Contact Person

The contact person for the Avon Police Department Building located at 36784 Detroit Road is _____.

The contact person shall be responsible for the required site inspections, reporting changes in status to the storm water manager and assisting the storm water manager in the implantation, maintenance and revision of the SWPPP.

The contact person shall attend storm water meetings that relate to this and other facilities under the direction of the storm water manager.

Facility Inventory

Spills and Leaks

Releases from employees and impounded vehicles
(parking lot)

Facility Best Management Practices (BMPs)

- a) Excess or spilled salt in parking lot be swept and picked up for proper disposal.
- b) Parking lot swept and properly disposed of debris.
- c) Scrap materials and waste stored in an enclosed dumpster with the lid closed.
- d) Washing of machinery or vehicles shall be done were the conveying system is intercepted by the oil / water separator.
- e) Informational and educational material shall be available to the public in an area open and accessible to the public.
- f) Impounded vehicles stored away from the drainage systems such as yard drains and roadway ditches. Allow for visual inspection of fluid leaks around the vehicle.

Spill Response Plan

- 1) When an oil, grease, fuel or hazardous substance spill occurs within the Avon Police Department premises, (inside or outside the building), immediately locate and detain the spill.
- 2) Protect all drains from the spill entering the conveying system.
- 3) Use the “spill kit” to contain and absorb the spill.
- 4) For spills that are five (5) gallons or more, use the “spill kit” and immediately report the spill to the Avon Fire Department.
