**Fish Consumption Assessment**

**Integrated Report Assessment Category: 3      Priority:      Scheduled Monitoring: 2005**

A small amount of data were collected in this watershed, but there are not enough sampling locations to do a complete assessment. The only recent biological sampling done have been at reference sites. Fish tissue data were collected in 2000. The vast majority of the data in this watershed are from 1983. Cross Creek, and a tributary to Dry Fork are currently listed on the 303(d) list, but data from 1983 are not adequate to justify keeping them on the list. Another survey of these
