OHIO EPA ISSUES REVISED POLICY - CLOSURE PLAN REVIEW
GUIDANCE FOR RCRA FACILITIES

On June 15, 2005, DHWM issued its revised policy titled *Closure Plan Review Guidance for RCRA Facilities (CPRG)*. Facility owners and/or operators may also find it helpful in preparing closure plans for DHWM review.

A draft version of the CPRG was issued on June 30, 2004. Public comment was requested on the draft version, and after receiving the comments further revisions were made. A responsiveness summary, which addresses all public comments made, is also being issued with the final version of the 2005 CPRG. The policy and the responsiveness summary are available either by accessing the DHWM's web page at <http://www.epa.state.oh.us/dhwm/guidancedocs.html> or by requesting a paper copy from Jeri Savelle at (614) 644-2944.

PUBLIC NOTICE
OHIO EPA ISSUES FINAL RENEWAL HAZARDOUS WASTE PERMIT

On June 17, 2005, Ohio EPA issued a final renewal hazardous waste facility installation and operation permit (Permit) to Safety-Kleen Systems, Inc., Hebron Recycle Center, for its facility at 581 Milliken Drive SE, Hebron, Ohio 43025. The EPA Identification Number for this facility is OHD980587364.

Why does Safety-Kleen Systems, Inc. need a Permit?

Safety-Kleen Systems, Inc. (Safety-Kleen) recycles a variety of spent solvents and solvent-contaminated waste waters for beneficial reuse/recovery. Safety-Kleen stores these solvents and waste waters in tanks and containers prior to recycling. To store the hazardous wastes, Safety-Kleen needs a Permit. The final renewal Permit contains the conditions under which the facility must operate. To issue this final renewal Permit, Ohio EPA determined that the Permit application is complete and meets appropriate standards and that the applicant has a history of compliance with relevant environmental laws, given the potential for harm to the public health and safety and the environment that could result from the irresponsible operation of the facility. The renewal Permit will allow Safety-Kleen to continue to store hazardous waste in the designated areas and will require Safety-Kleen to investigate and, if necessary, clean up any contamination from hazardous wastes or constituents that may be at the facility. Details about this final action can be viewed on Ohio EPA's website under Stakeholders Involvement at <http://web.epa.state.oh.us/dhwm/>

Can I appeal this permit?

Yes, if you are an officer of an agency of the state or of a political subdivision, acting in a representative capacity, or any person who would be aggrieved or adversely affected by this Permit, you have the right to appeal this permit decision to the Environmental Review Appeals Commission (ERAC).

If I decide to appeal this final renewal Permit, how and when must I make the appeal?

If you file an appeal, you must put it in writing no later than July 18, 2005. Your appeal must explain why you are appealing the action and the grounds you are using for your appeal. You must file your appeal, according to Ohio Revised Code § §3745.04 and 3745.07, with ERAC at the following address: **Environmental Review Appeals Commission**, 309 South Fourth Street, Room 222, Columbus, Ohio 43215. You must send a copy of the appeal to the director of Ohio EPA at the following address no later than three (3) days after you file it with ERAC: **Joseph P. Koncelik Director of Ohio EPA**, P.O. Box 1049, Columbus, Ohio 43216-1049.

As required by the Antidegradation Rule, three alternatives have been submitted for the project. The applicant's preferred alternative, if approved, would result in nine open cut stream crossings of 30 feet of impact each for a total stream impact of 270 feet. The applicant's minimal degradation alternative, if approved, would result in eight crossings tunneled beneath the stream and one open cut stream crossing for a total stream impact of 30 feet. The applicant's non-degradation alternative would have no direct impacts to water resources. The application was submitted by Montgomery County, Department of Sanitary Engineering, 1850 Spaulding Road, Kettering, Ohio 45432-3732. The project is located from McEwen Road south of Alexandersville-Bellbrook Road to the intersection of Zengel Drive and Mimosa Drive in Centerville, and rear lots on Rossmore, Washington Township, Montgomery County, Ohio. The discharges from the activity, if approved, would result in degradation to, or lowering of, the water quality in the watershed of Holes Creek in the Great Miami River basin (05080002). The review of the application will be conducted, and a decision whether to grant or deny the application will be made, in accordance with Chapters 3745-1 and 3745-32 of the Ohio Administrative Code (OAC). In accordance with OAC 3745-1-05, an antidegradation review of the application will be conducted before deciding whether to allow a lowering of the water quality. Other alternatives resulting in lesser or no degradation, or lowering of water quality, will be considered by Ohio EPA during the review process.

No exclusions or waivers, as outlined by Paragraph 3745-1-05 (D) of the Antidegradation Rule (effective as of May 1, 1998), apply or may be granted by the Director of Ohio EPA.
