Conditions

1. Compliance Requirements

The emissions unit(s) identified in this Permit to Install shall remain in full compliance with all applicable State laws and regulations and the terms and conditions of this permit.

2. Reporting Requirements

The permittee shall submit required reports in the following manner:

- a. Reports of any required monitoring and/or recordkeeping information shall be submitted to the appropriate Ohio EPA District Office or local air agency.
- b. Except as otherwise may be provided in the terms and conditions for a specific emissions unit, quarterly written reports of (a) any deviations (excursions) from emission limitations, operational restrictions, and control device operating parameter limitations that have been detected by the testing, monitoring, and recordkeeping requirements specified in this permit, (b) the probable cause of such deviations, and (c) any corrective actions or preventive measures which have been or will be taken, shall be submitted to the appropriate Ohio EPA District Office or local air agency. If no deviations occurred during a calendar quarter, the permittee shall submit a quarterly report, which states that no deviations occurred during that quarter. The reports shall be submitted quarterly, i.e., by January 31, April 30, July 31, and October 31 of each year and shall cover the previous calendar quarters. (These quarterly reports shall exclude deviations resulting from malfunctions reported in accordance with OAC rule 3745-15-06.)

3. Records Retention Requirements

Each record of any monitoring data, testing data, and support information required pursuant to this permit shall be retained for a period of five years from the date the record was created. Support information shall include, but not be limited to, all calibration and maintenance records and all original strip-chart recordings for continuous monitoring instrumentation, and copies of all reports required by this permit. Such records may be maintained in computerized form.

4. Inspections and Information Requests

The Director of the Ohio EPA, or an authorized representative of the Director, may, subject to the safety requirements of the permittee and without undue delay, enter upon the premises of this source at any reasonable time for purposes of making inspections, conducting tests, examining records or reports pertaining to any emission of air contaminants, and determining compliance with any applicable State air pollution laws and

regulations and the terms and conditions of this permit. The permittee shall furnish to the Director of the Ohio EPA, or an authorized representative of the Director, upon receipt of a written request and within a reasonable time, any information that may be requested to determine whether cause exists for modifying, reopening or revoking this permit or to determine compliance with this permit. Upon verbal or written request, the permittee shall also furnish to the Director of the Ohio EPA, or an authorized representative of the Director, copies of records required to be kept by this permit.

5. Scheduled Maintenance/Malfunction Reporting

Any scheduled maintenance of air pollution control equipment shall be performed in accordance with paragraph (A) of OAC rule 3745-15-06. The malfunction of any emissions units or any associated air pollution control system(s) shall be reported to the appropriate Ohio EPA District Office or local air agency in accordance with paragraph (B) of OAC rule 3745-15-06. Except as provided in that rule, any scheduled maintenance or malfunction necessitating the shutdown or bypassing of any air pollution control system(s) shall be accompanied by the shutdown of the emissions unit(s) that is (are) served by such control system(s).

6. Permit Transfers

Any transferee of this permit shall assume the responsibilities of the prior permit holder. The appropriate Ohio EPA District Office or local air agency must be notified in writing of any transfer of this permit.

7. Air Pollution Nuisance

The air contaminants emitted by the emissions units covered by this permit shall not cause a public nuisance, in violation of OAC rule 3745-15-07.

8. Termination of Permit to Install

This Permit to Install shall terminate within eighteen months of the effective date of the Permit to Install if the owner or operator has not undertaken a continuing program of installation or modification or has not entered into a binding contractual obligation to undertake and complete within a reasonable time a continuing program of installation or modification. This deadline may be extended by up to 12 months if application is made to the Director within a reasonable time before the termination date and the party shows good cause for any such extension.

9. Construction of New Sources(s)

The proposed emissions unit(s) shall be constructed in strict accordance with the plans and application submitted for this permit to the Director of the Ohio Environmental Protection Agency. There may be no deviation from the approved plans without the express, written approval of the Agency. Any deviations from the approved plans or the above conditions

may lead to such sanctions and penalties as provided under Ohio law. Approval of these plans does not constitute an assurance that the proposed facilities will operate in compliance with all Ohio laws and regulations. Additional facilities shall be installed upon orders of the Ohio Environmental Protection Agency if the proposed sources cannot meet the requirements of this permit or cannot meet applicable standards.

If the construction of the proposed emissions unit(s) has already begun or has been completed prior to the date the Director of the Environmental Protection Agency approves the permit application and plans, the approval does not constitute expressed or implied assurance that the proposed facility has been constructed in accordance with the approved plans. The action of beginning and/or completing construction prior to obtaining the Director's approval constitutes a violation of OAC rule 3745-31-02. Furthermore, issuance of the Permit to Install does not constitute an assurance that the proposed source will operate in compliance with all Ohio laws and regulations. Approval of the plans in any case is not to be construed as an approval of the facility as constructed and/or completed. Moreover, issuance of the Permit to Install is not to be construed as a waiver of any rights that the Ohio Environmental Protection Agency (or other persons) may have against the applicant for starting construction prior to the effective date of the permit. Additional facilities shall be installed upon orders of the Ohio Environmental Protection Agency if the proposed facilities cannot meet the requirements of this permit or cannot meet applicable standards.

10. Public Disclosure

The facility is hereby notified that this permit, and all agency records concerning the operation of this permitted source, are subject to public disclosure in accordance with OAC rule 3745-49-03.

11. Applicability

This Permit To Install is applicable only to the emissions unit(s) identified in the Permit To Install. Separate Permit To Install for the installation or modification of any other emissions unit(s) are required for any emissions unit for which a Permit To Install is required.

12. Best Available Technology

As specified in OAC Rule 3745-31-05, all new sources must employ Best Available Technology (BAT). Compliance with the terms and conditions of this permit will fulfill this requirement.

13. Source Operation and Operating Permit Requirements After Completion of Construction

This facility is permitted to operate each source described by this Permit to Install for a period of up to one year from the date the source commenced operation. This permission to operate is granted only if the facility complies with all requirements contained in this

permit and all applicable air pollution laws, regulations, and policies. Pursuant to OAC Chapter 3745-35, the permittee shall submit a complete operating permit application within ninety (90) days after commencing operation of the emissions unit(s) covered by this permit.

14. Construction Compliance Certification

The applicant shall provide Ohio EPA with a written certification (see enclosed form) that the facility has been constructed in accordance with the Permit to Install application and the terms and conditions of the Permit to Install. The certification shall be provided to Ohio EPA upon completion of construction but prior to startup of the source.

15. Fees

The permittee shall pay fees to the Director of the Ohio EPA in accordance with ORC section 3745.11 and OAC Chapter 3745-78. The permittee shall pay all applicable Permit to Install fees within 30 days after the issuance of this Permit to Install.

B. Permit to Install Summary of Allowable Emissions

The following information summarizes the total allowable emissions, by pollutant, based on the individual allowable emissions of each air contaminant source identified in this permit.

SUMMARY (for informational purposes only)
TOTAL PERMIT TO INSTALL ALLOWABLE EMISSIONS

<u>Pollutant</u>	<u>Tons Per Year</u>
OC	43.6
Individual HAP	9.9
Combined HAP	24.8

PART II - SPECIAL TERMS AND CONDITIONS FOR SPECIFIC EMISSIONS UNIT(S)

A. Applicable Emissions Limitations and/or Control Requirements

1. The specific operations(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

Operations, Property, and/or Equipment - (R003) - One (1) adhesive coating booth with two (2) adjoining spray stations equipped high volume low pressure (HVLP) spray guns and a single electric infrared heater

Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures
OAC Rule 3745-17-07(A)(1)	Visible particulate emissions (VE) from any stack shall not exceed 20 percent opacity as a six-minute average, except as specified by rule.
OAC rule 3745-31-05(A)(3)	<p>Organic Compound (OC) emissions shall not exceed 36.0 pounds per hour (lbs/hr), excluding cleanup material.</p> <p>The OC content of any coating employed in R003 shall not exceed 5.54 pounds per gallon (lbs/gal), as applied.</p> <p>The OC content of any thinner or cleanup material employed in R003 shall not exceed 6.7 lbs/gal.</p> <p>The requirements of this rule also include compliance with the requirements of OAC rule 3745-31-05(C)</p>
OAC rule 3745-17-11(B)(1)	Particulate emissions from the stack shall not exceed 0.551 pound per hour based on Table I (Figure II does not apply because the uncontrolled rate of emissions is less than 10 pounds/hr).
OAC rule 3745-21-07(G)(2)	See section A.2.a.
OAC rule 3745-35-07(B)(1) (synthetic minor to avoid Title V and MACT requirements)	The individual hazardous air pollutant (HAP) emissions from this unit (R003) shall not exceed 9.9 tons and combined HAP emissions shall not exceed 24.8 tons based upon a rolling, 12-month summation.

Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures
	<p>The OC* emissions from this unit (R003) shall not exceed 43.6 tons based upon a rolling, 12-month summation, including cleanup materials.</p> <p>See sections A.2.b, B.1, and B.2.</p> <p>*For Title V purposes it was assumed that all OCs were VOC.</p>

2. Additional Terms and Conditions

2.a To avoid the emission limitations/control requirements contained in OAC rule 3745-21-07(G)(2), no photochemically reactive materials (i.e., as raw materials or cleanup materials) shall be employed in this emissions unit.

Note: The definition of "photochemically reactive material" is based upon OAC rule 3745-21-01(C)(5).

2.b A listing of the HAPs can be found in Section 112(b) of the Clean Air Act or can be obtained by contacting your Ohio EPA field office or local air agency contact. Material Safety Data Sheets typically include a listing of the solvents contained in the adhesive/coatings and clean up materials.

2.c The Best Available Technology (BAT) requirements under OAC rule 3745-31-03(A)(3) do not apply to the particulate emissions from this air contaminant source since the calculated annual emission rate for particulate emissions is less than ten tons per year taking into account the federally enforceable rule limit of 0.551 pound of particulate emissions per hour under OAC rule 3745-17-11(B), Table I.

2.d The hourly OC limitation for this emissions unit was established to reflect the maximum potential to emit. Therefore, it is not necessary to develop additional monitoring, record keeping and/or reporting requirements to ensure compliance with this limit.

B. Operational Restrictions

1. The maximum annual coating usage for this emissions unit shall not exceed 13,560 gallons, based upon a rolling, 12-month summation of the coating usage figures.

To ensure enforceability during the first 12 calendar months of operation or the first 12 calendar months following the issuance of this permit, the permittee shall not exceed the coating usage levels specified in the following table:

<u>Month(s)</u>	<u>Maximum Allowable Cumulative Coating Usage</u>
1	3,560
1-2	4,560
1-3	5,560
1-4	6,560
1-5	7,560
1-6	8,560
1-7	9,560
1-8	10,560
1-9	11,560
1-10	13,560
1-11	13,560
1-12	13,560

After the first 12 calendar months of operation or the first 12 calendar months following the issuance of this permit, compliance with the annual coating usage limitation shall be based upon a rolling, 12-month summation of the coating usage figures.

2. The maximum annual cleanup material usage for this emissions unit shall not exceed 660 gallons, based upon a rolling, 12-month summation of the cleanup material usage figures.

To ensure enforceability during the first 12 calendar months of operation or the first 12 calendar months following the issuance of this permit, the permittee shall not exceed the cleanup material usage levels specified in the following table:

<u>Month(s)</u>	<u>Maximum Allowable Cumulative Cleanup Material Usage</u>
1	200
1-2	250
1-3	300
1-4	350
1-5	400
1-6	450
1-7	500
1-8	550
1-9	600
1-10	660
1-11	660
1-12	660

After the first 12 calendar months of operation or the first 12 calendar months following the issuance of this permit, compliance with the annual cleanup material usage

limitation shall be based upon a rolling, 12-month summation of the cleanup material usage figures.

3. The permittee shall operate the fabric filtration system whenever this emissions unit is in operation.

C. Monitoring and/or Recordkeeping Requirements

1. The permittee shall collect and record the following information for emissions unit R003 on a monthly basis:
 - a. the name and identification number of each coating and cleanup material employed;
 - b. the total number of gallons of each coating and cleanup material employed;
 - c. the OC content of each coating and cleanup material, as applied, in pounds/gallon;
 - d. a determination of whether the coating is photochemically reactive;
 - e. the individual HAP content for each HAP of each coating and cleanup material, as applied, in pounds of individual HAP per gallon;
 - f. the total combined HAP content of each coating and cleanup material employed, in pounds of combined HAPs per gallon, as applied (sum of all individual HAP contents from e);
 - g. the number of gallons of each type of clean up material drummed for shipment offsite;
 - h. the total calculated OC emissions from all coatings and cleanup materials employed, in pounds or tons (i.e, the sum of all coatings, thinner, and cleanup materials multiplied by the respective OC contents minus the amount of cleanup material shipped off-site);
 - i. the total calculated emissions of each individual HAP for each coating and cleanup materials, in pounds or tons (for each HAP the sum of b times e for each coating plus the sum of b times e for each cleanup material);
 - j. the calculated total HAP emissions from all coatings and cleanup materials, in pounds or tons (the sum of b times f for each coating plus the sum of b times f for each cleanup material);
 - k. the rolling, 12-month summation of the total coating usage, in gallons;

- I. the rolling, 12-month summation of the total cleanup material usage, in gallons;
 - m. the rolling, 12-month summation of the total OC emissions from all coatings and cleanup materials, in pounds or tons;
 - n. the rolling, 12-month summation of the total emissions of each individual HAP from all coatings and cleanup materials employed in pounds or ton (for each HAP the sum of k times e for each coating plus the sum of l times e for each cleanup material); and
 - o. the rolling, 12-month summation of the total HAP emissions from all coatings and cleanup materials, in pounds or tons (the sum of k times f for each coating plus the sum of l times f for each cleanup material).
2. The permittee shall maintain daily records that document any time periods when the fabric filtration system was not in service when the emissions unit was in operation.
3. The permit to install for this emissions unit R003 was evaluated based on the actual materials and the design parameters of the emissions unit's exhaust system, as specified by the permittee in the permit to install application. The Ohio EPA's "Review of New Sources of Air Toxic Emissions" policy ("Air Toxic Policy") was applied to this emissions unit for each toxic pollutant, using data from the permit to install application, and modeling was performed for the toxic pollutant(s) emitted at over a ton per year using the SCREEN 3.0 model or other Ohio EPA approved model. The predicted 1-hour maximum ground-level concentration result(s) from the use of the SCREEN 3.0 (or other approved) model, was compared to the Maximum Acceptable Ground-Level Concentration (MAGLC), calculated as described in the document titled "Review of New Sources of Air Toxic Emissions". The following summarizes the results of the modeling for the "worst case" pollutant(s):

Pollutant: Toluene

TLV (mg/m3): 188

Maximum Hourly Emission Rate (lbs/hr): 6.8

Predicted 1-Hour Maximum Ground-Level Concentration (ug/m3): 135.2

MAGLC (ug/m3): 4476

Pollutant: Cyclohexane

TLV (mg/m3): 100

Maximum Hourly Emission Rate (lbs/hr): 9.5

Predicted 1-Hour Maximum Ground-Level Concentration (ug/m3): 187.8

MAGLC (ug/m3): 8195

4. Physical changes to or changes in the method of operation of the emissions unit after its installation or modification could affect the parameters used to determine whether or not the "Air Toxic Policy" is satisfied. Consequently, prior to making a change that could impact such parameters, the permittee shall conduct an evaluation to determine that the

“Air Toxic Policy” will still be satisfied. If, upon evaluation, the permittee determines that the “Air Toxic Policy” will not be satisfied, the permittee will not make the change. Changes that can affect the parameters used in applying the “Air Toxic Policy” include the following:

- a. changes in the composition of the materials used or the use of new materials, that would result in the emission of a compound or chemical with a lower Threshold Limit Value (TLV) than the lowest TLV previously modeled, as documented in the most current version of the American Conference of Governmental Industrial Hygienists’ (ACGIH’s) handbook entitled “TLVs and BEIs” (“Threshold Limit Values for Chemical Substances and Physical Agents, Biological Exposure Indices”);
 - b. changes in the composition of the materials, or use of new materials, that would result in an increase in emissions of any pollutant with a listed TLV that was proposed in the application and modeled; and
 - c. physical changes to the emissions unit or its exhaust parameters (e.g., increased/ decreased exhaust flow, changes in stack height, changes in stack diameter, etc.).
5. If the permittee determines that the "Air Toxic Policy" will be satisfied for the above changes, the Ohio EPA will not consider the change(s) to be a "modification" under OAC rule 3745-31-01 solely due to the emissions of any type of toxic air contaminant not previously emitted, and a modification of the existing permit to install will not be required, even if the toxic air contaminant emissions are greater than the de minimis level in OAC rule 3745-15-05. If the change(s) meet(s) the definition of a “modification” under other provisions of the rule, then the permittee shall obtain a final permit to install prior to the change.

The permittee shall collect, record, and retain the following information when it conducts evaluations to determine that the changed emissions unit will still satisfy the “Air Toxic Policy”:

- a. a description of the parameters changed (composition of materials, new pollutants emitted, change in stack/exhaust parameters, etc.);
- b. documentation of the evaluation and determination that the changed emissions unit still satisfies the “Air Toxic Policy”; and
- c. where computer modeling is performed, a copy of the resulting computer model runs that show the results of the application of the “Air Toxic Policy” for the change.

D. Reporting Requirements

1. The permittee shall notify the Ohio EPA, Central District Office in writing of any daily record showing that the fabric filtration system was not in service when the emissions unit was in operation. The notification shall include a copy of such record and shall be sent to the Director (the Ohio EPA, Central District Office) within 30 days after the event occurs.
2. The permittee shall submit quarterly deviation (excursion) reports which identify all exceedances of the rolling, 12-month coating usage limitation. These reports shall be submitted in accordance with the reporting requirements specified in Part I - General Terms and Conditions, Section A of this permit.
3. The permittee shall submit quarterly deviation (excursion) reports which identify all exceedances of the rolling, 12-month cleanup material usage limitation. These reports shall be submitted in accordance with the reporting requirements specified in Part I - General Terms and Conditions, Section A of this permit.
4. The permittee shall submit quarterly deviation (excursion) reports which identify all exceedances of the rolling, 12-month OC emission limitation. These reports shall be submitted in accordance with the reporting requirements specified in Part I - General Terms and Conditions, Section A of this permit.
5. The permittee shall submit quarterly deviation (excursion) reports which identify all exceedances of the rolling, 12-month single HAP limitation. These reports shall be submitted in accordance with the reporting requirements specified in Part I - General Terms and Conditions, Section A of this permit.
6. The permittee shall submit quarterly deviation (excursion) reports which identify all exceedances of the rolling, 12-month combined HAP limitation. These reports shall be submitted in accordance with the reporting requirements specified in Part I - General Terms and Conditions, Section A of this permit.
7. The permittee shall submit quarterly deviation (excursion) reports which identify all periods of time when a photochemically reactive material is employed in this emissions unit. These reports shall be submitted in accordance with the reporting requirements specified in Part I - General Terms and Conditions, Section A of this permit.

E. Testing Requirements

1. Compliance with the emission limitation(s) in Section A.I of these terms and conditions shall be determined in accordance with the following method(s):

Emissions Limitation:

- a. Visible particulate emissions from any stack shall not exceed 20 percent opacity as a six-minute average, except as specified by rule.

Applicable Compliance Method:

Compliance shall be determined through visible emission observations performed in accordance with 40 CFR Part 60, Appendix A, Method 9 and the procedures specified in OAC rule 3745-17-03(B)(1).

- b. The OC content of any coating employed in R003 shall not exceed 5.54 pounds/gallon, as applied.

Applicable Compliance Method:

Compliance with the OC content limit may be determined through the monthly record keeping specified in section C.1.c above. Formulation data or USEPA Method 24 shall be used to determine the organic compound content of the coatings.

- c. The OC content of any thinner or cleanup material employed in R003 shall not exceed 6.7 pounds/gallon, as applied.

Applicable Compliance Method:

Compliance with the OC content limit may be determined through the monthly record keeping specified in section C.1.c above. Formulation data or USEPA Method 24 shall be used to determine the organic compound content of the coatings.

- d. Organic Compound (OC) emissions shall not exceed 36.0 pounds per hour, excluding cleanup material.

The hourly emission limitation is based on the maximum coating usage of 6.5 gal/hr multiplied by the maximum OC content of 5.54 lbs/gal.

- e. The OC emissions from R003 shall not exceed 43.6 tons based upon a rolling, 12-month summation, including cleanup materials.

Applicable Compliance Method:

Compliance shall be based upon the record keeping specified in A.2.c of these terms and conditions.

- f. The individual hazardous air pollutant (HAP) emissions from this unit (R003) shall not exceed 9.9 tons and combined HAP emissions shall not exceed 24.8 tons based upon a rolling, 12-month summation.

Applicable Compliance Method:

Compliance shall be based upon the record keeping specified in C.1 of these terms and conditions.

- g. Particulate emissions from the stack shall not exceed 0.551 pound per hour.

Applicable Compliance Method:

Compliance may be determined by multiplying the maximum coating usage of 6.5 gallons per hour by the maximum solids content of the coating and the transfer efficiency of the spray operation.

- 2. The VOC content of the coatings and clean-up materials shall be determined according to OAC rule 3745-21-10(B). USEPA Methods 24 shall be used to determine the VOC contents for coatings. If an owner or operator determines that Method 24 cannot be used for a particular coating, the permittee shall so notify the Administrator of the USEPA and shall use formulation data for that coating to demonstrate compliance until the USEPA provides alternative analytical procedures or alternative precision statements for Method 24 or 24A.

F. Miscellaneous Requirements

None
