Integrated Report Assessment Category: 3 Priority: Scheduled Monitoring: 2012

A small amount of data were collected in this watershed, but there are not enough sampling locations to do a complete assessment. The last major Ohio EPA survey done within this watershed was in 1982. Only one biological reference site has been sampled since then. Conotton Creek is currently listed on the 303(d) list, but data from 1982 are not adequate to justify keeping it on the list. Another survey of this stream is needed to reassess the status.
