

Ohio EPA Swova Hosting Information

demo environment for review

Date: March 17, 2010

Revised: June 11, 2010

Swova has setup a demo environment for you to test ArcSDE connections and a sample edit environment on one of our existing servers. This demo environment is for the Ohio EPA to evaluate the Swova hosting environment to make a decision on hosting their production and test servers with Swova. Please find the connection information below:

Three Tier Connections:

Server: 38.100.242.70

Service: 5151

Database: sde

Direct Connections:

Server: 38.100.242.70

Service: sde:sqlserver: 38.100.242.70

Database: sde

ArcGIS Desktop User Logins:

Login	Password	Version
editor1	editor\$1	SDEDBO.Edit
viewer	viewer	SDE.Default

Web Application Demo:

- Web application sample: we have also set up a demo web application with the data that you mentioned in your earlier email and we downloaded from your FTP site. Please note that the demo web application is connected to the data in our SDE database that you can demo editing. Here is the URL for the demo web application with your data:
 - <http://admin.swova.com/ohioepa>
 - You can use the sample project search to enter a project name. Once a result is returned, right click to zoom to it.
 - Keep in mind there has been no customization on this application for scale controls for the zoom in and zoom out. The zoom control is inheriting from the ESRI basemaps and will zoom to the world at the outer most extent and in beyond the map ESRI map data at the inner most scale.
