Enclosed please find an Ohio EPA Permit to Install which will allow you to install the described source(s) in a manner indicated in the permit. Because this permit contains several conditions and restrictions, I urge you to read it carefully.

The Ohio EPA is urging companies to investigate pollution prevention and energy conservation. Not only will this reduce pollution and energy consumption, but it can also save you money. If you would like to learn ways you can save money while protecting the environment, please contact our Office of Pollution Prevention at (614) 644-3469.

You are hereby notified that this action by the Director is final and may be appealed to the Ohio Environmental Review Appeals Commission pursuant to Chapter 3745.04 of the Ohio Revised Code. The appeal must be in writing and set forth the action complained of and the grounds upon which the appeal is based. It must be filed within thirty (30) days after the notice of the Directors action. A copy of the appeal must be served on the Director of the Ohio Environmental Protection Agency within three (3) days of filing with the Commission. An appeal may be filed with the Environmental Review Appeals Commission at the following address:

Environmental Review Appeals Commission
309 South Fourth Street, Room 222
Columbus, Ohio 43215

Sincerely,

Michael W. Ahern, Manager
Permit Issuance and Data Management Section
Division of Air Pollution Control

CC: USEPA

NWDO

**Permit To Install
Terms and Conditions**

**Issue Date: 8/16/2005
Effective Date: 8/16/2005**

FINAL PERMIT TO INSTALL 03-16329

Application Number: 03-16329
Facility ID: 0317010035
Permit Fee: **\$100**
Name of Facility: Transco Railway Products, Inc.
Person to Contact: Harold Fitz
Address: 820 Hopley Avenue
Bucyrus, OH 44820

Location of proposed air contaminant source(s) [emissions unit(s)]:
**820 Hopley Avenue
Bucyrus, Ohio**

Description of proposed emissions unit(s):
Increase VOC limit for paint room K002 due to the closing of K001.

The above named entity is hereby granted a Permit to Install for the above described emissions unit(s) pursuant to Chapter 3745-31 of the Ohio Administrative Code. Issuance of this permit does not constitute expressed or implied approval or agreement that, if constructed or modified in accordance with the plans included in the application, the above described emissions unit(s) of environmental pollutants will operate in compliance with applicable State and Federal laws and regulations, and does not constitute expressed or implied assurance that if constructed or modified in accordance with those plans and specifications, the above described emissions unit(s) of pollutants will be granted the necessary permits to operate (air) or NPDES permits as applicable.

This permit is granted subject to the conditions attached hereto.

Ohio Environmental Protection Agency

Director

Part I - GENERAL TERMS AND CONDITIONS

A. Permit to Install General Terms and Conditions

1. Compliance Requirements

The emissions unit(s) identified in this Permit to Install shall remain in full compliance with all applicable State laws and regulations and the terms and conditions of this permit.

2. Reporting Requirements

The permittee shall submit required reports in the following manner:

- a. Reports of any required monitoring and/or recordkeeping information shall be submitted to the appropriate Ohio EPA District Office or local air agency.
- b. Except as otherwise may be provided in the terms and conditions for a specific emissions unit, quarterly written reports of (a) any deviations (excursions) from emission limitations, operational restrictions, and control device operating parameter limitations that have been detected by the testing, monitoring, and recordkeeping requirements specified in this permit, (b) the probable cause of such deviations, and (c) any corrective actions or preventive measures which have been or will be taken, shall be submitted to the appropriate Ohio EPA District Office or local air agency. If no deviations occurred during a calendar quarter, the permittee shall submit a quarterly report, which states that no deviations occurred during that quarter. The reports shall be submitted quarterly, i.e., by January 31, April 30, July 31, and October 31 of each year and shall cover the previous calendar quarters. (These quarterly reports shall exclude deviations resulting from malfunctions reported in accordance with OAC rule 3745-15-06.)

3. Records Retention Requirements

Each record of any monitoring data, testing data, and support information required pursuant to this permit shall be retained for a period of five years from the date the record was created. Support information shall include, but not be limited to, all calibration and maintenance records and all original strip-chart recordings for continuous monitoring instrumentation, and copies of all reports required by this permit. Such records may be maintained in computerized form.

4. Inspections and Information Requests

The Director of the Ohio EPA, or an authorized representative of the Director, may, subject to the safety requirements of the permittee and without undue delay, enter upon the premises of this source at any reasonable time for purposes of making inspections, conducting tests, examining records or reports pertaining to any emission of air contaminants, and determining compliance with any applicable State air pollution laws and

regulations and the terms and conditions of this permit. The permittee shall furnish to the Director of the Ohio EPA, or an authorized representative of the Director, upon receipt of a written request and within a reasonable time, any information that may be requested to determine whether cause exists for modifying, reopening or revoking this permit or to determine compliance with this permit. Upon verbal or written request, the permittee shall also furnish to the Director of the Ohio EPA, or an authorized representative of the Director, copies of records required to be kept by this permit.

5. Scheduled Maintenance/Malfunction Reporting

Any scheduled maintenance of air pollution control equipment shall be performed in accordance with paragraph (A) of OAC rule 3745-15-06. The malfunction of any emissions units or any associated air pollution control system(s) shall be reported to the appropriate Ohio EPA District Office or local air agency in accordance with paragraph (B) of OAC rule 3745-15-06. Except as provided in that rule, any scheduled maintenance or malfunction necessitating the shutdown or bypassing of any air pollution control system(s) shall be accompanied by the shutdown of the emissions unit(s) that is (are) served by such control system(s).

6. Permit Transfers

Any transferee of this permit shall assume the responsibilities of the prior permit holder. The appropriate Ohio EPA District Office or local air agency must be notified in writing of any transfer of this permit.

7. Air Pollution Nuisance

The air contaminants emitted by the emissions units covered by this permit shall not cause a public nuisance, in violation of OAC rule 3745-15-07.

8. Termination of Permit to Install

This Permit to Install shall terminate within eighteen months of the effective date of the Permit to Install if the owner or operator has not undertaken a continuing program of installation or modification or has not entered into a binding contractual obligation to undertake and complete within a reasonable time a continuing program of installation or modification. This deadline may be extended by up to 12 months if application is made to the Director within a reasonable time before the termination date and the party shows good cause for any such extension.

9. Construction of New Sources(s)

The proposed emissions unit(s) shall be constructed in strict accordance with the plans and application submitted for this permit to the Director of the Ohio Environmental Protection Agency. There may be no deviation from the approved plans without the express, written approval of the Agency. Any deviations from the approved plans or the above conditions

may lead to such sanctions and penalties as provided under Ohio law. Approval of these plans does not constitute an assurance that the proposed facilities will operate in compliance with all Ohio laws and regulations. Additional facilities shall be installed upon orders of the Ohio Environmental Protection Agency if the proposed sources cannot meet the requirements of this permit or cannot meet applicable standards.

If the construction of the proposed emissions unit(s) has already begun or has been completed prior to the date the Director of the Environmental Protection Agency approves the permit application and plans, the approval does not constitute expressed or implied assurance that the proposed facility has been constructed in accordance with the approved plans. The action of beginning and/or completing construction prior to obtaining the Director's approval constitutes a violation of OAC rule 3745-31-02. Furthermore, issuance of the Permit to Install does not constitute an assurance that the proposed source will operate in compliance with all Ohio laws and regulations. Approval of the plans in any case is not to be construed as an approval of the facility as constructed and/or completed. Moreover, issuance of the Permit to Install is not to be construed as a waiver of any rights that the Ohio Environmental Protection Agency (or other persons) may have against the applicant for starting construction prior to the effective date of the permit. Additional facilities shall be installed upon orders of the Ohio Environmental Protection Agency if the proposed facilities cannot meet the requirements of this permit or cannot meet applicable standards.

10. Public Disclosure

The facility is hereby notified that this permit, and all agency records concerning the operation of this permitted source, are subject to public disclosure in accordance with OAC rule 3745-49-03.

11. Applicability

This Permit To Install is applicable only to the emissions unit(s) identified in the Permit To Install. Separate Permit To Install for the installation or modification of any other emissions unit(s) are required for any emissions unit for which a Permit To Install is required.

12. Best Available Technology

As specified in OAC Rule 3745-31-05, all new sources must employ Best Available Technology (BAT). Compliance with the terms and conditions of this permit will fulfill this requirement.

13. Source Operation and Operating Permit Requirements After Completion of Construction

This facility is permitted to operate each source described by this Permit to Install for a period of up to one year from the date the source commenced operation. This permission to operate is granted only if the facility complies with all requirements contained in this

permit and all applicable air pollution laws, regulations, and policies. Pursuant to OAC Chapter 3745-35, the permittee shall submit a complete operating permit application within ninety (90) days after commencing operation of the emissions unit(s) covered by this permit.

14. Construction Compliance Certification

The applicant shall provide Ohio EPA with a written certification (see enclosed form) that the facility has been constructed in accordance with the Permit to Install application and the terms and conditions of the Permit to Install. The certification shall be provided to Ohio EPA upon completion of construction but prior to startup of the source.

15. Fees

The permittee shall pay fees to the Director of the Ohio EPA in accordance with ORC section 3745.11 and OAC Chapter 3745-78. The permittee shall pay all applicable Permit to Install fees within 30 days after the issuance of this Permit to Install.

B. Permit to Install Summary of Allowable Emissions

The following information summarizes the total allowable emissions, by pollutant, based on the individual allowable emissions of each air contaminant source identified in this permit.

SUMMARY (for informational purposes only)
TOTAL PERMIT TO INSTALL ALLOWABLE EMISSIONS

<u>Pollutant</u>	<u>Tons Per Year</u>
OC	80.0
Individual HAP	9.9
Combined HAPs	24.9

PART II - SPECIAL TERMS AND CONDITIONS FOR SPECIFIC EMISSIONS UNIT(S)

A. Applicable Emissions Limitations and/or Control Requirements

1. The specific operations(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
K002 - Paint Spray Room. Modification of PTI number 03-7954 issued on December 7, 1994, to combine the activities from emissions unit K001 to K002, increasing the allowable Organic Compound (OC) limitation in booth K002 due to the shutting down of emissions unit K001.	OAC rule 3745-31-05 (A) (3) OAC rule 3745-31-05 (C)	44.31 pounds (lbs) Organic Compounds (OC)/hour (hr) (includes coating and cleanup operations) See section A.2.a. 80.0 tons OC per rolling, 12-month period (includes coating and cleanup operations) See section A.2.b 9.9 tons per rolling, 12- month period for any individual Hazardous Air Pollutant (HAP) and 24.9 tons per rolling, 12- month period for any combination of HAPs for emission unit K002
	OAC rule 3745-21-09 (U) (1) (c)	See section A.2.c 3.5 pounds Volatile Organic Compounds (VOCs) per gallon, excluding water and exempt solvents, for an extreme performance coating

2. Additional Terms and Conditions

- 2.a** The requirements of this rule include compliance with the requirements of OAC rule 3745-31-05 (C) and OAC rule 3745-21-09 (U) (1) (c).
- 2.b** The emissions of OC from emissions unit K002 shall not exceed 80.0 tons per year based on a rolling, 12- month summation of the monthly emissions. The federally enforceable OC limitation is based on a coating usage restriction (See B.1) and a maximum coating VOC content of 3.5 lbs/gallon established by OAC rule 3745-21-09 (U) (1) (c). Federally enforceable OC limitations are being established for the purpose of avoiding Title V applicability. For purposes of federal enforceability a restriction on OC emissions effectively limits VOC emissions.
- 2.c** HAP emissions from emissions unit K002 shall not exceed 9.9 tons per year for any individual HAP and 24.9 tons per year for any combination of HAPs, based on a rolling, 12 - month summation of the monthly HAP emissions. Federally enforceable HAP limitations are being established for the purpose of avoiding Title V and MACT applicability.

B. Operational Restrictions

- 1. The maximum rolling 12-month usage rate of OC containing materials for emissions unit K002 is limited by the following equation:

$$\sum_{M=1}^{12} \sum_n [(U_n)(C_n)(1\text{ton}/2000 \text{ lbs})] \leq 80.0$$

Where,

- M = the increment of the rolling 12-month period;
- n = the increment of the OC containing material during the period;
- U_n = total amount of the individual OC containing material, in gallons.
- C_n = OC content for the individual OC containing material in pounds per gallon

To ensure enforceability during the first 12 calendar months of operation under the provisions of this permit, the permittee shall not exceed the usage restrictions in the following table:

Month	$\sum (U_n)(C_n)(1\text{ton}/2000 \text{ lbs})$ is less than or equal to
1	10.0 tons
1-2	20.0 tons
1-3	40.0 tons

1-4	60.0 tons
1-12	80.0 tons

After the first 12 calendar months of operation under the provisions of this permit, compliance with the annual usage restriction shall be based upon a rolling, 12-month summation.

- HAP emissions from emissions unit K002 shall not exceed 9.9 tons of any individual HAP and 24.9 tons for any combination of HAPs, based upon a rolling, 12-month summation of the monthly HAP emissions.

Federally enforceable HAP limitations are being established for purposes of avoiding Title V applicability.

To ensure federal enforceability during the first 12 calendar months of operation, the permittee shall not exceed the HAP emission rates specified in the following table:

Maximum Allowable Cumulative HAP Emission Rates (tons)

Month(s)	Individual HAP	Combined HAPs
1	0.8	2.1
1-2	1.7	4.2
1-3	2.5	6.2
1-4	3.3	8.3
1-5	4.1	10.4
1-6	5	12.5
1-7	5.8	14.5
1-8	6.6	16.6
1-9	7.4	18.7
1-10	8.3	20.8
1-11	9.1	22.8
1-12	9.9	24.9

After the first 12 calendar months of operation, compliance with the annual HAP emission limitations shall be based upon a rolling, 12-month summation of the monthly HAP emission rates.

C. Monitoring and/or Recordkeeping Requirements

1. The permittee shall collect and record the following information each month for emissions unit K002:
 - a. the company name and identification for each coating and cleanup material employed;
 - b. the OC content of each coating and cleanup material, as applied, in lbs/gallon;
 - c. the VOC content of each coating (excluding water and exempt solvents), in lbs/gallon, as applied [the VOC content shall be calculated in accordance with the equation specified in paragraph (B) (8) of OAC rule 3745-21-10 for $C_{VOC,2}$];
 - d. the number of gallons of each coating and cleanup material employed;
 - e. The OC emissions for each individual OC containing material processed, in tons/month, calculated as follows:

$$E_n = [(U_n)(C_n)(1\text{ton}/2000\text{ lbs})]$$

E_n = OC emissions from an individual OC containing material

U_n = total throughput of the individual OC containing material, in gallons

C_n = OC content for the individual OC containing material in lbs OC per gallon

- f. The total OC emission rate of all aggregate processed, in tons/month, calculated as follows:

$$E_M = E_1 + E_2 + E_3 + \dots + E_n$$

Where:

E_M = Monthly OC emissions, in tons/month; and,

E_n = OC emissions from each individual OC containing material (C.1.b)

- g. The rolling, 12-month OC emission rate calculated as follows:

$$E_T = E_{M1} + E_{M2} + E_{M3} + \dots + E_{M12}$$

Where:

E_T = Annual OC emissions (tons) as summed from the previous 12 months of monthly OC emissions;

E_M = Monthly OC emissions (tons/month).

- h. during the first 12 calendar months of operation under this permit, the cumulative year-to-date OC emissions

- * The company may calculate OC emissions from cleanup operations in accordance with the following formula if waste cleanup materials are sent off-site for reclamation/disposal

OC emissions from cleanup operations = (total gallons of cleanup material used x solvent density of cleanup material) - (total gallons cleanup material sent off-site for disposal or reclamation [minus solids content of said material] x solvent density.

- 2. The permittee shall collect and record the following information regarding HAP emissions each month for emission unit K002:
 - a. the company identification of each coating and cleanup material employed;
 - b. the lbs per gallon of each HAP in each coating and cleanup material, as applied;
 - c. the number of gallons of each coating and cleanup material employed;
 - d. the total emission rate for each HAP from all coatings and cleanup materials employed, [summation of each HAP emission rate ("b" x "c") for each individual coating/cleanup material], in lbs/month;
 - e. the total HAP emission rate for the combination of all HAPs from all coatings and cleanup materials employed, (sum of "d" for all HAPs) in lbs/month;
 - f. for the first 12 months of operation, the cumulative monthly emission rate of each individual HAP and the combination of all HAPs, in tons per month; and
 - g. after the first 12 months of operation, the annual emissions of each HAP and the combination of all HAPs, based upon a rolling 12-month summation.

D. Reporting Requirements

- 1. The permittee shall submit deviation (excursion) reports for emissions unit K002 which identify exceedances of any of the following:

- a. any exceedances of the maximum emission limitations for each HAP and total combined HAPs specified in paragraph A.2.c. of this permit;
- b. any exceedances of the 80.0 tons including (coating and cleanup materials) OC per rolling, 12-month period
- c. any exceedances of the rolling 12-month usage rate for OC containing material
- d. any exceedances of the cumulative first 12 calendar months of any OC containing material as specified in paragraph B.1 of this permit.

The permittee shall submit these deviation (excursion) reports in accordance with the General Terms and Conditions of this permit.

2. The permittee shall notify the Director (the appropriate Ohio EPA District Office or local air agency) in writing of any monthly record showing the use of noncomplying coatings. The notification shall include a copy of such record and shall be sent to the Director (the appropriate Ohio EPA District Office or local air agency) within 30 days following the end of the calendar month.

E. Testing Requirements

1. Compliance with the emission limitations in section A.1 of the terms and conditions of this permit shall be determined in accordance with the following methods:

- a. Emission Limitation:
44.31 lbs OC/hr

Applicable Compliance Method:

The hourly OC emission limitation is based on the emission unit's potential to emit*. Therefore, no recordkeeping, deviation reporting, or compliance method calculations are required to demonstrate compliance.

*The potential to emit for this emissions unit was based on a maximum hourly coating usage of 12.66 gallons and a maximum OC content of 3.5 pounds per gallon.

- b. Emission Limitation:
80.0 tons of OC/year (including coating and cleanup operations)

Applicable Compliance Method:

Compliance shall be based upon the record keeping requirements as specified in C.1.

- c. Emission Limitation:
9.9 tons per rolling, 12-month period for any individual HAP and 24.9 tons per rolling 12-month period for any combination of HAPs for emissions unit K002.

Applicable Compliance Method

Compliance shall be based upon the record keeping requirements as specified in C.2.

F. Miscellaneous Requirements

1. Pursuant to Engineering guide #69, modeling to demonstrate compliance with the Ohio EPA's Air Toxic Policy was not necessary since the modification resulted in an annual emissions increase of less than 1 ton for each toxic compound. OAC Chapter 3745-31 requires permittee to apply for and obtain a new or modified permit to install prior to making a "modification" as defined by OAC rule 3745-31-01. The permittee is hereby advised that changes in the composition of the materials, or use of new materials, that would result in an increase in emissions of any pollutant that has listed TLV to above 1.0 ton per year may require the permittee to apply for and obtain a new permit to install.
2. The following terms and conditions are federally enforceable: A.1 through E.1.c.
