**PUBLIC NOTICE OHCO00002
NPDES Construction Storm Water Located within Portion of the Olentangy River
Watershed General Permit Renewal**

On the basis of staff review and application of standards and regulations, on February 20, 2014, the Director of the Ohio Environmental Protection Agency will issue a draft alternative general permit renewal for the regulation of Storm Water Discharges Associated with Construction Activity Located within Portions of the Olentangy River Watershed. The draft permit will be issued as a final action unless the Director revises the draft after consideration of the record of a public hearing or written comments, or upon disapproval by the Administrator of the U.S. Environmental Protection Agency. Any person may submit comments on the draft permit and administrative record.

The NPDES alternative general permit for storm water discharges associated with construction activity located within portions of the Olentangy River watershed (Permit No. OHCO00002) is the second generation of this general permit. The permit would cover portions of the Olentangy River watershed, identified by 14-digit Hydrologic Unit Codes (HUC-14), and would authorize storm water discharges from construction activity disturbing one or more acres. Also, the permit would authorize some discharges that are not entirely storm water (such as trench dewatering), as well as storm water discharges from on-site concrete and asphalt batch plants. The permit identifies who can apply to be covered, how an entity obtains coverage and how a permittee terminates coverage. The permit contains requirements for permittees to prepare, submit for approval and implement storm water pollution prevention plans (SWP3s). The SWP3 is the permittee's plan to minimize contamination of storm water that will be discharged to surface waters from the site. The permit also contains riparian setback requirements with mitigation options if intrusions within delineated setbacks are necessary.

The public notice, associated fact sheet and general permit may be viewed over the internet at <http://epa.ohio.gov/dsw/storm/index.aspx>. Copies are also available for inspection at the Ohio Environmental Protection Agency-Central Office, Division of Surface Water, 50 West Town Street, Suite 700, Columbus, Ohio between the hours of 8:00 A.M. and 5:00 P.M., Monday through Friday. Copies may also be obtained by contacting Michael Joseph at 614-752-0782 or via email at michael.joseph@epa.ohio.gov.

The processing of this general permit and associated Notices of Intent for coverage is and will be done, respectively, in accordance with Ohio's antidegradation rule, Ohio Administrative Code (OAC) 3745-1-05, and NPDES general permit rules, OAC 3745-38.

An Ohio EPA public hearing to accept comments on the draft general permit has been scheduled for 3:00 pm on April 9, 2014.
