PWS ID: OH1100312 PWS Name: SPRING MEADOWS CARE CENTER

PWS Type: Community Ground Water Population Served: 94

DISTRIBUTION ID: DS1 **Sample Monitoring Point: DS000**

Effective Date: 1/1/07

THIS SCHEDULE DOES NOT INCLUDE ALL MONITORING REQUIREMENTS FOR YOUR SYSTEM.

Contact your district office to review additional monitoring for coliform, monthly operating parameters, and/or other monitoring requirements not included on this schedule. For water emergencies that occur after hours, please call 800-282-9378

Chemicals	Monitoring Requirements	Sample Date
TOTAL CHLORINE (1000)	Sample in the distribution system *	
TOTAL HALOACETIC ACIDS (HAA5) (2456) TOTAL TRIHALOMETHANES (TTHM) (2950)	Not Required	
COPPER (1022) LEAD (1030)	5 Sample(s) between 6/1/2007 to 9/30/2007	

Disinfectants and Disinfection Byproducts Sampling Information

TTHM and HAA5 sample(s) should be collected from point(s) in the distribution system where the water age is the oldest. Use MR000 as the sample monitoring point. If your system is also required to collect TTHM and HAA5 samples from other locations in your distribution system, use RD000 as the sample monitoring point. Any questions concerning this schedule or the Disinfectants and Disinfection Byproducts Rule can be directed to Sarah Byerly of the Ohio EPA DDAGW Central Office at (614) 644-2752. Your district office representative is also available to provide assistance.

Multiple wells drawing water from a single aquifer may be considered one treatment plant for determining the number of TTHM and HAA5 samples required, with approval from Ohio EPA.

* Total chlorine samples are collected in the distribution system at the same time and place as total coliforms are sampled.

** One sample for Chlorite at each of the following locations: near the first customer, at a location representative of the average residence time, and at a location reflecting maximum residence time of the water in the distribution system.

Asbestos Sampling Information

Collect one sample at a tap served by asbestos-cement pipe. The sample monitoring point (smp) code is DS000. Due to limited Laboratory capacity and a 48 hour filtering requirement, contact your lab early in the monitoring period to schedule a sampling date.

Any questions concerning this schedule or the Disinfectants and Disinfection Byproducts Rule can be directed to Sarah Byerly of the Ohio EPA DDAGW Central Office at (614) 644-2752. Your district office representative is also available to provide assistance.

Multiple wells drawing water from a single aquifer may be considered one treatment plant for determining the number of TTHM and HAA5 samples required, with approval from Ohio EPA.

* Total chlorine samples are collected in the distribution system at the same time and place as total coliforms are sampled.

** One sample for Chlorite at each of the following locations: near the first customer, at a location representative of the average residence time, and at a location reflecting maximum residence time of the water in the distribution system.

Asbestos Sampling Information

Collect one sample at a tap served by asbestos-cement pipe. The sample monitoring point (smp) code is DS000. Due to limited Laboratory capacity and a 48 hour filtering requirement, contact your lab early in the monitoring period to schedule a sampling date.
